**GENERAL INFORMATION**

---

Nomura Funds Ireland Plc (the “Fund”) is structured as an open-ended umbrella investment company with variable capital, incorporated under the laws of Ireland on 13th April, 2006 as a public limited company pursuant to the Companies Act 2014. The Fund has been authorised by the Central Bank of Ireland (the “Central Bank”) pursuant to the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the “Central Bank UCITS Regulations”). The Fund commenced operations on 18th December, 2006.

The Fund has segregated liability between its Sub-Funds (the “Sub-Funds”) and accordingly any liability incurred on behalf of or attributable to any Sub-Fund shall be discharged solely out of the assets of that Sub-Fund. The Sub-Funds are set out below:

- Nomura Funds Ireland - India Equity Fund
- Nomura Funds Ireland - Japan Strategic Value Fund
- Nomura Funds Ireland - US High Yield Bond Fund

**GENERAL INFORMATION (CONTINUED)**

---

**Nomura Funds Ireland - India Equity Fund**

The investment objective of the Nomura Funds Ireland - India Equity Fund (the “Sub-Fund”) is to achieve long-term capital growth through investment in an actively managed portfolio of Indian securities.

The Sub-Fund invests, under normal market conditions, primarily in equity and equity-related securities listed or traded on a recognised exchange in India. The Sub-Fund may invest in equity and equity-related securities listed or traded on any recognised exchange outside India provided that the business activities of the issuers of such securities are in India. The Sub-Fund may also hold exposure to India through investment in such instruments as American Depositary Receipts (“ADRs”) and Global Depositary Receipts (“GDRs”) and which may be listed on any recognised exchange outside India.

It is anticipated that the Sub-Fund will invest across the entire range of capitalisations (from small cap to large cap).

The Sub-Fund is considered to be actively managed in reference to the MSCI India Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. However, the Index is not used to define the portfolio composition of the Sub-Fund or as a performance target and the Sub-Fund may be wholly invested in securities which are not constituents of the Benchmark.

**Nomura Funds Ireland - NEWS Emerging Markets Small Cap Equity Fund**

The Nomura Funds Ireland - NEWS Emerging Markets Small Cap Equity Fund was fully redeemed on 27th June, 2014 but the Central Bank has not withdrawn its approval yet.

As at 31st December, 2024, the Sub-Fund held three illiquid positions in its portfolio – Inepar SA Industria e Construcoes, China Lumena New Materials Corp, China Metal Recycling Holdings Ltd. The Sub-Fund had a cash balance of USD 11,037 at the financial year end.

**Nomura Funds Ireland - Japan Strategic Value Fund**

The investment objective of the Nomura Funds Ireland - Japan Strategic Value Fund (the “Sub-Fund”) is to achieve long-term capital growth through investment in a portfolio of Japanese equity securities.

The Sub-Fund invests, under normal market conditions, primarily in equity and equity-related securities listed or traded on a recognised exchange in Japan. The Sub-Fund may invest up to 30% of its net assets in equity and equity-related securities listed or traded on any recognised exchange outside Japan, provided that the business activities of the issuers of such securities are in Japan. It is anticipated that the Sub-Fund will invest across the entire range of capitalisations (from small cap to large cap).

The Sub-Fund seeks to identify equity and equity-related securities, whose valuations are, in the opinion of the Sub-Investment Manager, low in comparison to assets and profitability, and which may be expected to rise in the future. In addition to these valuation opportunities, the Sub-Fund seeks investments based on other strategic features as detailed below:

- a) equity and equity-related securities where changes to financial conditions, such as changes in operations, strategy and dividend and share buy-back policies, are expected;
- b) equity and equity-related securities where potential for growth has been identified, including improved results and increasing market share, as new business operations are developed and the underlying economy improves; and
- c) equity and equity-related securities relating to companies that have been identified as candidates for business restructuring, corporate governance reform or attractive merger and acquisition opportunities.

The Sub-Fund is considered to be actively managed in reference to the TOPIX Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. However, the Index is not used to define the portfolio composition of the Sub-Fund or as a performance target and the Sub-Fund may be wholly invested in securities which are not constituents of the Benchmark.

The Sub-Fund is managed so as to maintain a near fully invested position, other than during periods where the Investment Manager believes that a larger cash position is warranted.

**GENERAL INFORMATION (CONTINUED)**

---

**Nomura Funds Ireland - US High Yield Bond Fund**

The investment objective of the Nomura Funds Ireland - US High Yield Bond Fund (the “Sub-Fund”) is to achieve current yield and capital gains, through investment in a diversified portfolio of primarily high yielding US Dollar denominated debt and debt-related securities issued principally by companies in the United States and Canada.

The Sub-Fund may invest in debt and debt-related securities issued by United States or non-United States corporations, limited liability companies or limited partnerships and other forms of enterprise.

The Sub-Fund may hold equity and equity-related securities that it receives in connection with its ownership of certain debt and debt-related securities, such as defaulted high yield securities in the course of reorganisation which are subsequently converted into equity and equity-related securities.

Under normal circumstances, the Sub-Fund invests at least 80% of its net assets in debt and debt-related securities that are rated below investment grade by at least one rating agency or are unrated.

No more than 30% of the Sub-Fund’s net assets may be invested in debt and debt-related securities with a rating of lower than B3/B- by both Moody’s and S&P, respectively or which are deemed to be of equivalent quality by the Investment Manager.

The Sub-Fund may invest up to 25% of its net assets in debt and debt-related securities issued by companies, governments or governmental agencies in countries other than the United States or Canada.

No more than 5% of the Sub-Fund’s net assets may be invested in the debt and debt-related securities of any one issuer and no more than 25% of the Sub-Fund’s net assets may be invested in debt and debt-related securities in any one industry. The Sub-Fund may invest up to 20% of its net assets in debt and debt-related securities not denominated in US Dollar.

The Sub-Fund is considered to be actively managed in reference to the ICE Bank of America Merrill Lynch US High Yield Constrained Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund’s securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

A change in Index proposed by the Directors will be subject to shareholder approval and disclosure in a revised supplement for the Sub-Fund.

**Nomura Funds Ireland - Japan High Conviction Fund**

The investment objective of the Nomura Funds Ireland - Japan High Conviction Fund (the “Sub-Fund”) is to achieve long-term capital growth through investment in a concentrated, actively managed portfolio of Japanese equity securities.

The Sub-Fund shall invest, under normal market conditions, primarily in equity and equity-related securities listed or traded on a recognised exchange in Japan.

The Sub-Fund may invest up to 20% of its net assets in equity and equity-related securities listed or traded on any recognised exchange outside Japan, provided that the business activities of the issuers of such securities are in Japan. It is anticipated that the Sub-Fund will invest across the entire range of capitalisations (from small cap to large cap).

The Sub-Fund is considered to be actively managed in reference to the TOPIX Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. However, the Index is not used to define the portfolio composition of the Sub-Fund or as a performance target and the Sub-Fund may be wholly invested in securities which are not constituents of the Benchmark.

Investors should note that due to the highly concentrated nature of the portfolio, the Sub-Fund is likely to have a high annualised volatility.

**GENERAL INFORMATION (CONTINUED)**

---

**Nomura Funds Ireland - Asia Ex Japan High Conviction Fund**

The investment objective of the Nomura Funds Ireland - Asia Ex Japan High Conviction Fund (the “Sub-Fund”) is to achieve long-term capital growth through investment in a concentrated, actively managed portfolio of Asian (excluding Japan) equity securities.

The Sub-Fund shall invest, under normal market conditions, primarily in equity and equity-related securities listed or traded on a recognised exchange in the countries covered by the MSCI All Country Asia Ex Japan Index (the “Index Countries”).

The Sub-Fund may invest up to 30% of its net assets in equity and equity-related securities listed or traded on any recognised exchange in non-Index Countries, provided that the business activities of the issuers of such securities are in the Index Countries.

The Sub-Fund may also hold exposure to the Index Countries through investment in such instruments as American Depositary Receipts (“ADRs”), Global Depositary Receipts (“GDRs”) or Non-Voting Depositary Receipts (“NVDRs”) and which may be listed on any recognised exchange in a non-Index Country. It is anticipated that the Sub-Fund will invest across the entire range of capitalisations (from small cap to large cap).

The Fund is considered to be actively managed in reference to the MSCI All Country Asia Ex Japan Index (total return with net dividends reinvested) (the “Benchmark”) by virtue of the fact that it seeks to outperform the Benchmark. While certain of the Fund’s securities may be components of and may have similar weightings to the Benchmark, the Investment Manager will use its discretion to invest in securities or sectors not included in the Benchmark in order to take advantage of investment opportunities. The investment strategy does not restrict the extent to which the Fund’s holdings may deviate from the Benchmark and deviations may be material. This is likely to increase the extent to which the Fund can outperform or underperform the Benchmark.

Investors should note that due to the general nature of Asian markets, and the highly concentrated nature of the portfolio, the Sub-Fund is likely to have a high annualised volatility.

**Nomura Funds Ireland - Global Sustainable High Yield Bond Fund**

The investment objective of the Nomura Funds Ireland - Global Sustainable High Yield Bond Fund (the “Sub-Fund”) is sustainable investment to achieve current yield and capital gains through investment in a diversified portfolio of primarily high yielding debt and debt-related securities issued in the United States or major Eurobond developed markets.

The Sub-Fund shall invest in a diversified portfolio of primarily high yielding debt and debt-related securities issued in developed markets principally by companies, which are listed or traded on a recognised exchange and which constitute sustainable investments. Investors should note that high yielding securities generally have a high volatility.

The Sub-Fund may invest in debt and debt-related securities issued by corporations, limited liability companies or limited partnerships, other forms of enterprise and in sovereign and quasi-sovereign debt and debt-related securities.

The Sub-Fund may hold equity and equity-related securities, which may or may not be listed or traded on a recognised exchange, that it receives or purchases in connection with its ownership of certain debt and debt-related securities, such as defaulted high yield securities in the course of reorganisation which are subsequently converted into equity and equity-related securities.

Under normal circumstances, the Sub-Fund will invest at least 80% of its net assets in debt and debt-related securities that are rated below investment grade by at least one rating agency or are unrated. No more than 30% of the Sub-Fund’s net assets may be invested in debt and debt-related securities with a rating lower than B3/B - by both Moody’s and S&P, respectively or which are deemed to be of equivalent quality by the Investment Manager.

Subject to Section 2.1 of Appendix 1 to the Prospectus, the Sub-Fund may invest up to 10% of its net assets in loans, loan participations and/or loan assignments, which constitute transferable securities or money market instruments.

No more than 5% of the Sub-Fund’s net assets may be invested in the debt and debt-related securities of any one issuer and no more than 25% of the Sub-Fund’s net assets may be invested in debt and debt-related securities in any one industry (as defined by reference to ICE BofA Level 4 Industry Classification which comprises a detailed sector classification for constituents of the ICE BofA global fixed income universe).

The Sub-Fund is considered to be actively managed in reference to the ICE BofA Developed Markets High Yield Constrained (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund’s securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

The Sub-Fund seeks to achieve its sustainable investment objective by investing in debt and debt-related securities of issuers that contribute to the sustainable development of society and/or the environment and which also provide attractive return.

**GENERAL INFORMATION (CONTINUED)**

---

**Nomura Funds Ireland - Global Sustainable High Yield Bond Fund (continued)**

The Sub-Fund may also employ spot foreign exchange transactions, forward foreign exchange contracts and currency futures to seek to hedge the foreign exchange exposure of the assets of the Sub-Fund from the impact of fluctuations in the relevant exchange rates.

**Nomura Funds Ireland - Global Dynamic Bond Fund**

The investment objective of the Nomura Funds Ireland - Global Dynamic Bond Fund (the “Sub-Fund”) is to provide a combination of income and growth through investing principally in debt and debt-related securities with fixed or variable rates of income.

The Sub-Fund shall invest principally in debt and debt-related securities with fixed or variable (linked to inflation or other indices) rates of income, issued by corporations, limited liability companies, limited partnerships, sovereign, government agencies, supranational or other issuers, which are listed or traded on recognised exchanges. In addition to direct investment in debt and debt-related securities, the Sub-Fund may also gain exposure to debt and debt-related securities indirectly through investment in financial derivative instruments.

There are no geographical restrictions as to the debt and debt-related securities that may be held, but a maximum of 30% of the Net Asset Value of the Sub-Fund may be invested in debt and debt-related securities of emerging market issuers.

The Sub-Fund may invest either in investment grade or sub-investment grade debt and debt-related securities, which have been rated as such by at least one rating agency (either Standard & Poor’s or Moody’s). The Sub-Fund may also invest up to 30% of its Net Asset Value in unrated securities (which are not rated by a rating agency), if the Investment Manager determines that the security is of comparable quality to a rated security that the Sub-Fund may purchase.

Subject to Section 2.1 of Appendix 1 to the Prospectus, the Sub-Fund may invest up to 10% of its net assets in loans, loan participations and/or loan assignments, which constitute transferable securities or money market instruments.

With the exception of equity options and equity index options no investment shall be made in equity securities provided, however, that equity securities up to 10% of the Net Asset Value may be held as a result of investments in preferred securities, which have equity/warrant characteristics or as a result of acquisitions of equity securities upon conversion or exercise of convertible bonds.

The Sub-Fund is actively managed without reference to any benchmark meaning that the Investment Manager has full discretion over the composition of the Sub-Fund’s portfolio, subject to the stated investment objectives and policies of the Sub-Fund.

**Nomura Funds Ireland - Emerging Market Local Currency Debt Fund**

The investment objective of the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund (the “Sub-Fund”) is to generate a total return through a combination of capital gains and income gains.

The Sub-Fund seeks to achieve its objective principally by investing in local currency denominated emerging debt and debt-related securities and derivative instruments comprising forward currency contracts, non-deliverable forward contracts (“NDFs”), futures, interest rate swaps, cross currency swaps, credit default swaps, FX options and interest rate options. The Sub-Fund may, without limitation, also invest in non-local currency denominated emerging debt and debt-related securities and non-emerging debt and debt-related securities.

The Sub-Fund may invest in debt and debt-related securities issued by corporations, limited liability companies or limited partnerships and other forms of enterprise, and in sovereign, quasi-sovereign and supranational bonds which are listed or traded on a recognised exchange.

The Sub-Fund will not invest in debt and debt-related securities rated below B3 or B- by Moody’s or S&P respectively. If any debt and debt-related securities are downgraded, then they will be held within the portfolio until upgraded, or disposed of within 6 months, if not upgraded. The Sub-Fund may purchase unrated securities (which are not rated by a rating agency) if the Investment Manager determines that the security is of comparable quality to a rated security that the Sub-Fund may purchase. Unrated securities may be less liquid than comparable rated securities and involve the risk that the Investment Manager may not accurately evaluate the security’s comparative credit rating.

With the exception of options on equity index futures and options on equity indices as detailed further in the Prospectus, no investment shall be made in equity securities provided, however, equity securities up to 10% of the Net Asset Value may be held as a result of investments in hybrid preferred securities which have equity/warrant characteristics or as a result of acquisitions of equity securities upon conversion or exercise of convertible bonds or upon allotments to the bondholders.

**GENERAL INFORMATION (CONTINUED)**

---

**Nomura Funds Ireland - Emerging Market Local Currency Debt Fund (continued)**

The Sub-Fund is considered to be actively managed in reference to the JPMorgan GBI-EM Global Diversified Composite Unhedged USD Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund’s securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate materially from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

**Nomura Funds Ireland - Asia High Yield Bond Fund**

The investment objective of the Nomura Funds Ireland - Asia High Yield Bond Fund (the “Sub-Fund”) is to generate income and capital growth through investing primarily in a diversified portfolio of primarily high yielding debt and debt-related securities in Asia.

The Sub-Fund shall invest primarily in a diversified portfolio of high yielding debt and debt-related securities issued in countries covered by the Index (the “Index Countries”) or issued in other countries provided that the business activities of the issuers of such securities are in the Index countries as defined above.

The Sub-Fund may invest in debt and debt-related securities issued by corporations, financial institutions, limited liability companies or limited partnerships, other forms of enterprise and in sovereign and quasi-sovereign debt and debt-related securities, which are listed on recognised exchanges.

Under normal circumstances, the Sub-Fund will invest at least 80% of its net assets in debt and debt-related securities that are rated below investment grade by at least one rating agency or are unrated. From time to time, the Sub-Fund may invest in investment grade debt and debt-related securities provided that no more than 20% of the Sub-Fund’s net assets may be invested in non-benchmark debt and debt-related securities which are rated as investment grade. The Sub-Fund will take a higher rating of either Standard & Poor’s or Moody’s when determining a rating constraint. Investors should note that high yielding debt and debt-related securities which are rated non-investment grade and/or unrated will generally have a high volatility.

The Sub-Fund may hold equity and equity-related Securities that it receives in connection with its ownership of certain debt and debt-related securities, such as defaulted securities in the course of reorganisation which are subsequently converted into equity and equity-related securities. While certain debt and debt-related securities (i.e. convertible bonds) and equity and equity-related securities (i.e. convertible shares) may embed a derivative component (such as an option, which would give the holder the option to buy the underlying asset at a predetermined price), they will not embed any leverage.

The Sub-Fund shall primarily consist of securities denominated in US Dollar as well as the various Asian currencies included of the Index countries.

The Sub-Fund is considered to be actively managed in reference to the J.P. Morgan Asia Credit Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund’s securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

**Nomura Funds Ireland - Asia Investment Grade Bond Fund**

The investment objective of the Nomura Funds Ireland - Asia Investment Grade Bond Fund (the “Sub-Fund”) is to generate income and capital growth by investing firstly in a diversified portfolio of primarily investment grade debt and debt-related securities in Asia.

The Sub-Fund shall invest primarily in a diversified portfolio of investment grade debt and debt-related securities issued in the countries covered by the J.P. Morgan Asia Credit Index (JACI) Investment Grade Index (the “Index Countries”) or issued in other countries provided that the business activities of the issuers of such securities are in the Index countries, as defined above.

The Sub-Fund may invest in debt and debt-related securities issued by corporations, financial institutions, limited liability companies or limited partnerships, other forms of enterprise and in sovereign and quasi-sovereign debt and debt-related securities, which are listed or traded on recognised exchanges.

Under normal circumstances, the Sub-Fund will invest at least 80% of its net assets in investment grade debt and debt-related securities. Investors should note that investment grade debt and debt-related securities may be subject to ratings downgrades by the rating agencies during the holding period of the debt and debt-related securities. In the instance of one or more downgrades to below investment grade or otherwise, the Sub-Fund may continue to hold such securities. Such downgrades might affect the Net Asset Value of the Sub-Fund.

**GENERAL INFORMATION (CONTINUED)**

---

**Nomura Funds Ireland - Asia Investment Grade Bond Fund (continued)**

No more than 30% of the Sub-Fund's net assets may be invested in debt and debt-related securities which have a rating of below investment grade or are unrated. The Sub-Fund will take a higher rating of either Standard & Poor's or Moody's when determining a rating constraint.

The Sub-Fund shall primarily consist of debt and debt-related securities denominated in US Dollar as well as the various Asian currencies included in the Index countries.

The Sub-Fund may hold equity and equity-related securities that it receives in connection with its ownership of certain debt and debt-related securities, such as defaulted securities in the course of reorganisation which are subsequently converted into equity and equity-related securities.

While certain debt and debt-related securities (i.e. convertible bonds) and equity and equity-related securities (i.e. convertible shares) may embed a derivative component (such as an option, which would give the holder the option to buy the underlying asset at a predetermined price), they will not embed any leverage.

The Sub-Fund is considered to be actively managed in reference to the J.P. Morgan Asia Credit Index (the "Index") by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund's securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

**Nomura Funds Ireland - China Fund**

The investment objective of the Nomura Funds Ireland - China Fund (the "Sub-Fund") is to achieve long-term capital growth through investment in an actively managed portfolio of Chinese securities.

The Sub-Fund shall invest, under normal market conditions, primarily in equity and equity-related securities of companies listed or traded on recognised exchanges in the People's Republic of China ("PRC"), comprising Hong Kong Special Administrative Region ("SAR"). The Sub-Fund may also invest in equity and equity-related securities listed or traded on any recognised exchange outside the PRC, provided that the companies issuing such securities carry out a significant part of their business activities in the PRC. The Sub-Fund may also hold exposure to China through investment in such instruments as American Depositary Receipts ("ADRs") and Global Depositary Receipts ("GDRs") and which may be listed on any recognised exchange outside China.

It is anticipated that the Sub-Fund will invest across the entire range of capitalisations (from small cap to large cap).

The Sub-Fund may also invest in "A" shares of companies in the PRC. "A" Shares of companies in the PRC are shares denominated in Renminbi (the official currency of the PRC) and issued by companies in the PRC and listed on PRC stock exchanges.

The Sub-Fund may also invest from time to time in debt and debt-related securities issued by corporations, financial institutions, limited liability companies or limited partnerships, other forms of enterprise and in sovereign and quasi-sovereign debt and debt-related securities, which are listed or traded on a recognised exchange. Such debt and debt-related securities will be rated investment grade (BBB) by at least one rating agency (either Standard & Poor's or Moody's).

While certain debt and debt-related securities (i.e. convertible bonds) and equity and equity-related securities (i.e. convertible shares) may embed a derivative component (such as an option, which would give the holder the option to buy the underlying asset at a predetermined price), they will not embed any leverage.

The Sub-Fund is considered to be actively managed in reference to the MSCI China Index (the "Index") by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund's securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

**GENERAL INFORMATION (CONTINUED)**

---

**Nomura Funds Ireland - Global High Conviction Fund**

The investment objective of the Nomura Funds Ireland - Global High Conviction Fund (the “Sub-Fund”) is to achieve long-term capital growth through investment in a concentrated, actively managed portfolio of global equity securities.

The Sub-Fund shall invest, under normal market conditions, primarily (at least 65% of net assets) in equity and equity-related securities listed or traded on a recognised exchange in the countries covered by the MSCI All Country World Net Total Return Index (the “Index Countries”).

The Sub-Fund may also invest from time to time in equity and equity-related securities listed or traded on a recognised exchange in a Non-Index Country, when market opportunities so arise.

The Sub-Fund may also hold exposure to Index and Non-Index Countries through investment in such instruments as American Depositary Receipts (“ADRs”), Global Depositary Receipts (“GDRs”), Non-Voting Depositary Receipts (“NVDRs”) or PNotes (as further described in Section 8 of the Supplement of the Prospectus) and which will be listed on a recognised exchange.

The Sub-Fund may invest in equity and equity-related securities (such as convertible securities) with embedded derivative instruments. While these securities may embed a derivative element, (such as an option, which would give the holder the option to buy the underlying asset at a predetermined price), they will not embed any leverage.

It is anticipated that the Sub-Fund will invest on a long-only basis across a range of capitalisations but generally this will be from medium cap to high cap. There is no particular industry / sector focus to the Sub-Fund’s investments.

The Sub-Fund will be highly concentrated in that it will own approximately 20 stocks and aims to generate a higher excess return than is available from a more diversified portfolio. Investors should note that due to the highly concentrated nature of the portfolio, the Sub-Fund is likely to have a higher annualised absolute volatility than a more diversified portfolio. Annualised volatility can be described as the distribution of periodic returns recalculated in such a way to show the level of volatility as if over a one year period. A more concentrated portfolio is likely to experience higher volatility of returns than a less concentrated portfolio as the impact on portfolio returns from the movement in one holding will, by definition, be higher when the weight of that holding within the portfolio is higher.

The Sub-Fund is considered to be actively managed in reference to the MSCI All Country World Net Total Return Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund’s securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate materially from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

**Nomura Funds Ireland - European High Yield Bond Fund**

The investment objective of the Nomura Funds Ireland - European High Yield Bond Fund (the “Sub-Fund”) is to achieve current yield and capital gains, through investment primarily in a diversified portfolio of debt and debt-related securities rated below investment grade and issued in European currencies.

Such debt and debt-related securities shall be issued by European and Non-European issuers such as corporations, limited liability companies and/or limited partnerships. The Sub-Fund may also invest in debt and debt-related securities issued by emerging market issuers such as corporations, limited liability companies and/or limited partnerships, if these are determined to be suitable by the Investment Manager.

The Sub-Fund may hold equity and equity-related securities, which are listed or traded on a recognised exchange, that it receives or acquires in connection with its ownership of certain debt and debt-related securities, such as defaulted high yield securities in the course of reorganisation which are subsequently converted into equity and equity-related securities.

Under normal circumstances, the Sub-Fund will invest at least 80% of its net assets in debt and debt-related securities that are rated between BB and CCC. The minimum rating for securities at purchase is CCC- and D.

No more than 5% of the Sub-Fund’s net assets may be invested in the debt and debt-related securities of any one issuer and no more than 25% of the Sub-Fund’s net assets may be invested in debt and debt-related securities in any one industry sector.

The Sub-Fund is considered to be actively managed in reference to the ICE Bank of America Merrill Lynch European Currency High Yield Constrained Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund’s securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

**GENERAL INFORMATION (CONTINUED)**

---

**Nomura Funds Ireland - Global Sustainable Equity Fund**

The investment objective of the Nomura Funds Ireland – Global Sustainable Equity Fund (the “Sub-Fund”) is to achieve long-term capital growth through investment in a relatively concentrated, actively managed portfolio of global equity securities issued by companies with a high overall positive impact on society.

The Sub-Fund shall invest, under normal market conditions, primarily in equity and equity-related securities listed or traded on a recognised exchange in the countries covered by the MSCI All Country World Net Total Return Index (the “Index Countries”).

The Sub-Fund may also invest from time to time in equity and equity-related securities listed or traded on any recognised exchange in non-Index Countries, if suitable investments are identified which meet the investment strategy of the Investment Manager.

The Sub-Fund may also hold exposure to Index and non-Index Countries through investment in such instruments as American Depositary Receipts (“ADRs”), Global Depositary Receipts (“GDRs”), Non-Voting Depositary Receipts (“NVDRs”) or PNotes (as further described in Section 8 of the Supplement) and which will be listed on a recognised exchange.

The Sub-Fund may invest in equity and equity-related securities (such as convertible securities) with embedded derivative instruments. While these securities may embed a derivative element, (such as an option, which would give the holder the option to buy the underlying asset at a predetermined price), they will not embed any leverage.

Investors should note that due to the relatively concentrated nature of the Sub-Fund, the Sub-Fund is likely to have a higher annualised volatility than a more diversified portfolio.

The Sub-Fund is considered to be actively managed in reference to the MSCI All Country World Net Total Return Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund’s securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate materially from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

The strategy focuses on investing in businesses that provide a positive impact on the sustainable development of society. The Investment Manager defines such companies as follows: a) companies that create high total value which is shared among all stakeholders in both monetary and non-monetary terms; b) companies that demonstrate ethical business practices (i.e. they follow proper business policies and practices regarding such issues as corporate governance, bribery, discrimination, corporate social responsibility and fiduciary responsibilities) in respect of all employees, supply chain and customers alike; c) companies that actively demonstrate socially responsible corporate governance and engage with the wider community, which is assessed by a combination of external research and data, and an internal assessment of any strengths and weaknesses of engagements conducted by the Investment Manager’s analyst team.

The Sub-Fund may hold up to 10% of net assets in debt and debt-related securities, which are listed or traded on debt and debt-related securities, that it receives or purchases in connection with its ownership of certain equity and equity-related securities and accordingly, holding such debt and debt-related securities will be as a result of investment in equity and equity-related securities. This occurs in circumstances where the Sub-Fund has purchased equity and equity-related securities which have subsequently been subject to a corporate action which results in the issuance of debt and debt-related securities. These debt and debt-related securities are held by the Sub-Fund until they can be sold at a price which the Investment Manager believes reflects the underlying value of the security. Such debt and debt-related securities will be issued by corporations, limited liability companies or limited partnerships, other forms of enterprise (such as state owned enterprises) and sovereign and quasi-sovereign entities and may be rated either investment grade or non-investment grade by at least one rating agency (such as Moody’s, Standard & Poor’s, Fitch or Rating and Investment Information Inc.).

The Sub-Fund may invest up to 30% of net assets in emerging market countries at any given time.

The Sub-Fund may invest up to 10% of net assets in Russian markets provided that the Sub-Fund will only invest in securities that are listed / traded on the Moscow Exchange.

**GENERAL INFORMATION (CONTINUED)**

---

**American Century Global Small Cap Equity Fund**

The investment objective of the American Century Global Small Cap Equity Fund (the “Sub-Fund”) is to achieve long-term capital growth through investment in an actively managed portfolio of equity and equity-related securities issued by small capitalisation companies in both developed and emerging countries.

The Investment Manager will invest primarily in companies within the MSCI ACWI Small Cap Index (the “Index”) or other companies whose capitalisation is no greater than that of the largest company within the Index at the time of investment.

The Sub-Fund shall invest in countries world-wide, including both developed and emerging markets. The Sub-Fund shall invest, under normal market conditions, at least 40% (unless the Investment Manager deems market conditions to be detrimental to the performance of the Sub-Fund, in which case the Sub-Fund would invest at least 30%) of its assets in equity and equity-related securities of issuers located outside of the United States. The Sub-Fund will allocate its assets among at least three different countries.

The Sub-Fund may invest in equity and equity-related securities denominated in both US Dollar and other currencies.

The Sub-Fund may also hold exposure through investment in such instruments as American Depositary Receipts (“ADRs”), Global Depositary Receipts (“GDRs”) or Non-Voting Depositary Receipts (“NVDRs”) (as further described in Section 8 of the Supplement of the Prospectus) and which will be listed on a recognised exchange.

The Sub-Fund is considered to be actively managed in reference to the Index by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund’s securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

The Sub-Fund will be managed so as to maintain a near fully invested position in equity and equity-related securities, other than during periods where the Investment Manager believes that a larger cash position is warranted.

In the event of exceptional market or economic conditions, the Sub-Fund may also invest up to 10% of net assets in debt and debt-related securities, whether rated investment grade or non-investment grade, comprising notes, bonds, convertible bonds, preferred securities, zero coupon, pay-in-kind or deferred payment securities, variable and floating rate instruments, issued by governments, governmental agencies or corporates.

The Sub-Fund may also invest up to 10% in other collective investment schemes including equity exchange-traded funds. Any investment in exchange-traded funds will be in accordance with the investment limits for investment in transferable securities and collective investment schemes as appropriate and as set out in Appendix I to the Prospectus.

**American Century Global Growth Equity Fund**

The investment objective of the American Century Global Growth Equity Fund (the “Sub-Fund”) is to achieve long-term capital growth through investment in an actively managed portfolio of global equity and equity-related securities.

The Sub-Fund shall invest, under normal market conditions, primarily (at least 65% of net assets) in equity and equity-related securities of issuers located in the countries covered by the MSCI All Country World Net Total Return Index (the “Index Countries”) and which are listed or traded on a recognised exchange.

The Sub-Fund may also invest from time to time in equity and equity-related securities of issuers located in Non-Index Countries, if suitable investments are identified which meet the investment strategy of the Investment Manager.

The Sub-Fund may invest in equity and equity-related securities of companies located in emerging market countries.

The Sub-Fund may also hold exposure to Index and Non-Index Countries through investment in such instruments as American Depositary Receipts (“ADRs”), Global Depositary Receipts (“GDRs”) or Non-Voting Depositary Receipts (“NVDRs”) (as further described in Section 8 of the Supplement of the Prospectus) and which will be listed on a recognised exchange.

The Sub-Fund is considered to be actively managed in reference to the MSCI All Country World Net Total Return Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund’s securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

**GENERAL INFORMATION (CONTINUED)**

---

**American Century Global Growth Equity Fund (continued)**

The Sub-Fund will be managed so as to maintain a near fully invested position in equity and equity-related securities, other than during periods where the Investment Manager believes that a larger cash position is warranted.

The Sub-Fund may also, in accordance with the investment powers and restrictions set out in Appendix I of the Prospectus, use derivatives for efficient portfolio management and /or hedging purposes.

**American Century Concentrated Global Growth Equity Fund**

The investment objective of the American Century Concentrated Global Growth Equity Fund (the “Sub-Fund”) is to achieve long-term capital growth through investment in a concentrated, actively managed portfolio of global equity and equity-related securities.

The Sub-Fund shall invest, under normal market conditions, primarily (at least 65% of net assets) in equity and equity-related securities of approximately 30 to 50 different issuers located in the countries covered by the MSCI All Country World Net Total Return Index (the “Index Countries”) and which are listed on a recognised exchange.

The Sub-Fund may also invest from time to time in equity and equity-related securities of issuers located in Non-Index Countries, if suitable investments are identified which meet the investment strategy of the Investment Manager.

The Sub-Fund may invest in equity and equity-related securities of companies located in emerging market countries.

The Sub-Fund may also hold exposure to Index and Non-Index Countries through investment in such instruments as American Depositary Receipts (“ADRs”), Global Depositary Receipts (“GDRs”) or Non-Voting Depositary Receipts (“NVDRs”) (as further described in Section 8 of the Supplement of the Prospectus) and which will be listed on a recognised exchange.

The Sub-Fund will be managed so as to maintain a near fully invested position in equity and equity-related securities, other than during periods where the Investment Manager believes that a larger cash position is warranted.

The Sub-Fund is considered to be actively managed in reference to the MSCI All Country World Net Total Return Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund’s securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

The Sub-Fund may also, in accordance with the investment powers and restrictions set out in Appendix I of the Prospectus, use derivatives for efficient portfolio management and /or hedging purposes.

**American Century Emerging Markets Equity Fund**

The investment objective of the American Century Emerging Markets Equity Fund (the “Sub-Fund”) is to achieve long-term capital growth through investment in an actively managed portfolio of emerging market equity securities.

The Sub-Fund will invest at least 80% of its assets in equity and equity-related securities of companies located in the countries covered by the MSCI Emerging Markets (Net) Index (the “Index Countries”) and which are listed or traded on a recognised exchange. The Sub-Fund may invest up to 20% of net assets in equity and equity-related securities listed or traded on any recognised exchange in non-Index Countries, if suitable investments are identified which meet the investment strategy of the Investment Manager. The Sub-Fund may also hold exposure to the Index Countries through investment in such instruments as American Depositary Receipts (“ADRs”), Global Depositary Receipts (“GDRs”) or Non-Voting Depositary Receipts (“NVDRs”) and which may be listed on any recognised exchange in a non-Index Country.

Shareholders should note that the Sub-Fund's exposure may also include Chinese A shares traded via Shanghai Hong Kong Stock Connect or Shenzhen Hong Kong Stock Connect. Chinese A shares are renminbi-denominated A shares of companies domiciled in mainland China; these are traded on Chinese stock exchanges such as the Shanghai Stock Exchange and the Shenzhen Stock Exchange.

The Sub-Fund is considered to be actively managed in reference to the MSCI Emerging Markets (Net) Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund’s securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

**GENERAL INFORMATION (CONTINUED)**

---

**American Century Emerging Markets Equity Fund (continued)**

The Sub-Fund will be managed so as to maintain a near fully invested position in equity and equity-related securities, other than during periods where the Investment Manager believes that a larger cash position is warranted.

The Sub-Fund may also, in accordance with the investment powers and restrictions set out in Appendix I of the Prospectus, use derivatives for efficient portfolio management and /or hedging purposes.

**Nomura Funds Ireland - Global Multi-Theme Equity Fund**

The investment objective of the Nomura Funds Ireland - Global Multi-Theme Equity Fund (the “Sub-Fund”) is to achieve medium to long-term capital appreciation through investment in an actively managed portfolio of global equity securities.

The Sub-Fund shall invest, under normal market conditions, primarily in equity and equity-related securities listed or traded on a recognised exchange in Index Countries.

The Sub-Fund may also invest from time to time less than 20% of net asset value in equity and equity-related securities listed or traded on any recognised exchange in non-Index Countries, if suitable investments are identified which meet the investment strategy of the Investment Manager.

The Sub-Fund may also hold exposure to Index and non-Index Countries through investment in such instruments as American Depositary Receipts (“ADRs”), Global Depositary Receipts (“GDRs”), Non-Voting Depositary Receipts (“NVDRs”) or PNotes and which will be listed on a recognised exchange.

Up to 10% of the Net Asset Value of the Sub-Fund may be invested, in aggregate, in collective investment schemes. The Sub-Fund will invest in such instruments when such investment is consistent with the Sub-Fund’s primary investment objective.

The Sub-Fund may also invest in equity and equity-related securities (such as convertible preferred shares) with embedded derivative instruments. While these securities may embed a derivative element, (such as an option, which would give the holder the option to convert the preferred shares into a fixed number of common shares), they will not embed any leverage.

The Sub-Fund may hold up to 10% of net assets in debt and debt-related securities, which are listed or traded on recognised exchanges, that it receives or purchases in connection with its ownership of certain equity and equity-related securities and accordingly, holding such debt and debt-related securities will be as a result of investment in equity and equity-related securities. This occurs in circumstances where the Sub-Fund has purchased equity and equity-related securities which have subsequently been subject to a corporate action which results in the issuance of debt and debt-related securities. These debt and debt-related securities are held by the Sub-Fund until they can be sold at a price which the Investment Manager believes reflects the underlying value of the security.

Such debt and debt-related securities may be issued by corporations, limited liability companies or limited partnerships, state owned enterprises and sovereign and quasi-sovereign entities and may be rated either investment grade or non-investment grade by at least one rating agency (such as Moody’s, Standard & Poor’s, Fitch or Rating and Investment Information, Inc.).

The Sub-Fund may invest up to 10% of net assets in Russian markets provided that the Sub-Fund will only invest in securities that are listed /traded on the Moscow Exchange.

The Sub-Fund is considered to be actively managed in reference to the MSCI All Country World Net Total Return Index (the “Index”). Certain of the Sub-Fund’s securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager will use its discretion to invest in companies or sectors not included in the Index.

**GENERAL INFORMATION (CONTINUED)**

---

**Nomura Funds Ireland - Japan Small Cap Equity Fund**

The investment objective of the Nomura Funds Ireland – Japan Small Cap Equity Fund (“Sub-Fund”) is to achieve long-term capital growth through investment in an actively managed portfolio of equity and equity-related securities of small capitalisation companies in Japan.

The Sub-Fund shall invest primarily in equity and equity-related securities of small capitalization companies that are listed or traded on a recognised exchange in Japan.

The Sub-Fund may invest up to 20% of its net assets in equity and equity-related securities of small capitalisation companies that are listed or traded on any recognised exchange outside Japan, provided that the business activities of the issuers of such securities are in Japan.

The Investment Manager considers small capitalisation companies to be those that have a market capitalisation of less than JPY 1 trillion at the time of investment.

The Sub-Fund will be managed so as to maintain a near fully invested position in equity and equity-related securities, other than during periods where the Investment Manager believes that a larger cash position is warranted. Examples are situations such as financial crisis where the Investment Manager expects large redemption from shareholders and/or the Investment Manager deems it appropriate to reduce market exposure in the face of deteriorating market condition.

The Sub-Fund may also invest in equity and equity-related securities (such as convertible preferred shares) with embedded derivative instruments. While these securities may embed a derivative element, (such as an option, which would give the holder the option to convert the preferred shares into a fixed number of common shares), they will not embed any leverage.

Up to 10% of the Net Asset Value of the Sub-Fund may be invested, in aggregate, in collective investment schemes, including Exchange Traded Funds (“ETFs”). The Sub-Fund will invest in such schemes when such investment is consistent with the Sub-Fund’s primary investment objective.

Up to 10% of the net asset value of the Sub-Fund may be invested in real estate investment trusts (“REITs”).

The Sub-Fund is actively managed in reference to the Russell/Nomura Small Cap Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. However, the Index is not used to define the portfolio composition of the Sub-Fund or as a performance target and the Sub-Fund may be wholly invested in securities which are not constituents of the Benchmark.

**American Century Emerging Markets Sustainable Impact Equity Fund**

The investment objective of the American Century Emerging Markets Sustainable Impact Equity Fund (“Sub-Fund”) is to achieve long-term capital growth through investment in an actively managed portfolio of emerging market equity securities issued by companies that create a positive social and/or environmental impact.

The Sub-Fund will invest at least 80% of its assets in equity and equity-related securities of companies located in Index Countries and which are listed or traded on a recognised exchange, whose products or behaviour, in the opinion of the Investment Manager, have a positive social and/or environmental impact. The Sub-Fund may invest up to 20% of net assets in equity and equity-related securities listed or traded on any recognised exchange in non-Index Countries, if suitable investments are identified which meet the investment strategy of the Investment Manager. The Sub-Fund may also hold exposure to the Index Countries through investment in such instruments as American Depositary Receipts (“ADRs”), Global Depositary Receipts (“GDRs”) or Non-Voting Depositary Receipts (“NVDRs”) and which may be listed on any recognised exchange in a non-Index Country.

Shareholders should note that the Sub-Fund's exposure may also include Chinese A shares traded via Shanghai Hong Kong Stock Connect or Shenzhen Hong Kong Stock Connect. Chinese A shares are renminbi-denominated A shares of companies domiciled in mainland China; these are traded on Chinese stock exchanges such as the Shanghai Stock Exchange and the Shenzhen Stock Exchange.

The Sub-Fund will be managed so as to maintain a near fully invested position in equity and equity-related securities, other than during periods where the Investment Manager believes that a larger cash position is warranted.

**GENERAL INFORMATION (CONTINUED)**

---

**American Century Emerging Markets Sustainable Impact Equity Fund (continued)**

In order to achieve its investment objective described in the Prospectus, the Sub-Fund will invest principally in sustainable investments which are defined as those investments that contribute to an environmental or social objective, provided that such investments do not significantly harm any of those objectives and that investee companies follow good governance practices. As a result, the Investment Manager seeks to invest in companies or other organisations which have a commercial purpose of solving social or environmental problems.

In the event of exceptional market or economic conditions, the Sub-Fund may also invest up to 10% of net assets in both investment grade and non-investment grade debt and debt-related securities comprising notes (such as short term treasury notes), bonds, convertible bonds, (which may embed a derivative element but will not embed any leverage), preferred securities, (such as bonds with hybrid features and characteristics of both bonds and equities which are in general perpetual and callable, and pay fixed-rate or floating-rate dividends instead of coupons and rank higher than common stocks but lower than senior debt), zero coupon, pay-in-kind or deferred payment securities, variable and floating rate instruments (debt securities with floating coupon rates whereby the interest paid to an investor fluctuates over time with an underlying interest rate level, such as floating rate notes) issued by governments, governmental agencies or corporates.

Investment grade securities are those that have been rated in one of the four highest categories used by a nationally recognised statistical rating organisation or determined by the Investment Manager to be of comparable credit quality. Non-investment grade securities are those that have been rated below the four highest categories used by a nationally recognized statistical rating organisation, or, if not rated, determined by the Investment Manager to be of similar quality (which assessment is made by the Investment Manager reviewing the credit attributes of the issuer of the security, such as its financial strength (profitability, cash flows, liquidity, leverage etc.) business profile, management quality as well as the political, legal and regulatory environment).

The Sub-Fund may also invest up to 10% in other eligible collective investment schemes including exchange-traded funds. Any investment in exchange-traded funds will be in accordance with the investment limits for investment in transferable securities and collective investment schemes.

The Sub-Fund may engage in active trading of portfolio securities to achieve its investment objective.

The Sub-Fund may also, in accordance with the investment powers and restrictions, use financial derivative instruments for efficient portfolio management and/or hedging.

The Sub-Fund is actively managed in reference to the MSCI Emerging Markets (Net) Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund’s securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

**American Century Advanced Medical Impact Equity Fund**

The American Century Advanced Medical Impact Equity Fund (the “Sub-Fund”) was fully redeemed on 12th December, 2023, but the Central Bank has not withdrawn its approval yet.

**American Century US Focused Innovation Equity Fund**

The investment objective of the American Century US Focused Innovation Equity Fund (“Sub-Fund”) is to provide a total return that exceeds the MSCI USA Growth Index (the “Index”) through investment in a concentrated, actively managed portfolio of companies with significant long-term growth potential.

The Sub-Fund will invest primarily, under normal market conditions, in equity and equity-related securities of US companies that are listed or traded on a recognised exchange. Such US companies may be selected from the Index or from outside the Index. In addition, the Sub-Fund may also invest up to 10% in non-US companies which will be selected from outside the Index. The Investment Manager will favour stocks of early and rapid stage growth companies, which the Investment Manager believes will increase in value over time, as further set out in the investment strategy below.

The Sub-Fund may gain exposure to the Index directly or through investment in such instruments as American Depositary Receipts (“ADRs”) and Global Depositary Receipts (“GDRs”), which may be listed on any recognised exchange in a non-Index Country.

The Sub-Fund will generally invest in companies which have a market capitalisation at the date of investment of USD2 billion or greater.

---

**American Century US Focused Innovation Equity Fund (continued)**

The Sub-Fund will be managed so as to maintain a near fully invested position in equity and equity-related securities, other than during periods where the Investment Manager believes that a larger cash position is warranted.

The Sub-Fund may also invest up to 10% in other eligible collective investment schemes, including exchange-traded funds. Any investment in exchange-traded funds will be in accordance with the investment limits for investment in transferable securities and collective investment schemes.

**Nomura Funds Ireland - Japan Sustainable Equity Growth Fund**

The Japan Sustainable Equity Growth Fund (the “Sub-Fund”) was fully redeemed on 20th December, 2024, but the Central Bank has not withdrawn its approval yet.

**Nomura Funds Ireland - Japan Sustainable Equity Core Fund**

The investment objective of the Nomura Funds Ireland - Japan Sustainable Equity Core Fund (“Sub-Fund”) is sustainable investment and the Sub-Fund seeks to achieve long-term capital growth through investment in an actively managed portfolio of Japanese equity and equity-related securities, issued by companies with a high overall positive environmental and/or societal impact.

In order to achieve its objective of sustainable investment, the Sub-Fund shall invest in Japanese equity and equity-related securities, which constitute sustainable investments, as further described below.

The Sub-Fund is actively managed in reference to the TOPIX Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes.

The Investment Manager has a responsible investment philosophy of considering the environmental, social and governance (“ESG”) impact of investment decisions on all the stakeholders of the issuing company, including the environment, society, customers, suppliers, employees and investors. Within this philosophical framework, the Investment Manager has identified three Sustainable Development Goals (“SDGs”) aligned “Impact Goals,” reflecting its sustainable investment objective, to pursue over the long term. The “Impact Goals” are as follows: 1) Mitigate Climate Change, 2) Mitigate Natural Capital Depletion and 3) Promote Good Health and Well-Being. The Investment Manager will select sustainable investments which contribute directly or indirectly to achieving the “Impact Goals”. The strategy seeks to identify those companies that have the greatest positive total impact on all stakeholders of the company.

The Sub-Fund shall invest primarily in equity and equity-related securities that are listed or traded on a recognised exchange in Japan. The Sub-Fund may also invest up to 20% of its net assets in equity and equity-related securities that are listed or traded on any recognised exchange outside Japan, provided that the business activities of the issuers of such securities are in Japan.

The Sub-Fund may also invest in equity and equity-related securities (such as convertible preferred shares) with embedded derivative instruments. While these securities may embed a derivative element, (such as an option, which would give the holder the option to convert the preferred shares into a fixed number of common shares), they will not embed any leverage.

**Nomura Funds Ireland - Asia Sustainable Equity Fund**

The investment objective of the Nomura Funds Ireland - Asia Sustainable Equity Fund (“Sub-Fund”) is sustainable investment and the Sub-Fund seeks to achieve long-term capital growth through investment in an actively managed portfolio of Asian equity and equity-related securities, issued by companies with a high overall positive environmental and/or societal impact.

In order to achieve its objective of sustainable investment, the Sub-Fund shall invest in Asian equity and equity-related securities, which constitute sustainable investments, as further described below.

The Sub-Fund is actively managed in reference to the MSCI All Country Asia Pacific Ex Japan Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes.

**GENERAL INFORMATION (CONTINUED)**

---

**Nomura Funds Ireland - Asia Sustainable Equity Fund (continued)**

The Investment Manager has a responsible investment philosophy of considering the environmental, social and governance (“ESG”) impact of investment decisions on all the stakeholders of the issuing company, including the environment, society, customers, suppliers, employees and investors. Within this philosophical framework, the Investment Manager has identified six SDGs aligned “Impact Goals,” reflecting its sustainable investment objective, to pursue over the long term. The “Impact Goals” are as follows: 1) Mitigate Climate Change, 2) Mitigate Natural Capital Depletion, 3) Global Access to Basic Financial Services, 4) Global Access to Clean Drinking Water, 5) Eliminate Communicable Disease and 6) Mitigate the Obesity Epidemic. The Investment Manager will select sustainable investments which contribute directly or indirectly to achieving the “Impact Goals”. The strategy seeks to identify those companies that have the greatest positive total impact on all stakeholders of the company.

The Sub-Fund shall invest primarily in equity and equity-related securities that are listed or traded on a recognised exchange in the countries covered by the Index (the “Index Countries”). The Sub-Fund may invest up to 20% of its net assets in equity and equity-related securities that are listed or traded on any recognised exchange in non-Index countries, provided that the business activities of the issuers of such securities are in the Index countries.

The Sub-Fund may also hold exposure to the Index Countries through investment in such instruments as American Depositary Receipts (“ADRs”), Global Depositary Receipts (“GDRs”), Non-Voting Depositary Receipts (“NVDRs”) or PNotes (as further described in Section 8 of the Supplement) and which may be listed on any recognised exchange in a non-Index country. It is anticipated that the Sub-Fund will invest across the entire range of capitalisations (from small cap to large cap).

The Sub-Fund may invest in China A shares listed on the Shanghai Stock Exchange via the Shanghai Hong Kong Stock Connect scheme, or the Shenzhen Stock Exchange via the Shenzhen Hong Kong Stock Connect scheme. Such investment is expected to range generally between 5% and 15% of the Net Asset Value of the Sub-Fund but may fluctuate lower or higher than this.

Up to 10% of the Net Asset Value of the Sub-Fund may be invested in real estate investment trusts (“REITs”).

**Nomura Funds Ireland - Corporate Hybrid Bond Fund**

The investment objective of the Nomura Funds Ireland - Corporate Hybrid Bond Fund (“Sub-Fund”) is to achieve an attractive level of total return (income plus capital appreciation) through investment primarily in corporate hybrid bonds.

In order to achieve its investment objective, the Sub-Fund will invest in debt and debt-related securities, comprising primarily of corporate hybrid bonds, both investment grade and sub-investment grade that have been rated by a recognised rating agency such as Moody’s, S&P, and Fitch, which are listed or traded on global recognised exchanges.

The Sub-Fund is actively managed in reference to the ICE BofA Global Hybrid Non-Financial 5% Constrained Custom Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes.

Corporate hybrid bonds are bonds that have certain equity-like features (such as subordination risk, coupon deferral risk and extension risk). Corporate hybrid bonds are issued by non-financial corporations and generally offer a means for issuers to borrow money from investors in return for interest payments.

The Sub-Fund may also invest in other debt and debt-related securities, both investment grade and sub-investment grade that have been rated by a recognised rating agency, including fixed and floating rate debt securities, such as senior bonds, issued by governments, government related and corporate entities from OECD countries denominated in local currencies. The Sub-Fund will not invest in contingent convertible bonds.

Under normal market conditions, it is the intention of the Investment Manager to invest at least 50% of the Sub-Fund’s Net Asset Value in investment grade debt and debt-related securities. The Sub-Fund will invest a majority of its Net Asset Value in securities denominated in Euro, Sterling and/or US Dollar. The investments will be fully hedged into the base currency of the Sub-Fund through the use of forward and future contracts.

The Sub-Fund may also invest up to 10% in other eligible collective investment schemes, including exchange-traded funds (“ETFs”).

**GENERAL INFORMATION (CONTINUED)**

---

**Nomura Funds Ireland - US High Yield Bond Continuum Fund**

The investment objective of the Nomura Funds Ireland - US High Yield Bond Continuum Fund (“Sub-Fund”) is to achieve current yield and capital gains through investment in a diversified portfolio of primarily high yielding US Dollar denominated debt and debt-related securities.

The Sub-Fund is actively managed in reference to the ICE BofA US High Yield Constrained Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes.

The Sub-Fund may invest in debt and debt-related securities issued by corporates, limited liability companies or limited partnerships and other forms of enterprise and in sovereign, quasi-sovereign and supranational debt and debt-related securities.

The Sub-Fund may hold equity and equity-related securities that it receives in connection with its ownership of certain debt and debt-related securities and accordingly, holding such equity and equity-related securities will be as a result of investment in debt and debt-related securities.

Under normal circumstances, the Sub-Fund will invest at least 80% of its net assets in debt and debt-related securities that are rated below investment grade by at least one rating agency or are unrated. No more than 30% of the Sub-Fund’s net assets may be invested in debt and debt-related securities with a rating of lower than B3/B- by both Moody’s and S&P, respectively or which are deemed to be of equivalent quality by the Investment Manager.

The Sub-Fund will not invest more than 10% of its net assets in debt and debt-related securities issued by governments or governmental agencies.

No more than 5% of the Sub-Fund’s net assets may be invested in the debt and debt-related securities of any one issuer and no more than 25% of the Sub-Fund’s net assets may be invested in debt and debt-related securities in any one industry.

The Sub-Fund may invest up to 20% of its net assets in debt and debt-related securities not denominated in US Dollar.

The Sub-Fund may also invest up to 10% in eligible collective investment schemes including exchange-traded funds (“ETFs”).

**Nomura Funds Ireland - Emerging Market Corporate Bond Fund**

The investment objective of the Nomura Funds Ireland - Emerging Market Corporate Bond Fund (“Sub-Fund”) is to achieve an attractive level of total return (income plus capital appreciation) through investment in debt and debt-related securities that are economically tied to emerging market countries.

In order to achieve its investment objective, the Sub-Fund will invest primarily in debt and debt-related securities, which are listed or traded on recognised exchanges, that are economically tied to emerging market countries. In addition, a portion of the Sub-Fund’s assets may be invested in debt and debt-related securities, which are listed or traded on recognised exchanges, that are economically tied to frontier markets (i.e. emerging market countries at an earlier stage of development).

The Sub-Fund is actively managed in reference to the J.P. Morgan CEMBI Broad Diversified Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes.

The Sub-Fund may invest in debt and debt-related securities issued by corporates, limited liability companies or limited partnerships and other forms of enterprise and in sovereign, quasi-sovereign and supranational debt and debt-related securities. Under normal circumstances, the Sub-Fund will invest at least 80% of its Net Asset Value in debt and debt-related securities issued by corporate issuers that are economically tied to emerging market countries.

The Sub-Fund will principally invest in investment grade and sub-investment grade debt and debt-related securities that have been rated by a recognised rating agency such as Moody’s, S&P, and Fitch.

The securities in which the Sub-Fund invests will predominantly be denominated in hard currencies (primarily US Dollar), but may be denominated in any currency, including local currencies of emerging market countries. No more than 20% of the Sub-Fund’s Net Asset Value may be invested in non-US Dollar denominated securities.

The Sub-Fund may hold equity and equity-related securities that it receives in connection with its ownership of certain debt and debt-related securities and accordingly, holding such equity and equity-related securities will be as a result of investment in debt and debt-related securities.

The Sub-Fund may also invest up to 10% in eligible collective investment schemes including, exchange-traded funds (“ETFs”).

**GENERAL INFORMATION (CONTINUED)**

---

**Nomura Funds Ireland - China A-Shares AI Quant Strategy Fund**

The investment objective of the Nomura Funds Ireland - China A-Shares AI Quant Strategy Fund (“Sub-Fund”) is to seek to achieve long-term capital growth through investment primarily in an actively managed portfolio of China A-Shares.

The Sub-Fund is actively managed in reference to the MSCI China A Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes.

The Sub-Fund shall invest primarily in China A-Shares that are listed on the Shanghai Stock Exchange via the Shanghai Hong Kong Stock Connect scheme, or the Shenzhen Stock Exchange via the Shenzhen Hong Kong Stock Connect scheme, or through the Qualified Foreign Investor (“QFI”) scheme.

The Sub-Fund may hold up to 10% of its net assets in debt and debt-related securities in the People’s Republic of China (“PRC”) via the Bond Connect scheme. Such debt and debt-related securities will only be held as a result of investment in China A-Shares. This occurs in circumstances where the Sub-Fund has purchased China A-Shares which have subsequently been subject to a corporate action which results in the issuance of debt and debt-related securities. These debt and debt-related securities are held by the Sub-Fund until they can be sold at a price which the Investment Manager believes reflects the underlying value of the security. Such debt and debt-related securities may be issued by corporations, limited liability companies or limited partnerships, state owned enterprises and sovereign and quasi-sovereign entities and may be rated either investment grade or non-investment grade by at least one rating agency (such as Moody’s, Standard & Poor’s, Fitch or Rating and Investment Information, Inc.).

The Sub-Fund may also invest up to 10% in other eligible collective investment schemes, including exchange-traded funds. Any investment in exchange-traded funds will be in accordance with the investment limits for investment in transferable securities and collective investment schemes as appropriate and as set out in Appendix 1 to the Prospectus.

The Sub-Fund will be managed so as to maintain a near fully invested position in a portfolio of China A-Shares, other than during periods where the Investment Manager believes that a larger cash position is warranted. Examples are situations such as a financial crisis where the Investment Manager expects large redemptions from Shareholders and/or the Investment Manager deems it appropriate to reduce market exposure in the face of deteriorating market conditions. In such circumstances, the Sub-Fund may invest up to 20% of its net assets in cash.

## DIRECTORS' REPORT

---

The Directors present, herewith, their annual report and audited financial statements for Nomura Funds Ireland Plc (the "Fund") for the year ended 31st December, 2024.

The Fund is organised in the form of an umbrella fund with thirty sub-funds: the Nomura Funds Ireland - India Equity Fund, the Nomura Funds Ireland - Japan Strategic Value Fund, the Nomura Funds Ireland - US High Yield Bond Fund, the Nomura Funds Ireland - Japan High Conviction Fund, the Nomura Funds Ireland - Asia Ex Japan High Conviction Fund, the Nomura Funds Ireland - Global Sustainable High Yield Bond Fund, the Nomura Funds Ireland - Global Dynamic Bond Fund, the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund, the Nomura Funds Ireland - Asia High Yield Bond Fund, the Nomura Funds Ireland - Asia Investment Grade Bond Fund, the Nomura Funds Ireland - China Fund, the Nomura Funds Ireland - Global High Conviction Fund, the Nomura Funds Ireland - European High Yield Bond Fund, the Nomura Funds Ireland - Global Sustainable Equity Fund, the American Century Global Small Cap Equity Fund, the American Century Global Growth Equity Fund, the American Century Concentrated Global Growth Equity Fund, the American Century Emerging Markets Equity Fund, the Nomura Funds Ireland - Global Multi-Theme Equity Fund, the Nomura Funds Ireland - Japan Small Cap Equity Fund, the American Century Emerging Markets Sustainable Impact Equity Fund, the American Century Advanced Medical Impact Equity Fund, the American Century US Focused Innovation Equity Fund, the Nomura Funds Ireland - Japan Sustainable Equity Growth Fund, the Nomura Funds Ireland - Japan Sustainable Equity Core Fund, the Nomura Funds Ireland - Asia Sustainable Equity Fund, the Nomura Funds Ireland - Corporate Hybrid Bond Fund, the Nomura Funds Ireland - US High Yield Bond Continuum Fund, the Nomura Funds Ireland - Emerging Market Corporate Bond Fund and the Nomura Funds Ireland - China A-Shares AI Quant Strategy Fund (the "Sub-Funds").

### Statement of Directors' responsibilities

The Directors are responsible for preparing the annual report and the audited financial statements in accordance with applicable Irish law and International Financial Reporting Standards ("IFRS") as adopted by the European Union.

Irish company law requires the Directors to prepare financial statements for each financial year which give a true and fair view of the assets, liabilities and financial position of the Fund and of the profit or loss of the Fund for that year. In preparing the financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent; and
- state whether the financial statements have been prepared in accordance with applicable accounting standards and identify the standards in question, subject to any material departures from those standards being disclosed and explained in the notes to the financial statements; and
- prepare the financial statements on a going concern basis unless it is inappropriate to presume that the Fund will continue in business.

The Directors are responsible for keeping adequate accounting records that are sufficient to:

- correctly record and explain the transactions of the Fund;
- enable, at any time, the assets, liabilities, financial position and profit or loss of the Fund to be determined with reasonable accuracy; and
- enable the Directors to ensure that the financial statements comply with the Companies Act 2014 and enable those financial statements to be audited.

The Directors confirm that they have complied with the above requirements in preparing the financial statements.

The Directors are responsible for keeping adequate accounting records, which disclose with reasonable accuracy at any time the financial position of the Fund and enable them to ensure that the financial statements are prepared in accordance with IFRS as adopted by the European Union and comply with Irish statute comprising the Companies Act 2014, the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations") and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended). They are also responsible for safeguarding the assets of the Fund and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities. Under the Central Bank UCITS Regulations, the Directors are required to entrust the assets of the Fund to the Depositary for safekeeping. In carrying out this duty, the Fund has delegated custody of the Fund's assets to Brown Brothers Harriman Trustee Services (Ireland) Limited.

## DIRECTORS' REPORT (CONTINUED)

---

### Statement of Manager's responsibilities

The Manager is responsible for monitoring the below managerial functions:

- Operational Risk Management - monitoring of delegates so that there are appropriate effective operational risk procedures;
- Fund Risk Management - monitoring through the delegates that the Sub-Funds' risks are identified and managed;
- Investment Management - monitoring that the Investment Manager is in compliance with the approved investment approach and on an ongoing basis monitoring the investment process and performance;
- Capital and Financial Management - monitors that relevant accounting records are properly maintained and that the assets and liabilities of the Sub-Funds are valued appropriately. The Manager also ensures it is appropriately capitalised at all times;
- Regulatory Compliance - monitors that the Sub-Funds are in compliance with regulatory obligations; and
- Distribution - monitors the approved distribution.

### Accounting records

The Directors are responsible for ensuring that adequate accounting records as outlined in Section 281 to 285 of the Companies Act 2014 are maintained by the Fund. To achieve this, the Directors have appointed a service organisation Brown Brothers Harriman Fund Administration Services (Ireland) Limited (the "Administrator"). The Fund's accounting records are retained at Brown Brothers Harriman Fund Administration Services (Ireland) Limited, 30 Herbert Street, Dublin 2.

### Directors

The following Directors who held office on 31st December, 2024 or at any time during the year, under the Memorandum and Articles of Association, are not required to retire by rotation:

David Dillon – Irish  
John Walley – Irish<sup>1</sup>  
James Tucker – British (Chairman)  
Tomohisa Hanabata – Japanese  
Kenichi Suzuki – Japanese<sup>2</sup>  
Andrew Billingsley – American<sup>3</sup>

All Directors are non-executive.

<sup>1</sup> Independent Director.

<sup>2</sup> Appointed on 22nd February, 2024.

<sup>3</sup> Appointed on 21st August, 2024.

Details of Directors' fees and expenses are given in Note 15.

### Directors' and Company Secretary's interests in shares and contracts

None of the Directors, the Company Secretary or their families, hold or held, at 31st December, 2024 or during the year, any direct and indirect interest in the shares of the Fund, with the exception of James Tucker as detailed under Note 17.

### Connected Parties

Regulation 43 of the Central Bank UCITS Regulations 2019 "Restrictions of transactions with connected persons" states that "A responsible person shall ensure that any transaction between a UCITS and a connected person is conducted a) at arm's length; and b) in the best interest of the shareholders of the UCITS".

As required under UCITS Regulation 81.4, the Directors, as responsible persons are satisfied that there are in place arrangements, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43(1) are applied to all transactions with a connected party; and all transactions with a connected parties that were entered into during the financial period to which the report relates complied with the obligations that are prescribed by Regulation 43(1).

## **DIRECTORS' REPORT (CONTINUED)**

---

### **Transactions involving Directors and Secretary**

Except as noted in Note 17, there are no contracts or arrangements of any significance in relation to the business of the Fund in which the Directors or Company Secretary had any interest as defined in the Companies Act 2014 at any time during the year ended 31st December, 2024.

### **Directors' Compliance Statement**

It is the policy of the Fund to comply with its relevant obligations (as defined in the Companies Act 2014). As required by Section 225(2) of the Companies Act 2014, the Directors acknowledge that they are responsible for securing the Fund's compliance with the relevant obligations. The Directors have drawn up a compliance policy statement as defined in Section 225(3)(a) of the Companies Act 2014 and a compliance policy which refers to the arrangements and structures that are in place and which are, in the Directors' opinion, designed to secure material compliance with the Fund's relevant obligations. In discharging their responsibilities under Section 225, the Directors relied upon, among other things, the services provided, advice and/or representations from third parties whom the Directors believe have the requisite knowledge and experience in order to secure material compliance with the Fund's relevant obligations.

### **Statement of Relevant Audit Information**

The Directors in office at the date of this report have each confirmed that:

- as far as he/she is aware, there is no relevant audit information of which the Fund's auditor is unaware; and
- he/she has taken all the steps that he/she ought to have taken as a Director in order to make himself/herself aware of any relevant audit information and to establish that the Fund's auditor is aware of that information.

### **Review of business activities and future developments**

The change in the Net Asset Value of the Sub-Funds for the year in the Directors' opinion is a key indicator to the performance of the Fund, as well as to a detailed review of the business and future developments.

The Directors have directed the affairs of the Fund in accordance with the Irish Companies Act 2014. The Fund was incorporated on 13th April, 2006 and issued its Prospectus on 30th August, 2006, while an amended Prospectus was noted by the Central Bank on 24th November, 2023.

After making reasonable inquiries, the Directors have a reasonable expectation that the Fund has adequate resources to continue in operational existence for the foreseeable future. Accordingly financial statements have been prepared on a going concern basis.

### **Political donations**

There were no political donations made during the year ended 31st December, 2024 (31st December, 2023: Nil).

### **Risk management objectives and policies**

Investment in a Sub-Fund of the Fund carries with it a degree of risk including, but not limited to, the risks referred to in Note 16 of these financial statements.

### **Results for the year and assets, liabilities and financial position as at 31st December, 2024**

The Statement of Financial Position and the Statement of Comprehensive Income of the Fund are set out on pages 94 to 127.

### **Dividends**

Details of dividends declared by the Fund during the year ended 31st December, 2024 are disclosed in Note 21 of the financial statements.

### **Events during the year**

Details of the significant events during the year are disclosed in Note 24 of the financial statements.

## DIRECTORS' REPORT (CONTINUED)

---

### Events since the year end

Other than as disclosed in Note 25, up to the date of the approval of these financial statements there were no events subsequent to the year end, which, in the opinion of the Directors of the Fund, may have had an impact on the financial statements for the year ended 31st December, 2024.

### Corporate Governance Statement

#### General Principles

The Fund is obliged to comply with the requirements of the Companies Act 2014, Central Bank UCITS Regulations and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended), as applicable to the Fund.

The European Communities (Directive 2006/46/EC) Regulations (S.I. 450 of 2009 and S.I. 83 of 2010) (the "Regulations") requires the inclusion of a corporate governance statement in the Directors' Report. The Fund is subject to corporate governance practices imposed by;

- i) The Companies Act 2014 which is available for inspection at the registered office of the Fund; and may also be obtained at <http://www.irishstatutebook.ie/>;
- ii) The Articles of Association of the Fund which are available for inspection at the registered office of the Fund and at the Companies Registration Office in Ireland;
- iii) The Central Bank in their Central Bank UCITS Regulations which can be obtained from the Central Bank's website at <https://www.centralbank.ie/regulation/industry-market-sectors/funds> and are available for inspection at the registered office of the Fund; and

On 14th December, 2011, Irish Funds ("IF") published a corporate governance code ("IF Code") that may be adopted on a voluntary basis by Irish authorised collective investment schemes. The IF Code became effective from 1st January, 2012 with a twelve month transitional period until 1st January, 2013. The IF Code reflects existing corporate governance practices imposed on Irish authorised collective investment schemes, as noted above. If the IF Code is adopted on a voluntary basis, it can be referred to in the disclosures made in the Directors' Report in compliance with the provisions of the European Communities (Directive 2006/46/EC) Regulations (i.e. S.I. 450 of 2009 and S.I. 83 of 2010).

On 31st December, 2012 the Board of Directors (the "Board") voluntarily adopted the Corporate Governance Code for Irish Domiciled Collective Investment Schemes as published by the Irish Funds, as the Fund's corporate governance code.

### Internal Control and Risk Management Systems in Relation to Financial Reporting

The Directors are responsible for the oversight of the implementation and operation of the internal controls and risk management systems of the Fund in relation to the financial reporting process, by way of delegation to third parties, namely the Administrator and the Investment Manager. Such systems are designed to manage rather than eliminate the risk of error or fraud in achieving the Fund's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement or loss. The Fund has procedures in place to ensure that all relevant accounting records are properly maintained and are readily available, including production of annual and half yearly financial statements. These procedures include appointing the Administrator to maintain the accounting records of the Fund independently of the Investment Manager and the Depositary. The Administrator is authorised and regulated by the Central Bank and must comply with the rules imposed by the Central Bank. From time to time, the Board of Directors examines and evaluates the Administrator's financial accounting and reporting routines. The annual financial statements of the Fund are produced by the Administrator and reviewed by the Investment Manager. They are required to be approved by the Board and the annual and half yearly financial statements of the Fund are required to be filed with the Central Bank.

During the period of these financial statements, the Directors were responsible for the review and approval of the annual financial statements as set out in the Statement of Directors' Responsibilities. The statutory financial statements are required to be audited by independent auditors who report annually to the Directors on their findings.

The Directors monitor and evaluate the independent auditor's performance, qualifications and independence. As part of its review procedures, the Directors receive presentations from relevant parties including consideration of Irish accounting standards and their impact on the annual financial statements, and presentations and reports on the audit process.

The Directors also evaluate and discuss significant accounting and reporting issues as the need arises.

**REPORT OF THE DEPOSITARY TO THE SHAREHOLDERS**

---

We have enquired into the conduct of Nomura Funds Ireland Plc (the “Fund”) for the year ended 31st December, 2024, in our capacity as Depositary to the Fund.

This report including the opinion has been prepared for and solely for the shareholders in the Fund, in accordance with the Central Bank (Supervision and Enforcement) Act 2013 (section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (S.I. No, 430 of 2019) (the “Central Bank UCITS Regulations”) and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

A UCITS V Depositary Agreement was signed with Brown Brothers Harriman & Co., effective from 21st March, 2016. As a result, the Custodian is hereinafter referred to as the Depositary.

**Responsibilities of the Depositary**

Our duties and responsibilities are outlined in the Central Bank UCITS Regulations. One of those duties is to enquire into the conduct of the Fund in each annual accounting period and report thereon to the shareholders.

Our report shall state whether, in our opinion, the Fund has been managed in that period in accordance with the provisions of the Fund’s Memorandum and Articles of Association and the Central Bank UCITS Regulations. It is the overall responsibility of the Fund to comply with these provisions. If the Fund has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

**Basis of Depositary Opinion**

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Central Bank UCITS Regulations and to ensure that, in all material respects, the Fund has been managed:

- (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of its constitutional documentation and the appropriate regulations; and
- (ii) otherwise in accordance with the Fund’s constitutional documentation and the appropriate regulations.

**Opinion**

In our opinion, the Fund has been managed during the year, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Fund by the Memorandum & Articles of Association and by the Central Bank UCITS Regulations; and
- (ii) otherwise in accordance with the provisions of the Memorandum & Articles of Association and the Central Bank UCITS Regulations.

**NOMURA FUNDS IRELAND – INDIA EQUITY FUND**  
**INVESTMENT MANAGER’S REPORT**  
**For the year ended 31st December, 2024**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	1.62	-0.82	17.67	30.47	434.74
<b>Benchmark</b>	-2.93	-11.32	11.21	23.67	218.89
<b>Out/(Under) Performance</b>	4.55	10.50	6.46	6.80	215.85

Source BBH; % Returns in USD. Benchmark is MSCI India Index.  
 \*Since Inception date is 13th January, 2007.

**Performance Commentary**

For the year ended 31st December, 2024, the Sub-Fund recorded a return of 17.67%, compared with the benchmark return of 11.21% and therefore outperformed the benchmark by 6.46%.

Stock selection contributed majorly to our performance during the period. In particular, our overweight in Real Estate and Industrials sectors and our selected stocks (**Kaynes Technologies, Kalyan Jewellers, Jyoti CNC, Indian Hotels and Macrotech Developers**) were the largest performance contributors. Our stock selection worked perfectly in Consumer Discretionary too. In Industrial, localization of manufacturing in India and a pickup in Infrastructure cycle appear to be a multi-year positive thematic. In Real Estate, the sector remains in the midst of an upcycle. On the supply side, the sector continues to see consolidation in favour of the organized players. On the demand side, companies are reporting double digit growth in pre-sales and most markets are witnessing healthy price increases. Affordability remains at multi year lows even factoring in price increases.

In Consumer Discretionary, we exited **Tata Motor** as we booked profits – lot of what was promised on product, margins and deleveraging has played out. We added to **Swiggy** in its IPO – strong player in both food delivery and quick commerce markets in India and trading at a big discount to **Zomato**.

**Investment Outlook**

On the whole, we are positioned for an underlying revival in economic growth - with an overweight to Real Estate and Industrial. We are underweight global linked sectors such as Information Technology and Energy.

Our biggest overweight is currently to Real Estate. A series of reforms/events starting with demonetization, implementation of RERA, introduction and rationalization of GST as well as the NBFC crisis have helped organized real estate developers. Total number of registered developers have come down manifold as the sector has been consolidating. Housing inventory in top cities has come down and this has resulted in price increases. All these factors apart from improved affordability are driving housing demand in India. We believe we are at mid-stage of a property upcycle.

We have added to the Industrials sector and continue to look for opportunities to increase exposure. Localization of manufacturing in India and strong growth in Infrastructure and power capital expenditure (“capex”) appear to be a multi-year positive thematic.

Financials is now an underweight as previously mentioned. Stocks are now cheap relative to broader market and while we are conservative in the near term, there may be opportunities to add exposure ahead.

Amongst exporters, we are underweight in the IT sector given weaker than expected demand outlook. In Healthcare we are positioned in sub sectors like Hospitals with clear growth drivers. In consumer staples - we are underweight the sector but well positioned in companies with strong execution and growth runway. We are underweight Communication services but looking to add exposure.

Our philosophy around stock selection is not going to change. Our focus will remain on quality managements with good execution and governance track record and sound balance sheets. We will not go down the quality curve to chase returns as we firmly believe better quality and well managed companies compound returns better over time. This has been validated in our experience over the last few investment cycles in India.

**NOMURA FUNDS IRELAND – JAPAN STRATEGIC VALUE FUND**  
**INVESTMENT MANAGER’S REPORT (CONTINUED)**  
**For the year ended 31st December, 2024**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	2.21	2.93	19.05	66.65	330.48
<b>Benchmark</b>	4.02	5.43	20.45	50.70	301.98
<b>Out/(Under) Performance</b>	-1.81	-2.50	-1.40	15.95	28.50

*Source BBH; % Returns in JPY. Benchmark is TOPIX Index.  
\*Since Inception date is 26th August, 2009.*

**Performance Commentary**

For the year ended 31st December, 2024, the Sub-Fund recorded a return of 19.05%, compared with the benchmark return of 20.45% and therefore underperformed the benchmark by 1.40%.

During the first quarter of 2024, the TOPIX Index (total return base) rose by 18.1% in local currency terms over the quarter, while the yen depreciated by 7.4% against the US dollar (weakening from 141.0 to 151.4). The portfolio achieved a return of 20.5% (gross of fees), outperforming the TOPIX Index by 2.4% during this review period.

In terms of sector returns, the rally was led by automobile related names and other exporters that benefited from the rebound in US long-term interest rates and the subsequent weakness of the yen, as well as semiconductor-related names that continued to see an improved outlook based on growing demand related to AI. The Real Estate sector also outperformed despite the Bank of Japan’s (BOJ) decision to end the negative interest rates policy, as the central bank maintained an accommodative policy for the time being.

In terms of style, the Russell Nomura Total Value Index (RNTV) rose 22.9% over the quarter, outperforming the TOPIX Index by 4.7%. In a reversal from the previous month, rising US long-term interest rates supported the value style during the period.

In light of these conditions, the portfolio delivered a strong performance in the current quarter, outperforming the benchmark. This performance was largely attributed to stock selection results, with the rise in stock prices of holding positions in the Electric Appliances, Chemicals, and Precision Instruments sectors. Among these, semiconductor-related companies have been the primary drivers of outperformance. In addition, sector allocation contributed modestly, with an underweight position in Services (with no holdings) and overweight positions in the Banks and Real Estate sectors adding value.

Going forward into fiscal year 2024, we believe the investment environment will remain favourable for value stocks. This is because companies with low valuations and low returns on equity (ROE) are expected to increase due to improved capital efficiency as a result of market reforms initiated by the TSE. Financials should also enjoy favourable conditions as the BOJ’s monetary policy revisions are expected to continue improving the earnings environment.

For the first quarter of 2024 the TOPIX Index gained 1.7% in local currency terms over the quarter, and the yen depreciated by 6.3% against the US dollar (weakening from 151.4 to 160.9) over the quarter. The portfolio rose 1.8% (gross of fees), outperforming the TOPIX Index by 0.1%.

In May, the domestic long-term interest rates rose above 1% for the first time in 11 years, and expectations increased regarding the BOJ revising their monetary policy. As a result, the Insurance and Banks sectors advanced. The Marine Transportation sector also advanced against a backdrop of rising prices resulting from increased geopolitical risk and logistics disruptions in the market. Meanwhile, the rise in long-term interest rates weighed on the earnings outlook for the Real Estate and Land Transportation sectors. The Automobile sector also fell as a result of the conservative guidance along with the earnings announcements.

In terms of style-based performance, the RNTV rose by 2.8% over the quarter, outperforming the TOPIX Index by 1.1%. With increased expectations of interest rate hikes by the BOJ, the Financials sector’s performance was strong, and value stocks outperformed. Returns from economically sensitive sectors such as Marine Transport and Nonferrous Metals also underpinned the value style.

Over the second quarter, the portfolio slightly outperformed the benchmark. According to attribution analysis, sector allocation had a negative impact on the performance, particularly due to overweight positions in the Real Estate sector, which was adversely affected by rising interest rates. Underweight positions in the Services sector (with no holdings) as well as the Insurance sector were also contributing factors. Conversely, stock selection made a positive contribution. The rise in stock prices of holdings in the Electric Appliances and Retail Trade sectors, alongside the disappointing performance of certain heavily weighted stocks within the Transportation Equipment sector (in which the Sub-Fund is underweight) offset the negative impact from sector allocation.

**NOMURA FUNDS IRELAND – JAPAN STRATEGIC VALUE FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

---

**Performance Commentary (continued)**

Going forward, we believe that the investment environment will continue to favour the value style. Export-related sectors such as Automobiles are expected to rebound after quarterly results confirm the strength of their performance, despite suffering declines due to overly conservative guidance for the full-year based on conservative currency rate assumptions. Similarly, the Financials sector should also improve with higher long-term interest rates and increased economic intervention by the BOJ.

During the third quarter of 2024, the Japanese yen appreciated drastically against the US dollar. This was due to factors such as Donald Trump commenting that the yen was too undervalued in July, a shift in the BOJ’s stance regarding further rate hikes in August, and the Federal Reserve’s (“Fed’s”) decision to cut policy interest rates by 50 basis points in September.

Against the backdrop of the appreciating yen, Japanese equities fell due to growing concerns over deteriorating corporate earnings performance. In particular, sectors that benefit from the yen depreciating such as automobiles, machinery, and trading companies were negatively affected. Meanwhile, sectors that benefit from an appreciating yen such as Retail Trade, Construction, and Air Transportation rose. Furthermore, the Financials sector including Banks, Securities & Commodity Futures, and Insurance companies all fell after expectations for further BOJ policy rate hikes receded following the Fed’s rate cut. Comments made by the BOJ deputy governor following the market turmoil contributed as well.

In terms of style, the RNTV fell 6.8% over the quarter, underperforming the TOPIX by 1.9%. Two of the biggest detractors were the underperformance of the Financials sector, which fell on the back of expectations that the next BOJ interest rate hike would be delayed, and the underperformance of the trading companies, which priced in a stronger yen. In addition, the appreciation of domestic demand related sectors that benefit from a stronger yen, including Information & Communication and Retail Trade sectors, also led to the underperformance of the value index.

During the quarter, the portfolio’s performance slightly underperformed the benchmark. According to attribution analysis, sector allocation made a small positive contribution, particularly due to underweight position in Transport Equipment and the overweight positions in Information & Communication and Construction. Conversely, the stock selection effects had a negative impact. This was primarily due to the underperformance of semiconductor-related holdings in sectors such as Metal Products and Precision Instruments, as well as the negative impact from stock selection in the Pharmaceuticals sector.

Despite the recent underperformance by the value style, we believe the investment environment will turn favourable going forward. As wage increases and positive economic data are confirmed, we expect the BOJ to gradually normalise monetary policy, which should benefit the Financials sector. Shareholder returns will continue to be a point of focus for undervalued companies in particular, as recent market corrections could entice companies to buy back more shares while prices are attractive.

In the fourth quarter, the Financials sector benefited from the BOJ’s policy normalisation, while the Automobiles sector appreciated along with further yen depreciation and news surrounding a potential merger between Nissan and Honda Motor. Reflecting on the full year, the TOPIX Index (including dividends) returned 20.5% in 2024. Robust demand for generative AI led to outperformance by semiconductor and AI server-related names, while financial companies outperformed due to rising interest rates.

In terms of style, the RNTV rose 26.9% for the full calendar year, outperforming the TOPIX Index by 6.5%.

The portfolio underperformed relative to the benchmark index during the fourth quarter. According to attribution analysis, sector allocation had a negative impact due to the underweight position in the Transport Equipment sector, while the overweight position in the Banks sector contributed positively. Although sector allocation resulted in a slight negative effect, overall it was nearly neutral. Stock selection effects detracted from the portfolio, primarily due to the weak performance of semiconductor-related holdings in the Metal Products and Electric Appliances sectors, as well as the strong performance of benchmark-heavy stocks in the Transport Equipment sector, where the Sub-Fund was underweight relative to the benchmark.

Looking ahead to 2025, we forecast steady domestic economic growth to support the equity market. Domestic consumption and capex make up a large portion of Japan’s GDP, and we see the two recording steady growth in the coming year. Wages are also likely to continue growing at around 5% once again in spring negotiations (Shunto). This is especially the case when considering the labour shortages in both the manufacturing and nonmanufacturing industries in addition to the robust corporate earnings. As a result, real wages are likely to stay positive, which should lead to steady domestic consumption under the current government’s policies. Capex is also expected to grow. Labour shortages are likely to be a catalyst for IT system investment.

---

**NOMURA FUNDS IRELAND – JAPAN STRATEGIC VALUE FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

---

**Investment Outlook**

Recent data releases suggest that Japan's economy has extended its solid growth trend, mainly driven by domestic demand. According to the Monthly Labor Survey for October, scheduled cash earnings (based on like-for-like business establishments) for regular employees increased by 2.9% (yoy) (September: +2.8%, yoy), continuing a recently established trend of wage growth. Since May, the wage growth rate has generally been around the upper 2% range (yoy), and the real household income situation is also expected to continue improving. However, the economic outlook for Japan will inevitably be impacted to some extent by policies from the incoming Trump administration. At the December Monetary Policy Meeting (MPM), the BOJ announced that it would maintain the policy interest rate at 0.25%. Referring to the uncertainty surrounding the global economy and the US, BOJ Governor Kazuo Ueda commented on his intention to consider raising interest rates after future developments in wage growth are confirmed, with the intent to establish confidence in a virtuous cycle between wages and prices. Among the opinions expressed at the meeting, only a limited number of participants suggested maintaining the current status quo regarding monetary policy. Some suggested raising interest rates in the near future. The BOJ implemented an interest rate hike and raised the policy rate to 0.50% in January 2025 (our forecast as of the end of December 2024). Our forecasts for Japan's real GDP growth rate are -0.2% (yoy) in 2024 and 1.0% (yoy) in 2025.

Shifting to a microeconomic perspective, since the start of the reforms announced by the Tokyo Stock Exchange (TSE) in March 2023, significant changes have been observed among Japanese companies. As of November 2024, 89% of the Prime Market companies have responded to the TSE's request, with 83% having disclosed initiatives, and 7% considering disclosure. The most common response among the companies was to buy back shares. As of November 2024, announced share buybacks by listed companies totalled 13.7 trillion yen in financial year 2024, exceeding the financial year 2023 total of 9.9 trillion yen. As for dividends, 75% of companies are expected to increase, leading to a total expected return ratio of 60% in financial year 2024 compared to 50% in financial year 2023.

Furthermore, corporate actions have also increased in number and scale. Among the 2024 large cap transactions, we saw acquisition proposals for Seven & i Holdings by a Canadian convenience store giant Alimentation Couche-Tard, as well as the proposed mergers between Nissan and Honda Motor. This is also true for small and medium sized enterprises, with increased numbers of strategic mergers & acquisitions, management buyouts, and unwinding of parent/subsidiary dual listings. While not the only reason, the TSE's efforts have helped instil a new standard for Japanese companies. As we observe the unwinding of cross-shareholdings in companies including Toyota Group, we believe the overall reform will lead to an outperformance by Japanese companies over their global peers.

Considering the investment environment described above, we aim to review our stock holdings based on undervaluation from earnings and asset perspectives, focusing on the following factors:

- (1) Changes in corporate financial position, policies taken to improve shareholder returns.
- (2) Competitive advantage, growth potential, and management reform.

In particular, we are focusing on companies that are expected to improve shareholder returns against a backdrop of profitability supported by superior competitive strength, companies with technologies that can support social and industrial change in areas such as semiconductor production and digital transformation, and companies where capital efficiency is expected to improve due to governance reforms.

As a reference, when comparing the sector composition with the market at the end of December, the portfolio held overweight positions in Information & Communication, Electric Appliances, and Construction. Its largest sector underweights were Transportation Equipment, Services, and Machinery (Note that sector weights are the result of bottom up stock selection decisions, and are not due to intentional top down allocations).

According to the Nomura Securities Financial & Economic Research Centre, corporate earnings for the financial year ending March 2025 are expected to rise by 6.0% (yoy) based on forecasts as of 30th December, 2024 for the Russell/Nomura Large Cap Index, excluding Financials and on a consolidated basis. Nomura's corporate earnings growth forecast for financial year 2025 ending March 2026 indicates a continuing earnings recovery, with growth of 4.2% in terms of recurring profits.

As for valuations, the market PBR was 1.45\* at the end of December. The earnings yield (i.e. earnings per share/stock price) was 6.40%\* as earnings performance seems to be recovering. The expected dividend yield is 2.34%\*, which is higher than the long-term interest rate (10-year JGB yield) of 1.09%. (\*Source: Nomura Asset Management, based on the TOPIX).

**NOMURA FUNDS IRELAND – US HIGH YIELD BOND FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	-0.53	-0.05	7.31	8.94	301.55
<b>Benchmark</b>	-0.41	0.16	8.22	9.02	275.64
<b>Out/(Under) Performance</b>	-0.12	-0.21	-0.91	-0.08	25.91

*Source BBH; % Returns in USD. Benchmark shown is the ICE BofA US High Yield Constrained Index (HUC0).  
\*Since Inception date is 31st March, 2009.*

**Performance Commentary**

For the year ended 31st December, 2024, the Sub-Fund returned 7.31%, compared with the benchmark return of 8.22%, and therefore underperformed the benchmark by 0.91%.

US High Yield Bond Fund had a muted start to the year, but performed well later in the first quarter on the basis of solid economic news and technicals, despite persistent concerns around the potential for sticky inflation, and the market’s reassessment of the prospects and timing of the Fed’s expected rate cuts. Inflation continued to be a major driver of high yield market performance in the second quarter, and more positive signs of inflation resuming its path towards the Fed’s 2% target emerged in the spring and early summer. Economic data continued to be stable, suggesting that a soft landing was still in play. Disinflation progress continued, prompting the Fed to make an initial 50 basis points cut in September.

Despite the optimism in risk assets following the US election in November, the headwinds from higher Treasury yields had a dampening impact on returns, particularly at concurrent spread levels. Even though the Fed started its cutting cycle during the third quarter, economic data continued to feed into pessimism regarding the threat of inflation having passed. GDP growth, consumer spending, and employment data all showed an economy that was continuing to perform well, while uncertainty over Trump policies, particularly tariffs, all seemed to point to the potential for inflation reigniting in 2025. The 10-year Treasury sold off from 3.8% to 4.6% during the fourth quarter. In an environment where spreads were already at year-to-date lows, the market could not fully absorb the rates impact, and treaded water into the end of the year.

Portfolio relative performance during 2024 was subdued by negative security selection in the lower credit quality segments, particularly CCCs, which detracted from overall performance, while credit selection and weighting in BBs contributed. Sector contributors included Support Services, Gas Distribution, and Air Transportation, while sectors that detracted from performance during the year included Specialty Retail, Cable & Satellite TV, and Packaging.

Volatile market conditions caused the market to oscillate between risk-on and risk-off states, and market leadership changed frequently throughout the year. Thus, we were not able to identify trends to drive outperformance through security selection. Furthermore, we took active positions in sectors, but there was limited dispersion in sector performance, negatively impacting alpha generating opportunities. Interest rate volatility was elevated, but we held portfolio duration broadly close to the benchmark’s due to an uncertain rates outlook. The strategy was defensively positioned throughout the year, with a credit ratings posture similar to the broader market.

**Investment Outlook**

Looking forward, NCRAM expects US economic activity to slow modestly in 2025, from near 3% real GDP growth in both 2023 and 2024, to the mid-2% range in the coming year, with some risk to the upside. Higher interest rates will impact some consumer spending, and growth is generally slow outside of the US. The policy impact of the Trump administration will be a key factor but is somewhat unknown. We continue to feel the incoming administration has a fairly large appetite for change, and aggressive ideas have been floated in the areas of taxes, deregulation, immigration, tariffs, and geopolitics. While Trump can undertake some executive action, there remains uncertainty about what will pass Congress with small Republican majorities. In general, we are hopeful that growth remains supportive for high yield. Deregulation, extending the 2017 tax cuts, and further initiatives to reduce the tax burden on companies and individuals would support stronger growth and higher profits. Lighter-touch regulation would also create a more favorable environment for mergers & acquisitions, supporting asset prices. On the other hand, protectionist trade policy and amplified diplomatic tensions are anti-growth and inflationary. Overall, NCRAM maintains a constructive outlook for high yield, driven by resilient fundamentals underpinned by continued earnings growth, supportive technicals, and attractive yields.

**NOMURA FUNDS IRELAND – JAPAN HIGH CONVICTION FUND**  
**INVESTMENT MANAGER’S REPORT (CONTINUED)**  
**For the year ended 31st December, 2024**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	1.07	-0.77	1.42	-6.41	160.59
<b>Benchmark</b>	4.02	5.43	20.45	50.70	211.87
<b>Out/(Under) Performance</b>	-2.95	-6.20	-19.03	-57.11	-51.28

*Source BBH; % Returns in JPY. Benchmark is the TOPIX Index.  
\*Since Inception date is 7th August, 2013.*

**Performance Commentary**

For the year ended 31st December, 2024, the Sub-Fund recorded a return of 1.42%, compared with the benchmark return of 20.45% and therefore underperformed the benchmark by 19.03%.

The Japanese stock market rallied significantly during the first quarter, mainly due to active buying by overseas investors. The US economy was stronger than expected, and market participants sought out value stocks on the back of expectations that the Fed would postpone interest rate cuts and that Japanese companies would improve their capital efficiency.

Tokyo Electron was a positive contributor during the first quarter as a result of its stock price rising due to buying pressure on semiconductor-related stocks following expectations for generative AI. Fast Retailing rallied thanks to steady market sentiment regarding its corporate earnings results and broad purchases of large-cap stocks.

M3 was a negative contributor due to a stock price fall as a result of a delayed recovery during the first quarter in its pharmaceutical marketing business and a bidding war with Dai-ichi Life over Benefit One, while Unicharm’s stock price fell due to concerns about deteriorating personal consumption and intensifying price competition.

NOF Corporation manufactures a wide range of innovative products including those related to functional materials, chemicals, nutraceuticals, life sciences, and rust prevention. We opened a new position in the company due to expectations for the growth potential of raw materials for use in drug delivery system pharmaceutical preparations.

Meanwhile, although Shimano still maintains a competitive edge in the global market as a manufacturer of bicycle parts, we expect to see a significant decline in profits for the second consecutive fiscal year due to the high base effect from the pandemic. We exited our position after the company’s ROE levels deteriorated to roughly around the 5% level. Shimano was delisted by the Growth Stock Committee. We also closed our position in Pigeon. The declining birth rate outpaced expectations and market growth is unavoidably slowing as a result. The company’s growth potential also declined significantly as expanding sales volume of skin care products could not compensate for falling sales of baby bottles. It has become apparent that ROE levels would continue to decline. Finally, we also liquidated our position in Katitas. Although the company had achieved growth through a unique business model of renovating and flipping residential real estate, its growth potential has deteriorated due to intensifying competition with new housing manufacturers and rising construction material costs. We believe it will be difficult to stop its falling ROE levels, which had been high at more than 20%.

During the second quarter of 2024 the stock market was more or less flat during the quarter, reflecting the global interest rate environment. Value stocks rose noticeably due to proactive shareholder returns by Japanese companies and an increase in domestic long-term interest rates.

Recruit Holdings and Itochu added value to the portfolio. Recruit's stock price rose due to improved profitability through cost reductions and increased shareholder returns, while Itochu rallied due to a high level of cash flow generation and leeway for greater shareholder returns.

Positions in M3 and GMO Payment Gateway detracted from the relative portfolio performance. M3 retreated due to a delay in the recovery of its pharmaceutical marketing business and GMO Payment Gateway fell due to an absence of positive catalysts despite its solid business performance.

**NOMURA FUNDS IRELAND – JAPAN HIGH CONVICTION FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

---

**Performance Commentary (continued)**

During the quarter we took the following action to manage the transition to a new portfolio manager:

- (1) Made sure there was no deviation from the portfolio’s emphasis on stocks that maintain high ROE levels, which is the basis of our strategy.
- (2) Made sure that we will be able to take measures such as holding stocks while monitoring and reviewing changes in price trends and portfolio weights, even when the company is able to maintain high ROE levels on average.
- (3) Confirmed that we will be able to expand investment options for ROE improvement stocks.

In light of this, we added a new position in Toyota Motor; its profitability has improved due to strong performance from hybrid vehicles and continuous cost reduction efforts. The company’s ROE levels have improved to double digits. The Growth Stock Committee approved this company in March and we added it to the portfolio in April. We also added a new position in Hitachi. In the past, structural reforms such as reorganising its low-profit businesses drove its performance; however, we bought the stock based on expectations that the spread of AI will lead to a phase of accelerated growth centred on its IT and energy businesses. Finally, we also added a new position in Tokio Marine. Its ROE has improved due to growth in its overseas insurance business, and we included it as a "transformational stock." Tokio Marine aims to halve its cross shareholdings in the next three years and eliminate them by 2030.

Meanwhile, we exited the positions in M3, MonotaRO, and Nihon M&A Center Holdings after they were delisted by the Growth Stock Committee. M3 had experienced slowing growth potential of its pharmaceutical marketing operation, which is its mainstay high-profit business. This has resulted in continually declining ROE levels. Although MonotaRO offers the convenience of internet-based indirect materials sales, its growth rate had been noticeably slowing and its ROE levels have decreased significantly from the 30% level. Finally, we lost confidence in Nihon M&A Center’s medium- to long-term growth potential following reputational damage to its brand value caused by scandals and high turnover of core human resources.

The Japanese stock market declined during the third quarter. While expectations were growing that the Bank of Japan would continue to normalise its monetary policy, interest rate cuts were expected in the US following the September FOMC meeting. The yen appreciated against the dollar from July to September as a result, and the Japanese market, starting with the automobile and banking sectors, was generally sluggish.

As for individual stocks, Fast Retailing, Chugai Pharmaceutical, Obic, Sysmex, and Hitachi added value to the portfolio. Fast Retailing was rated highly after releasing solid sales figures, while Chugai Pharmaceutical’s stock price rallied as expectations for their obesity control drug gathered momentum. On the other hand, Daiichi Sankyo, Disco, Tokyo Electron, JEOL, and Murata Manufacturing detracted from the relative portfolio performance. The clinical trial results of an anticancer drug that Daiichi Sankyo is developing fell short of expectations. Share prices of Disco and Tokyo Electron also declined due to the unclear impact of semiconductor export restrictions on sales.

**New Purchases: Daiichi Sankyo, Asics**

Daiichi Sankyo has positioned cancer related products as a prioritised sector, and has a strong position in the production of antibody drug conjugates (ADC), a type of biopharmaceutical. We expect the average ROE of 8% over the past five years to increase to 20% over the next five years. The weighting of the company as a "ROE improvement stock" has increased significantly. In general, pharmaceutical manufacturers face risks such as the possibility that drugs under development might not be authorised, as well as patent cliffs, whereby product patents expire and sales suddenly drop due to generic products entering the market. There have been many examples of a pharmaceutical manufacturer not being able to maintain their business at a certain level. However, Daiichi Sankyo’s main business area is cancer treatment, a sector that is expected to grow, and their ADC technology enables them to develop drugs at a rapid pace, diversifying their risk. Also, their profit structure does not depend on a single drug.

Asics is positioned close to Nike and Adidas in terms of running shoe sales, and it has industry leading product quality in areas such as sole development. Their product development leverages scientifically analysed data accumulated at the Asics Institute of Sports Science, which was established in 1985. The data includes the characteristics of human biomechanics as well as the balance of mind and body. Their more casual product range, Onitsuka Tiger, is also growing in popularity. Structural reforms that company president Yasuhito Hirota has been working on since 2019 have paid off, and the company’s profitability has dramatically improved thanks to better inventory management and more accurate demand forecasts. We added a new position in the brand as an "ROE improvement stock".

**NOMURA FUNDS IRELAND – JAPAN HIGH CONVICTION FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

---

**Performance Commentary (continued)**

Sales: Toyota Motor Corporation

Although the company's competitiveness among car manufacturers has remained unchanged, production recovery was delayed due to an inspection scandal. With the yen weakening, a boost in earnings is not looking likely, and we will reduce the weighting for now and monitor the stock's progress.

Japan's stock market rallied during the fourth quarter, and active share buybacks by companies underpinned the growth of the market. News reports of Japan's National Pension Investment Corporation (GPIF) raising its investment yield target heightened market expectations that the stock ownership ratio was improving. Against a backdrop of the yen appreciating against the dollar and rising long-term interest rates, both in Japan and the US, bank stocks and automobile stocks were especially popular.

As for individual stocks, positions in Recruit Holdings, Fast Retailing, Mitsubishi Corporation (not held), Daifuku, and eGuarantee contributed positively. Despite the sluggish US market, Recruit Holdings was favourably recognised for its strength and its ability to improve profitability, while Fast Retailing offers good medium-term growth potential after a strong start for its new overseas stores.

On the other hand, positions in Unicharm, Shin-Etsu Chemical, Mitsubishi UFJ Financial Group (not held), Sony Group (not held), and Murata Manufacturing detracted from the performance. Unicharm, which declined following the quarterly results due to concerns about intensified competition in Asia, and Murata Manufacturing Co., Ltd., which declined due to concerns about future demand for products such as smartphones, had a negative effect on returns.

New Purchases: Plus Alpha Consulting

The company's main product has been the SaaS (Software as a Service) called Talent Palette, a talent management system offered since 2016. The "Talent Palette" service quantitatively analyses human resource information and has experienced significant growth due to an on-going trend among companies to strengthen human capital management. Their financial results for the financial year 2024, were slightly below market expectations, and the company was sold off heavily after failing to achieve their targeted figures due to pre-emptive costs. However, the company has managed to maintain a winning formula by operating in an expanding market, having a competitive edge, and maintaining high profitability. The stock seemed to be oversold given its growth potential.

All Sales: SMS

The company provides a nursing related recruitment service and a SaaS business for nursing care providers. We downgraded our growth outlook for SMS to "probable slowdown" due to intensified competition within the human resource placement business. We divested the entire position because it has become increasingly difficult for it to maintain a high ROE.

**Investment Outlook**

We expect the TOPIX Index to fluctuate in a range between 2,450-3,090 points over the next quarter.

Although the performance of the Japanese stock market was positive from July to December, it fluctuated due to increased volatility in long-term interest rates as well as political events both in Japan and the US. Going forward, we will pay attention to the following potential risk factors.

(1) Policies of incoming US President Donald Trump: President Trump's election victory, together with majorities in both the House of Representatives and the Senate, confirmed an electoral "red sweep" for the Republican Party. While this makes the probability of implementing growth oriented economic policies more feasible, we will keep a close eye on the impact of proposed tariffs, which could lead to a decline in trade volume and heighten inflation risk. Therefore, businesses could become more hesitant about investing in infrastructure.

(2) Trends in interest rates in Japan and the US: As mentioned above, should inflation accelerate again, possibly reducing the likelihood of a US interest rate cut, then the yen could weaken further against the dollar. We will pay close attention to the risk that the stock market might maintain its current value bias, due to expectations of a BOJ interest rate hike. In this case, the headwind against growth stocks could continue.

(3) Stagnation of China's Economy: We will pay close attention to the impact that higher US tariffs might have on the global economy, as well as the stagnation of China's consumer spending resulting from the prolonged real estate recession.

*Source BBH; % Returns in USD. Benchmark is MSCI All Country Asia Ex Japan Index.  
\*Since Inception date is 4th September, 2013.*

**Performance Commentary**

For the year ended 31st December, 2024, the Sub-Fund returned 8.58% compared with the benchmark return of 11.96%, and therefore underperformed the benchmark by 3.38%.

The strength of the US economy, with higher interest rates, a higher dollar index (DXY) and the strength of the equity markets, saw the US outperforming most other markets worldwide. A return of the Trump Trade helped to revive animal spirits and the Cryptocurrency surge further accentuated this trend. The US economy remained strong and resilient. Employment was not worrisome and inflation did not collapse. Strong corporate balance sheets, the lack of real impact from high interest rates, productivity gains from AI, rising household wealth and record low household debt (US household debt to asset ratio at a 50-year low) resulted in what has become popularly termed “US Exceptionalism”.

China did what China does best – initiating a big swing in equity markets, for the third time in four years; this time in a positive direction. The 30% swing in less than a fortnight helped the Emerging Market (EM) and Asia Pacific ex-Japan (APxJ) markets to end positively, albeit lagging behind the US markets for the year. The AI theme helped Taiwan end up as the best performing Asian market. South Korea’s much hyped “Value Up” theme evaporated quickly amid political turmoil and this ended as the region’s worst performing market. India, the favourite for most of the year, also saw multiple headwinds rearing up towards the end of 2024. Currency weakness in the first three quarters helped other Asian markets too; but the fourth quarter gave everything away. Earnings upgrades could not be sustained in the region for different reasons across countries. Asia ex-Japan ended the year with modest valuations and positioning in Asia also was very light at the end of the year.

Both country allocation and stock selection outcomes were negative. Our overweight to Indonesia and underweight to Taiwan along with stock selection in China/Hong Kong and Indonesia were the key detractors. On the other hand, underweight exposure to Korea, overweight to India and stock selection in India and Taiwan were positive contributors to the Sub-Fund.

China stock selection was the biggest drag on our performance. Our exposure to **New Oriental** was the main drag due to weaker than expected earnings resulting in EPS downgrades. **Kweichow Moutai** underperformed amid weak consumer demand trends; demand for baijiu remained weak and wholesale prices fell. **China Overseas Land and Investments** also contributed negatively with the expected government stimulus getting deferred increasing the near term uncertainty around the property sector recovery. Meanwhile, **Tencent Holdings** was a large positive contributor gained as the company announced more aggressive share buybacks and the company has benefitted from the pick-up in gaming approvals.

In Indonesia, **Bank Mandiri (BMRI)** and **Bukalapak.com (BUKA)** underperformed. BMRI underperformed as the banking sector liquidity environment remained tight, with Bank Indonesia absorbing excess liquidity to stabilize the Rupiah. BUKA underperformed as there were concerns that the company will miss its target to achieve its positive EBITDA target by fourth quarter. Any delay in achieving profitability will delay capital return to shareholders.

Our India stock selection was the most significant positive contributor to performance. Overweight positions in **Indian Hotels** and **Kalyan Jewellers** added the most value. For Indian Hotels, management execution has been phenomenal, assisted by a favourable industry demand-supply cycle, with occupancies and average room rents moving up. Kalyan Jewellers gained due to strong revenue performance and stable margins led by healthy same-store sales growth (SSSG) and driven by the positive network effect it is experiencing in several markets.

INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

---

**Investment Outlook**

Deepseek’s V3, a China-made AI large language model (LLM) which was released in December, made headlines mid-January, prompting investor inquiries as well as concerns about the cost of computation given that it uses earlier generation inferior chips, while operating at a fraction of the cost of its US peers while achieving performance similar to that of its US peers. This news headline shook up the AI trade and prompted a shift in crowded positioning with AI related stocks in the US, Taiwan and South Korea retracing upon returning from the Lunar year celebrations.

Further tariff headlines are very likely for China, but these should be in line with existing investor expectations, while the Chinese government can be expected to respond robustly to tariff announcements. This will be a year of tug of war between tariffs and economic stimulus. Economic growth has since Covid been driven by exports, thus domestic consumption could be another potential source of growth should exports wane due to the extent of tariff rates. Nevertheless, valuations are very cheap and China is possibly now the world’s least favoured market. Despite the tariff war news between China and the US, China’s equity markets have performed reasonably well due to the excitement around Deepseek, which suggests China may be competitive in the AI space. The internet sector is one of the largest beneficiaries of the AI application layer and we have exposure to this sector. We retain a neutral stance to China/Hong Kong markets taken together.

Taiwan continues to offer AI related beneficiaries, whether it is the Nvidia value chain or ASIC infrastructure related, for training or inferencing purposes. The recent concerns over Deepseek or delays to Nvidia’s GB chips make the valuations of Taiwanese tech stocks more palatable. We are gradually shifting away from AI training investments that have benefited from the initial wave of AI investment, towards more AI inferencing plays and also looking for opportunities to ease our underweight Taiwan position somewhat. South Korea appears less attractive as its technology sector is skewed towards memory production, which is currently going through a down cycle. The “Value-up” trade may have faded somewhat, but it has had lasting effects in the financial sector where Banks are increasing shareholder returns and we have exposure to this segment. Our underweight exposure to Korea is likely to be retained near term.

Smaller ASEAN countries remain sensitive to the strength of the US dollar. Singapore, being a developed ASEAN country with a resilient currency and corporate fundamentals remains our preferred country position.

India remains the best medium term structural story with plentiful investment opportunities. However, progress in this market is not as smooth as it has been in the recent past given slowing growth and some shorter-term headwinds. We have retained our overweight country exposure.

\*Since Inception date is 1st May, 2014.*

**Performance Commentary**

For the year ended 31st December, 2024, the Sub-Fund returned 3.73%, compared with the benchmark return of 6.70%, and therefore underperformed the benchmark by 2.97%.

The global high yield market generally performed well in 2024 as economic data showed resilient growth in the US and lower inflation over the course of the year. US high yield had a muted start to the year, but performed well later in the first quarter on the basis of solid economic news and technicals, despite persistent concerns around the potential for sticky inflation, and the market’s reassessment of the prospects and timing of the Fed’s expected rate cuts. Inflation continued to be a major driver of high yield market performance in the second quarter, and more positive signs of inflation resuming its path towards the Fed’s 2% target emerged in the spring and early summer. As a result, the 10-year Treasury was little changed during the second quarter, and likewise spreads remained relatively flat.

Global high yield continued its positive performance in the third quarter as central banks were poised to start their rate cutting cycle. Economic data continued to be stable, suggesting that a soft landing was still in play. Disinflation progress continued, prompting the Fed to make an initial 50 basis points cut in September. In the fourth quarter, despite the optimism in risk assets following the US election in November, the headwinds from higher Treasury yields had a dampening impact on returns, particularly at concurrent spread levels. Even though the Fed started its cutting cycle during the third quarter, economic data continued to feed into pessimism regarding the threat of inflation having passed. GDP growth, consumer spending, and employment data all showed an economy that was continuing to perform well, while uncertainty over Trump policies, particularly tariffs, all seemed to point to the potential for inflation reigniting in 2025. The 10-year Treasury sold off from 3.8% to 4.6% during the fourth quarter. In an environment where spreads were already at year-to-date lows, the market could not fully absorb the rates impact, and treaded water into the end of the year.

From a ratings perspective, credit selection was a more meaningful driver than our weighting of ratings segments. Sectors that contributed to performance during the year included Software Services, Wireline Telecom, and Transportation. Sectors that detracted from performance included Health Services, Electric Generation, and Packaging. Our overweight in Sunnova, a residential solar provider, underperformed as the issuer and its industry were pressured by investor concerns that the incoming administration would reduce support for renewable energy. Packaging performance was hurt by our overweight in Ardagh Finance bonds. These bonds are subordinated within the Ardagh structure, and the exclusion of these bonds from negotiations to restructure the company’s debt led to lower prices, detracting from performance.

Volatile market conditions caused the market to oscillate between risk-on and risk-off states, and market leadership changed frequently throughout the year. Thus, we struggled to identify trends to drive outperformance through security selection. Furthermore, we took active positions in sectors, but there was limited dispersion in sector performance, negatively impacting alpha generating opportunities.

**NOMURA FUNDS IRELAND – GLOBAL SUSTAINABLE HIGH YIELD BOND FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

---

**Investment Outlook**

Looking forward, NCRAM expects US economic activity to slow modestly in 2025, from near 3% real GDP growth in both 2023 and 2024, to the mid-2% range in the coming year, with some risk to the upside. Higher interest rates will impact some consumer spending, and growth is generally slow outside of the US. The policy impact of the Trump administration will be a key factor but is somewhat unknown. We continue to feel the incoming administration has a fairly large appetite for change, and aggressive ideas have been floated in the areas of taxes, deregulation, immigration, tariffs, and geopolitics. While Trump can undertake some executive action, there remains uncertainty about what will pass Congress with small Republican majorities. In general, we are hopeful that growth remains supportive for high yield. Deregulation, extending the 2017 tax cuts, and further initiatives to reduce the tax burden on companies and individuals would support stronger growth and higher profits. Lighter-touch regulation would also create a more favorable environment for mergers & acquisitions, supporting asset prices. On the other hand, protectionist trade policy and amplified diplomatic tensions are anti-growth and inflationary. In Europe, we expect inflation to continue to march lower and the ECB should steadily decrease their benchmark rate in the first half of the year. We see policy divergence between US and European central banks as a key theme for the upcoming year, which could favor European fixed income assets. Overall, NCRAM maintains a constructive outlook for high yield, driven by resilient fundamentals underpinned by continued earnings growth, supportive technicals, and attractive yields.

INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	-0.43	-1.35	4.54	-3.64	42.25

*Source BBH; % Returns in USD. This Sub-Fund has no Benchmark.  
\*Since Inception date is 30th January, 2015.*

**Performance Commentary**

For the period ended 31st December, 2024, the Sub-Fund posted a return of 4.54%.

In the early part of the year, the markets moved from pricing in close to 7 25bp rate cuts by the Fed in 2024 to pricing in 3 or fewer. As a result, bond yields rose significantly, although credit spreads held up as risk assets in general powered higher, buoyed by surprisingly strong economic data and a boom associated with the adoption of AI.

The Fund performed strongly through its large allocation to Financials, primarily European banks and insurance companies. The allocation to convertible bonds also performed strongly, chiefly due to strong security selection, which saw a rotation into Asia ex Japan names after valuations were punished relative to other markets in 2023.

The Fund also benefited from volatility in early August, as relatively weak US jobs data led to extreme movements in some risk markets and lower US Treasury yields. The Sub-Fund’s hedges offset weakness in credit spreads and were temporarily scaled down, before being re-established prior to the US election at more attractive rates.

Also of note was a positive contribution from Emerging Markets allocations, which totaled between 15 and 20% throughout the period. An allocation to Egyptian hard currency debt was particularly strong, after the government announced a major land sale to UAE-based investors which substantially improved the government’s fiscal position and led investors to discount any possibility of default or restructure in the medium term. Since the bonds had traded at close-to-distressed levels at times in 2023, the pick-up in valuations contributed meaningfully at Sub-Fund level, despite the allocation being less than 2%. South African local currency exposure was also a strong contributor, buoyed by an attractive level of coupon and support from both domestic and overseas investors.

The major negative was duration exposure. This had been reduced in early 2024 as it became clear that too many rate cuts had been priced in, but the residual duration exposure was nonetheless painful. A portion of this duration exposure was maintained through bond call options, as a hedge in case economic data deteriorated more than expected, forcing more aggressive rate cuts by the major central banks.

**Investment Outlook**

- The US election is behind us, but political risk remains. The uncertainty around future US trade policy and the difficulties of the French and German governments are examples;
- We expect the French political dramas will eventually fade, and their only impact on the Sub-Fund’s portfolio in the short term is to cause volatility in the pricing of our French bank exposure. We see this impact as temporary and retain faith in the ability of French banks to continue to call these bond;
- However, the economic woes of core Europe remain clear and they are unlikely to be improved by the introduction of tariffs by the US administration;
- The ECB is therefore likely to continue cutting rates, which will be positive for the European bank credits that we hold, be it senior or subordinated (we hold substantial allocations to both);
- The Fed is likely to respond to announced policy rather than attempting to anticipate the impact of trade tariffs (and other policies) that are yet to be imposed. They should have some room to cut rates further, but we continue to expect such cuts to be gradual;
- This can and should lead to a steeper US Treasury curve. At time of writing, long end US Treasury yields seem to us perhaps a little rich, trading close to the top of the recent range. However, we have not yet been tempted to add to our existing (modest) duration. There is, however, some value in the front end, and we have a small duration exposure at the 5 year point of the curve;

**NOMURA FUNDS IRELAND – GLOBAL DYNAMIC BOND FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

---

**Investment Outlook (continued)**

- Our major risk positions are broadly unchanged. They remain focused on areas of the bond markets that are likely to perform strongly in the medium term as interest rates are gradually cut by the major central banks;
- Although we have reduced exposure to an extent, our largest allocation remains to European Bank and Insurance company debt. Our holdings are highly diversified across European countries including the UK, and diversified across the balance sheets of the investee firms, from senior debt down to AT1s (CoCos);
- We have exposure to high carry local EM yield curves in South Africa and Mexico. We have partly un-hedged the currency exposure of these positions recently after depreciation vs the USD offered a more attractive entry point to experience the full local currency yield. We also hold two hard currency exposures in the Middle East – Bahrain for its attractive carry above equivalent US Treasuries and Egypt, which continues to recover from severe fiscal difficulties, and was recently upgraded by Fitch. We also hold exposures in Romania and Bulgaria, both of which are on the path to EU membership (albeit at different points on that journey) and offer superior risk/reward dynamics to both core and peripheral European sovereign bonds;
- We continue to bias Convertibles exposures to stable names with valuations that sit close to the “bond floor”, offering limited downside risk;
- However, due at least in part to the political risk highlighted above, we have bought hedging through CDS contracts and put options on the Eurostoxx index. The latter expire in February and have a strike price which would represent an approximate 14% fall from where the index sits at time of writing. Any move lower in equity markets would likely be accompanied by an increase in volatility. Both effects would likely harm our credit exposures, but would benefit the equity put option-based hedge. This hedge, if it proves unnecessary (as we hope), could cost the Sub-Fund as much as 10 basis points in performance over its full three month lifespan. We believe it is a price worth paying.

*Source BBH % Returns in USD. Benchmark shown is the JPMorgan GBI-EM Global Diversified USD Total Return Index.*

*\*Since Inception date is 27th February, 2015.*

**Performance Commentary**

For the year ended 31st December, 2024, the Sub-Fund returned -5.76%, compared to the benchmark return of -2.28%, and therefore underperformed the benchmark by 3.48%.

It was a challenging year for emerging market debt, dominated by broad USD strength and idiosyncratic risks (political, fiscal etc.). Over the first half of the year, we reduced our exposure to China in order to avoid unattractive bond yields and possible repercussions from China's ongoing growth slowdown and property sector crisis. We invested in Indian government bonds to take advantage of the country's strong growth prospects and portfolio inflows resulting from the inclusion of JP Morgan GBI-EM in the index. On the other hand, the elevated fiscal risks in Brazil, which developed into a crisis of confidence, and the volatility of the Mexican peso following the unexpected election results weighed on our performance. Moreover, the post-election market rally in South Africa detracted from performance due to our short duration positioning, which we changed to a slight overweight following concrete signs of improved governance. On the other hand, countries with less attractive interest rates and economic prospects, such as China and Thailand, performed well in terms of bond yields. These countries, where we were underweight, detracted from performance.

Among the benchmark countries, South Africa, Serbia and China were the best performers in terms of price returns in 2024, while Colombia, Brazil and Türkiye were the worst. Emerging market currencies mostly depreciated against the US dollar in 2024. The best performers were the Malaysian rupiah, Thai baht and Peruvian sol, while the worst performers were the Brazilian real, Mexican peso and Turkish lira.

Overall, the Sub-Fund underperformed its benchmark due to an overweight and long duration position in Brazil and underweight positions in China and Thailand. The short forward position in the Taiwanese dollar, and the underweight in Colombia were the main contributors to performance.

**Investment Outlook**

While EM local currency bond markets held up well relative to developed market (DM) bonds in 2024, the weakening of EM currencies against the USD had a negative impact on the performance. The trajectory of the US dollar, driven by the policies of the new US administration and the robust US economy, has become a key determinant of market dynamics in 2025. A strong US dollar is a significant headwind for EM currencies, particularly in the short term.

Several country-specific developments affected the bond performance of EM bonds in 2024. The erosion of confidence in Brazil's fiscal rule and the incumbent party's controversial post-election judicial reforms in Mexico weighed on overall performance. In contrast, the formation of a pro-reform coalition government in South Africa supported the performance of EM local currency bonds. In 2025, the expected monetary tightening by the Brazilian central bank could mitigate currency volatility for the Brazilian real. However, risks related to fiscal rule compliance and debt sustainability remain. For Mexico, which is closely linked to the US economy, US policies on tariffs and immigration will be key factors to watch.

China's economic growth failed to demonstrate a meaningful recovery in 2024. While stimulus measures were announced in the second half of the year, they primarily addressed medium-to-long-term risks in the housing market rather than providing immediate support to consumption and growth. While economic weakness is expected to persist in 2025, the risk of debt deflation remains elevated. Furthermore, US-China relations and potential tariffs on Chinese products pose significant challenges.

Given the strength of the US dollar, we have adopted a more defensive stance on emerging markets ahead of the US elections. Our currency allocation currently emphasizes underweight positions in China, Thailand, and Mexico. On the bond side, our overall short duration position is somewhat balanced by selected overweight positions in Indonesia, Malaysia, South Africa, and Mexico.

We have increased our USD cash holdings to take advantage of investment opportunities in emerging markets, as the policies of the new US administration could lead to some volatility in emerging markets. However, we remain cautious on countries with significant macroeconomic imbalances and governance concerns.

**NOMURA FUNDS IRELAND – ASIA HIGH YIELD BOND FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	0.14	1.16	15.81	-9.66	-1.11
<b>Benchmark</b>	-0.58	0.37	15.18	2.45	28.12
<b>Out/(Under) Performance</b>	0.72	0.79	0.63	-12.11	-29.23

*Source: BBH % Returns in USD. Benchmark shown is the JP Morgan Asia Credit Non-Investment Grade Index.*

*\*Since Inception date is 6th March, 2015.*

**Performance Commentary**

For the year ended 31st December, 2024, the Sub-Fund recorded a return of 15.81% compared with the benchmark return of 15.18%, and therefore outperformed the benchmark by 0.63%.

Credit selection in China and Indonesia were the main contributors to the outperformance.

Our duration was shorter relative to the benchmark and had an insignificant impact on Sub-Fund performance. The contribution from curve positioning was also immaterial.

The benchmark returned 15.18% for the full year of 2024, outperforming both Developed Markets HY performance of +8.11% and CEMBI Broad HY performance of +11.51%. The current benchmark yield of 10.6% and spread of 622 basis points is cheap when compared to EM and US HY levels.

**Investment Outlook**

Asia High Yield (AHY) had a strong recovery in 2024, in-line with our projections, primarily supported by (i) the Fed’s recent pivot, (ii) continued counter-cyclical measures by the Chinese government, (iii) a decline in the default rate for AHY, and (iv) stable growth across Asia (excluding China). Despite recent yield compression in this asset class, the current double-digit yield remains historically attractive.

Looking ahead, 2025 is expected to be a year of heightened market volatility as investors assess policy measures under the newly inaugurated Trump administration and their potential economic impact. In the near term, China’s upcoming March 2025 Two Session will be a key event to monitor.

Despite these uncertainties, we remain constructive on the asset class, given its attractive all-in yield and supportive technical dynamics, which we believe will continue to provide downside protection.

*Source: BBH % Returns in USD. Benchmark shown is the JP Morgan Asia Credit Investment Grade Index.*

*\*Inception date is 13th March, 2015.*

**Performance Commentary**

For the year ended 31st December, 2024, the Sub-Fund recorded a return of 6.43% compared with the benchmark 4.22% and therefore outperformed the benchmark by 2.21%.

In 2024, the US economy remained resilient, and US inflation remained persistent throughout the year despite tight monetary policy. At the beginning of the year, the market anticipated that the rate-cut cycle would start in the first quarter, with six to seven cuts priced in. However, due to persistent inflation, the first rate cut was delayed until the September FOMC meeting, and the total rate reduction was 100 basis points. As a result, US Treasury yields remained range-bound throughout the year and rose toward year-end due to the impact of the US elections. We had expected early rate cuts last year and maintained an overweight position in the duration strategy, which had a slight negative impact on relative performance.

Regarding the Asia Investment Grade market, 2024 was a relatively stable year. Except for a brief period of risk aversion in August, the JACI IG spread remained stable with a gradual tightening trend. We maintained a DTS overweight throughout the year, which contributed positively to performance.

Our country allocation strategy also added value. We maintained underweight positions in Indonesia and the Philippines throughout 2024, and the underperformance of these markets positively contributed to relative performance. On the other hand, our underweight position in China resulted in a small negative impact, as Chinese SOEs outperformed despite relatively tight valuations. However, the impact of spread tightening was largely offset by the lower spread carry of Chinese SOEs, minimizing its effect on relative performance.

The security selections were the biggest positive contributors in total to the relative outperformance and the contributions accounted for more than half of the total outperformance. We successfully switched our investment allocations from well-performed bonds to undervalued bonds throughout the year. Large positive security selection effects were achieved in China, Korea, Indonesia, and Hong Kong, without significant drawdowns from any single issuer.

The benchmark returned 4.22% for the full year of 2024. The 10-year US Treasury yield rose from 3.88% to 4.57%, contributing 1.64% to the benchmark return. The benchmark spread tightened from 108 basis points to 78 basis points, while the spread return, including capital gains and income, contributed 2.54% to the benchmark return. The benchmark yield at the end of 2024 stood at 5.31%, a slight increase from 5.13% in 2023.

**Investment Outlook**

In 2025, we expect the Fed to continue its monetary policy adjustments and implement 25 basis points rate cuts in March and June. We also anticipate a marginal decline in US Treasury yields over the year, in line with monetary policy adjustments. As a result, we will slightly extend duration in the first quarter while closely monitoring the trajectory of inflation and policy measures under the new US administration.

We find that bonds in the mid-duration range are more attractive than those at the short or long end of the curve, given their relatively higher carry per unit of duration and superior liquidity. Consequently, we will overweight this maturity bucket when increasing duration exposure.

As for the Asia Investment Grade corporate bond market, we anticipate another stable year. The IG spread is not significantly high following last year’s tightening, and we do not expect significant further tightening in 2025. However, the market is currently facing a shortage of new bond supply, and this tight supply-demand dynamic is expected to persist, continuing to anchor the market. Thus, we do not anticipate significant spread tightening or widening in the year ahead, and we expect the credit factor to provide a decent carry in 2025. As part of our strategy, we will maintain a small overweight in credit risk-taking while aiming to construct a portfolio with undervalued bonds.

**NOMURA FUNDS IRELAND – ASIA INVESTMENT GRADE BOND FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

---

**Investment Outlook (continued)**

In terms of the valuations across Asian markets, we assess that issuers in Korea, Malaysia, and Hong Kong are currently valued higher than their regional peers, particularly China. In Korea and Hong Kong, we have observed a healthy new bond supply, while corporate bonds in these regions trade at slightly cheaper levels with higher liquidity. Therefore, we will maintain substantial allocations to these markets and continue seeking security selection opportunities.

On the other hand, high-quality Chinese bonds are currently trading at tighter levels compared to their high-quality peers in other markets. Although we believe the fundamentals of high-quality Chinese issuers, such as quasi-sovereigns and major financial institutions, remain intact, we do not intend to increase allocations in this sector until valuations improve.

Among the sectors in the investment grade market, we find financials relatively attractive, particularly T2 bonds. As we already hold overweight positions in financials at the end of 2024, we will maintain this exposure going forward.

**Performance Commentary**

For the year ended 31st December, 2024, the Sub-Fund returned 13.61% compared with the benchmark return of 19.42% and therefore underperformed the benchmark by 5.81%.

Attribution analysis shows that both allocation and selection effect made negative contribution.

In sector allocation, our underweight in Financials and Communication Services sectors are negative contributors while the overweight in Consumer Discretionary and underweight in Health Care are positive factors of the relative performance.

In stock selection, Negatives come from underweight in Tencent (Communication Services) and overweight in Ke Holdings (Real Estate) due to improving gaming business and weaker-than-expected property sales data respectively. Our overweight in CNOOC (Energy) and underweight in Li Auto (Consumer Discretionary) made positive contribution due to the elevated oil price and weaker-than-expected EV shipment respectively. Sub-Fund outperformed before the sharp rally in late September which detracted most of the performance.

MSCI China rebounded strongly in 2024 and rose by 19% as macro recovered at a better-than-expected pace driven by ongoing positive policy supports as well as improving global trade condition especially in the first half of 2024. Policy wise, in addition to the fiscal stimulus targeting equipment upgrading and consumer goods trade-in programs along with accommodative monetary policies with LPR and RRR cut during the year, the measures became more comprehensive and explicitly extended to supporting equity market and further stabilizing housing market. That being said, weakness or market concerns still arose from time to time about rising external geopolitical tension especially Trump was elected as US president.

To recap, despite the lingering weakness in consumption and property, China macro in general saw a good start into 2024 with GDP growing 5.3% yoy, in the first quarter of 2024, as the manufacturing and infrastructure activities continued to improve thanks to exports resilience and ongoing policy supports which particularly tilted towards promoting industrial innovation, industry upgrade and equipment renewal. The macro outlook and market sentiment were further boosted into the second quarter of 2024 thanks to more positives on the policy front with a series of supportive housing policies especially on the unfinished housing projects initiated by the top level government along with the pro-market reform led by President Xi. The PBOC also set up a RMB 300 billion relending facility for converting housing inventories to affordable and public rental housing, which marked a crucial support in protecting any downsides in housing market. All in all, as the policies continued to roll out and pay off over time, the GDP growth in the first half of 2024 was in line with expectation at 5% yoy.

Going into the second half of 2024, the market was dragged as macro data saw more signs of moderation in July to August as previous stimulus’s positive effect gradually faded out. Having said that, it was to the market surprise the government later announced a series of comprehensive policies on all fronts to tackle the weak economy in September Politburo, shortly after the PBoC revealed supportive measures for the equity market with the launch of RMB 500 billion equity swap program and RMB 300 billion relending facility at a 1.75% interest rate for listed companies to conduct stock buybacks. Property policies support also came in stronger-than-expected given the new explicit aim of "stopping the fall" in house prices along with new round of policies to facilitate the inventory purchase by local SOEs as well as liquidity support for the redevelopment projects. Policymakers strengthened their pro-growth stance with increased policy priority on consumption along with the trade-in subsidy scheme expanding the products scope into more different consumer products. Market sentiment was boosted meaningfully with MXCN rose close to 40% in late September to early October, though the hype quickly faded into the fourth quarter of 2024 as investors looked for more signs and stronger improvement in macro recovery. China at the end delivered the 5% yoy full-year growth target with GDP specifically accelerated to 5.4% yoy in the fourth quarter, from 4.6% yoy in the third quarter.

**NOMURA FUNDS IRELAND – CHINA FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

---

**Investment Outlook**

China market showed some rebounds after the policy push in late September but quickly faded as investors look for more signs in macro recovery. There was also an empty policy window where investors would look for more policies sign in coming NPC two session dated in March. Although macro data remains rather sluggish and improvement has been minimal, we believe policy direction is towards the supportive side and more follow up policies will be launched in case of macro slowdown or external uncertainties. The policy pivot since September has not changed. As a matter of fact, consumer sector did see some upwards earnings revision upon the policy rollout especially particular sectors like home appliances.

While the market uncertainty remains amid lingering macro’s structural issues, such as local government debt and property, consumption weakness and escalating geopolitical tensions, we think policy supports and the government’s pro-growth stance will be the most important drivers to offset any negatives and revive the economy, of which the degree of recovery will be largely subject to the supporting policies’ timing and size across fiscal and monetary space going ahead.

For 2025, in order to achieve policymakers’ annual growth target at 5% as like previous year, we expect to see more positive development on policy fronts going ahead. Particularly, demand stimulus should remain as a key area in the fiscal space after policymakers at the December Politburo meeting and the CEWC further expanded the scope of products and enhanced lump sum amounts for the trade-in subsidy program. Also, for the first time in over a decade, the PBOC shifted monetary policy orientation from prudent to moderately loose, implying that there will be more accommodative measures in the monetary space through RRR and rate cuts this year. More proactive property policy easing, in terms of providing credit support for developers and prioritizing clearance of the existing high housing inventory, would also be needed to boost homebuyer confidence. We believe all these measures, combined with attractive valuations, should limit downside risk and provide upside potential for the equity market.

All in all, we expect the growth contribution should broaden across sectors into 2025, with new energy vehicles, travelling and particular sectors benefitting from the national trade-in subsidy scheme, such as home appliances, smartphone and the HDT sectors. In addition, the sentiment for tech companies should also remain elevated thanks to the AI advancement upon the recent launch of DeepSeek’s low-cost LLM as well as the increasingly supportive business environment after President Xi held a meeting with high-tech companies’ leaders and re-emphasized the importance of the private sector to the Chinese economy.

\*Since Inception date is 21st December, 2015.

**Performance Commentary**

For the year ended 31st December, 2024, the Sub-Fund returned 12.67% compared with the benchmark return of 17.49% and therefore underperformed the benchmark by 4.82%.

Performance of the Sub-Fund was dragged by its overweight in the Health Care sector and stock selection in Information Technology (the Sub-Fund does not own NVIDIA), Consumer Staples (Nestlé) and Financials (AIA).

We do not make top down allocations to sectors, the allocations are an outcome of our bottom up process, which looks for higher quality companies when they are trading at a discount to intrinsic value.

When 2024 started, the market believed that the FED had pivoted (last raise of interest rates was in July 2023) and was pricing six rate cuts for the year. We had the first rate cut in September 2024, being 50 basis points, and two additional ones in November and December, but the market is increasingly less optimistic about interest rate cuts for 2025. In fact, 10yr government bond yields started 2024 at around 3.9% but ended the year higher at around 4.6%, as bond yields started to rise after the first cut from the FED, to the surprise of many market participants.

Artificial intelligence (AI) has continued to be a significant driver of market performance for companies, especially for semiconductors, the best performing industry in the MSCI ACWI benchmark in 2024 with net total returns at 60%.

Market concentration has continued in 2024, with market returns driven by a small number of megacap tech companies from the US. Of the 17.5% total return from the MSCI ACWI, NVIDIA alone was 3.2% and more than 50% of the index performance was driven by the top 8 contributors, these being the Magnificent 7 (Mag 7) and Broadcom (a semiconductor stock).

As mentioned last year, our GHC strategy is exposed to four of the Mag 7 (Amazon.com, Alphabet, Microsoft and Apple).

For GHC, the best performing stocks for the year 2024 were:

- **Taiwan Semiconductor Manufacturing (TSMC)** shares performed well (+72% in USD) in 2024 due to their foundry position at the leading edge. There are only three leading edge semiconductor manufacturers that can make the most advanced chips, TSMC, Intel and Samsung. Intel and Samsung are having trouble keeping up with TSMC in leading edge chip manufacturing. This has led to all of NVIDIA’s AI chips being manufactured by TSMC. TSMC also makes AI chips for other custom ASICs companies such as Broadcom and Marvell. This AI demand enabled TSMC to raise revenue guidance multiple times during the year and they ended up growing revenue by around 34% in 2024;
- **Amazon.com** (also a top contributor in 2023, shares +44% in USD) reported operating margin of 11% in the third quarter of 2024 which was a historic high for the company. Operating margin for the full year will be an annual record high at double digits. The company is seeing operating leverage in their logistics network. After investing into same day delivery, the efficiency of their delivery operations has improved, allowing for margin expansion. Their cloud business, AWS, saw revenue growth reaccelerate which led to operating leverage in this segment as well and we also expect operating margins to rise significantly for AWS;
- **Alphabet** (also a top contributor in 2023, shares +36% in USD) is realising a recovery in all three of their main businesses, search, YouTube and cloud. The online advertising industry is seeing strong growth which is benefitting search and YouTube. The public cloud industry is also accelerating after customers reduced workloads in 2023. During the year, the shares corrected due to a legal battle with the US Department of Justice, but we maintained our overweight position given our belief in the fundamentals;

**NOMURA FUNDS IRELAND – GLOBAL HIGH CONVICTION FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

---

**Performance Commentary (continued)**

The worst performing stocks in 2024 for the Global High Conviction Fund were:

- Not owning **NVIDIA** (also top detractor in 2023, stock +171% in 2024), the poster child of the AI revolution, was the largest detractor to the strategy performance. While we like the company, we have preferred the risk-reward proposition from TSMC, ASML, and most recently Broadcom, in the semiconductor industry, while we see our holdings in Microsoft, Alphabet and Amazon, benefitting from the AI development. NVIDIA has been the first to benefit from generative AI training as models are trained on GPU chips made by NVIDIA. We chose to invest in other semiconductor stocks that will benefit from the rapid buildout of AI infrastructure such as TSMC given we had more upside to our fair value. Most recently, we chose Broadcom, as AI spending is moving from the training phase to inference, which will help custom ASIC programmes, benefiting them;
- **Nestlé** (shares -27% in USD), has been a big disappointment in 2024 as growth has been under pressure, they suffered from operational problems and the CEO had to resign and was replaced by a veteran of the company. We prefer the position of Nestlé vs. other companies in the food and beverages industry, as they would not suffer the structural headwinds from GLPIs and ultra processed foods to the same extent, being the main two profit drivers for Nestlé, pet food and coffee, where we see structural growth ahead;
- **Daikin** (shares -26% in USD), suffered from disappointing results, a challenging position, bad communication and poor execution. A weak strategy in their North American business (regulatory transition was badly handled), and a poor execution were the drivers behind the announcement of a new CEO, but we discussed this position a few times and decided to exit the position in October. The last results published in February 2025, indicate the company is going to need more time to fix their problems, while the Chinese market continues to be weak.

Aside from investment results, the Sub-Fund is an SFDR Article 8 strategy and as such has environmental, social and governance objectives as well. The Sub-Fund has been invested in companies that in aggregate are well within the Sustainable Development Scenario for climate change. The team maintains an exclusion list to avoid investments in the very worst companies from a sustainability perspective and during 2024 undertook multiple engagements with portfolio companies, some specifically intended to encourage the companies to adopt science-based targets for carbon emission reduction.

**Investment Outlook**

The market is increasingly optimistic about the prospects for the US economy and corporate earnings in 2025 following Trump’s re-election. His administration appears focused on economic growth, engaging extensively with business leaders and signaling a pro-business agenda through expected tax cuts and regulatory easing. While these measures could support corporate earnings, they also bring risks, including higher inflation expectations, rising bond yields, and potential sector-specific policy shifts. For example, the US Health Care sector index declined after Robert F. Kennedy (RFK) Jr.’s appointment as Health and Human Services Secretary, including managed care stocks falling on concerns over potential spending cuts and pharmacy benefit manager (PBM) reforms. Given these dynamics, we expect elevated market volatility as Trump’s legislative program unfolds.

Investor sentiment has clearly shifted in favour of US equities over other regions, particularly Emerging Markets, driven in part by concerns over trade barriers. However, we maintain a more balanced view, as many of the high quality European companies we hold have significant exposure to the US and could benefit from stronger economic growth and a stronger dollar. US outperformance following Trump’s election in 2016 was followed by a rebound in European equities. With European markets significantly underperforming the US in late 2024, it will be interesting to see if a similar catch-up occurs in 2025.

Despite the challenges of policy uncertainty, rising bond yields, and potential tariff risks, global earnings growth expectations for 2025 remain solid, particularly for the US tech sector. The FED retains flexibility to ease policy if needed, and the underlying strength of the US economy suggests no imminent recession. In this environment, we remain confident in our strategy of investing in a concentrated portfolio of high-quality companies with strong competitive advantages, robust margins, and solid balance sheets. These businesses are well positioned to navigate volatility and deliver attractive returns over the long term, even if macroeconomic conditions become more challenging.

**NOMURA FUNDS IRELAND – EUROPEAN HIGH YIELD BOND FUND**  
**INVESTMENT MANAGER’S REPORT (CONTINUED)**

*Source BBH; % Returns in EUR. Benchmark is ICE BofA European Currency High Yield Constrained Index (HPC0).  
\*Since Inception date is 8th November, 2017.*

**Performance Commentary**

For the year ended 31st December, 2024, the Sub-Fund returned 9.13%, compared with the benchmark return of 9.41%, and therefore underperformed the benchmark by 0.28%.

European high yield started 2024 on a strong note with positive returns driven by strong technicals, as inflows into the asset class were consistent among investors betting that central banks were on the verge of cutting rates, while absolute yields continued to be attractive among fixed income investments. Net supply also remained very constrained, as most new issue activity centered on refinancing existing bonds. As a result, bond prices and spreads remained resilient, even as the ECB continued to push back against rate cuts, reducing the market expectations of rate cuts in 2024 in half.

The second quarter continued with steady performance as the market experienced some volatility around government bond yields, but steady fundamental and technical factors supported bond prices. In April, sentiment continued to be buffeted by central bank representatives’ rhetoric around higher-for-longer rates, and the market continued to reduce the number of expected rate cuts for the year. However, in late May and early June, it started to become clear that the ECB saw enough progress on disinflation to move forward with their first rate cut of the cycle.

The third quarter saw a strong start as the market continued to be supported by lower global rates. The yield on the 10-year Bund decreased as the global easing cycle started with two cuts by the ECB and a surprise 50 basis points cut from the Fed. The European high yield market finished off 2024 with a strong tone as stable economic data and a low default environment continued to allow bonds to tighten into the end of the year. In total, spreads tightened about 90 basis points during 2024. In the fourth quarter, we saw a positive impact on risk assets from the election of Donald Trump in the US, even as the threat of tariffs loomed for certain European sectors.

From a ratings perspective, CCC credits underperformed due to idiosyncratic issues, while BBs contributed to overall performance. Sectors that contributed to performance included Software Services, Food & Drug Retailers, and Recreation & Travel. In Software Services, we did not hold Atos, the troubled French IT services provider whose bonds declined significantly as it held negotiations with bondholders and underwent a significant restructuring. Sector detractors included Wireline Telecom, Support Services, and Packaging. Packaging performance was hurt by our overweight in Ardagh Finance bonds. These bonds are subordinated within the Ardagh structure, and the exclusion of these bonds from negotiations to restructure the company’s debt led to lower prices.

**Investment Outlook**

Looking to 2025, we expect stable growth in the European economy, although we are watching risks that include geopolitical instability in Ukraine, political instability in Germany and France, energy prices, and the threat of Trump tariffs. We expect inflation to continue to march lower and the ECB should steadily decrease their benchmark rate in the first half of the year. As of January, the market was pricing in three rate cuts at the ECB against only one cut at the Fed for the first six months of 2025. We see policy divergence between US and European central banks as a key theme for the upcoming year, which could favor European fixed income assets. Default rates should continue to be low, excluding several large well-telegraphed capital structures where restructuring is expected in 2025. As a result, while we think European spreads are somewhat tight and could widen marginally over 2025, lower rates could make up a large portion of that move, leading to another year of positive total return in the European high yield market. The yield provided by the high yield market continues to be attractive, at almost 6%, which provides investors with significant cushion to achieve a positive total return in 2025 under a wide variety of economic and market outcomes.

**NOMURA FUNDS IRELAND – GLOBAL SUSTAINABLE EQUITY FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>

**Performance Commentary**

For the year ended 31st December, 2024, the Sub-Fund returned 12.48% compared with the benchmark return of 17.49% and therefore underperformed the benchmark by 5.01%.

In a difficult year for the Sub-Fund the underperformance was split broadly evenly between selection and allocation. The strategy had been as much as 450 basis points ahead of the benchmark mid-August but was hit by a perfect storm through the remainder of the year as investors digested the implications of a Trump led Red Wave in which the market was very strong, led by mega cap tech, with US Financials performing very well and Healthcare continuing to lag significantly.

The performance of the year was particularly impacted by the fourth quarter of 2024 as the election had a significant effect on financial markets. The strategy returned -5.8% over the quarter underperforming MSCI ACWI by -4.8% in an exceptionally difficult period for the strategy. The underperformance came from both allocation and selection. The overweight to Healthcare was by far the biggest driver of the sector allocation effect with the underweight to Consumer Discretionary also contributing materially. Selection was weak in both Financials and Information Technology. The period saw a near perfect storm for the strategy as markets started to price in a Trump victory and subsequently digested the impact of a Red Wave and news flow surrounding the incoming administration. Healthcare performed particularly poorly as a result of the uncertainty around news that Robert F. Kennedy Jr (RFK Jr) would be the Health and Human Services (HHS) Secretary and comments from the proposed Department of Government Efficiency (DOGE). Industrial and Utility companies leveraged to sustainability related spending lagged and traditional US Financials to which the strategy does not invest on sustainability grounds rallied strongly. Against this backdrop treasury yields also climbed sharply from 3.78% to 4.57% and sit at 4.79% at the time of writing. Despite this mega cap tech, to which the strategy is underweight continued to perform exceptionally well. Indeed whilst the S&P advanced only 2% (USD) the Magnificent 7 (MAG7) rose 16% and the S&P Equally Weighted index declined -2%.

Turning to the full year of 2024, the outperformance of MAG7 was even starker beating the S&P 500 by 42% whilst the S&P Equally Weighted underperformed the regular market cap weighted index by 12%. These conditions continue to prove a headwind for the strategy. Across 2024, the greatest contributors to performance were Boston Scientific (+54%), TSMC (+72%), JCI (+39%), SAP (+39%) and Pentair (+40%) while the greatest detractors to performance were Adobe (-25%), Bank Rakyat (-27%), AIA (-15%), ASML (-6%) and CVS Health (-41%).

Although the team are disappointed to underperform the benchmark for a second year, we continue to be encouraged by our relative performance compared to other sustainable funds. This position appears to be recognised by end clients and has allowed us to expand sustainability AUM more broadly in the team this year with another segregated mandate launched in December. Going into 2025, we are hopeful that we can use this strong relative position to further increase AUM in the UCITS vehicle.

---

**NOMURA FUNDS IRELAND – GLOBAL SUSTAINABLE EQUITY FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

---

**Investment Outlook****Market Outlook**

The market is increasingly excited about the prospects for the US economy and US corporates in 2025 after Trump’s re-election. The economy seems to be the first priority for the administration and Trump has engaged extensively with business owners since his re-election. Although we await the full legislative details after the inauguration, we would expect lower taxes and looser regulation (particularly around acquisitions) to encourage a more dynamic business environment. For investors, this approach helps to underwrite corporate earnings growth but there are several important risks to balance this against. Accompanied with Trump’s arrival has also been a rise in inflation expectations that have pushed 10-year Treasury yields +90 basis points higher in the fourth quarter. Part of this is related to the promise of tariffs that could push up the cost of imports whilst stimulus measures are also likely to be inflationary. After 2 years of >20% gains in the S&P 500, we wonder whether a continued upward drift in yields will allow for further advancement in 2025. In addition, we think certain sectors may face policy risks under a Trump administration. There are winners and losers of all administrations but the speed and direction of change so far has taken the market by surprise in some areas. The US Pharma index fell by –5% after the appointment of RFK Jr as the HHS Secretary given his perceived opposition to certain conventional medicines. Managed care, which generally has been supported by Republican administrations, also sold off –15% in December after concerns on DOGE spending cuts and Trump’s comments on pharmacy benefit management (PBM) reform. For sustainable investors, it is also concerning, though less of a surprise, to see Trump’s administration being more opposed to the renewable transition than Biden. Ultimately, we feel that our investments in affected areas will be quite resilient to the changing landscape but we anticipate heightened volatility in 2025 as Trump’s legislative programme is unveiled.

Outside the US, there appears to have been a clear move amongst investors to sell everything ex-US and buy into US equities. Part of that could be the fears around trade barriers as the Trump administration have floated heightened tariffs. Our view is a little bit more balanced. Many of the large European corporates we hold tend to be global businesses and in many cases the US is the largest portion of earnings. For these businesses, there should actually be a benefit if the US economy flourishes in the way that is expected. On top of that, a stronger USD tends to be supportive of many European corporates that have large USD revenues and high EUR denominated costs in headquarters/SG&A. If we look at the time around the first Trump presidency in 2016, the US markets similarly outperformed European (S&P 500 vs Stoxx 600) by 4% in USD terms during the fourth quarter of 2016 as Trump was elected. However, in the following year European equities rebounded and outperformed US stocks by 5%. Given the sizeable underperformance of Europe in the fourth quarter of 2024 (-12% behind S&P 500), it will be curious to see if any catch-up follows in 2025. China equities also underperformed in the fourth quarter and despite being a strong performer in 2024 (CSI 300 +16%), there remains significant uncertainty over the Chinese economy. Deflation in producer price index (PPI), which has been persistently negative since the third quarter of 2022, and a weak economic outlook that has been complicated by Trump’s election has led to falling yields in Chinese government bonds through the fourth quarter of 2024 and the start of 2025. An increasing number of commentators are pointing to a weakened economic growth profile now being priced by markets. For most of our investee companies, China has been an area of difficulty for 2024 and any green shoots could provide welcome relief that is certainly not priced in the main part.

**Impact Outlook**

The ‘perfect storm’ for the investment performance of the strategy flows through into our impact outlook too and poses questions on both the near term and longer term pace of driving positive change. Trump’s re-election and his appointments to date would indeed suggest at a high level a negative effect on the energy transition and decarbonisation of the US economy, in addition to a retrenchment back to nationalism reducing the support for emerging countries in pursuing their own social and environmental progression.

One key piece of legislation at risk is Biden’s Inflation Reduction Act (IRA), which currently provides significant subsidies for the development of renewables, the adoption of electric vehicles and the broader build out of sustainable infrastructure. Despite the fact that to date the benefits of the IRA have predominantly flowed to Republican states through taxes and job creation, Trump is threatening a full repeal. It is important to note however the vast difference within different types of renewables deployment, with Trump positioned particularly negative on offshore wind, which is located in Democratic states and mostly dependent on an imported supply chain, while onshore wind predominantly uses local content located within red states. The team’s view is that the rule of law will be respected and no projects under construction or with safe harboured equipment (where more than 5% of the capex planned for equipment have already been secured) will be cancelled. However, for offshore wind specifically, we believe any new developments would be put on hold completely, which could potentially lead to further asset impairments across companies within the space.

**NOMURA FUNDS IRELAND – GLOBAL SUSTAINABLE EQUITY FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

---

**Investment Outlook (continued)**

**Impact Outlook (continued)**

The US economy is at an interesting junction, with load demand growth (that has previously been stagnant over the preceding decades) now ramping up driven by several factors such as reshoring of manufacturing, electrification trends and a huge increase in data centre energy demand driven by the artificial intelligence (AI) megatrend. In the next decade or so, an incredible amount of additional generation will be needed to meet this demand and the team believe renewables have a key role to play in delivering those. Even leaving aside the sustainability benefits of renewables generation (noting the strong commitment of the hyperscalers to climate change mitigation), probably even more importantly certain renewable technologies have unmatched speed to market. There are multiple obstacles for fast delivery of new generation today, be it network connection queues, supply chain bottlenecks or costs. Expansions of existing assets or restarts of closed ones are possible but hard to deliver meaningful additions, which are needed to meet the growing demand. In summary, the team’s view is that renewables (excluding offshore wind) will continue to play a crucial role in the US energy system and even without a more sustainability focused administration the electrification megatrend should not be expected to slow down.

It is important to note too that whilst Trump and his administration do have very considerable power to impact the pace of the transition of the US, individual states also have a great deal of autonomy and we would expect (similar to the prior Trump presidency) that certain states will remain committed to their own transition plans, and indeed even ramp these up to somewhat offset federal headwinds. Furthermore, market forces will ultimately dominate and both the competitiveness and practicality of certain renewable technologies alongside the sustainability commitments of corporations will offset these headwinds to a great extent.

Globally, we would also expect countries’ commitments in general to be put through tests with expectations of Trump to leave the Paris Agreement again (which Biden re-joined as one of his first acts in cabinet). Further uncertainty around the sustainability space was fuelled with BlackRock’s announcement of leaving the Net Zero Asset Management (NZAM) Initiative in January 2025, followed by NZAM itself announcing a review to evaluate whether the initiative is fit for purpose. As part of the review, NZAM removed commitments and signatories list from their website. What is very clear from this is that the sustainability community must itself improve how it works with other stakeholders and humbly seek to address the gaps in the difference of opinion or understanding. Now is certainly not the time for ourselves to retreat to our own form of nationalism and narrow sightedness.

**Performance Commentary**

For the year ended 31st December, 2024, the Sub-Fund returned 12.85% compare with the benchmark return of 7.66% and therefore outperformed the benchmark by 5.19%.

Global equities delivered positive performance for the year despite periods of volatility. Optimism over moderating inflation and relatively stable economic growth supported equity performance. Corporate earnings also appeared relatively resilient despite headwinds for global economic growth. Investors welcomed interest rate cuts by the European Central Bank, Bank of England and Fed, even though the Bank of Japan shifted to tightening mode as Japan suffered its highest inflation in decades. In the third quarter, China announced a stimulus package aimed at addressing an extended economic downturn.

From a geographic perspective, stock selection in the US contributed. Investments in Taiwan detracted.

On a sector basis, health care was an area of strength. Stock selection in the biotechnology industry aided relative performance. Shares of ADMA Biologics, a notable contributor, rose on excitement over its increasing plasma collections and improving production yields. Consumer discretionary investments also contributed. Resilient consumer spending trends lifted a number of portfolio holdings. These included sporting goods company Asics, which delivered very strong revenue and earnings growth.

On a negative note, energy positioning detracted. Stock selection and an underweight in the energy sector hindered relative performance. Upstream oil and gas company Kosmos Energy was a detractor after trimming production guidance due to a slower ramp-up on a project in Ghana. Investments in the industrials sector also detracted, primarily because of stock selection. Relative detractors included Airtac International Group, a global supplier of pneumatic pumps that suffered earnings headwinds.

**Investment Outlook**

The Sub-Fund continues to invest in companies where we believe fundamentals are strong and improving but share price performance does not fully reflect these factors. Our process is based on individual security selection, but broad themes have emerged.

**A more favourable backdrop for small caps.** Macro events have overshadowed company fundamentals in recent years, with small-cap stocks bearing the brunt of worries about inflation, rising interest rates and slowing economic growth. This period of relative underperformance compared to large caps has been an exception compared to a record of small-cap outperformance since 2001. Though inflation remains above central bank targets, we are investing with a better economic backdrop than a year ago. We believe this could allow investors to refocus on earnings growth as the key driver of stock prices.

**Small-cap valuations remain attractive relative to large caps.** We continue to identify small-cap companies that we believe have the potential to deliver accelerating and sustainable earnings growth. Declining interest rates and an improving outlook for M&A may also provide a tailwind for small-cap markets. We believe bottom-up stock selection and prudent diversification remain critical as we find growth opportunities across various sectors and geographies.

**Data center demand and artificial intelligence are driving earnings growth for select information technology companies.** We have continued to find compelling investments in companies tied to strong semiconductor, data center and cybersecurity spending. AI continues to fuel increased demand for computing capacity, semiconductor testing and measurement, data center space and advanced semiconductors.

**AMERICAN CENTURY GLOBAL SMALL CAP EQUITY FUND  
INVESTMENT MANAGER'S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

---

**Investment Outlook (continued)**

**We see opportunities in select consumer discretionary companies that are benefiting from stock-specific drivers of earnings growth.** We continue to find attractive opportunities in apparel companies and specialty retailers that we believe will continue to gain market share and deliver accelerating earnings growth.

**We are finding opportunities among industrial companies.** Reshoring and nearshoring trends continue as a catalyst as businesses move operations closer to home or friendlier and lower-cost countries. We also see opportunities in companies with end markets tied to infrastructure, electrification and aerospace.

**AMERICAN CENTURY GLOBAL GROWTH EQUITY FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	-2.48	0.53	18.91	6.57	285.85
<b>Benchmark</b>	-2.37	-0.99	17.49	17.21	251.87
<b>Out/(Under) Performance</b>	-0.11	1.52	1.42	-10.64	33.98

*Source BBH; % Returns in USD. Net Returns. Institutional Class. Benchmark is the MSCI All Country World Net Total Return Index.  
\*Since Inception date is 14th April, 2010 (Please note that this Sub-Fund become a Sub-Fund of Nomura Funds Ireland by way of a merger on 2nd August, 2019).*

**Performance Commentary**

For the year ended 31st December, 2024, the Sub-Fund returned 18.91% compared with the benchmark return of 17.49%, and therefore outperformed the benchmark by 1.42%.

Contrary to many predictions, 2024 turned out to be a year of robust performance for global equities. A range of factors contributed to this rise, including resilient economic growth, slowing inflation, healthy corporate earnings and investor optimism surrounding the prospect of Fed rate cuts and their likely impact. Investor enthusiasm for artificial intelligence carried over from 2023, leading to substantial stock gains for large technology companies poised to benefit from AI-related innovation.

On a sector basis, stock selection in industrials had the greatest positive impact, whereas selection and an underweight in communication services held back relative return. From a geographic perspective, stock selection in Japan bolstered relative performance, while selection in Ireland weighed on results. The largest stock contributor for the period was an overweight position in NVIDIA. The chipmaker’s stock gained on investor optimism that demand for its AI chips would remain strong, underscored by indications that Amazon and Apple will maintain their commitment to investing in AI advancements. The largest detractor was ICON. Shares of the company, which provides outsourced clinical trial and commercialization services to the pharmaceuticals industry, declined following its disappointing third-quarter results and reduced guidance for the full year 2024.

**Investment Outlook**

**Artificial intelligence spending continues unabated despite elevated interest rates.** Since many of the biggest buyers are spending cash, high interest rates are not proving to be a headwind to AI infrastructure investment. As a result, the technology upgrades required to handle massive amounts of data at high speeds are driving revenue growth across a wide range of businesses. Beneficiaries include companies that make components for processing data and cooling the equipment inside data centers. Power demand is also notable, with companies such as Microsoft and Amazon making multibillion-dollar investments to develop the dedicated power sources they need to maintain their competitive edge.

**Accelerated spending on AI infrastructure expands to power generation and distribution.** Advancements in AI, the rise of green energy and aging infrastructure are fueling significant demand for electricity generation and distribution. In addition, operators of large-scale data centers have announced substantial capital spending plans to address the rising power requirements for accelerated computing. In this environment, we see potential investment opportunities ranging from utilities that are increasing their power generation capacities to companies that provide essential services and products along the supply chain.

**Financials present opportunities.** This sector has performed well in the wake of the US presidential election due to expectations the incoming Trump administration may reduce the regulatory burden on financial institutions. We’ve also seen a nascent recovery in M&A activity, which would be positive for investment banks. Furthermore, many expect the administration to focus on higher US economic growth, which would be financed through US banks.

**We are limiting our exposure to industries with stagnant demand.** Slowing global growth has weighed heavily on eurozone exporters of machinery, vehicles, chemicals and agri-food products. Though stimulus measures have the potential to reignite demand, China’s slowdown has been especially impactful since the country is a key end market for Europe-based industrial companies. Instead, our non-US exposure is focused on companies whose products and services address attractive opportunities such as semiconductor manufacturing and the commercialization of innovative treatments for diabetes and obesity.

**Positive trends continue in Japan. We continue to find opportunities in Japan-based equities.** Favorable developments include increased digitalization driven by rising labor costs and inflation, which benefits information technology consulting companies. Japanese industrial companies are also profiting from secular opportunities such as growing global and local electricity demand. Additionally, corporate culture improvements, such as better capital allocation and enhanced governance, are making Japanese equities more attractive.

**AMERICAN CENTURY CONCENTRATED GLOBAL GROWTH EQUITY FUND**  
**INVESTMENT MANAGER’S REPORT (CONTINUED)**  
**For the year ended 31st December, 2024**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	-2.28	-1.79	14.34	4.72	321.64
<b>Benchmark</b>	-2.37	-0.99	17.49	17.21	250.89
<b>Out/(Under) Performance</b>	0.09	-0.80	-3.15	-12.49	70.75

*Source BBH; % Returns in USD. Benchmark is the MSCI All Country World Net Total Return Index.  
 \*Since Inception date is 7th November, 2011 (Please note that this Sub-Fund became a Sub-Fund of Nomura Funds Ireland by way of a merger on 2nd August, 2019).*

**Performance Commentary**

For the year ended 31st December, 2024, the Sub-Fund returned 14.34% compared with the benchmark return of 17.49%, and therefore underperformed the benchmark by 3.15%.

Contrary to many predictions, 2024 turned out to be a year of robust performance for global equities. A range of factors contributed to this rise, including resilient economic growth, slowing inflation, healthy corporate earnings and investor optimism surrounding the prospect of Fed rate cuts and their likely impact. Investor enthusiasm for artificial intelligence carried over from 2023, leading to substantial stock gains for large technology companies poised to benefit from AI-related innovation.

On a sector basis, real estate had the largest negative impact due to stock selection and an overweight, whereas stock selection and an underweight in the energy sector provided a relative contribution. From a geographic perspective, stock selection in Ireland weighed on relative performance, while selection in the U.K. buoyed relative results. The top individual detractor for the period was Entegris. The semiconductor materials supplier’s financial results for the second quarter of 2024 included earnings and revenue that exceeded estimates. However, sales guidance for the third quarter fell below consensus expectations, underwhelming investors. The largest stock contributor was an overweight position in NVIDIA. The chipmaker’s stock gained on investor optimism that demand for its AI chips would remain strong, underscored by indications that Amazon and Apple will maintain their commitment to investing in AI advancements.

**Investment Outlook**

**Artificial intelligence spending continues unabated despite elevated interest rates.** Since many of the biggest buyers are spending cash, high interest rates are not proving to be a headwind to AI infrastructure investment. As a result, the technology upgrades required to handle massive amounts of data at high speeds are driving revenue growth across a wide range of businesses. Beneficiaries include companies that make components for processing data and cooling the equipment inside data centers. Power demand is also notable, with companies such as Microsoft and Amazon making multibillion-dollar investments to develop the dedicated power sources they need to maintain their competitive edge.

**Accelerated spending on AI infrastructure expands to power generation and distribution.** Advancements in AI, the rise of green energy and aging infrastructure are fueling significant demand for electricity generation and distribution. In addition, operators of large-scale data centers have announced substantial capital spending plans to address the rising power requirements for accelerated computing. In this environment, we see potential investment opportunities ranging from utilities that are increasing their power generation capacities to companies that provide essential services and products along the supply chain.

**Financials present opportunities.** This sector has performed well in the wake of the US presidential election due to expectations the incoming Trump administration may reduce the regulatory burden on financial institutions. We’ve also seen a nascent recovery in M&A activity, which would be positive for investment banks. Furthermore, many expect the administration to focus on higher US economic growth, which would be financed through US banks.

**We are limiting our exposure to industries with stagnant demand.** Slowing global growth has weighed heavily on eurozone exporters of machinery, vehicles, chemicals and agri-food products. Though stimulus measures have the potential to reignite demand, China’s slowdown has been especially impactful since the country is a key end market for Europe-based industrial companies. INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	1.20	-4.80	13.34	-14.37	55.81
<b>Benchmark</b>	-0.14	-8.01	7.50	-5.65	51.62
<b>Out/(Under) Performance</b>	1.34	3.21	5.84	-8.72	4.19

*Source BBH; % Returns in USD. Benchmark is the MSCI Emerging Markets (Net) Index.  
\*Since Inception date is 8th November, 2017 (Please note that this Sub-Fund become a Sub-Fund of Nomura Funds Ireland by way of a merger on 2nd August, 2019).*

**Performance Commentary**

For the year ended 31st December, 2024, the Sub-Fund returned 13.34% compared with the benchmark return of 7.50%, and therefore outperformed the benchmark by 5.84%.

The investing environment of the prior year was characterised by uncertainty around monetary easing, followed by interest rate cuts by major central banks. Excitement around artificial intelligence fueled market gains, especially in the US, but concern around economic growth and the property market in China weighed on stocks elsewhere, including EM. Later in the year, worries about the impact of potential tariffs from the US on trade and growth pressured markets. EM equities advanced during the period but trailed their DM counterparts when including US stocks. Latin American stocks declined sharply, led lower by Brazil, as worsening fiscal dynamics, the depreciation of the Brazilian real, high inflation and hawkish fiscal policy weighed on the market. Eastern European EM also finished lower. Asian EM equities advanced but trailed broad DM indices, despite strength in Taiwan. China’s market rose, narrowly outperforming global and DM stocks, amid shifting sentiment surrounding the government’s ability to stimulate growth. Taiwanese equities advanced sharply, driven by strength in technology stocks, especially those linked to AI. On a sector basis, consumer discretionary (driven by stock selection) and materials (underweight) were key drivers of outperformance. In contrast, financials was the largest relative detractor during the period, driven by stock selection. Taiwan Semiconductor Manufacturing Co. (TSMC) was the largest individual contributor, bolstered by the world’s largest chipmaker’s continued dominance of leading-edge semiconductor production, surging demand for and sales growth from AI chips and rebounding margins. We see strong earnings visibility from expanding generative AI demand and TSMC’s advantage in leading-edge technology. The single-largest detracting stock was Samsung Electronics. Memory shipments and price increases were expected to fall short of expectations because of sluggish smartphone and PC sales. Smartphone and PC makers with high inventory were expected to adopt conservative purchasing strategies for components (including memory), as new product demand fell short of expectations. In our view, while sluggish demand from PCs and smartphones is a likely near-term headwind, server demand remains robust. From a geographic perspective, holdings in India and Taiwan were the largest contributors. Positioning in Thailand and Mexico weighed on relative returns.

**Investment Outlook**

EM assets held up well in 2024, thanks to broadly resilient global economic activity, another leg down in inflation, the beginning of interest rate cuts by core central banks and announced stimulus measures from China. Now, the global backdrop brings uncertainties with regard to the policy pledges of the incoming US administration, the US Fed shifting its focus back to inflation and questions about a sustainable rebound in China’s economic activity.

Nonetheless, we remain constructive and expect resilient EM growth in 2025, supported by Chinese stimulus. Beijing has set the tone for more forceful and effective economic policies prioritizing domestic demand and structural reform. Further, lower inflation and economic slack still leave space for certain EM central banks to ease. We continue to focus on markets with compelling domestic fundamentals and a prudent mix of monetary and fiscal policy.

China’s outlook is sensitive to tariff scenarios. Recent indicators suggest green shoots emerging but, eventually, more policy support is needed. However, before applying more stimulus, policymakers may wait to first assess the policies of the incoming Trump administration. For now, recently announced policies are sufficient to ensure that economic activity does not stall. Growth accelerated in China during the fourth quarter of 2024.

Growth in India has softened after several phenomenal years, yet the country remains the strongest EM growth story. The economy benefits from a young demographic profile and new infrastructure. While urban demand is slowing, rural demand is expected to recover.

**AMERICAN CENTURY EMERGING MARKETS EQUITY FUND  
INVESTMENT MANAGER'S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

---

**Investment Outlook (continued)**

ASEAN markets offer many secular growth stories and benefit from ongoing investment. Electric vehicles and artificial intelligence are changing the region's investment landscape.

2024 was tough for Latin American equities as currencies depreciated. The sell-off reflected heightened political risk and ongoing fiscal concerns across most of the region. We believe Brazil will likely remain in a high interest rate environment, and we tend to favour exporters. Mexican equities reflect heightened political noise, high interest rates and fiscal concerns. Risk from potential policy shifts under a new US administration (such as tariffs and immigration) is an additional source of volatility.

We remain constructive on EM equities, driven by our belief that earnings will likely remain resilient and our expectations of additional policy support from China. EM equities remain cheap on most valuation metrics and are underowned, in our view. There will be challenges in 2025 — much like we experienced in 2024 — which should lead to dispersion across countries and sectors, bringing support for our bottom-up approach and focus on stock selection.

*Source BBH; % Returns in USD. Benchmark is the MSCI All Country World Net Total Return Index.  
\*Since Inception date is 3rd February, 2020.*

**Performance Commentary**

For the year ended 31st December, 2024, the Sub-Fund returned 22.39% compared to the benchmark return of 17.83% and therefore outperformed the benchmark by 4.56%.

**Market Review**

During the first quarter of 2024, the global equity market remained almost unchanged from early to mid-January, as the uncertainties surrounding the situation in the Middle East intensified, while expectations for new artificial intelligence (AI) related semiconductors announced by a major US semiconductor manufacturer increased. Towards the end of the month, the University of Michigan Consumer Sentiment Index for January (preliminary) exceeded market expectations, and the core PCE (Personal Consumption Expenditures) price index for December 2023 showed a year-on-year growth rate that was close to a 3-year low. This was well received by the market and led to an increase in stock prices.

In February, the Federal Open Market Committee (FOMC) indicated a continued monetary tightening stance, which led to some declines, but the market rallied due to strong earnings reports from several major information technology (IT) companies, including leading semiconductor manufacturers.

In March, there were periodical declines due to speculation that the US government would strengthen regulations on exports of AI-related semiconductors to China. However, the market appreciated after FRB Chair Jerome Powell expressed a positive outlook for the start of interest rate cuts. Towards the end of the month, the market rose as the FOMC indicated a sustained positive economic outlook, while also maintaining expectations of a possible three interest rate cuts in 2024, leading to an overall upward trend during this period.

When looking at sector performance, the IT and Communication Services sectors led the way in performance terms, with some large-cap stocks announcing strong earnings and proactive shareholder return policies. On the other hand, sectors such as Real Estate, Utilities, and Materials weakened due to a rise in US long-term interest rates, causing a backlash after these sectors had benefitted from declining interest rates up to this point.

Stock selection was the major contributor for the first quarter. Our overweight position in the IT sector and stock selection within it were the major standouts. Stock selection in Communication Services and Industrials also contributed positively to our performance.

Among individual stocks, stock selection among structural growth companies in the New Technology theme were major contributors. Additionally, stocks outside of the IT sector, such as Meta Platforms from the Entertainment and Experience theme and Eaton from the “Internet of Things (IOT)"/Reshoring theme contributed positively. Major positive contributors were NVIDIA and Micron Technology (New Technology). Robust earnings announced for the November-January quarter, which were driven by strong demand for AI semiconductors, led to an acceleration in performance growth and resulted in a rise in stock prices for NVIDIA. Similarly, Micron Technology reported strong earnings for the December-February quarter, with expectations of rising product prices due to increased demand for high-performance memory for AI semiconductors, leading to a favourable outlook and a rise in their stock price. Apple Corp. from the New Technology theme, in which we had an underweight position, contributed positively. Even though we continue to value their high profitability and the stability of their business, we judged that mid-term growth expectations from their multifaceted businesses in software and services have been partially factored into the stock price; so we decided to keep our underweight position. On the other hand, Snowflake from AI/Data Science was a major negative contributor. The stock price fell as there was increased uncertainty surrounding their future earnings growth due to actions such as the withdrawal of mid-term targets and changes in their management team.

**NOMURA FUNDS IRELAND – GLOBAL MULTI-THEME EQUITY FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

---

**Performance Commentary (continued)**

**Market Review (continued)**

Our focus has shifted towards the monetary policies of central banks, as well as the corporate results for the January to March quarter and earnings forecasts. Against this backdrop, there has been uneven performance among individual companies. As such, we have adjusted our portfolio in response to these changes in the market environment. We reduced our overweight position in the IT sector but increased our overweight position in Communication Services. We maintained overweight positions in countries such as the US from the previous quarter, while maintaining underweight exposures to countries such as Japan. Moreover, we reduced the exposure to themes such as IoT/Reshoring and increased the exposure to themes such as Entertainment/Experience.

Major purchases were ICICI Bank (Demographic Dividend). We bought shares in ICICI Bank, which is expected to grow in the medium to long term thanks to India's high economic growth potential and strong domestic demand for financial services. Also, Progressive Corp (Tech Solutions) was added as we expect the company to achieve medium-term growth based on efficient utilization of driving data, as well as anticipated continued increases in insurance premiums. Major sales included PTC (IoT/Reshoring). We exited our position in this stock as the long-term growth expectations for software in computer-aided design (CAD) and product lifecycle management (PLM) that are capable of managing production from start to finish remain unchanged, however, we believe that the growth expectations have been somewhat factored into its stock price. We also disposed of Tesla (Tech Solutions) before the quarterly result announcement, due to concerns about a slowdown in business growth as the company's business environment worsened.

In the second quarter of 2024 the global equity market declined in early April as expectations for an early rate cut diminished after a key member of the FOMC commented that it would be preferable for the Fed to take its time to address inflation. Meanwhile, reports surfaced that the Chinese authorities had instructed major domestic telecommunications companies to gradually exclude the use of foreign-made semiconductors. During the January-March quarterly results announcements in late April, major IT companies demonstrated strong earnings performance that exceeded market expectations. Some companies also indicated a more positive approach to shareholder returns. This was well received by the market and led to an increase in stock prices.

In early May, the market advanced as sales from a major smartphone manufacturer for the January-March quarter exceeded market expectations, and the growth rates of the number of employees and average wages in the April employment statistics fell below market expectations, raising hopes of an early interest rate cut. Subsequently, the strong demand for AI-related semiconductors resulted in one major semiconductor manufacturer's sales forecasts for the May-July quarter significantly exceeding market expectations, which was well received. Conversely, there was some risk averse sentiment after the US Composite PMI (Purchasing Managers' Index) flash estimate reached its highest level in over two years, leading to heightened inflation concerns and resulting in mixed market sentiment.

In early June, the market surged as a US IT company providing network equipment for enterprises saw a sharp increase in revenue from their AI server business for the May-July quarter, leading to a significant rise in stock prices. Following that, the market reacted positively to factors such as the May US Consumer Price Index (CPI) and Producer Price Index (PPI) falling below market expectations. However, profit-taking activity intensified, particularly among US semiconductor manufacturers that had seen significant stock price increases, leading to a lacklustre performance in stock prices.

When looking at sector performance, the IT and Communication Services sectors stood out, driven by some large-cap stocks announcing strong earnings and proactive shareholder return policies. The Utilities sector excelled, benefitting from the decline in US interest rates due to rising expectations of rate cuts. On the other hand, concerns over a growing number of macroeconomic indicators that seemed to be signalling an economic slowdown resulted in risk aversion and underperformance in sectors such as Real Estate, Materials, and Industrials.

Sector allocation was the major contributor for the second quarter of 2024. Our overweight position in the IT sector was the major standout. Stock selection in the Communication Services and Industrials sectors also contributed positively to our performance.

**NOMURA FUNDS IRELAND – GLOBAL MULTI-THEME EQUITY FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

---

**Performance Commentary (continued)****Market Review (continued)**

Among individual stocks, selection of structural growth companies in the New Technology theme was a major contributor. Also, stocks outside of the IT sector, such as Alphabet Inc. from the AI/Data Science theme and Asics Corporation from the Entertainment/Experience theme contributed positively. Major positive contributors were Arista Networks, Inc. (New Technology). AI training requires more computing power, and creating large AI server clusters with high-performance network equipment is one way to accelerate computing power. Arista offers high-performance network equipment for hyper scalers. They plan to increase their production output in the second half of this year. Investors gradually recognized their growth potential as networking chip makers highlighted the importance of networking in the AI era, resulting in a rise in Arista’s stock price. NVIDIA Corporation (New Technology) also contributed positively, as a major EV maker disclosed that it was using a big AI server cluster for training that utilizes many GPUs. It announced robust earnings for the February to April quarter, resulting in accelerated performance growth driven by strong demand for AI semiconductors. This boosted NVIDIA’S stock price further. On the other hand, a major negative contributor was Apple Inc. (New Technology). Not holding the stock had a negative impact, as it performed well due to the expectations of an accelerating smartphone replacement cycle with the announcement of new features incorporating AI. Also, the position in Inspire Medical Systems, Inc. (Global Ageing) had a negative effect. Although Inspire is a leading provider of minimally invasive treatment for sleep disorders and still has strong revenue growth, the leading indicators of its growth momentum such as utilization and procedures/centers shows a below trend level. At the same time, markets heightened concerns over GLP-1 related risks to the ultimate total addressable market (TAM) of Inspire, especially after Eli Lilly’s clinical trial data showed that Tirzepatide was effective as a therapy option for individuals with obesity and moderate-to-severe obstructive sleep apnea (OSA).

Focus has shifted to the monetary policies of central banks, changes in economic outlooks, and election results in major countries. Against this backdrop, there has been uneven performance among individual companies. As such, we have adjusted our portfolio in response to these changes in the market environment. We reduced our overweight position in IT while shifting our underweight position in Healthcare to overweight. Also, we maintained our overweight positions in countries such as the US from the previous quarter, while being underweight on countries such as the United Kingdom. Moreover, we reduced the exposure to themes such as AI/Data Science and increased the exposure to themes such as Global Aging.

Major purchases were Broadcom (New Technology). While data centers are expanding their AI capabilities and interconnecting AI servers, investors are underestimating the increase in the number of chips per cluster. Therefore, we bought it to capture those growth gap opportunities. Another major purchase was Uber (Entertainment/Experience). We bought Uber, judging the expansion of user numbers and usage frequency of ride-sharing services and food delivery services, along with the improvement in the competitive environment, will lead to an improvement in performance. On the other hand, major sales included Idexx Laboratories (Entertainment/Experience) and Workday (AI/Data Science). For Idexx, while we have expectations for the long-term performance growth of the animal clinical diagnostics business, we sold off our entire position in Idexx due to the lower-than-expected recovery of anticipated clinic visits. For Workday, due to uncertainty in the macro environment, Workday’s customers, especially small and medium-sized businesses, are considering to reduce their IT investments. This led to concerns about the slowdown in growth of Workday’s product demand, so we decided to liquidate the position.

In the third quarter the global equity market advanced in early July as Fed Chairman Jerome Powell indicated that the slowdown in inflation is likely to continue, along with expectations of a gradual economic slowdown. However, from mid to late July, the US government issued a request to its main allied trading partners to enhance regulations on semiconductor exports to China. This raised concerns about the negative impact such regulations would have on the performance of US semiconductor manufacturers. Additionally, US automakers reported second-quarter earnings that fell short of market expectations, which in turn led to a decline in stock prices and resulted in an overall drop for the month.

In early August, the stock market experienced a steep decline amid concerns about an economic downturn. The ISM manufacturing index for July fell below the pivotal level of 50 for a fourth consecutive month, and the unemployment rate for July rose to 4.3%, the highest level in nearly three years. After starting the month with a significant sell off, the market rebounded from mid to late August, helped by July’s retail sales data, which were better than expected. This alleviated fears of an economic slowdown, and equity markets ended higher on the month.

The equity market declined in early September as the August ISM manufacturing index fell below the pivotal level of 50 for a fifth consecutive month, again raising concerns of a slowing economy. US non-farm payroll figures for August also fell short of market expectations. However, the market advanced from mid to late September, following the decision by the FOMC to cut the policy interest rate by 0.5%, which clarified the Fed’s commitment to supporting the labor market. Additionally, driven by rising demand for AI-related memory, US semiconductor manufacturers indicated a stronger-than-expected outlook for the period between September to November, which also supported equity markets for the month.

**NOMURA FUNDS IRELAND – GLOBAL MULTI-THEME EQUITY FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

---

**Performance Commentary (continued)****Market Review (continued)**

When looking at sector performance, Real Estate and Utilities stood out as a result of the cuts made to US interest rates. On the other hand, the Energy sector's performance was negative due to declining oil prices, and the performance of sectors such as Consumer Staples lagged behind the benchmark.

During the third quarter, stock selection detracted most from the performance, especially in IT and Health Care. Sector allocation also had a negative effect, and this was largely attributable to the overweight position in the IT sector.

Among individual stocks, stock selection from the IoT/Reshoring theme was a major positive contributor. On the other hand, stocks in the IT sector under the themes of New Technology and AI/Data Science had a negative impact. A major positive contributor was Constellation Energy Corporation from the IoT/Reshoring theme. The company's stock price advanced after signing a long-term power supply agreement with a major IT company that provides cloud services. Against the backdrop of rising demand for AI-related services, the potential for future earnings growth through increased power demand for data centers was viewed positively. ASICS Corporation from the Entertainment/Experience theme was also a major contributor. In July, the company revised its full-year earnings forecast for 2024 upward, resulting in their stock price increasing. They also achieved their target of attaining over 80 billion yen in operating profit two years ahead of schedule. The target was originally set for financial year 2026 in its medium-term management plan. This led investors to heighten expectations for ASICS' medium-term growth, further boosting its stock price. On the other hand, major negative contributors included Micron Technology from the New Technology theme. While expectations toward the company remain high due to the strong demand for high-performance HBM (High Bandwidth Memory) used for AI servers, the increased production capacity and supply from Chinese memory manufacturers in the conventional memory market have led to widespread expectations of lower future memory prices, resulting in a decline in stock prices. Confluent Inc. from the AI/Data Science theme also had a negative effect. In their second quarter of 2024 earnings report, which was released at the end of July, the growth rate of their cloud business and their NRR (net retention rate) came in below what the company targeted. This was partially attributable to the volatile tendencies of the digital native customers' consumption patterns. We disposed of this stock in August.

In terms of transactions, we made some adjustments to reduce our risk exposure and to protect our performance in the highly volatile market environment. After the equity market recovered from the August 5<sup>th</sup> collapse, a top-down portfolio adjustment was completed in early September. We shifted our overweight position in IT to underweight, while shifting our underweight position in Utilities to overweight. We also maintained our overweight position from the previous quarter in countries such as the US. We reduced our exposure to themes such as AI/Data Science and increased our exposure to themes such as Established Brands.

Major purchases were Constellation Energy from the IoT/Reshoring theme and Walmart from the Established Brands. We bought Constellation Energy Corp under the rationale that an increase in electricity demand for data centers driven by the expansion of generative AI will lead to significant mid- to long-term growth. Although the intent of adding Walmart was to reduce the portfolio's risk level, we also think the increase in necessity-based rather than luxury based spending will benefit the company. We bought Pepsico, which we also categorized under the Established Brands theme, because their ability to deliver growth while being less-affected by macroeconomic conditions. On the other hand, major sales included Alphabet from the AI/Data Science theme. We exited our position in Alphabet due to concerns over their advertising business, which could face an antitrust law violation ruling. Besides Alphabet, we exited our position in Amazon, which we also categorize under the AI/Data Science theme, in order to switch positions to more stable, less volatile consumer related names.

During the fourth quarter, US equities delivered modest gains, while equities from non-US developed markets and emerging markets underperformed against US equities, because of the stronger dollar and concerns about a slowing global economy. At the same time, growth and value diverged during the fourth quarter, reflecting investor preferences for growth stocks, particularly in Technology related companies. The MSCI ACWI Growth Index outperformed with a quarterly return of 3.4%, while the MSCI ACWI Value Index declined by 4.9%. In the developed markets, Denmark was the weakest. In the emerging markets, South Korea declined as the country went through a political upheaval following President Yoon Suk Yeol's impeachment after he briefly declared martial law. Latin America faced significant challenges as Brazil and Mexico fell due to currency depreciation and political uncertainty. Sector dispersion remained a dominant theme during the quarter. Amid support from strong consumer demand, growth oriented sectors such as Consumer Discretionary and Communication Services stood out. The IT sector also posted solid gains as a result of the enthusiasm surrounding the AI revolution. Mega cap stocks such as the "Magnificent Seven" had driven the equity market throughout the year, most notably NVIDIA, which rallied by nearly 180% in 2024. In contrast, defensive sectors as well as the Materials sectors underperformed during the quarter, and faced headwinds such as rising interest rates and expectations of more moderate inflation.

INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

---

**Performance Commentary (continued)**

**Market Review (continued)**

During the fourth quarter, stock selection in Health Care, Consumer Staples and IT were major contributors. Our underweight position in Materials contributed positively to the performance. Country allocation also had a positive effect in addition to our overweight position in the US.

Among individual stocks, major positive contributors were Marvell Technology and Broadcom, both from the New Technology theme. In December, both companies delivered strong financial results driven by custom ASICs (application specific integrated circuit) and an opportunistic outlook for AI accelerators, resulting in their stock prices advancing. Investors believe there is further upside in their outlook as these chips are very cost-efficient for specific workloads compared to GPUs (Graphics Processing Unit). This has raised investor expectations for both companies' medium-term growth, which further boosted their stock prices. Major negative contributors included the exposure to Tesla. The company's stock price advanced after the third quarter of 2024 results in October, which reported better than expected earnings. Their stock price rose more sharply in November and December under investors' expectations for Robotaxi/Cybercab and humanoid robots, along with the view that CEO Elon Musk would hold an influential position in the Trump administration. Although the company has attractive opportunities backed by the ongoing AI revolution, current valuations already seem to have priced in the potential upside.

During the quarter, we made some minor adjustments to the portfolio based on fundamental considerations. In terms of sector position, we are now back to an overweight IT exposure. From a theme allocation perspective, we increased our position in the AI/Data Science theme the most, and trimmed our positions in Entertainment/Experience, IoT/Reshoring and Established Brand themes.

In terms of major purchases, we bought back Amazon and Alphabet, both of which we categorize under the AI/Data Science theme. We bought back Amazon because we believe their future growth will be derived from their highly profitable advertising business and because the growth of their cloud business has room to accelerate due to the strong demand for AI. We also bought back Alphabet because we believe their future growth in the digital advertising market will likely be driven by improved advertising effectiveness through the use of generative AI. We also believe their cloud business has room to grow as well, and the driver will also be the strong demand for AI. On the other hand, we disposed of our position in Meta Platforms in the Entertainment/Experience theme. We believe their future growth in the digital advertising field driven by AI improving their advertising effectiveness has already been priced in to their stock price. Simultaneously, we exited our position in Trade Desk, which we also categorize under the Entertainment/Experience theme. We believe the expected growth driven by the expansion of their advertising businesses for video streaming services has already been factored in to their stock price as well.

**Investment Outlook**

While we must keep a close eye on market concentration and current rich valuations, the de-coupling of monetary policy by major central banks, progress in the disinflation trend, and technological innovation will drive the divergence in business cycles globally even further. Despite this, the divergence in the performance trends of individual companies is noticeable, and market volatility has increased, making it necessary for us to adjust the portfolio accordingly.

We believe the US will remain the global epicentre of growth because their business cycle is still in the expanding phase, the labour market is healthy, and AI-related capital spending continues to grow. In contrast, Europe will continue to face structural challenges, while EM will struggle with higher-for-longer interest rates, a strong US dollar, and incremental trade policy headwinds.

At the same time, we expect mergers and acquisitions to recover, thanks to a mix of supportive economic and financial conditions, as well as a more favourable regulatory regime, especially in the US. Meanwhile, we are carefully monitoring the BOJ movement, as the yen carry trade seems to have contributed to the recent strong performance of growth stocks. Because of this, we believe a reversal of the carry trade could pressure the BOJ and create volatility across markets. The BOJ's move toward normalizing Japan's monetary policy even further will be supported by a virtuous cycle between wages and prices that helps anchor inflation expectations at around 2%.

**NOMURA FUNDS IRELAND – GLOBAL MULTI-THEME EQUITY FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

---

**Investment Outlook (continued)**

Regarding AI enthusiasm, we believe AI has the potential to boost GDP growth through productivity improvements, similar to what we experienced during the internet revolution, which eventually resulted in a boost to productivity of around one percentage point per year. Although we are still early in this process, AI is already leading to cost structure improvements for some companies. For example, computer programming and coding groups have reported dramatic increases in productivity.

In terms of portfolio construction, we will focus on identifying companies with balance sheet resilience, good management, and operational agility. We see themes such as generative AI technology, digital transformation, cybersecurity, and de-carbonization as remaining attractive. The pandemic has accelerated many emerging technology trends and changed working styles and consumer behaviours. Beneficiaries will not just be technology companies but also any company that better utilizes data and new technologies.

**NOMURA FUNDS IRELAND – JAPAN SMALL CAP EQUITY FUND**  
**INVESTMENT MANAGER’S REPORT (CONTINUED)**  
**For the year ended 31st December, 2024**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	2.36	1.08	15.30	51.66	72.62
<b>Benchmark</b>	3.29	4.51	16.36	45.50	60.39
<b>Out/(Under) Performance</b>	-0.93	-3.43	-1.06	6.16	12.23

*Source BBH; % Returns in JPY. Benchmark is the Russell Nomura Small Cap (RNS) Index.  
 \*Since Inception date is 7th February, 2020.*

**Performance Commentary**

For the year ended 31st December, 2024, the Sub-Fund recorded a return of 15.30% compared with the benchmark return of 16.36% and therefore underperformed the benchmark by 1.06%.

The benchmark (RNS Index) rose by 16.36% in the calendar year ending December 2024, during which it gained 11.9% in the first quarter, gained 0.6% in the second quarter, declined by -1.1% in the third quarter, and concluded with a +4.5% gain in the fourth quarter in local currency terms. The RNS Index underperformed relative to the TOPIX Index, which appreciated by 20.5% over the same review period. In the first quarter, the Nikkei 225 Index reached a new record high for the first time since December 1989, around the apex of Japan's economic bubble. Among small cap stocks, value stocks performed well due to expectations of improvements in management attitudes and capital efficiency, including a trend towards strengthening of shareholder returns. In the second quarter, the Japanese equity market was relatively directionless, but a last-minute rally toward the end of June helped the index to extend its positive returns. As for small cap stocks, value stocks remained strong following on from the previous quarter due to expectations for improved management efficiency, including efforts to strengthen shareholder returns. During the third quarter, the Bank of Japan raised its policy interest rate, which helped to trigger market volatility and a steep sell off in the Japanese stock market in early August. This is believed to have been a reaction to concerns over the yen's rapid appreciation, along with expectations that the Fed would accelerate its own interest rate cuts. The stock market quickly recovered afterwards, but ended lower for the third quarter. In the fourth quarter, despite growing political uncertainty, the stock market tended to fluctuate within a narrow range. During this period, the markets contended with news of Japan's ruling coalition led by the Liberal Democratic Party losing its majority and the re-election of President Trump in the US. However, the late-December announcement by Honda Motor outlining a consolidation plan with Nissan Motor served as a turning point. This pushed the market higher overall and helped it to break past its range. Large-cap stocks led the rally, while small cap stocks lagged behind.

Sector allocation had a negative effect on the relative performance for the annual review period. While overweight positions in the Metal Products and Electric Power & Gas sectors added value, the underweight position in the Nonferrous Metal sector and the overweight position in the Chemicals sector detracted from the relative performance.

Stock selection added value to the relative performance. Positive stock selection contributions over the review period came from overweight positions in Trancom in the Warehousing & Harbor Transportation Services sector and Kyushu Electric Power in the Electric Power & Gas sector. Meanwhile, the absence of a position in Fujikura in the Nonferrous Metal sector and the overweight position in LITALICO in the Services sector had a negative impact on the Sub-Fund's relative performance. Trancom announced a management buyout (MBO) with an investment fund, and the stock price soared. Kyushu Electric Power's stock price rose significantly, mainly in the first half of 2024. This was due to the earlier-than-expected reinstatement of an annual dividend of ¥50 per share and anticipation of higher electricity demand in the Kyushu region driven by factors such as the increasing number of semiconductor factories. Fujikura's share price soared amid expectations that the growth of optical components for data centres in North America would be the driving force. However, the Sub-Fund did not hold Fujikura, and this detracted from the relative performance. LITALICO is a company that offers services that support individuals with disabilities. In 2024, the company revised its remuneration structure, which had a negative impact on the operating income from its child welfare and education business. Combined with other operational disruptions, the company's performance deteriorated, resulting in a significant drop in the company's stock price.

In this review period, we increased the portfolio position of Nakanishi, the world's leading manufacturer of dental hand piece equipment, in the Precision Instruments sector. The stock price fell after the third quarter results (July to September) showed that profits had declined and were below market consensus expectations. In 2023, Nakanishi fully acquired DCI International, a US dental chair manufacturer, and the acquisition process has been moving along smoothly. Due to the potential synergies with DCI, it is possible for Nakanishi's market share to increase within the US dental equipment industry. Considering the competitiveness, profitability, and growth potential of the company, we believe it is undervalued at the current stock price, so we decided to increase our holdings. On the other hand, we liquidated our position in Trancom, as its stock price soared after announcing an MBO.

**NOMURA FUNDS IRELAND – JAPAN SMALL CAP EQUITY FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

---

**Investment Outlook**

In 2024, the RNS Index appreciated by 16.4%, the RNS Value Index rose 21.8%, and the RNS Growth Index rose 8.2%. Value stocks led the market, driven in particular by pressure from the TSE to improve capital efficiency. The once excessively high valuations of growth stocks have declined, and the valuation gap between small cap growth and value stocks has narrowed over the last few years. Due to the broad progress in measures to improve the capital efficiency of Japanese companies, and the intensifying demands and pressure from the TSE and activist investors, value stocks still look attractive today. In terms of our portfolio’s exposure to value and growth stocks, the structure appears similar to a barbell position (i.e. no particular style bias); however, we have maintained a position with a tilt towards value. While we maintain this positioning, we expect it to normalise very slowly if value stocks continue to outperform. We will continue to base our investment decisions on thorough fundamental analysis. At the end of 2024, the Price-to-Book Ratio (PBR) of the benchmark RNS Index was 1.11 and the portfolio’s PBR was lower at 0.94 (Source: Nomura Asset Management).

We will continue to actively seek out companies whose stock prices are currently judged to be trading below their "intrinsic value". We will select stocks from a wide range of industries, particularly companies that have not received much attention from the market despite their excellent business strategies, companies where management has shown signs of change due to internal reforms, and companies where capital efficiency is expected to improve due to changes in their attitude toward shareholder returns. In the Japanese stock market, activist funds have become more prominent. Traditional asset management companies are also increasingly demanding that listed companies improve capital efficiency. Among small cap companies, which have been slower to address capital efficiency improvements compared to large-cap firms, more companies appear to be intensifying their efforts to improve capital efficiency in response to this external pressure. We continue to focus on cash-rich companies, those expected to show improvements in corporate governance and investor relations, and those that may see the resolution of their parent company listings.

While we tend to focus on determining whether it is possible to maintain long-term sustainable growth and a high ROIC (return on invested capital) in order to identify the “intrinsic investment value” of a company, we are also paying attention to whether it is possible to maintain or improve ROE through appropriate capital policies. The main points of this analysis are summarised in our assessment of how competitive the company is (i.e., its strengths and weaknesses). In addition to analysing the strengths of business operations, we also place importance on analysing what we call the "vitality" of a company, such as the quality of management leadership and employee awareness. In addition to analysing financial statements, which are the result of management actions, we believe that stable investment performance can be achieved over the long term by conducting careful research and analysis of companies from the viewpoint of management quality.

**AMERICAN CENTURY EMERGING MARKETS SUSTAINABLE IMPACT EQUITY FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	-0.65	-6.04	9.60	-12.91	3.24
<b>Benchmark</b>	-0.14	-8.01	7.50	-5.65	16.67
<b>Out/(Under) Performance</b>	-0.51	1.97	2.10	-7.26	-13.43

*Source BBH; % Returns in USD. Benchmark is the MSCI Emerging Markets (Net) Index.  
\*Since Inception date is 4th March, 2020.*

**Performance Commentary**

For the year ended 31st December, 2024, the Sub-Fund returned 9.60% compared with the benchmark return of 7.50%, and therefore outperformed the benchmark by 2.10%.

The investing environment of the prior year was characterised by uncertainty around monetary easing, followed by interest rate cuts by major central banks. Excitement around artificial intelligence fueled market gains, especially in the US, but concern around economic growth and the property market in China weighed on stocks elsewhere, including EM. Later in the year, worries about the impact of potential tariffs from the US on trade and growth pressured markets. EM equities advanced during the period but trailed their DM counterparts when including US stocks. Latin American stocks declined sharply, led lower by Brazil, as worsening fiscal dynamics, the depreciation of the Brazilian real, high inflation and hawkish fiscal policy weighed on the market. Eastern European EM also finished lower. Asian EM equities advanced but trailed broad DM indices, despite strength in Taiwan. China’s market rose, narrowly outperforming global and DM stocks, amid shifting sentiment surrounding the government’s ability to stimulate growth. Taiwanese equities advanced sharply, driven by strength in technology stocks, especially those linked to AI. On a sector basis, materials (due to an underweight) and consumer discretionary (driven largely by stock selection) were key drivers of outperformance. In contrast, financials and information technology were the largest relative detractors during the period, driven by stock selection. India-based food delivery platform Zomato was the largest individual contributor. Shares rallied amid a growth recovery and margin improvement in the space, an underpenetrated market with strong growth potential. Zomato continued to deliver strong monetization across quick commerce, food delivery and dining out and positive momentum from users with higher order frequencies has supported margins. The single-largest detracting stock was Samsung Electronics. The stock declined amid weaker-than-expected demand for chips, a tepid foundry business and increasing labor costs. Lower-than-expected profit from the semiconductor division also weighed on shares. In our view, while sluggish demand from PCs and smartphones is a likely near-term headwind, server demand remains robust. From a geographic perspective, holdings in India drove outperformance during the period, with additional contribution from South Korea and South Africa, all due primarily to stock selection. Positioning in Brazil and Taiwan led to significant detracting.

**Investment Outlook**

EM assets held up well in 2024, thanks to broadly resilient global economic activity, another leg down in inflation, the beginning of interest rate cuts by core central banks and announced stimulus measures from China. Now, the global backdrop brings uncertainties with regard to the policy pledges of the incoming US administration, the US Fed shifting its focus back to inflation and questions about a sustainable rebound in China’s economic activity.

Nonetheless, we remain constructive and expect resilient EM growth in 2025, supported by Chinese stimulus. Beijing has set the tone for more forceful and effective economic policies prioritizing domestic demand and structural reform. Further, lower inflation and economic slack still leave space for certain EM central banks to ease. We continue to focus on markets with compelling domestic fundamentals and a prudent mix of monetary and fiscal policy.

China’s outlook is sensitive to tariff scenarios. Recent indicators suggest green shoots emerging but, eventually, more policy support is needed. However, before applying more stimulus, policymakers may wait to first assess the policies of the incoming Trump administration. For now, recently announced policies are sufficient to ensure that economic activity does not stall. Growth accelerated in China during the fourth quarter of 2024.

Growth in India has softened after several phenomenal years, yet the country remains the strongest EM growth story. The economy benefits from a young demographic profile and new infrastructure. While urban demand is slowing, rural demand is expected to recover.

**AMERICAN CENTURY EMERGING MARKETS SUSTAINABLE IMPACT EQUITY FUND  
INVESTMENT MANAGER'S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

---

**Investment Outlook (continued)**

ASEAN markets offer many secular growth stories and benefit from ongoing investment. Electric vehicles and AI are changing the region's investment landscape.

2024 was tough for Latin American equities as currencies depreciated. The sell-off reflected heightened political risk and ongoing fiscal concerns across most of the region. We believe Brazil will likely remain in a high interest rate environment, and we tend to favor exporters. Mexican equities reflect heightened political noise, high interest rates and fiscal concerns. Risk from potential policy shifts under a new US administration (such as tariffs and immigration) is an additional source of volatility.

We remain constructive on EM equities, driven by our belief that earnings will likely remain resilient and our expectations of additional policy support from China. EM equities remain cheap on most valuation metrics and are underowned, in our view. There will be challenges in 2025 — much like we experienced in 2024 — which should lead to dispersion across countries and sectors, bringing support for our bottom-up approach and focus on stock selection.

**AMERICAN CENTURY US FOCUSED INNOVATION EQUITY FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)

*Source BBH; % Returns in USD. Benchmark is the MSCI USA Growth Index.  
\*Since Inception date is 30th June, 2021.*

**Performance Commentary**

For the year ended 31st December, 2024, the Sub-Fund returned 35.66% compared with the benchmark return of 35.81%, and therefore underperformed the benchmark by 0.15%.

As the year began, there were clear signs that inflation was moving closer to the Fed’s desired level and that the economy would maintain modestly positive growth — a soft landing. As a result, investors began to anticipate that the Fed would begin to lower interest rates. For the first half of the year, markets were largely driven by enthusiasm for artificial intelligence, rewarding stocks expected to benefit from AI, including semiconductor companies that produce the advanced chips needed, semiconductor equipment makers and companies likely to incorporate AI into their businesses. AI enthusiasm cooled during the third quarter but reemerged during the fourth quarter. The Fed began to cut interest rates in September, but with stickier inflation than expected, said it would slow the pace. Although stocks declined in December, markets posted strong returns for the year, with the S&P 500 Index up 25.02%. Large-cap stocks posted the largest gains, and growth outperformed value across capitalization ranges.

Stock selection in information technology along with an underweight allocation to the sector helped drive portfolio underperformance. The semiconductors and semiconductor equipment industry led sector detractors. Advanced Micro Devices was a significant detractor. The semiconductor maker reported revenue and earnings above expectations but offered disappointing guidance. Not owning Broadcom also weighed on performance. This semiconductor manufacturer benefited from demand for the advanced chips needed for AI applications. In IT services, Okta’s stock fell after the cloud-based secure-identity company reported excellent revenue growth and margin expansion resulting in better-than-expected earnings. However, the stock declined because it offered disappointing guidance and was vulnerable to profit-taking after a strong recent performance. Other significant detractors included Regeneron Pharmaceuticals. Although the biotechnology company reported revenue and earnings above expectations, investors appeared to be concerned about disappointing sales of its higher-dose Eylea, which does not face the biosimilar competition that its original Eylea does. Eylea treats age-related macular degeneration.

On the positive side, stock selection in the industrials sector benefited performance. Rocket Lab USA was the largest sector contributor. The commercial space exploration company reported better-than-expected revenues and said it has a multiyear backlog of orders. It also won government contracts and CHIPS and Science Act funding and inked its first customers for its forthcoming Neutron rocket. Elsewhere, we were underweight NVIDIA during the year, which aided performance. The stock price of this semiconductor manufacturer soared throughout 2024 on demand for its graphics processing units used in AI applications, but NVIDIA was subject to profit-taking in December’s downturn. Microsoft reported better-than-expected earnings, but the stock fell on concerns about the software giant’s spending on AI. We own Microsoft but hold less than the benchmark, which benefited relative performance. The streaming video service Netflix outperformed, helped by strong subscriber growth that has been driven by a crackdown on password sharing and its tier with advertisements.

**Investment Outlook**

Market volatility is likely to remain high as investors contemplate US policy uncertainty alongside geopolitical risks. Consensus 2025 corporate earnings forecasts predict solid growth. Even using these lofty projections, valuations on large caps aren’t cheap. Having said that, lower interest rates do cut financing costs and benefit long-duration growth stocks. Add it all up, and we are positive on growth stocks because we continue to identify companies producing strong, sustainable earnings growth driven by powerful secular trends. Examples include digital advertising and business transformation; artificial intelligence, mobile and cloud computing; process automation; and electric vehicle adoption.

**AMERICAN CENTURY US FOCUSED INNOVATION EQUITY FUND  
INVESTMENT MANAGER'S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

---

**Investment Outlook (continued)**

Today's returns depend on tomorrow's earnings. Corporate earnings are key because stock returns are a function of earnings growth, dividend yield and the price investors are willing to pay for these earnings. The market is forward-looking, trading on expectations of future growth. For this reason, we expect investors to focus on full-year 2025 earnings estimates, which still look too high, in our opinion. Overall, we are generally positive on growth stocks going forward, given falling interest rates and the increasing likelihood of an economic soft landing. Nevertheless, very high 2025 earnings forecasts are a risk, particularly for companies that fail to meet those lofty expectations.

Productivity is central to profit growth. We see lasting challenges to productivity growth in the movement toward nationalism, deglobalization and demographic trends of social inequality and aging global populations. Worker productivity is critical to corporate profit growth, and we hope that AI and other technologies may help offset these productivity declines over time. Moreover, uncertainty remains high on several fronts, which we think explains today's extreme market concentration and recent bouts of volatility. In addition to the economy and interest rates, wars and policy uncertainty introduce other sources of potential volatility. Progress on any or all of these fronts could lead to broader market participation.

Volatility presents opportunities. Business conditions vary from quarter to quarter and year to year, and stocks go up or down in the near term for any number of reasons. However, we believe companies with solid long-term growth prospects are better situated to ride out uncertainty relating to economic and earnings growth. As a result, we believe our portfolio investments have significant long-term fundamental growth opportunities, which should ultimately lead to wealth creation over time. As ever, we remain vigilant in monitoring the fundamental progress and risks of our investments. We will utilize short-term volatility as an opportunity to add to positions when we see share prices disconnect from our assessment of long-term fundamentals.

Individual security selection is preferable to binary market calls. There's a tendency to think in binary terms about electoral outcomes, Fed rate changes and economic data points. However, we would argue that individual companies respond differently to macroeconomic conditions. Indeed, we are finding opportunities in diverse companies developing new products and technologies that are transforming entire sectors and industries. We don't view these as top-down solutions. Rather, we believe the best approach is to rely on bottom-up, fundamental research to identify individual companies innovating and reimagining their competitive landscape. That's why we buy dynamic, innovative growth companies with healthy balance sheets and cash flows that we believe can improve throughout the economic cycle.

**NOMURA FUNDS IRELAND – JAPAN SUSTAINABLE EQUITY CORE FUND**  
**INVESTMENT MANAGER’S REPORT (CONTINUED)**  
**For the year ended 31st December, 2024**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	1.20	1.64	17.62	N/A	47.00
<b>Benchmark</b>	4.02	5.43	20.45	N/A	50.84
<b>Out/(Under) Performance</b>	-2.82	-3.79	-2.83	N/A	-3.84

*Source BBH; % Returns in JPY. Benchmark is the TOPIX Index.  
\*Since Inception date is 30th March, 2022.*

**Performance Commentary**

For the year ended 31st December, 2024, the Sub-Fund recorded a return of 17.62%, compared with the benchmark return of 20.45% and therefore underperformed the benchmark by 2.83%.

The Japanese equity market rallied sharply over the first half of calendar year 2024, reflecting a positive reaction to expectations that the economy was finally overcoming deflation, together with the yen's continued depreciation and the robust US economy. However, in August, amid the prospect of a US interest rate cut, the Bank of Japan tightened monetary policy, which led to a sudden strengthening of the yen against the dollar and in turn triggered a steep sell off in the Tokyo equity market. Japan's equity market recovered most of these losses over the second half of 2024, helped by news of solid economic growth in the US, while the yen resumed its depreciation against the US dollar. The market tended to favour value stocks, but gains were more pronounced among large-cap stocks in terms of size as well as sectors such as Financials and Information/systems.

Of the Sub-Fund holdings, Asics added the most value. The company was highly rated for its rising market share, earnings growth as a result of upgrades to its product mix, improving profitability, and enhanced shareholder returns. Obayashi Corporation was the next strongest holding in terms of added value – lauded for its solid sales growth, increased ROE target, and improved capital policy. SOMPO Holdings was the next strongest. The company was highly rated for management's commitment to reducing cross-shareholdings to zero by the fiscal year ending March 31, 2031.

Stocks that detracted most from the performance included Taiyo Yuden, which underperformed following cuts to its short-term earnings forecasts due to prolonged inventory adjustment. Yamato Holdings underperformed due to concerns about weak parcel delivery volumes and an increasingly heavy cost burden, while Ibiden underperformed due to a drop in demand from their main customer.

**Investment Activity**

Mitsui Fudosan was the largest purchase. The company was highly praised for its policy of replacing fixed assets and strengthening shareholder returns. Considering the low office vacancy rate and the prospect of higher rental fees, steady growth in terms of EPS can be expected, leaving much room for revaluation. Sumitomo Mitsui Financial Group was the next largest purchase. The stock was rated highly for its improving domestic lending margins, active sales of cross-shareholdings, and expectations of improvement in earnings following the Bank of Japan's monetary policy change. Sumitomo Electric Industries was another major purchase. The stock was rated for its ability to exceed market expectations in terms of sales growth. Profitability of its wiring harnesses business looks robust, while growth expectations for the info-communications business, which caters to businesses such as datacentres, also look promising.

Recruit Holdings was the largest sales transaction. We trimmed the position to take profits after its share price increased. Daito Construction was the next largest sale. We liquidated the position after determining that their rating within the general construction sector would be lower upon revaluation. The Ibiden position was also liquidated. We determined that Ibiden's revaluation would be delayed in light of the downside risk to short-term earnings stemming from a prolonged slump in final demand.

**NOMURA FUNDS IRELAND – JAPAN SUSTAINABLE EQUITY CORE FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

---

**Investment Outlook**

Although the global economy is slowing down due to monetary tightening in Europe and the US, as well as the slump in Chinese economic growth, the outlook is likely to remain solid, starting with the US. Despite the policies of the new Trump administration, which could bring a period of instability with the risk of re-accelerating inflation, the firm labour market and healthy household financial data suggests that a major downturn in the economy can be averted.

Over the short term, the stock market looks to be affected by fluctuations in monetary policy and the economic outlook. However, judging from the medium-term earnings outlook, we believe there are sectors and stocks that offer highly attractive investment opportunities.

We believe companies with business operations that can contribute to achieving a sustainable society can improve their enterprise value over the long term. We invest in these companies based on the philosophy that they are investment opportunities that contribute to strengthening social initiatives and can achieve high investment performance. In terms of contributions, we value a carbon neutral society, the conservation of natural capital, and achieving a healthy, prosperous society. We are investing in companies that contribute to these areas.

In selecting stocks, we base decisions on individual fundamentals in light of changes in the external environment. In this context, we will focus on identifying equities with valuations that are cheap relative to fundamentals among firms with impressive medium- to long-term growth potential, which are highly competitive and which are expected to undergo structural changes.

As for individual companies, we are focusing on companies that are reforming their balance sheets as well as business portfolios, companies that are expected to benefit from increased demand for semiconductors and AI, companies that are expected to improve their pricing strategies in an inflationary phase, and companies that are expected to benefit from environmental changes such as decarbonisation.

INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	0.14	-6.28	8.17	N/A	-2.83
<b>Benchmark</b>	-1.15	-8.16	10.15	N/A	3.48
<b>Out/(Under) Performance</b>	1.29	1.88	-1.98	N/A	-6.31

*Source BBH; % Returns in USD. Benchmark is the MSCI All Country Asia Pacific Ex Japan Index.  
\*Since Inception date is 31st March, 2022.*

**Performance Commentary**

For the year ended 31st December, 2024, the Sub-Fund returned 8.17% compared to the benchmark return of 10.15%, and therefore underperformed the benchmark by 1.98%.

For country/asset allocation, the overweight positions in Korea and Hong Kong have detracted while underweight in India, Australia and China have gained. As for stock selection, China and India has detracted from the performance while Korea and Taiwan positively contributed.

As for the stock selection in China, the overweight position in ENN Energy Holdings was main dragger as its gas distribution business suffer from natural gas price hike and demand volume decline. Li Auto underperformed due to concern for market share decline in Chinese EV market. The overweight position in Lenovo detracted value as slow demand recovery for PC in China dragged the share price. The underweight position in PDD Holdings contributed positively as its US business might face some political pressure such as higher tariff from China. The overweight position in Agricultural Bank of China added value on the back of steady earnings and dividend growth. In Hong Kong, the overweight position in AIA Group detracted value. AIA Group underperformed amid concern for slowdown insurance underwriting in China.

In Korea, the overweight position in SK Hynix added value on the expectation for DRAM price recovery and higher revenue growth in AI related chips. The overweight position in KB Financial Group and Shinhan Financial Group also added value as they committed increase in share buyback and dividend after the Korean government promoted corporate value up plan. Samsung Biologics outperformed on the back of strong CMO (contract manufacturing organization) orders from global pharmaceutical companies. In Taiwan, the overweight position in Taiwan Semiconductor Manufacturing and Chroma ATE added value as their AI related business continued to expand.

In Australia, the underweight position in material stocks such as BHP and Fortescue added value as the material stocks underperformed backed by sluggish iron ore price movement. Dexco fell due to the concern for weakening property demand in Australia. CSL was also dragger as new entrants in its main human plasma business cap the share price. In Singapore, DBS Group outperformed as the company continued to delivered strong lending growth with controlled asset quality. In India, HDFC Bank dragged the value as the profits growth lagged its peers.

**Investment Outlook and Strategy**

With respect to the US economy, three scenarios are all equally possible:

- (1) The economy remains extremely resilient and performs even stronger than expected;
- (2) The economy reaches fatigue after a long period of exceptional strength and then collapses; or
- (3) The economy drifts towards a “very” soft landing, with growth hovering around current levels while slowing gradually. In policy terms, we expect the impact of tariffs and fiscal stimulus to nullify each other over time. The third scenario is the consensus case; few people believe rates and the US dollar are coming down in a hurry.

AI as an investment theme is here to stay and will play out in different forms. China’s economy, even if it delivers on the 5% growth target, will be stimulus driven, and will not be enough to drive world growth. Europe and Japan do not have the capabilities to lead growth either.

With respect to the equity markets, US market levels and valuations have reached an all-time high. Bond yields are at a post-Covid high too. Tariffs are probably not priced in as yet, while the initial Trump Trade might have played out, and we might now be in for a short-term peak and a period of volatility until fiscal policies start to play a role. We therefore expect to see heightened volatility and noise as the Trump administration takes over – with tariffs, regulations and geo-politics playing their part in generating a downward bias for equity markets in the near term amid higher interest rates.

**NOMURA FUNDS IRELAND – ASIA SUSTAINABLE EQUITY FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

---

**Investment Outlook and Strategy (continued)**

For Asia, it is imperative for the US markets and the US dollar go through a phase of relative weakness for this region to be in favour. Fundamentals are supportive, growth rates are higher, valuations are lower and investor positioning is very light. Yet, given the relentless momentum in the US markets, fund flows are unlikely to become supportive for Asia markets in the near term. Moreover, Asian central banks are unable to loosen monetary policy and cut interest rates unless the Fed leads the way.

China’s immediate growth rate could pick up due to the stimulus effects and a rise in pre-tariff economic activity. There is also a chance that the outcome of the tariff announcements by President Trump could be significantly positive for China. Over the medium term, growth rates will fade given the structural headwinds of debt and demographics. Nevertheless, valuations are very cheap and China is possibly the world’s least favoured market. Given the propensity for big swings, we prefer to avoid large country level bets. Consumer Discretionary is our preferred sector, with exposure to higher quality companies.

AI thematic investment could play out in different forms. Taiwan continues to offer alternatives to the AI exposure while also offering some exposure to a Chinese recovery. Chip giant TSMC provides the stability, while a recent correction enables returning back to a neutral position. The downtrend in the memory cycle and fading interest in the “value up” trade leaves fewer catalysts for the Korean markets. Cheaper valuations notwithstanding, politics and a sluggish domestic economy mean Korea is still a funding market for us.

Among the smaller Asean markets, Singapore remains well supported because of its strong currency and liquidity, as well as the presence of good quality companies. Other regional markets are extremely vulnerable to currency market shifts. Growth recoveries appear to have peaked, with monetary stimulus looking difficult to implement. Malaysia is benefiting from continuing inbound investment and the Philippines is seeing a much improved macroeconomic environment. Meanwhile, Indonesia faces political uncertainty and Thailand offers no near term recovery prospects.

India remains the best medium term structural story with plentiful investment opportunities, although the sailing is not as smooth as it has been in the recent past given slowing growth and some shorter term headwinds. India remains the biggest structural overweight position within Asia, expensive valuations (less so than before) notwithstanding.

**NOMURA FUNDS IRELAND – CORPORATE HYBRID BOND FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	-0.04	1.47	9.47	N/A	14.73
<b>Benchmark</b>	0.62	1.78	10.31	N/A	15.89
<b>Out/(Under) Performance</b>	-0.66	-0.31	-0.84	N/A	-1.16

*Source BBH; % Returns in EUR. Benchmark is the ICE BofA Global Hybrid Non-Financial 5% Constrained Custom Index.  
\*Since Inception date is 9th August, 2023.*

**Performance Commentary**

For the year ended 31st December, 2024, the Sub-Fund recorded a return of 9.47% compared with the benchmark 10.31% and therefore underperformed the benchmark by 0.84%.

Corporate hybrid performance in 2024 was essentially driven by the dramatic recovery in real estate spreads. The Sub-Fund added to the sector in December 2023 (Aroundtown and Grand City) which allowed performance to keep up somewhat with the benchmark, despite being underweight real estate versus the benchmark for the whole reporting period. In hindsight, we should have added more exposure but what we did select were among the best performing securities in the corporate hybrid market last year.

Away from real estate, we saw strong security selection across utilities, telecommunications and certain energy issuers. Encouragingly, our high conviction positions in names such as Southern Company, Ausnet, Rogers Communications and Bayer outperformed.

In what was a strong market overall, cash drag was a factor in the underperformance. On average, the portfolio will maintain a cash position of 3-5% to manage flows and take advantage of any primary market / broader volatility but in rising markets will detract from performance.

**Investment Outlook**

We believe that Corporate Hybrids still represent arguably the most undervalued asset class in liquid credit:

- This is a non-financial (i.e. zero banks, zero insurance), investment grade asset class but with high-yield type coupons and far less volatility;
- Given the current macro uncertainty, it is important to note that corporate hybrid issuers mainly come from defensive, recession resistant sectors that have a proven ability to pass on inflation;
- Think regulated Utilities, Telecoms and genuine market leaders across Consumer Non-Cyclicals/Industrial sectors;
- The ECB continuing to cut rates should also be supportive for this predominately European asset class;
- Corporate Hybrid valuations are at extremely attractive levels – at least 100 basis points wide of fair value;
- Yield pickup vs EUR/USD BBs despite being rated 2 notches higher at the issue level and 4/5 notches higher at the issuer level;
- Trading in line with CoCos. The differential should be greater than 250 basis points given the structural differences.

**NOMURA FUNDS IRELAND – US HIGH YIELD BOND CONTINUUM FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	-0.48	-0.21	6.89	N/A	13.91
<b>Benchmark</b>	-0.41	0.16	8.22	N/A	15.55
<b>Out/(Under) Performance</b>	-0.07	-0.37	-1.33	N/A	-1.64

*Source BBH; % Returns in USD. Benchmark is the ICE BofA US High Yield Constrained Index (HUC0).  
\*Since Inception date is 23rd August, 2023.*

**Performance Commentary**

For the year ended 31st December, 2024, the Sub-Fund returned 6.89%, compared with the benchmark return of 8.22%, and therefore underperformed the benchmark by 1.33%.

US high yield had a muted start to the year, but performed well later in the first quarter on the basis of solid economic news and technicals, despite persistent concerns around the potential for sticky inflation, and the market’s reassessment of the prospects and timing of the Fed’s expected rate cuts. Inflation continued to be a major driver of high yield market performance in the second quarter, and more positive signs of inflation resuming its path towards the Fed’s 2% target emerged in the spring and early summer. Economic data continued to be stable, suggesting that a soft landing was still in play. Disinflation progress continued, prompting the Fed to make an initial 50 basis points cut in September.

Despite the optimism in risk assets following the US election in November, the headwinds from higher Treasury yields had a dampening impact on returns, particularly at concurrent spread levels. Even though the Fed started its cutting cycle during the third quarter, economic data continued to feed into pessimism regarding the threat of inflation having passed. GDP growth, consumer spending, and employment data all showed an economy that was continuing to perform well, while uncertainty over Trump policies, particularly tariffs, all seemed to point to the potential for inflation reigniting in 2025. The 10-year Treasury sold off from 3.8% to 4.6% during the fourth quarter. In an environment where spreads were already at year-to-date lows, the market could not fully absorb the rates impact, and treaded water into the end of the year.

The Sub-Fund’s relative performance during 2024 was subdued by negative security selection in the lower credit quality segments, particularly CCCs, which detracted from overall performance, while credit selection and weighting in BBs contributed. Sector contributors included Tech Hardware & Equipment, Packaging, and Gas Distribution, while sectors that detracted from performance during the year included Specialty Retail, Health Services, and Media Content.

Volatile market conditions caused the market to oscillate between risk-on and risk-off states, and market leadership changed frequently throughout the year. Thus, we were not able to identify trends to drive outperformance through security selection. Furthermore, we took active positions in sectors, but there was limited dispersion in sector performance, negatively impacting alpha generating opportunities. Interest rate volatility was elevated, but we held portfolio duration broadly close to the benchmark’s due to an uncertain rates outlook. The strategy was defensively positioned throughout the year, with a credit ratings posture similar to the broader market.

**Investment Outlook**

Looking forward, NCRAM expects US economic activity to slow modestly in 2025, from near 3% real GDP growth in both 2023 and 2024, to the mid-2% range in the coming year, with some risk to the upside. Higher interest rates will impact some consumer spending, and growth is generally slow outside of the US. The policy impact of the Trump administration will be a key factor but is somewhat unknown. We continue to feel the incoming administration has a fairly large appetite for change, and aggressive ideas have been floated in the areas of taxes, deregulation, immigration, tariffs, and geopolitics. While Trump can undertake some executive action, there remains uncertainty about what will pass Congress with small Republican majorities. In general, we are hopeful that growth remains supportive for high yield. Deregulation, extending the 2017 tax cuts, and further initiatives to reduce the tax burden on companies and individuals would support stronger growth and higher profits. Lighter-touch regulation would also create a more favorable environment for mergers & acquisitions, supporting asset prices. On the other hand, protectionist trade policy and amplified diplomatic tensions are anti-growth and inflationary. Overall, NCRAM maintains a constructive outlook for high yield, driven by resilient fundamentals underpinned by continued earnings growth, supportive technicals, and attractive yields.

**NOMURA FUNDS IRELAND – EMERGING MARKET CORPORATE BOND FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2024**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	-0.70	-1.05	7.14	N/A	12.83
<b>Benchmark</b>	-0.54	-0.80	7.63	N/A	12.93
<b>Out/(Under) Performance</b>	-0.16	-0.25	-0.49	N/A	-0.10

*Source BBH; % Returns in USD. Benchmark is the JPMorgan Corporate Emerging Market Bond Index Broad Diversified (CEMBI BD).  
\*Since Inception date is 12th September, 2023.*

**Performance Commentary**

For the year ended 31st December, 2024, the Sub-Fund returned 7.14%, compared with the benchmark return of 7.63%, and therefore underperformed the benchmark by 0.49%.

2024 proved to be a strong year as buoyant risk sentiment helped drive credit spreads significantly tighter despite the moderate increase in Treasury yields. The index spread fell by approximately 75 basis points, while the 10-year Treasury yield rose from 3.9% to 4.6%.

The rally in credit spreads was broad-based, as all regions and the vast majority of countries and sectors tightened throughout the year. In terms of rating categories, higher beta respectively lower credit ratings performed best, consistent with the strong risk sentiment and broader market performance. Generally speaking, we believe the credit spread tightening was further supported by the significant negative net issuance, combined with the strong fundamental backdrop and high all-in yields.

In terms of our performance, we managed to take advantage of various improving stories in the metals and mining sector as well as telecommunication companies throughout Latin America. On the other hand, we remained cautious on most high yield names in Asia, especially in China, although we benefitted from the tightening of Macau-based gaming names relative to their US-based peers. In terms of detractors, our bias towards quality and slight underweight in Turkey led to a small underperformance, as did our low allocation towards Eastern Europe.

**Investment Outlook**

Looking ahead, we expect EM hard currency bonds to deliver mid-to-high-single-digit returns in 2025. EM GDP growth is expected to remain steady at around 4% in 2025, despite the China slowdown. Sovereign fiscal and primary deficits should improve marginally from 2024 levels, as sovereign debt ratios have increased but remain below 50% of GDP on average, while corporate credit metrics remain strong and default rates could dip even lower in 2025. US trade policy will be a focus, but we think is unlikely to cause broad based headwinds, although shifts in US foreign policy could increase geopolitical risks and market volatility. We expect market technical factors to remain highly constructive in 2025, with a likely return of positive flows, which should further underpin the market backdrop.

**NOMURA FUNDS IRELAND – CHINA A-SHARES AI QUANT STRATEGY FUND**  
**INVESTMENT MANAGER’S REPORT (CONTINUED)**  
**For the year ended 31st December, 2024**

**Investment Performance**

<b>Sub-Fund</b>	2.56	-2.49	17.00	N/A	16.05
<b>Benchmark</b>	1.17	-4.85	13.95	N/A	12.06
<b>Out/(Under) Performance</b>	1.39	2.36	3.05	N/A	3.99

*Source BBH; % Returns in USD. Benchmark is the MSCI China A Net Return USD Index.  
\*Since Inception date is 27th November, 2023.*

**Performance Commentary**

For the year ended 31st December, 2024, the Sub-Fund returned 17.00% compared with the benchmark return of 13.95% and therefore outperformed the benchmark by 3.05%.

Despite periods of weak economic data and geopolitical tensions, the MSCI China A Index ended the year on a positive note, driven by the announcement of strong economic stimulus measures. Early in the period, markets faced headwinds from disappointing macroeconomic indicators, including weaker-than-expected GDP growth, and external pressures such as additional tariffs on Chinese electric vehicles imposed by Europe and Canada. In September, announcement of aggressive monetary and fiscal policies triggered a sharp rally. However, markets later gave up some of these gains as investors awaited policy clarifications and expressed concerns over stricter regulations introduced by the US following the presidential election results.

Attribution analysis shows that stock selection effect, sector allocation effect, and risk factor effect were all positive.

In stock selection, our overweight on Cambricon Technologies (Information Technology) and on Agricultural Bank of China (Financials) which were highly evaluated based on our proprietary quantitative model, made positive contribution while negative came from the overweight in Weichai Power (Industrials) which was also highly evaluated based on our model. Breaking down contribution from the two models utilized, both the AI and the non-financial model had positive impacts, with the AI model contributing more significantly.

As for risk factor effect, price momentum and low volatility characteristics affected positively performance.

In sector allocation, the underweight on Materials and the overweight on Financials sectors contributed positively while the overweight on Health Care sector was negative factor of the relative performance.

**Investment Outlook**

In terms of the economic environment, China's economy achieved a real GDP growth rate of 5.0% in 2024 and is expected to aim to maintain the same level in 2025. However, domestic demand remains weak, with YoY consumer prices near zero and producer prices declining consecutively, underscoring persistent deflationary pressures. Policies such as incentives for replacing automobiles and home appliances, along with support measures for the housing market, have shown some positive effects. Yet, these measures have not significantly boosted overall consumption. Exports have temporarily strengthened due to front-loading demand in response to US tariff hikes. However, their long-term sustainability remains uncertain, especially amid ongoing trade tensions. To address these challenges, the Chinese government has announced plans to increase fiscal spending and implement monetary easing. However, the impact of interest rate cuts is expected to be limited, with potential side effects such as reduced bank profitability and accelerated currency depreciation. In 2025, the recovery of domestic demand will be essential for achieving economic growth. The effectiveness and concreteness of government policies will play a critical role in shaping the country's economic trajectory.

In terms of our model's characteristics on risk factors, the model has tendency to have stocks with cheaper value, strong price momentum and low volatility compared to the benchmark at the end of 2024. We understand that was because the China A-shares market was in downward trend in recent years, which led to stocks with those characteristics more attractive to the model by reflecting the recent price movement. Looking ahead to 2025, there is a possibility that those characteristic will remain the same given the decelerated growth forecast of the country despite the market recovery in September 2024.

Besides, non-financial perspective will continue to be focused by investors through various aspects in our understanding. For example, In December 2024, the Chinese government introduced the new Corporate Sustainability Disclosure Standards. These standards aim to align corporate sustainability disclosures with global ESG frameworks and establish a unified national reporting system with full implementation planned by 2030. Such initiative is likely to generate interest in ESG investments, which aligns with our strategy considering such kind of aspects.

We will continue to manage the portfolio by appropriately reflecting our model's evaluation on stocks.

Shape the future  
with confidence

## **INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF NOMURA FUNDS IRELAND PLC**

### **Report on the audit of the financial statements**

#### **Opinion**

We have audited the financial statements of Nomura Funds Ireland Plc('the Company') for the year ended 31 December 2024, which comprise the Statement of Financial Position, Statement of Comprehensive Income, Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares, Statement of Cash Flows and notes to the financial statements, including the summary of material accounting policy information set out in note 1. The financial reporting framework that has been applied in their preparation is Irish Law and International Financial Reporting Standards ('IFRS') as adopted by the European Union.

In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the Company as at 31 December 2024 and of its profit for the year then ended;
- have been properly prepared in accordance with IFRS as adopted by the European Union; and
- have been properly prepared in accordance with the requirements of the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011, and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019.

#### **Basis for opinion**

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with ethical requirements that are relevant to our audit of financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### **Conclusions relating to going concern**

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's ability to continue as a going concern for a period of at least twelve months from the date when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the Company's ability to continue as a going concern.

Shape the future  
with confidence

## **INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF NOMURA FUNDS IRELAND PLC**

### **Other information**

The directors are responsible for the other information. The other information comprises the information included in the annual report other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

### **Opinions on other matters prescribed by the Companies Act 2014**

In our opinion, based solely on the work undertaken in the course of the audit, we report that:

- the information given in the directors' report for the financial year ended for which the financial statements are prepared is consistent with the financial statements; and
- the directors' report, other than those parts relating to sustainability reporting where required by Part 28 of the Companies Act 2014, has been prepared in accordance with applicable legal requirements.

We have obtained all the information and explanations which, to the best of our knowledge and belief, are necessary for the purposes of our audit.

In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited and the financial statements are in agreement with the accounting records.

### **Matters on which we are required to report by exception**

Based on the knowledge and understanding of the Company and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

The Companies Act 2014 requires us to report to you if, in our opinion, the disclosures required by sections 305 to 312 of the Act, which relate to disclosures of directors' remuneration and transactions are not complied with by the Company. We have nothing to report in this regard.

Shape the future  
with confidence

## INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF NOMURA FUNDS IRELAND PLC

### Respective responsibilities

#### Responsibilities of directors for the financial statements

As explained more fully in the directors' responsibilities statement set out on page 33, the directors are responsible for the preparation of the financial statements in accordance with the applicable financial reporting framework that give a true and fair view, and for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

#### Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA's website at: [https://iaasa.ie/wp-content/uploads/docs/media/IAASA/Documents/audit-standards/Description\\_of\\_auditors\\_responsibilities\\_for\\_audit.pdf](https://iaasa.ie/wp-content/uploads/docs/media/IAASA/Documents/audit-standards/Description_of_auditors_responsibilities_for_audit.pdf). This description forms part of our auditor's report.

#### The purpose of our audit work and to whom we owe our responsibilities

Our report is made solely to the Company's members, as a body, in accordance with section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members, as a body, for our audit work, for this report, or for the opinions we have formed.

\* The Fund Totals as at 31st December, 2024 and 31st December, 2023, have been adjusted to account for balances in the name of the Fund.

The accompanying notes on pages 155 to 423 form an integral part of these financial statements.

**NOTES TO THE FINANCIAL STATEMENTS**  
**For the year ended 31st December, 2024**

---

**1. Summary of material accounting policies**

The principal accounting policies applied in the preparation of these financial statements are set out below/overleaf.

**Basis of preparation of financial statements**

The financial statements of Nomura Funds Ireland Plc (the “Fund”) have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as adopted by the European Union and Irish statute comprising the Companies Act 2014, the requirements of the Central Bank UCITS Regulations and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 (as amended) (the “UCITS Regulations”) and any regulations made thereafter.

The financial statements are prepared under the historical cost convention, as modified to include investments at valuation. Valuation time is 3pm (Irish time) on a Dealing Day or such other time or times in such place as the Directors may from time to time determine and notify to shareholders in relation to any Sub-Fund with the approval of Brown Brothers Harriman Fund Administration Services (Ireland) Limited (the “Administrator”).

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires the Board of Directors to exercise its judgement in the process of applying the Fund’s accounting policies. Uncertainty about these estimates and assumptions could result in outcomes that might require a material adjustment to the carrying amount of the asset or liability affected in future periods. Certain reclassifications have been made to previously reported amounts to conform to current year presentation, which had no impact on reported net assets.

*Going concern*

The Fund’s management has made an assessment of the Fund’s ability to continue as a going concern and is satisfied that the Fund has the resources to continue in business for the foreseeable future. Furthermore, management is not aware of any material uncertainties that may cast significant doubt upon the Fund’s ability to continue as a going concern. Therefore, the financial statements continue to be prepared on the going concern basis.

*Taxes*

Uncertainties exist with respect to the interpretation of complex tax regulations and changes in tax laws on foreign withholding tax. Given the wide range of international investments, differences arising between the actual investment income and assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax expense already recorded. The Fund establishes provisions, based on reasonable estimates, for possible consequences of audits by the tax authorities of the respective countries in which it invests. The amounts of such provisions are based on various factors, such as experience of previous tax audits and differing interpretations of tax regulations by the taxable entity and the responsible tax authority. Such differences of interpretation may arise on a wide variety of issues depending on the conditions prevailing in the respective investment’s domicile. As the Fund assesses the probability for litigation and subsequent cash outflow with respect to taxes as remote, no contingent liability has been recognised.

**Standards, amendments and interpretations effective for annual period beginning on 1st January, 2024**

There are no new standards, amendments to existing standards and interpretations that are effective for the first time for the annual period beginning on 1st January, 2024 that have a material effect of the financial statements of the Fund.

**Accounting standards in issue that are not yet effective and have not been early adopted**

There are no new standards not yet effective which will have a material impact on the Fund.

---

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**  
**For the year ended 31st December, 2024**

---

**1. Summary of material accounting policies (continued)****Financial assets and financial liabilities at fair value through profit or loss***(a) Classification*

The Fund has assessed the classification of financial instruments as at the date of initial application and has applied such classification retrospectively. Based on that assessment:

- All financial assets previously held at fair value continue to be measured at fair value.
- Debt, equity and derivatives instruments, are acquired for the purpose of generating short-term profit. Therefore, they meet the hold-for-trading criteria and are required to be measured at fair value through profit or loss.
- Financial assets previously classified as receivables are held to collect contractual cash flows and give rise to cash flows representing solely payments of principal and interest. Thus, such instruments continue to be measured at amortised cost under IFRS 9.
- The classification of financial liabilities under IFRS 9 remains broadly the same as under IAS39.

*Impairment*

IFRS 9 requires the Fund to record expected credit losses (“ECLs”) on all of its debt securities, loans, trade receivables, either on a 12- month or lifetime basis. Given the limited exposure of the fund to credit risk, this amendment has not had a material impact on the financial statements. The Fund only holds trade receivables with no financing component and that have maturities of less than 12 months at amortised cost. Therefore, it has adopted an approach similar to the simplified approach to ECLs.

*Hedge accounting*

The Fund has not applied hedge accounting under IAS 39 nor will it apply hedge accounting under IFRS 9.

*(b) Recognition/Derecognition*

The Fund recognises a financial asset or a financial liability when, and only when, it becomes a party to the contractual provisions of the instrument. Purchases and sales of financial assets at fair value through profit or loss are recognised on trade date – the date on which the Fund commits to purchase or sell the financial instrument.

A financial asset (or, where applicable, part of a financial asset or a part of a group of similar financial assets) is derecognised where the rights to receive cash flows from the asset have expired, or the Fund has transferred its rights to receive cash flow from the asset, or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a pass-through arrangement and either:

- (a) the Fund has transferred substantially all of the risks and rewards of the asset.

Or

- (b) the Fund has neither transferred nor retained substantially all the risk and rewards of the asset, but has transferred control of the asset.

When the Fund has transferred its right to receive cash flows from an asset (or has entered into a pass-through arrangement), and has neither transferred nor retained substantially all of the risk and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Fund’s continuing involvement in the asset. In that case, the fund also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the fund has retained.

The Fund derecognises a financial liability when the obligation under the liability is discharged, cancelled or expired.

---

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)****For the year ended 31st December, 2024**

---

**1. Summary of material accounting policies (continued)****Financial assets and financial liabilities at fair value through profit or loss (continued)***(b) Recognition/Derecognition (continued)*

Realised fair value gains and losses on disposals of financial instruments are calculated using the average cost method for the Nomura Funds Ireland - India Equity Fund and the first in, first out method for the Nomura Funds Ireland - Japan Strategic Value Fund, the Nomura Funds Ireland - US High Yield Bond Fund, the Nomura Funds Ireland - Japan High Conviction Fund, the Nomura Funds Ireland - Asia Ex Japan High Conviction Fund, the Nomura Funds Ireland - Global Sustainable High Yield Bond Fund, the Nomura Funds Ireland - Global Dynamic Bond Fund, the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund, the Nomura Funds Ireland - Asia High Yield Bond Fund, the Nomura Funds Ireland - Asia Investment Grade Bond Fund, the Nomura Funds Ireland - China Fund, the Nomura Funds Ireland - Global High Conviction Fund, the Nomura Funds Ireland - European High Yield Bond Fund, the Nomura Funds Ireland - Global Sustainable Equity Fund, the American Century Global Small Cap Equity Fund, the American Century Global Growth Equity Fund, the American Century Concentrated Global Growth Equity Fund, the American Century Emerging Markets Equity Fund, the Nomura Funds Ireland - Global Multi-Theme Equity Fund, the Nomura Funds Ireland - Japan Small Cap Equity Fund, the American Century Emerging Markets Sustainable Impact Equity Fund, the American Century Advanced Medical Impact Equity Fund, the American Century US Focused Innovation Equity Fund, the Nomura Funds Ireland - Japan Sustainable Equity Growth Fund, the Nomura Funds Ireland - Japan Sustainable Equity Core Fund, the Nomura Funds Ireland - Asia Sustainable Equity Fund, the Nomura Funds Ireland - Corporate Hybrid Bond Fund, the Nomura Funds Ireland - US High Yield Bond Continuum Fund, the Nomura Funds Ireland - Emerging Market Corporate Bond Fund and the Nomura Funds Ireland - China A-Shares AI Quant Strategy Fund.

*(c) Measurement*

Financial assets and financial liabilities at fair value through profit or loss are recorded in the Statement of Financial Position at fair value. The main impact on measurement from the classification of liabilities under IFRS 9 relates to the element of gains and losses for financial liabilities designated as at fair value through profit or loss attributable to changes in credit risk. IFRS 9 requires that such element be recognised in other comprehensive income, unless this treatment creates or enlarged an accounting mismatch in profit or loss, in which case, all gains and losses on that liability (including the effects of changes in credit risk) should be presented in profit or loss. The Fund has not designated any financial liabilities at fair value through profit or loss. Therefore, this requirement has not had an impact on the Fund.

Transaction costs are expensed in the Statement of Comprehensive Income. Transaction costs are costs incurred to acquire financial assets or liabilities at fair value through profit or loss. They include fees and commissions paid to agents, advisers and brokers. Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value (see Note 1 (d)).

Gains and losses arising from changes in the fair value of the 'financial assets or financial liabilities at fair value through profit or loss' category are presented in the Statement of Comprehensive Income in the period in which they arise. Dividend income from financial assets at fair value through profit or loss is recognised in the Statement of Comprehensive Income within operating income when the Fund's right to receive payments is established.

*(d) Determination of fair value*

Fair value is the amount for which an asset could be exchanged or a liability settled, between knowledgeable willing parties in an arm's length transaction. The fair value of financial instruments traded in active markets (such as trading securities) is based on quoted market prices at 3pm (Irish time) on the relevant dealing day. For the purpose of these financial statements, the quoted market price used is the quoted market prices at 3pm (Irish time) on the relevant dealing day. The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. The Sub-Funds use a variety of methods and make assumptions that are based on market conditions existing at each statement of financial position date.

Units or shares in collective investment schemes are valued at the bid quotation or if unavailable the latest available Net Asset Value or, if listed or traded on a regulated market, at the latest quoted trade price or the mid quotation or, if unavailable or unrepresentative, the latest available Net Asset Value as deemed relevant to the collective investment scheme.

*Investment Entity Status*

The Fund's management has determined that the Fund has all of the typical characteristics of an investment entity as set out in IFRS 10.

---

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**  
**For the year ended 31st December, 2024**

---

**1. Summary of material accounting policies (continued)****Foreign currency translation***Functional and presentation currency*

The functional and presentation currency of the Nomura Funds Ireland - India Equity Fund, the Nomura Funds Ireland - US High Yield Bond Fund, the Nomura Funds Ireland - Asia Ex Japan High Conviction Fund, the Nomura Funds Ireland - Global Sustainable High Yield Bond Fund, the Nomura Funds Ireland - Global Dynamic Bond Fund, the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund, the Nomura Funds Ireland - Asia High Yield Bond Fund, the Nomura Funds Ireland - Asia Investment Grade Bond Fund, the Nomura Funds Ireland - China Fund, the Nomura Funds Ireland - Global High Conviction Fund, the Nomura Funds Ireland - Global Sustainable Equity Fund, the American Century Global Small Cap Equity Fund, the American Century Global Growth Equity Fund, the American Century Concentrated Global Growth Equity Fund, the American Century Emerging Markets Equity Fund, the Nomura Funds Ireland - Global Multi-Theme Equity Fund, the American Century Emerging Markets Sustainable Impact Equity Fund, the American Century Advanced Medical Impact Equity Fund, the American Century US Focused Innovation Equity Fund, the Nomura Funds Ireland - Asia Sustainable Equity Fund, the Nomura Funds Ireland - US High Yield Bond Continuum Fund, the Nomura Funds Ireland - Emerging Market Corporate Bond Fund and the Nomura Funds Ireland - China A-Shares AI Quant Strategy Fund is US Dollar. The functional and presentation currency of the Nomura Funds Ireland - Japan Strategic Value Fund, the Nomura Funds Ireland - Japan High Conviction Fund, the Nomura Funds Ireland - Japan Small Cap Equity Fund, the Nomura Funds Ireland - Japan Sustainable Equity Growth Fund and the Nomura Funds Ireland - Japan Sustainable Equity Core Fund is Japanese Yen. The functional and presentation currency of the Nomura Funds Ireland - European High Yield Bond Fund and the Nomura Funds Ireland - Corporate Hybrid Bond Fund is Euro. The presentation currency of the aggregated financial statements is US Dollar.

*Transactions and balances*

Assets and liabilities denominated in currencies other than the functional currency of the Sub-Fund are translated into the functional currency at the exchange rates ruling at the statement of financial position date. Transactions in currencies other than the functional currency are translated into the functional currency at the exchange rates ruling at the dates of the transactions. Gains and losses on foreign exchange transactions are recognised in the Statement of Comprehensive Income in determining the result for the year. Proceeds from subscriptions and amounts paid for redemptions in currencies other than the functional currency are translated into the functional currency at the exchange rates ruling at the dates of the transactions.

**Futures contracts**

Upon entering into a futures contract, a Sub-Fund is required to deposit with its futures broker, an amount of cash in accordance with the initial margin requirements of the broker or exchange. Futures contracts are valued using quoted daily settlement prices established by the exchange on which they trade. The Sub-Fund and the broker agree to exchange an amount of cash equal to the daily fluctuations in the value of the futures contract (“variation margin”).

For open futures, changes in the value of the contract are recognised as unrealised gains or losses by “marking-to-market” the value of the contract at the statement of financial position date. When the contract is closed, the difference between the proceeds (or cost) of the closing transactions and the original transaction is recorded as a realised gain or loss in the Statement of Comprehensive Income.

**Forward foreign currency contracts**

All forward foreign currency contract commitments are marked to market at the applicable translation rates and any resulting unrealised gains or losses are recorded in the Statement of Comprehensive Income. The Sub-Fund records realised gains or losses upon closing of the forward foreign currency contracts. Where the Sub-Fund enters into forward foreign currency contracts as a way of managing foreign exchange risk for specific unit classes, gains and losses from these contracts are allocated solely to the corresponding unit classes. Purchases and sales of forward foreign currency contracts having the same notional value, settlement date and counterparty are generally offset and any realised gains or losses are recognised on settlement date. Forward foreign currency contracts may result in credit exposure to the counterparty.

---

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**  
**For the year ended 31st December, 2024**

---

**1. Summary of material accounting policies (continued)****Swaps**

Swap agreements are privately negotiated agreements between a Sub-Fund and a counterparty to exchange or swap investment cash flows, assets, foreign currencies, market-linked returns or other identified amounts at specified future intervals. In connection with these agreements, securities or cash may be identified as collateral in accordance with the terms of the respective swap agreements to provide assets of value and recourse in the event of default or bankruptcy/insolvency.

Swaps are marked-to-market daily based upon quotations received from counterparties or valued using a pricing service and in other cases based upon calculations using valuation models.

The significant assumptions and the formula behind the calculations used in the valuation models are defined explicitly in the individual term sheets. Generally, the total returns are determined by the daily index level or daily price multiplied by a predetermined notional amount and the financing portion is built-in to create an all-in valuation.

Changes in valuations, if any, are recorded as unrealised gains or losses. Payments received or made are recorded as realised gains or losses.

*Credit Default Swaps*

A credit default swap is a bilateral financial contract under which the protection buyer pays a fee, usually expressed in basis points per annum on the notional amount, in return for a payment by the protection seller contingent on the occurrence of a credit event, such as a bankruptcy, default, or restructuring, with respect to a referenced entity. The credit events and applicable settlement mechanism used to determine the contingent payment are negotiated between the counterparties at the time of trading. Once the credit event has been declared, the protection buyer has the right to settle the contract. Settlement is usually physical, with the protection buyer having the right to deliver bonds of the reference entity up to the notional amount of the contract. In return, the protection buyer receives the par value of those obligations. Selling protection is the synthetic equivalent of buying a bond or alternative form of debt. Buying protection is the equivalent of synthetically shorting or hedging a bond or other credit exposure.

Credit default swap agreements on credit indices involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a write-down, principal shortfall, interest shortfall or default of all or part of the reference entities comprising the credit index. A credit index is a list of a basket of credit instruments or exposures designed to be representative of some part of the credit market as a whole. Components of the indices may include, but are not limited to, investment grade securities, high yield securities, asset backed securities, emerging markets, and/or various credit ratings within each sector. Credit indices are traded using credit default swaps with standardised terms including a fixed spread and standard maturity dates. An index credit default swap references all the names in the index, and if there is a default, the credit event is settled based on that name's weight in the index. The composition of the indices change periodically, usually every six months, and for most indices, each name has an equal weight in the index. The Sub-Fund may use credit default swaps on credit indices to hedge a portfolio of credit default swaps or bonds with a credit default swap on indices which may be less expensive than it would be to buy many credit default swaps to achieve a similar effect. Credit default swaps on indices are benchmarks for protecting investors owning bonds against default, and traders use them to speculate on changes in credit quality.

The use of credit default swap contracts is restricted to the extent that the benefits to the Sub-Fund mirror that which could be obtained by direct investment in the underlying instruments and that the swaps do not expose the Sub-Fund to risks which it would not otherwise assume (other than the exposure to the credit default swap counterparty). The upfront payment received by a Sub-Fund, as protection seller, is recorded as a liability on the Sub-Fund's books. An upfront payment made by a Sub-Fund, as protection buyer, is recorded as an asset on the Sub-Fund's books.

---

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**  
**For the year ended 31st December, 2024**

---

**1. Summary of material accounting policies (continued)****Swaps (continued)***Swaptions*

When a Sub-Fund writes a swaption, an amount equal to the premium received by the Sub-Fund is recorded as a liability and is subsequently adjusted to the current fair value of the swaption written. Premiums received from the written swaptions which expire unexercised are treated by the Sub-Fund on the expiration dates as realised gains. If a written call swaption is exercised, the premium is added to the proceeds from the sale of the underlying swap in determining the realised gain or loss. If a written put swaption is exercised, the premium reduces the cost basis of the swap purchased.

When a Sub-Fund purchases a swaption, an amount equal to the premium paid by the Sub-Fund is recorded as an asset and is subsequently adjusted to the current fair value of the swaption purchased. Premiums paid for the purchase of swaptions which expire unexercised are treated on the expiration date as realised losses. If a purchased payer swaption is exercised, the premium is subtracted from the proceeds of the underlying swap in determining whether the relevant Sub-Fund has realised a gain or a loss. If a purchased receiver swaption is exercised, the premium is added to the cost basis of the floating rate investment that has been swapped.

**Options contracts**

The unrealised gain or loss on open option contract is calculated and recorded as the fair value of the option contract less the premium paid on that option. The fair value of the options contracts which are dealt in on a securities market are the settlement price as determined by the market. Unrealised gains or losses on open options contracts are included in financial assets and liabilities at fair value through profit or loss in the Statement of Financial Position.

The premium on purchased put options contracts exercised is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on purchased call options contracts exercised is added to the cost of the securities or foreign currency purchased. Premiums paid from the purchase of options contracts, which expire unexercised, are treated as realised losses.

**Offsetting financial instruments**

Financial assets and liabilities are offset and the net amount reported in the Statement of Financial Position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

**Due from and due to brokers**

Amounts due from and to brokers represent receivables for securities sold and payables for securities purchased respectively, that have been contracted for but not yet settled or delivered on the statement of financial position date.

These amounts are recognised initially at fair value and subsequently measured at amortised cost, less provision for impairment for amounts due from brokers, if any. A provision for impairment of amounts due from brokers is established when there is objective evidence that the Fund will not be able to collect all amounts due from the relevant broker.

**Cash at bank**

Cash at bank includes cash in hand, deposits held on call with banks or brokers and other short-term highly liquid investments with original maturities of three months or less. Cash and other liquid assets are valued at their face value with interest accrued, where applicable, to the valuation point on the relevant dealing day, unless in the opinion of the Directors (in consultation with Nomura Asset Management U.K. Limited (the "Investment Manager") and the Administrator), any adjustment should be made to reflect the true value thereof.

---

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**  
**For the year ended 31st December, 2024**

---

**1. Summary of material accounting policies (continued)****Cash at bank (continued)***Company cash accounts*

A number of Company cash accounts are being operated by the Administrator, on behalf of the Company pursuant to the Central Bank of Ireland Guidance paper entitled Umbrella Funds – Cash Accounts Holding Subscription, Redemption and Dividend Monies. These cash accounts, held with Brown Brothers Harriman Trustee Services (Ireland) Limited (the “Depositary”) for collection of unprocessed subscription monies received from investors, redemption monies payable to investors and/or other amounts due to investors for the Company are deemed assets of the Company. The balance on these cash accounts is reflected on the Statement of Financial Position of the Company with an appropriate equal and opposite liability.

**Amounts due from broker on margin accounts**

The amounts receivable from brokers on margin accounts include cash held with the futures brokers as well as the appropriate payable or receivable for the change in value when the futures contracts are marked to market each day.

Amount due from broker on margin account are detailed in Note 4.

**Redeemable participating shares**

The Fund issues redeemable participating shares, which are redeemable at the holder’s option and are classified as financial liabilities. Redeemable participating shares can be put back to the Fund at any time for cash equal to a proportionate share of the particular Sub-Fund’s Net Asset Value. The redeemable participating share is carried at the redemption amount that is payable at the statement of financial position date if the holder exercises the right to put the share back to the Fund.

Redeemable participating shares are issued and redeemed at the holder’s option at prices based on the Sub-Fund’s Net Asset Value per share at the time of issue or redemption. The Sub-Fund’s Net Asset Value per share is calculated by dividing the net assets attributable to the holders of redeemable participating shares with the total number of outstanding redeemable participating shares. In accordance with the provisions of the Fund’s regulations, investment positions are valued based on the last traded market price for the purpose of determining the Net Asset Value per share for subscriptions and redemptions.

**Dividend income**

Dividends are credited to the Statement of Comprehensive Income on the dates on which the relevant securities are listed as “ex-dividend” to the extent that information thereon is reasonably available to the Sub-Fund. Dividend income is accounted for gross of any non-reclaimable/irrecoverable withholding taxes and net of any tax credits.

**Interest income**

Interest income and expense are recognised in the Statement of Comprehensive Income at nominal rate for financial instruments at fair value through profit or loss and on an effective yield methodology for bank interest income.

**Accrued expenses**

All expenses, including management fees and performance fees, are recognised in the Statement of Comprehensive Income on an accrual basis.

**Reimbursement expense policy**

Fund reimbursement expense policy is at the sole discretion of the Investment Manager. The reimbursement is set with reference to a maximum Total Expense Ratio (“TER”) per share class, and may be utilized for the purpose of setting TER at specific level.

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)****For the year ended 31st December, 2024****1. Summary of material accounting policies (continued)****Distribution policy**

Distributions proposed and approved by the Board of Directors subsequent to the financial year end are not recognised as a liability at the financial year end date.

Distributions are recognised in the financial year that they are approved by the Board of Directors.

The Nomura Funds Ireland - China Fund, the Nomura Funds Ireland - Global High Conviction Fund, the Nomura Funds Ireland - Global Sustainable Equity Fund, the American Century Global Small Cap Equity Fund, the American Century Global Growth Equity Fund, the American Century Concentrated Global Growth Equity Fund, the American Century Emerging Markets Equity Fund, the Nomura Funds Ireland - Global Multi-Theme Equity Fund, the Nomura Funds Ireland - Japan Small Cap Equity Fund, the American Century Emerging Markets Sustainable Impact Equity Fund, the American Century Advanced Medical Impact Equity Fund, the American Century US Focused Innovation Equity Fund, the Nomura Funds Ireland - Japan Sustainable Equity Growth Fund, the Nomura Funds Ireland - Japan Sustainable Equity Core Fund, the Nomura Funds Ireland - Asia Sustainable Equity Fund, the Nomura Funds Ireland - Emerging Market Corporate Bond Fund and the Nomura Funds Ireland - China A-Shares AI Quant Strategy Fund are accumulating Sub-Funds and therefore they do not currently intend to distribute dividends to the holders of redeemable participating shares. The income and earnings of these Sub-Funds will be accumulated and reinvested on behalf of the holders of redeemable participating shares.

The Articles of Association of the Fund empower the Directors to declare dividends in respect of any shares in the Nomura Funds Ireland - India Equity Fund, the Nomura Funds Ireland - Japan Strategic Value Fund, the Nomura Funds Ireland - US High Yield Bond Fund, the Nomura Funds Ireland - Japan High Conviction Fund, the Nomura Funds Ireland - Asia Ex Japan High Conviction Fund, the Nomura Funds Ireland - Global Sustainable High Yield Bond Fund, the Nomura Funds Ireland - Global Dynamic Bond Fund, the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund, the Nomura Funds Ireland - Asia High Yield Bond Fund, the Nomura Funds Ireland - Asia Investment Grade Bond Fund, the Nomura Funds Ireland - European High Yield Bond Fund, the Nomura Funds Ireland - Corporate Hybrid Bond Fund and the Nomura Funds Ireland - US High Yield Bond Continuum Fund out of the net income of the Sub-Funds whether from dividends, interest or otherwise and/or net realised gains (i.e. realised gains net of realised and unrealised losses) or net realised and unrealised gains (i.e. realised and unrealised capital gains net of all realised and unrealised losses), subject to certain adjustments.

The Fund currently makes a distribution out of the net assets of Class AD, Class ID and Class RD of the Nomura Funds Ireland - Japan Strategic Value Fund, Class AD, Class BD, Class CD, Class D, Class ID, Class TD and Class TID of the Nomura Funds Ireland - US High Yield Bond Fund, Class ID of the Nomura Funds Ireland - Japan High Conviction Fund, Class FD and Class ID of the Nomura Funds Ireland - Asia Ex Japan High Conviction Fund, Class BD, Class FD, Class ID and Class TD of the Nomura Funds Ireland - Global Sustainable High Yield Bond Fund, Class AD, Class AD2, Class AD3, Class BD, Class CD, Class FD, Class ID, Class ID2, Class ID3, Class RD, Class SD, Class TD and Class TID of the Nomura Funds Ireland - Global Dynamic Bond Fund, Class AD, Class FD, Class ID and Class SD of the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund, Class SD of the Nomura Funds Ireland - Asia High Yield Bond Fund, Class SD of the Nomura Funds Ireland - Asia Investment Grade Bond Fund, Class BD, Class SD and Class TD of the Nomura Funds Ireland - European High Yield Bond Fund and Class AD, Class FD and Class ID of the Nomura Funds Ireland - Corporate Hybrid Bond Fund.

It is not the current intention of the Directors to make distributions in respect of the net assets of Class A, Class I, Class S, Class T and Class Z of the Nomura Funds Ireland - India Equity Fund, Class A, Class B, Class I, Class R and Class T of the Nomura Funds Ireland - Japan Strategic Value Fund, Class A, Class B, Class C, Class I, Class S, Class T and Class TI of the Nomura Funds Ireland - US High Yield Bond Fund, Class A, Class B, Class I, Class R, Class T and Class TI of the Nomura Funds Ireland - Japan High Conviction Fund, Class A, Class F and Class I of the Nomura Funds Ireland - Asia Ex Japan High Conviction Fund, Class A, Class B, Class C, Class F, Class I, Class R, Class S, Class T and Class TI of the Nomura Funds Ireland - Global Sustainable High Yield Bond Fund, Class A, Class B, Class C, Class F, Class I, Class R, Class S, Class T and Class TI of the Nomura Funds Ireland - Global Dynamic Bond Fund, Class A, Class F and Class I of the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund, Class A and Class I of the Nomura Funds Ireland - Asia High Yield Bond Fund, Class A, Class F and Class I of the Nomura Funds Ireland - Asia Investment Grade Bond Fund, Class I, Class T and Class TI of the Nomura Funds Ireland - European High Yield Bond Fund, Class A, Class F, Class I and Class R of the Nomura Funds Ireland - Corporate Hybrid Bond Fund and Class A and Class I of the Nomura Funds Ireland - US High Yield Bond Continuum Fund. The income, earnings and gains of these Classes are accumulated and reinvested on behalf of the shareholders of the Sub-Funds. Distributions to holders of Redeemable Participating Shares are recognised as finance costs in the Statement of Comprehensive Income.

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**  
**For the year ended 31st December, 2024**

**1. Summary of material accounting policies (continued)**

**Distribution policy (continued)**

A new reporting fund regime was introduced by HM Revenue and Customs with effect from 1st December, 2009. The reporting regime removes the requirement for an offshore fund to seek certification as a distributing fund following the end of each financial year and instead permits an offshore fund to seek advance approval from HM Revenue and Customs to be treated as a “reporting fund” for accounting periods commencing on or after 1st December, 2009. Once an “Offshore fund” has been granted “reporting fund” status it will maintain that status for so long as it continues to satisfy the conditions to be a “reporting fund” without a requirement to apply for further certification by HM Revenue and Customs.

The share classes below, with their date of approval, have been approved by HM Revenue and Customs as having “reporting fund” status under the United Kingdom Income and Corporation Taxes Act 1988, as amended, for the purposes of UK taxation.

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**  
**For the year ended 31st December, 2024**

---

**1. Summary of material accounting policies (continued)****Taxation**

Under current law and practice, the Fund qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or capital gains. However, Irish tax can arise on the happening of a “chargeable event”. A chargeable event includes any distribution payments to shareholders or any encashment, redemption or transfer of shares. A chargeable event can also include a deemed disposal of shares every eight years beginning from the date of acquisition of those shares.

No Irish tax will arise on the Fund in respect of chargeable events in respect of:

- a shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidated Act, 1997 as amended, are held by the Fund; and
- certain exempted Irish tax resident shareholders who have provided the Fund with the necessary signed statutory declarations.

Capital gains, dividends, and interest received (if any) by the Fund may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Fund or its shareholders.

Where there is uncertainty over future income tax treatments that may arise on the sale of investments an accrual is in place for capital gains tax and is disclosed separately in the Statement of Financial Position. This accrual currently relates to Indian emerging market investments and can change depending on the market value of these investments. A decrease in the market value of these investments may require a reduction in the accrual which can result in a negative value in the Statement of Comprehensive Income. A holding period of up to one year is classified as short-term and anything more than that is long-term.

**Income from Securities Lending**

The Fund may lend portions of its securities to third parties. The volume of the securities lending transactions is kept at an appropriate level. The Fund is entitled to request the return of the securities lent in a manner that enables it, at all times, to meet its redemption obligations. It is ensured that securities lending transactions do not jeopardise the management of the Fund’s assets in accordance with its investment policy. The income earned from the securities lending program is included in “Operating income” in the Statement of Comprehensive Income and detailed in “Securities lending income” in Note 10. Income from securities lending is accounted for on a receipt basis.

**Swing Pricing**

Under certain circumstances and unless otherwise provided in the Supplement relating to a Sub-Fund, the Directors have the power to adjust the Net Asset Value per share applicable to the issue price (the “Swing Pricing”). In any case, the adjustments to the Net Asset Value per share applicable at any valuation point shall be identical for all issues dealt with as of that business day.

Under certain circumstances (for example, large volumes of deals), investment and/or disinvestment costs may have an adverse effect on the shareholders' interests in a Sub-Fund. In order to prevent this effect, called “dilution”, the Directors may determine that the Swing Pricing methodology applies so as to allow for the Net Asset Value per share to be adjusted upwards or downwards by dealing and other costs and fiscal charges which would be payable on the effective acquisition or disposal of assets in the relevant Sub-Fund if the net capital activity exceeds, as a consequence of the aggregate transactions in that Sub-Fund on a given business day, a threshold set by the Directors from time to time.

If the net cash movement of subscriptions and redemptions into and out of a particular Sub-Fund across all share classes on a given business day (the “Net Capital Activity”) leads to a net inflow of assets in excess of the threshold in the relevant Sub-Fund, the Net Asset Value used to process all subscriptions, redemptions or conversions in that Sub-Fund is adjusted upwards by the swing factor set by the Directors from time to time. If the Net Capital Activity on a given business day leads to a net outflow of assets in excess of the threshold in the relevant Sub-Fund, the Net Asset Value used to process all subscriptions, redemptions or conversions in that Sub-Fund is adjusted downwards by the swing factor set by the Directors from time to time.

In any case, the swing factor shall not exceed 1.00% of the Net Asset Value per share of the relevant Sub-Fund. Further, for the purpose of calculating the expenses of a Sub-Fund which are based on the Net Asset Value of the relevant Sub-Fund, the Administrator will continue to use the un-swung Net Asset Value.

\* The Fund Totals as at 31st December, 2024 and 31st December, 2023, have been adjusted to account for balances in the name of the Fund. In line with the Central Bank of Ireland (the “CBI”) Guidance paper entitled Umbrella Funds – Cash Accounts Holding Subscription, Redemption and Dividend Monies published in March 2016, one or more Company cash accounts are being operated by the Administrator, on behalf of the Company, in accordance with the requirements of the CBI. Such Company cash accounts are designed to hold unprocessed subscription monies received from investors, redemption monies payable to investors and/or other amounts due to investors. As at 31st December, 2024, the amount held in these cash accounts was USD 13,057,366 (31st December, 2023: USD 8,560,523). The Fund Total overdraft of USD 13 was held with Brown Brothers Harriman & Co. as at 31st December, 2024 (31st December, 2023: USD 2,200,808). All cash at bank balances at the year end are held with Brown Brothers Harriman & Co. or with third party institutions approved by the Fund on overnight deposit or directly with a sub-custodian.

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**  
**For the year ended 31st December, 2024**

**3. Security lending**

The following tables show the fair value of securities on loan at 31st December, 2024 and at 31st December, 2023 as well as the collateral held and collateral level.

In accordance with the Securities Lending Agency Agreement (SLAA), for each loan of securities Brown Brothers Harriman & Co. (“BBH”) accepts non-cash collateral on behalf of the Nomura Funds participating in the BBH Securities Lending Program. In this arrangement, the Fund transfers securities to a counterparty, in return for which it is agreed that securities of the same kind and amount should be transferred back to the Fund at a later date. The arrangement has the substance of a loan of the Fund’s securities in return for collateral. Non-cash collateral is limited to securities issued or fully guaranteed by the United States government or issued and unconditionally guaranteed by any agencies thereof or issued or fully guaranteed by any of the G-10 sovereigns.

The sovereign debt currently accepted by BBH on behalf of the Nomura Funds which participate in the BBH Securities Lending Program are: US, UK, Sweden, Switzerland, France, Germany and Netherlands.

The table below and overleaf is presented in USD as all of the collateral referred to is USD denominated.

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**

**For the year ended 31st December, 2024**

**8. Net Asset Value per redeemable participating share reconciliation**

The Net Asset Value per redeemable participating share is calculated by dividing the total net assets (as calculated for shareholder dealing purposes) of the Sub-Fund by the number of redeemable participating shares of that class in issue. The Net Asset Value per redeemable participating share reported in the Statement of Financial Position is that used for financial statement purposes.

Organisational expenses totalling EUR 13,809 for the Nomura Funds Ireland - Corporate Hybrid Bond Fund, USD 15,326 for the Nomura Funds Ireland - US High Yield Bond Continuum Fund and USD 15,100 for the Nomura Funds Ireland - Emerging Market Corporate Bond Fund were written off in the year ended 31st December, 2023. Organisational expenses totalling EUR 10,526 for the Nomura Funds Ireland - Corporate Hybrid Bond Fund, USD 12,018 for the Nomura Funds Ireland - US High Yield Bond Continuum Fund, USD 11,879 for the Nomura Funds Ireland - Emerging Market Corporate Bond Fund and USD 8,826 for the Nomura Funds Ireland - China A-Shares AI Quant Strategy Fund were written off in the year ended 31st December, 2024.

For the purpose of calculating the Net Asset Value per share for shareholder dealing, organisational expenses are being amortised over the first five financial years of the lifetime of the Fund, USD 43,644 (31st December, 2023: USD 45,714) was amortised for the year ended 31st December, 2024. For the purpose of calculating the Net Asset Value per share for shareholder dealing, swing pricing mechanism was adopted to protect the interest of the shareholders of the Sub-Fund, USD Nil (31st December, 2023: USD Nil) was adjusted for the year ended 31st December, 2024.

The amounts in the following tables are presented in the functional currency of the share class.

## NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

For the year ended 31st December, 2024

## 9. Share capital

## Authorised

The authorised share capital of the Fund is EUR 300,000 divided into 300,000 redeemable non-participating shares of EUR 1 each and 500,000,000,000 Redeemable Participating Shares of no par value. One redeemable non-participating share has been paid up and is beneficially owned by Nomura Asset Management USA Inc. which, along with the Investment Manager, is a wholly owned subsidiary of Nomura Asset Management Co Ltd. (Japan). A redeemable non-participating share carries voting rights, it does not entitle the holder thereof to any dividend and on a winding up entitles the holder thereof to receive the amount paid up thereon but does not otherwise entitle them to participate in the Net Asset Value of the Fund. They are thus disclosed in the financial statements by way of this note only.

The following tables set out the movement of shares in issue for the year ended 31st December, 2024 and 31st December, 2023 respectively:

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**

**For the year ended 31st December, 2024**

**12. Investment Management expense and performance expense**

Nomura Asset Management U.K. Limited, the Investment Manager earned a fee of USD 80,579,983 for the year ended 31st December, 2024 (31st December, 2023: USD 59,654,894), of which USD 21,996,671 (31st December, 2023: USD 15,334,417) was due at the year end.

The Investment Management expense is calculated and accrued daily and payable quarterly in arrears. The Investment Manager is entitled to be reimbursed by the Sub-Funds for reasonable out-of-pocket expenses incurred by it and any VAT on fees and expenses payable to or by it. The Investment Manager shall pay, out of its own fee, the fees of any Sub-Investment Managers appointed in respect of one or more Sub-Funds. The Investment Manager may from time to time, at its sole discretion, and out of its own resources, rebate to affiliated entities/intermediaries and/or shareholders, part or all of the Investment Management Fee and/or the Incentive Fee. This Incentive Fee is calculated and paid as agreed directly between the Investment Manager and the relevant individual Shareholder. There was no performance fees charged during the year ended 31st December, 2024 (31st December, 2023: none), none of which was due at the year end (31st December, 2023: none).

---

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)****For the year ended 31st December, 2024**

---

**13. Manager's expense**

Bridge Fund Management Limited, the Manager, earned a fee of USD 575,547 for the year ended 31st December, 2024 (31st December, 2023: USD 473,642), of which USD 53,409 (31st December, 2023: USD 51,226) was due at the year end.

Pursuant to the Management Agreement, the Manager is entitled to charge the Fund an annual fee not to exceed a maximum of 0.01% of the Net Asset Value of the Fund. The Manager's fee shall be subject to the imposition of VAT, if required. The fee will be calculated and accrued daily and is payable monthly in arrears. The Manager's expense may be waived or reduced by the Manager, in consultation with the Directors.

The Manager shall also be entitled to be repaid all of its out-of-pocket expenses out of the assets of the Fund. The Manager shall be entitled to be reimbursed out of the assets of the Fund for any VAT on all fees and expenses payable to or by it.

**14. Administration, Depositary, Brokerage and Audit fees**

The Fund pays to the Administrator, out of the assets of each Sub-Fund, an annual fee, accrued at each valuation point and payable monthly in arrears, at a rate between 0.015% and 0.045% which shall not exceed 0.045% per annum of the aggregate value of all Sub-Funds under the Fund umbrella. The rate of 0.045% is subject to an aggregate annual minimum fee of USD 48,000 per Sub-Fund plus VAT, if any, thereon. The Administrator is also entitled to receive a monthly fee of USD 333.33 per share class of a Sub-Fund launched (such fee will not be applied to the first three share classes of a Sub-Fund launched by the Fund).

The Administrator is entitled to receive a register fee per Sub-Fund of USD 10,000 per annum and also receives registration fees, and transaction charges as agreed at normal commercial rates and is also entitled to be repaid out of the assets of the Sub-Fund all of its reasonable out-of-pocket expenses incurred on behalf of the Fund which shall include legal fees, couriers' fees and telecommunication costs and expenses together with VAT, if any, thereon. Each Sub-Fund will bear its proportion of the fees and expenses of the Administrator.

The Administrator earned a fee of USD 4,843,260 for the year ended 31st December, 2024 (31st December, 2023: USD 4,152,170), of which USD 876,921 (31st December, 2023: USD 1,075,429) was due at the year end.

Brown Brothers Harriman Trustee Services (Ireland) Limited (the "Depositary") is entitled to receive, out of the assets of each Sub-Fund, a trustee fee, accrued at each valuation point and payable monthly in arrears, of 0.0125% per annum of the Net Asset Value of each Sub-Fund. The Depositary is also entitled to receive, out of the assets of each Sub-Fund, a depositary fee, accrued at each valuation point and payable monthly in arrears, which shall not exceed 0.4% per annum, calculated by reference to the fair value of the investments that the Sub-Fund may make in each relevant market, subject to a minimum annual fee of USD 12,000 per annum.

The Depositary is also entitled to agree upon transaction charges and to recover properly vouched out-of-pocket expenses out of the assets of the relevant Sub-Fund (plus VAT thereon, if any), including legal fees, couriers' fees and telecommunication costs and expenses and the fees, transaction charges and expenses of any sub-custodian appointed by it which shall be at normal commercial rates (plus VAT thereon, if any). Each Sub-Fund will bear its proportion of the fees and expenses of the Depositary.

The Depositary earned a fee of USD 3,432,530 for depositary and trustee services for the year ended 31st December, 2024 (31st December, 2023: USD 2,142,947), of which USD 599,609 (31st December, 2023: USD 543,333) was due at the year end.

Sub-Funds may be subject to a brokerage fees related to financial derivative instruments which are listed on Recognised Exchanges. There was no brokerage fees charged during the year ended 31st December, 2024 (31st December, 2023: none), none of which was due at the year end (31st December, 2023: none).

Audit fees accrued for the year amounted to USD 296,038 (31st December, 2023: USD 353,991), including VAT, of which USD 131,022 (31st December, 2023: USD 214,823) was due at the year end. Differences between the amounts charged to the Statement of Comprehensive Income and the figures noted below are in relation to under and over accruals for the respective years.

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**

For the year ended 31st December, 2024

**14. Administration, Depositary, Brokerage and Audit fees (continued)**

Statutory auditors' fees in respect of the financial year are analysed as follows:

	<b>31st December, 2024</b>	<b>31st December, 2023</b>
	<b>EUR</b>	<b>EUR</b>
Audit of individual company accounts	215,741	257,599
Other assurances services	-	-
Tax advisory services	-	-
Other non-audit services	-	-
	<u>215,741</u>	<u>257,599</u>

**15. Directors' fees and expenses**

Each Director is entitled to charge a fee for their services at a rate determined by the Directors up to a maximum fee per Director of EUR 40,000 per annum (plus VAT) and may be entitled to special remuneration if called upon to perform any special or extra services to the Fund. The Directors fees are fixed annually by the Board of Directors. All Directors are entitled to reimbursement by the Fund of expenses properly incurred in connection with the business of the Fund or the discharge of their duties.

Directors' fees accrued for the year amounted to USD 43,369 (31st December, 2023: USD 42,967) of which USD 1 was due at the year end (31st December, 2023: USD 263). The Directors' fees paid during the year ended 31st December, 2024 were USD 43,280 (31st December, 2023: USD 43,260).

**16. Financial risk management****Strategy in using financial instruments**

The investment objective of the Sub-Funds is to achieve long-term capital growth through investment in an actively managed portfolio of global emerging market securities (Nomura Funds Ireland - Emerging Market Local Currency Debt Fund, American Century Emerging Markets Equity Fund and American Century Emerging Markets Sustainable Impact Equity Fund), Indian securities (Nomura Funds Ireland - India Equity Fund), Asian securities (Nomura Funds Ireland - Asia Sustainable Equity Fund), Asian (excluding Japan) securities (Nomura Funds Ireland - Asia Ex Japan High Conviction Fund), global equity securities (Nomura Funds Ireland - Global High Conviction Fund, Nomura Funds Ireland - Global Sustainable Equity Fund, American Century Global Small Cap Equity Fund, American Century Global Growth Equity Fund, American Century Concentrated Global Growth Equity Fund, Nomura Funds Ireland - Global Multi-Theme Equity Fund and Nomura Funds Ireland - Japan Small Cap Equity Fund), Japanese equity securities (Nomura Funds Ireland - Japan Strategic Value Fund, Nomura Funds Ireland - Japan High Conviction Fund and Nomura Funds Ireland - Japan Sustainable Equity Core Fund), high yield debt securities (Nomura Funds Ireland - US High Yield Bond Fund, Nomura Funds Ireland - Global Sustainable High Yield Bond Fund, Nomura Funds Ireland - European High Yield Bond Fund and Nomura Funds Ireland - US High Yield Bond Continuum Fund), debt securities (Nomura Funds Ireland - Global Dynamic Bond Fund, Nomura Funds Ireland - Asia High Yield Bond Fund and Nomura Funds Ireland - Asia Investment Grade Bond Fund) or Chinese securities (Nomura Funds Ireland - China Fund and Nomura Funds Ireland - China A-Shares AI Quant Strategy Fund). The investment objective of the Sub-Fund is to provide a total return that exceeds the Index through investment in a concentrated, actively managed portfolio of companies with significant long-term potential (American Century US Focused Innovation Equity Fund). The investment objective of the Sub-Funds is to achieve an attractive level of total return through investment in corporate hybrid bonds (Nomura Funds Ireland - Corporate Hybrid Bond Fund) or debt securities (Nomura Funds Ireland - Emerging Market Corporate Bond Fund).

In pursuing its investment objectives, the Fund is exposed to a variety of financial risks: market risk (including market price risk, currency risk and interest rate risk), credit risk and liquidity risk that could result in a reduction in the Fund's Net Asset Value. The Fund's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Sub-Funds' financial performance.

The risks, and the Directors' approach to the management of the risks, are as follows.

---

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**  
**For the year ended 31st December, 2024**

---

**16. Financial risk management (continued)****Market price risk**

Market price risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices.

The Fund's assets consist principally of quoted equities and debt securities, the values of which are determined by market forces. All security investments present a risk of loss of capital. The Investment Manager moderates this risk through a careful selection of securities within specified limits including maximum overweight limits for individual stocks and country weights versus the benchmark. The maximum risk resulting from financial instruments is determined by the fair value of the financial instruments. The Board of Directors manage the market price risks inherent in the investment portfolios by ensuring full and timely access to relevant information from the Investment Manager.

The Board of Directors meets regularly and at each meeting reviews investment performance and overall market positions. They monitor the Investment Manager's compliance with the Fund's objectives and are directly responsible for investment strategy and asset allocation. There were no material changes to the Fund's policies and processes for managing market risk and the methods used to measure risk since the prior year end.

The Board of Directors is ultimately responsible for identifying and controlling risks, however the Investment Manager is responsible for the day to day monitoring of risk, and will bring any material events in relation to any changes in the risk profile of the Sub-Funds to the attention of the Directors. The Sub-Funds' global exposure is managed through the use of the "Commitment Approach" method or the value at risk ("VaR") approach. Where using the Commitment Approach, the global exposure through the use of derivatives is limited to 100 percent of the Net Asset Value of the Sub-Fund. Additionally, the Sub-Investment Managers monitor the risk of the Sub-Funds using a variety of proprietary and third party analysis tools to analyse the risk characteristics of the portfolios. The impact of individual trades on the risk profile of the Sub-Fund is also considered before the investment decision is made.

The Sub-Funds' equity securities are susceptible to market price risk arising from uncertainties about future prices of the instruments. The Sub-Funds' market price risk is managed through diversification of the investment portfolio ratios by exposures. An analysis of the Sub-Funds investment portfolio is shown in the Statement of Investments on pages 424 to 683. The equity securities are selected from a variety of regulated stock exchanges as detailed in the prospectus.

At 31st December, 2024 and 31st December, 2023, a 5% increase in equity security prices would have increased the net assets attributable to holders of redeemable participating shares of each Sub-Fund as outlined in the tables below; an equal change in the opposite direction would have decreased the net assets attributable to holders of redeemable shares by an equal but opposite amount.

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**

For the year ended 31st December, 2024

**16. Financial risk management (continued)****Currency risk**

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Certain, of each Sub-Fund's, assets, liabilities and income are denominated in currencies other than the Sub-Fund's functional currency. They are, therefore, exposed to currency risk as the value of the securities denominated in other currencies will fluctuate due to changes in exchange rates. Income denominated in foreign currencies is converted to the Sub-Fund's functional currency on receipt.

In accordance with the Fund's policy, the Investment Manager monitors the Fund's currency position on a daily basis and will bring any material events to the attention of the Board of Directors. There were no material changes to the Fund's policies and processes for managing currency risk and the methods used to measure risk since the prior year end. The following tables list the exposure to currencies with a value of greater than 5% of the net assets of each Sub-Fund.

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**  
**For the year ended 31st December, 2024**

**16. Financial risk management (continued)**

**Interest rate risk (continued)**

A bond's sensitivity to interest rates can be expressed in terms of duration, which gives the estimated percentage change in portfolio value, associated with a 1% increase in interest rates.

The following analysis is estimated based on the duration calculations as at 31st December, 2024 and 31st December, 2023. This analysis is intended as a relative estimate of interest rate risk for the Sub-Fund rather than as precise numbers. Therefore, the amounts presented represent hypothetical outcomes which are not intended to be predictive, as future market conditions could vary significantly from those experienced in the past.

Also shown in the tables is the estimated impact on the portfolio of a 1 basis point (0.01 of 1 per cent) increase in interest rates. The sensitivity analysis is based on a small parallel shift of the yield curve (interest rates of all maturities moving in unison). A 1 basis point decrease would have an equal but opposite effect.

At 31st December, 2024	Portfolio Value	Duration	Return expected if Interest Rates Rise by 1 Basis Point	
	USD		%	Total USD

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**  
**For the year ended 31st December, 2024**

---

**16. Financial risk management (continued)****Credit risk (continued)**

The concentration of credit risk, split out by the country and the industry each security is invested in, is included in the Statement of Investments on pages 424 to 683.

All transactions in listed securities are settled/paid for upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet its obligation.

Cash held via accounts opened on the books of Brown Brothers Harriman & Co. ('BBH') are obligations of BBH while cash held in accounts opened directly on the books of a third party cash correspondent bank, sub-custodian or a broker (collectively, 'agency accounts') are obligations of the agent. Cash held via agency cash accounts are liabilities of the agent, creating a debtor/creditor relationship directly between the agent and the Fund. Accordingly, while BBH is responsible for exercising reasonable care in the administration of such agency cash accounts where it has appointed the agent (i.e., in the case of cash correspondent banks and sub-custodians), it is not liable for their repayment in the event the agent, by reason of its bankruptcy, insolvency or otherwise, fails to make repayment. At 31st December, 2024 and 31st December, 2023, all institutions holding cash on behalf of the Fund had an F1 or better short-term credit rating as measured by Fitch's. The institutions holding cash on behalf of the Fund at 31st December, 2024 and 31st December, 2023 are listed in Note 2. At 31st December, 2024 and 31st December, 2023, all derivative assets and liabilities were held with the counterparties that had an A- or better long-term credit rating as measured by Fitch's. The counterparties of derivatives assets and liabilities are disclosed in the Statements of Investments.

The Trustee must ensure that there is legal separation of non-cash assets held in custody, that such assets are held on a fiduciary basis, and that appropriate internal control systems are maintained such that records clearly identify the nature and amount of all assets under custody. As Trustee, Brown Brothers Harriman Trustee Services (Ireland) Ltd. must ensure the ownership of each asset and the location of documents of title for each asset.

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**  
**For the year ended 31st December, 2024**

**16. Financial risk management (continued)**

**Liquidity risk**

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with liabilities.

The Sub-Funds are exposed to daily cash redemptions of redeemable participating shares. The Sub-Funds therefore invest the majority of their assets in financial instruments that are traded in an active market and can be readily disposed of; they may invest a limited proportion of their assets in investments not actively traded on a stock exchange.

The Sub-Funds' listed securities are considered readily realisable, as they are listed on the regulated stock exchanges as detailed in the prospectus. The Sub-Funds have the ability to borrow in the short-term to ensure settlement. At 31st December, 2024, the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund had an overdraft cash balance of USD 10 (31st December, 2023: none) and the American Century Global Small Cap Equity Fund had an overdraft cash balance of USD 3 (31st December, 2023: USD 2,200,808).

In accordance with the Fund's policy, the Investment Manager monitors the Sub-Funds' liquidity position on a daily basis and will bring any material events to the attention of the Board of Directors. There were no material changes to the Fund's policies and processes for managing liquidity risk and the methods used to measure risk since the prior year end.

A detailed analysis of the Sub-Funds' assets is not shown as they are considered liquid based on the fact that they could be converted to cash at close to their carrying value.

The tables that follow analyse the Sub-Funds' liabilities into relevant maturity groupings based on the remaining period at the statement of financial position date to the contractual maturity date. The amounts in the tables are the contractual undiscounted cash flows. Balances due within twelve months equal their carrying balances, as the impact of discounting is not significant.

\* Redeemable participating shares include the related redemption payable balance and are redeemed on demand at the holder's option.

**Fair value estimation**

The Fund has classified fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- (i) Level 1: Investments, whose values are based on quoted market prices in active markets, and therefore classified within level 1, include active listed equities and exchange traded derivatives. Quoted prices for these instruments are not adjusted.
- (ii) Level 2: Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. These include investment-grade corporate bonds, listed equities on markets that are not active and over-the-counter derivatives. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information. Investments classified within Level 2 are the following asset classes: bonds, forward foreign currency contracts, swaps and OTC derivatives. Forward Foreign Currency Contracts are priced based on the current spot rate, provided by financial FX vendors, plus or minus the applicable number of forward points. This is the forward rate. The number of forward points on a given exchange rate is determined by the prevailing interest rates in each market, the time period between the spot and forward rates as well as other market factors. Bonds are valued based on the latest bid prices obtained from Markit as per the Nomura Funds Ireland Plc pricing hierarchy. Swaps are valued at single price obtained from Markit prior day as per the Nomura Funds Ireland Plc pricing hierarchy. All assets that are not exchange traded but where the price is observable either directly or indirectly is deemed to be a Level 2.
- (iii) Level 3: Investments classified within level 3 have significant unobservable inputs, as they trade infrequently. Pricing inputs are unobservable for the investment and include situations where there is little, if any, market activity for the Instrument. The inputs into the determination of fair value require significant management judgement or estimation. As observable prices are not available for these securities, the Fund has used valuation techniques to derive the fair value, if applicable.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the financial asset or liability.

The determination of what constitutes 'observable' requires significant judgement by the Directors in consultation with the Investment Manager. The Directors consider observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

## NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

For the year ended 31st December, 2024

## 16. Financial risk management (continued)

The following tables analyse within the fair value hierarchy the Sub-Funds' financial assets and financial liabilities measured at fair value at 31st December, 2024 and 31st December, 2023:

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

For the year ended 31st December, 2024

16. Financial risk management (continued)

Offsetting

The Fund is required to disclose the impact of offsetting assets and liabilities represented in the Statement of Financial Position to enable users of the financial statements to evaluate the effect or potential effect of netting arrangements on its financial position for recognized assets and liabilities. These recognized assets and liabilities are derivative instruments that are either subject to an enforceable master netting arrangement or similar agreement or meet the following right of set-off criteria: the amounts owed by the Fund to another party are determinable, the Fund has the right to set-off the amounts owed with the amounts owed by the other party, the Fund intends to set-off on a net basis, and the fund right of set-off is enforceable at law.

For financial reporting purpose, the Fund does not offset derivative assets and derivative liabilities in the Statement of Financial Position. The following tables present the Fund's derivative assets and liabilities by counterparty, net of amounts available for offset under a master netting agreement and net of the related collateral received by the Fund for assets and pledged by the Fund for liabilities as at 31st December, 2024 and 31st December, 2023:

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**  
**For the year ended 31st December, 2024**

**17. Related party transactions**

Under IAS 24 “Related Party Disclosures” parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions.

Mr. David Dillon, a Director of the Fund is a Director of the Manager which provides management and professional services to the Fund. Expenses of USD 635,861 were paid by the Fund in relation to services provided by the Manager for the year ended 31st December, 2024 (31st December, 2023: USD 539,332). Mr. James Tucker and Mr. Go Hiramatsu, the Directors of the Fund, are employees of Nomura Asset Management U.K. Limited, the Distributor and Investment Manager of the Company. Mr. Tomahisa Hanabata, a Director of the Fund, is an employee of Nomura Asset Management Co. Ltd Tokyo, the Sub-Investment Manager of the Company. Directors who are employees of the Investment Manager (or an affiliate) are not paid any fees for their services as directors.

*Related party ownership*

One of the Directors held interests directly or indirectly in the Sub-Funds during the financial year. At the end of the year, his interests were as follows:

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**

For the year ended 31st December, 2024

**18. Efficient portfolio management**

The Fund may employ (subject to the conditions and within the limits laid down by the Central Bank techniques and instruments relating to transferable securities, including but not limited to futures contracts, swaps, options contracts, stock-lending, repurchase agreements and reverse repurchase agreements and any other techniques and instruments the Investment Manager may consider appropriate for efficient portfolio management purposes. Efficient portfolio management transactions may be entered into by the Investment Manager with one of the following aims: a) a reduction of risk; b) a reduction of cost with no increase or a minimal increase in risk; c) generation of additional capital or income with no, or an acceptably low level of risk (relative to the expected return). The techniques and instruments employed during the year were futures contracts, swaps, options contracts and stock-lending. Details of stock-lending, including counterparties, are presented in Note 3.

The following tables show the realised gains/(losses), movements in unrealised gains/(losses) and commission expenses related to futures contracts, swaps and options contracts during the year ended 31st December, 2024 and 31st December, 2023. Counterparties for futures contracts, swaps and options contracts used by the Sub-Funds are disclosed in relevant Statement of Investments.

The use of financial derivative instruments by a Sub-Fund may create leverage. To the extent that leverage is employed, leverage will be measured using the commitment approach of measuring risk, whereby such leverage cannot exceed 100 per cent of the Net Asset Value of a Sub-Fund. Where a Sub-Fund invests in financial derivative instruments for such purposes, a risk management process will be submitted to the Central Bank by the Fund, prior to a Sub-Fund engaging in such transactions in accordance with the Central Bank's requirements as set out in UCITS Regulations. It is expected at the use of financial derivative techniques and instruments will not increase a Sub-Fund's risk level.

---

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**  
**For the year ended 31st December, 2024**

---

**19. Global Exposure**

UCITS funds are required to monitor exposures on a daily basis by utilising either the commitment approach or the value at risk (“VaR”) approach when financial derivative instruments are held by the Sub-Funds. With the exception of the Nomura Funds Ireland - Global Dynamic Bond Fund and the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund, the Investment Manager utilises the commitment approach in monitoring the exposures of the Sub-Funds as the market risk can be adequately monitored through this method. The use of financial derivative instruments by a Sub-Fund may create leverage. The leverage of a sub-fund cannot exceed 100 per cent of the Net Asset Value of the Sub-Fund. With the exception of the Nomura Funds Ireland - Global Dynamic Bond Fund and the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund, derivatives will be primarily used to achieve one of the following aims: a) a reduction of risk; b) a reduction of cost with no increase or a minimal increase in risk; c) generation of additional capital or income with no, or an acceptably low level of risk (relative to the expected return).

Although permitted to hold derivatives, the Nomura Funds Ireland - India Equity Fund, the Nomura Funds Ireland - Asia Ex Japan High Conviction Fund, the Nomura Funds Ireland - China Fund, the Nomura Funds Ireland - Global Sustainable Equity Fund, the American Century Global Growth Equity Fund, the American Century Concentrated Global Growth Equity Fund, the American Century Emerging Markets Equity Fund, the Nomura Funds Ireland - Global Multi-Theme Equity Fund, the American Century Emerging Markets Sustainable Impact Equity Fund, the American Century US Focused Innovation Equity Fund, the Nomura Funds Ireland - Asia Sustainable Equity Fund and the Nomura Funds Ireland - US High Yield Bond Continuum Fund did not hold any derivatives at 31st December, 2024 and 31st December, 2023, the Nomura Funds Ireland - Japan Small Cap Equity Fund, the Nomura Funds Ireland - Japan Sustainable Equity Growth Fund, the Nomura Funds Ireland - Japan Sustainable Equity Core Fund and the Nomura Funds Ireland - China A-Shares AI Quant Strategy Fund did not hold any derivatives at 31st December, 2023. These Sub-Funds held equities, bonds and collective investment schemes at 31st December, 2024 and 31st December, 2023, respectively. These Sub-Funds are monitored regularly for any change that would require FDI risk monitoring.

The Nomura Funds Ireland - Japan Strategic Value Fund held equities and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2024 and 31st December, 2023. The Nomura Funds Ireland - US High Yield Bond Fund held equities, bonds, warrants, term loans and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2024 and 31st December, 2023. The Nomura Funds Ireland - Japan High Conviction Fund held equities and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2024 and 31st December, 2023. The Nomura Funds Ireland - Global Sustainable High Yield Bond Fund held bonds, equities, term loans and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2024 and 31st December, 2023. The Nomura Funds Ireland - Asia High Yield Bond Fund held bonds and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2024 and 31st December, 2023. The Nomura Funds Ireland - Asia Investment Grade Bond Fund held bonds and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2024 and bonds, futures contracts and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2023. The Nomura Funds Ireland - Global High Conviction Fund held equities and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2024 and 31st December, 2023. The Nomura Funds Ireland - European High Yield Bond Fund held bonds, equities, term loans, warrants and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2024 and 31st December, 2023. The American Century Global Small Cap Equity Fund held equities, collective investment schemes and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2024 and 31st December, 2023. The Nomura Funds Ireland - Japan Small Cap Equity Fund held equities and forward foreign currency contracts for the purposes of currency hedging at 31st December 2024. The Nomura Funds Ireland - Japan Sustainable Equity Core Fund held equities and forward foreign currency contracts for the purposes of currency hedging at 31st December 2024. The Nomura Funds Ireland - Corporate Hybrid Bond Fund held bonds and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2024 and 31st December, 2023. The Nomura Funds Ireland - Emerging Market Corporate Bond Fund held bonds, futures contracts and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2024 and bonds and futures contracts for the purposes of currency hedging at 31st December 2023. The Nomura Funds Ireland - China A-Shares AI Quant Strategy Fund held equities and futures contracts for the purposes of currency hedging at 31st December 2024.

Breaches of exposure limits, if any, are identified using the commitment approach, addressed by the Investment Manager and reported to the Directors. An annual FDI report is provided to the Central Bank detailing any exposures breached during the year and any material changes to the risk monitoring process.

Average VaR %	1.83

The purpose of a VaR model is the quantification of the maximum potential loss which might be generated by a Sub-Fund's portfolio in normal market conditions. This loss is estimated on the basis of a given holding period and a certain confidence interval. The Nomura Funds Ireland uses a Monte Carlo methodology for VaR calculation. The Monte Carlo simulation approach is used to model the probability of different outcomes in a process in which there are interventions of random variables and refers to any method that randomly generates trials. The holding period of VaR analysis used for the Nomura Funds Ireland - Global Dynamic Bond Fund and the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund is 20 days (31st December, 2023: 1 day), the length of the historical data window period is 250 days based on the full revaluation approach.

---

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)****For the year ended 31st December, 2024**

---

**20. Soft commissions**

In accordance with its obligations under MiFID, the Investment Manager shall return to the relevant Sub-Fund any fees, commissions or other monetary benefits paid or provided by a third party in relation to the investment management services provided by the Investment Manager to the Fund as soon as reasonably possible after receipt.

In particular, where the Investment Manager successfully negotiates the recapture of a portion of the commissions charged by brokers or dealers in connection with the purchase and/or sale of securities, permitted derivative instruments or techniques and instruments for the Fund or a Sub-Fund, the rebated commission shall be paid to the Fund or the relevant Sub-Fund as the case may be.

The Investment Manager shall however be permitted to retain minor non-monetary benefits received from third parties where the benefits are such that they could not impair the Investment Manager from complying with its obligation to act in the best interests of the Fund, provided they are disclosed to the Fund prior to the provisions of investment management services by that entity. A list of acceptable “minor non-monetary” benefits is set out in the Commission Delegated Directive (EU) 2017/593.

The Investment Manager may only receive third-party investment research, provided it is received on such basis that it does not contravene MiFID.

Investment research will not constitute an inducement under MiFID where it is paid for by the Investment Manager itself out of its own resources or out of a research payment account funded by a specific research charge to the applicable Sub-Fund.

In this regard, the Investment Manager may discharge the charges relating to investment research which is or may be used by the Investment Manager in managing the assets of the Fund out of its own resources or out of a research payment account funded by a specific research charge to the applicable Sub-Fund.

There were no soft commission arrangements entered into by the Investment Manager or its delegate, on behalf of the Fund during the year ended 31st December, 2024 (31st December, 2023: none).

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)****For the year ended 31st December, 2024****23. Notional foreign exchange adjustment**

For the purposes of reporting the combined results of the Fund at 31st December, 2024, the results of the Nomura Funds Ireland - Japan Strategic Value Fund, the Nomura Funds Ireland - Japan High Conviction Fund, the Nomura Funds Ireland - Japan Small Cap Equity Fund, the Nomura Funds Ireland - Japan Sustainable Equity Growth Fund and the Nomura Funds Ireland - Japan Sustainable Equity Core Fund have been translated into US Dollars at the closing rate at the year end date 1 USD = 157.1150 JPY (31st December, 2023: 1 USD = 141.4550 JPY) for Statement of Financial Position items and the average rate for the year from 1st January, 2024 to 31st December, 2024 1 USD = 151.3088 JPY (2023: 1 USD = 140.2721 JPY) for the Statement of Comprehensive Income and the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares. The results of the Nomura Funds Ireland - European High Yield Bond Fund and the Nomura Funds Ireland - Corporate Hybrid Bond Fund have been translated into US Dollars at the closing rate at the year end date 1 USD = 0.9638 EUR (31st December, 2023: 1 USD = 0.9033 EUR) for Statement of Financial Position items and the average rate for the year from 1st January, 2024 to 31st December, 2024 1 USD = 0.9242 EUR (2023: 1 USD = 0.9246 EUR) for the Statement of Comprehensive Income and the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares. A notional currency adjustment of USD (201,560,760) (31st December, 2023: USD (71,186,327)) arises from the translation of the opening net assets, the Statement of Comprehensive Income and the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares. The method of translation has no effect on the value of net assets allocated to the individual Sub-Funds.

In accordance with the UCITS Regulations, the annual report documents material changes that have occurred in the disposition of the assets of the Company during the financial year. A material change is defined as aggregate purchase of a security exceeding 1 percent of the total value of purchased for the financial year and/or aggregate disposals greater than 1 percent of the total value of sales for the financial year. If there are fewer than 20 purchases/sales that meet the material change definition, the Company shall disclose those purchase/sales and such number of the next largest purchases/sales so at least 20 purchases/sales are disclosed.

**APPENDIX 1 – SECURITIES FINANCING TRANSACTIONS REGULATION**

Securities Financing Transaction Regulation (“SFTR”) introduces reporting requirements for securities financing transactions (“SFTs”) and total return swaps.

A Securities Financing Transaction (SFT) is defined as per Article 3(11) of the SFTR as:

- a repurchase/reverse repurchase agreement
- securities or commodities lending and securities or commodities borrowing
- a buy-sell back transaction or sell-buy back transaction, or
- a margin lending transaction

As at 31st December, 2024 the Sub-Funds held securities lending as types of instruments under the scope of the SFTs.

The following tables are presented in USD as all of the collateral referred to is USD denominated.

**Global Data**

The amount of assets across all SFTs as at 31st December, 2024 is as follows:

Nomura Funds Ireland - Japan Strategic Value Fund

Type of asset	Amount*	% of NAV	% of lendable assets
Securities lending	USD 162,167,276	9.33%	9.31%

Nomura Funds Ireland - US High Yield Bond Fund

**APPENDIX 2 (UNAUDITED) – REMUNERATION DISCLOSURE**

The below disclosure is made in respect of the remuneration policies of Bridge Fund Management Limited (“Manager”) in accordance with the European Union Directive 2014/91/EU as implemented in Ireland by European Union (Undertakings for Collective Investment in Transferable Securities) (Amendment) Regulations 2016. This requires UCITS management companies to establish and apply remuneration policies and practices that promote sound and effective risk management, and do not encourage risk taking which is inconsistent with the risk profile of the UCITS.

The Manager has designated the following persons as Identified Staff:

- Executive and Non-Executive members of the management body of the Manager e.g. CEO, Directors, Executive and Non-Executive partners;
- Senior management;
- Risk takers – staff who can exert material influence on the Manager or on the UCITS or Alternative Investment Funds (“AIFs”) it manages;
- Those in control functions: Operations, HR, Compliance, Finance where applicable;
- Staff whose total remuneration takes them into the bracket of senior management and risk takers, whose professional activities have a material impact on the Manager’s risk position or those of the UCITS and/or AIFs it manages; and
- Categories of staff of the entities to which portfolio management or risk management activities have been delegated whose professional activities have a material impact on the Manager’s risk position or those of the UCITS and/or AIFs it manages.

The Remuneration Policy is designed to discourage risk taking that is inconsistent with the risk profile of the UCITS and the Manager is not incentivised or rewarded for taking excessive risk.

The Manager is required under UCITS regulations to make quantitative disclosures of remuneration. Disclosures are provided in relation to Identified Staff who are employed directly by the Manager and Identified Staff who have the ability to materially impact the risk profile of the UCITS including individuals who, although not directly employed by the Manager, are assigned by their employer to carry out services directly by the Manager.

All remuneration paid to Identified Staff can be divided into:

- Fixed remuneration (payments or benefits without consideration of any performance criteria); and
- Variable remuneration (additional payments or benefits depending on performance or, in certain cases, other contractual criteria) which is not based on the performance of the UCITS.

The Manager’s annual remuneration details for the year ended 31st December, 2024 are disclosed below:

<b>Description</b>	<b>Number of beneficiaries</b>	<b>Total remuneration paid</b>	<b>Fixed remuneration paid</b>	<b>Variable remuneration paid</b>
Total Staff Remuneration	62	€4,315,711	€3,349,915	€965,796
Senior Management (including executives), risk takers and other identified staff	15	€1,920,967	€1,274,081	€646,886

Details of the Remuneration Policy, including, but not limited to, a description of how remuneration and benefits are calculated and the identity of persons responsible for awarding the remuneration and benefits is available at the following website:

<https://bridgefundservices.com/remuneration-policy/>

## ANNEX

Product name: Nomura Funds Ireland – Japan Strategic Value Fund  
 Legal entity identifier: 549300PEL817FAJZZS61

# Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_\_%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted contribution to reduction of greenhouse gas (GHG) emissions and sustainable, fair and inclusive business practices as its environmental and social characteristics.

The environmental characteristic was pursued through focusing on companies that contribute to reduction of GHG emissions through products and services which improve energy efficiency of manufacturing industry as a whole, and products and services which enables electrification of automobiles and alike.

The social characteristic was pursued mainly through the exclusions applied for the Sub-Fund which limited the Sub-Fund's exposure in certain businesses and sectors such as gambling, thermal coal, tobacco and controversial weapons as well as compliance with the UN Global Compact principles.

The extent of the Sub-Fund's impact and/or contribution is further described in the section "How did the sustainability indicators perform?" and "How did this financial product consider principal adverse impacts on sustainability factors?" below. The proportion of the Sub-Fund

that was aligned with the environmental and social characteristics is disclosed under the section “What was the proportion of sustainability-related investments?” below.

● **How did the sustainability indicators perform?**

Contribution to reduction of greenhouse gas emissions:

- GHG emissions per unit revenue: The weighted average Scope 1 and 2 GHG intensity (Scope 1 & 2 emissions per USD1 million of revenue) was 55.8 tonnes, whereas that of the TOPIX index (the “Index”) was 80.6 tonnes.

Sustainable, fair and inclusive business practices:

- Women in senior management: The percentage of female directors was 20.66% as opposed to 19.28% of the companies in the Index.
- Compliance with UN Global Compact principles: No holdings fell outside compliance with UN Global Compact principles through the year.
- Exposure to controversial weapons: No holdings had exposure to controversial weapons through the year.

Please note that the sustainability indicator data becomes available on an annual basis in the following months post the end of the fiscal year (the end of March for most of Japanese companies). Therefore, the sustainability indicators provided above have been calculated based on the data available at the time of this periodic report, using the quarter-end average weights of holdings held in the Sub-Fund in 2024 and the latest available impact data. Sustainability indicators above do not take into account companies without relevant data and/or companies whose activities are not relevant to the particular sustainability indicator(s).

For the sustainability indicators above, the Investment Manager has used the data provided by third-party data providers, ISS-ESG and MSCI, as well as research conducted by in-house analysts.

● **...and compared to previous periods?**

Sustainability indicators	31 December 2022 reference period (reported in 2023 periodic report)	31 December 2023 reference period (reported in 2024 periodic report)	31 December 2024 reference period (reported in 2025 periodic report)
GHG emissions per unit revenue (weighted average Scope 1 and 2 GHG intensity)	81.04 tonnes	75.8 tonnes	55.8 tonnes
Women in senior management	16.99%	18.62%	20.66%
Compliance with UN Global Compact	All holdings	All holdings	All holdings
Exposure to controversial weapons	No holdings	No holdings	No holdings

An oil and gas exploration and production company with a commitment to reducing GHG emissions over medium-term has contributed to the lower GHG intensity through the reduction of Scope 1 and Scope 2 GHG emissions. Additionally, lower weight invested in an airline company has also contributed to the lower GHG intensity compared to the previous period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

Percentage of female board members has improved mainly due to many companies across the board have recently increased female board members with the help of the listing rule reform by Tokyo Stock Exchange.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable.

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Sub-Fund considered the following principal adverse impact (PAI) indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund’s Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)

- Violation of UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines) (threshold 0%)

The Sub-Fund also considered following PAI indicators:

- GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water
- Hazardous waste and radioactive waste ratio
- Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- Unadjusted gender pay gap
- Board gender diversity

	Impact	Portfolio	Data coverage (%)	Index	Data coverage (%)
1.1.1	Scope 1 GHG emissions	39,635.22	99.99	93,065.51	98.38
1.1.2	Scope 2 GHG emissions	31,921.46	99.99	33,455.71	98.38
1.1.3	Scope 3 GHG emissions	1,202,460.25	100.00	1,151,771.95	98.39
1.1.4	Total GHG emissions	1,274,066.58	99.99	1,278,388.27	98.38
1.2	Carbon Footprint	767.10	99.99	757.78	98.38
1.3	GHG intensity of investee company	1,203.24	99.99	1,047.06	98.38
1.4	Exposure to companies active in the fossil fuel sector	8.62	99.38	9.39	97.71
1.5	Share of non-renewable energy consumption and production	83.05	64.99	80.94	59.21
1.6.1	NACE Code A (Agriculture, Forestry and Fishing)	N/A	0.00	N/A	0.00
1.6.2	NACE Code B (Mining and Quarrying)	1.09	1.41	0.25	1.67
1.6.3	NACE Code C (Manufacturing)	0.34	40.88	0.36	47.14
1.6.4	NACE Code D (Electricity, Gas, Steam and Air Conditioning Supply)	N/A	0.00	2.09	1.15
1.6.5	NACE Code E (Water Supply; Sewerage, Waste Management and Remediation Activities)	N/A	0.00	0.23	0.15
1.6.6	NACE Code F (Construction)	0.09	5.35	0.12	2.24
1.6.7	NACE Code G (Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles)	0.04	10.20	0.06	7.62
1.6.8	NACE Code H (Transportation and Storage)	1.33	3.44	1.40	3.31
1.6.9	NACE Code L (Real Estate Activities)	0.14	3.88	0.16	1.35
1.7	Activities negatively affecting biodiversity-sensitive areas	7.37	99.32	11.84	97.46

1.8	Emissions to water	0.00	0.92	0.03	2.37
1.9	Hazardous waste and radioactive waste ratio	0.22	7.24	0.61	12.69
1.10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	98.82	0.17	97.34
1.11	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	1.63	99.38	2.10	97.70
1.12	Unadjusted gender pay gap	26.89	40.93	25.84	31.86
1.13	Board gender diversity	22.09	99.93	20.96	97.56
1.14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	100.00	0.00	97.85

\*Where there was no impact data and/or no data coverage for an indicator, the value is shown as "N/A" above. The PAI data above represents the average of four quarter-end impacts obtained from MSCI (the "Data Provider") at the time of this periodic report. The data coverage for #1.6.1 to #1.6.9 has been calculated by the Investment Manager based on the Data Provider's data.

- #1.1.3, 1.2 & 1.3 (Scope 3 GHG emissions, carbon footprint and GHG intensity): The carbon metrics underperformed the Index due to an outsized Scope 3 emissions of an industrial company estimated by the Data Provider's model which accounts for around 28% of the portfolio Scope 3 GHG emissions on average over four quarters. The Investment Manager has verified the reported Scope 3 emissions data published in the company's sustainability report, which was approximately half the amount of the Data Provider's estimate and a more realistic number based on the company's businesses. Should the reported Scope 3 GHG emissions data be used, the portfolio would have outperformed the Index. Investment Manager will continue to monitor the Scope 3 GHG emission of the company and the Data Provider's estimation methodology. Carbon footprint and GHG intensity are calculated based on the absolute GHG emissions and therefore the same outsized Scope 3 emission estimate of the industrial company has affected these indicators as well.
- #1.5 (Share of non-renewable energy consumption and production): The Sub-Fund holds a comprehensive electrical machinery manufacturer. Although this company has a low utilization rate of renewable energy due to its high energy consumption, it aims to achieve carbon neutrality for its GHG emissions from its offices and factories by the fiscal year 2030. Additionally, this company is one of a few global players that manufacture power grids which are essential for the expansion of renewable energy. Therefore, the Investment Manager believes that the company contributes to decarbonisation in the long term.
- #1.6.2 (NACE Code B): Regarding NACE Code B (Mining and Quarrying), the Sub-Fund invested in an oil and gas exploration and production company. The company commits to net zero by 2050 (Scope 1 & 2) and plans to invest more than 20% of the CapEx in decarbonisation projects including the expansion of hydrogen and ammonia businesses. While the PAI data of the Sub-Fund exceeds that of the Index (1.09 and 0.25, respectively), the Investment Manager considers that the commitment and activities of the company will contribute to the promotion of the environmental characteristic of the Sub-Fund.
- #1.12 (Unadjusted gender pay gap): The Sub-Fund holds construction companies that provide energy-efficient houses in Japan and overseas, and companies that can build large-scale power grids, which the Investment Manager believes to contribute to GHG emission reduction. These companies have been historically less gender diverse as industries, resulting in few women in leadership roles that has contributed to the wider gender pay gap. While the indicator for the Sub-Fund underperformed at 26.89

unadjusted gender pay gap ratio in comparison to 25.84 of the Index, the Investment Manager will continue to engage with companies to encourage further improvement.

- #1.13 (Board gender diversity): The Investment Manager has added exposure to companies that respect the importance of diversity which resulted in the Sub-Fund's outperformance on the board gender diversity (22.09%) against the Index (20.96%). The Investment Manager will continue to engage with companies to encourage further improvement.

Please note that data from the Data Provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund or the Index.

The Sub-Fund uses the Index in the way that the PAI of the Sub-Fund are compared against the PAI of the Index, with the aim being, in principle, to limit such portfolio average adverse impacts (weighted average adverse impact of the companies held by the Sub-Fund) to be lower than that of the Index. However, the Index is not used to define the portfolio composition of the Sub-Fund and is not used for the purpose of determining the attainment of the environmental and social characteristics promoted by the Sub-Fund. The Index is a broad market index and not consistent with the environmental and social characteristics promoted by the Sub-Fund.

## What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
MITSUBISHI UFJ FINANCIAL	Financials	5.81	Japan
HITACHI LTD	Industrials	4.68	Japan
NIPPON TELEGRAPH & TELEPHONE	Communication Services	4.55	Japan
SONY GROUP CORP	Consumer Discretionary	3.65	Japan
TOKYO ELECTRON LTD	Information Technology	3.08	Japan
SHIN-ETSU CHEMICAL CO LTD	Materials	2.73	Japan
DAIWA HOUSE INDUSTRY CO	Real Estate	2.60	Japan
ITOCHU CORP	Industrials	2.37	Japan
NINTENDO CO LTD	Communication Services	2.36	Japan
SUMCO CORP	Information Technology	2.18	Japan
MITSUBISHI CORP	Industrials	2.13	Japan
SUMITOMO REALTY & DEVELOPMENT CO LTD	Real Estate	2.11	Japan
DAIICHI SANKYO CO LTD	Health Care	2.07	Japan
FUJIFILM HOLDINGS CORP	Information Technology	2.03	Japan
NEC CORP	Information Technology	2.00	Japan

\* Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

## What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which promoted environmental and social characteristics during the reference period is provided below.

- **What was the asset allocation?**

#1 Aligned with E/S characteristics

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1<sup>st</sup> January 2024 to 31<sup>st</sup> December 2024.**

**Asset allocation** describes the share of investments in specific assets.

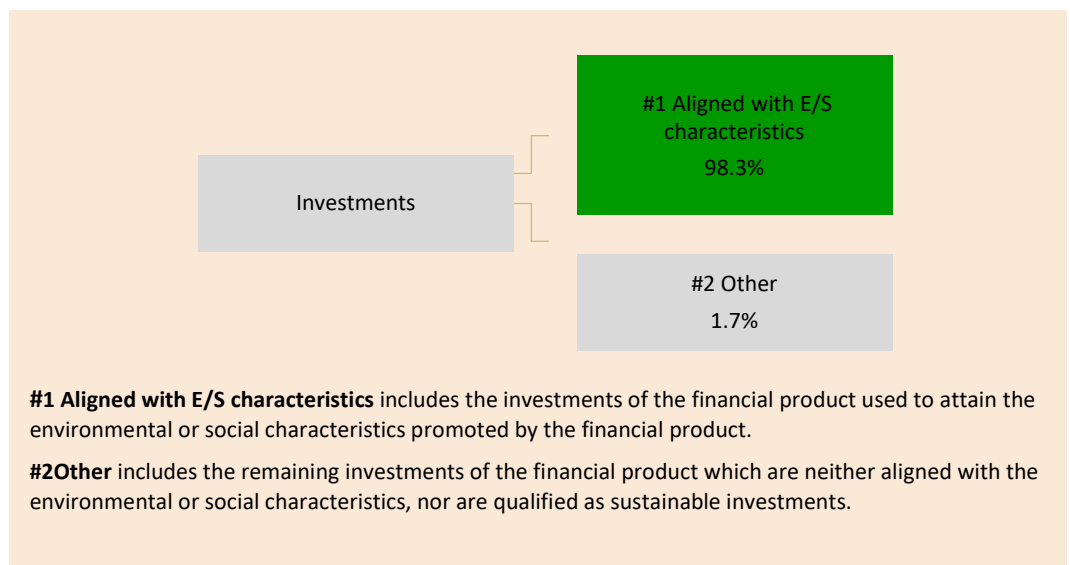

The Sub-Fund invested 98.3% of the Sub-Fund's assets in investments which are aligned with the environmental and social characteristics promoted by the Sub-Fund. The proportion was calculated as the proportion of the portfolio which was subject to the binding criteria which were used to attain the Sub-Fund's environmental and social characteristics as set out in Annex 1 attached to the Sub-Fund's Supplement.

The Sub-Fund did not make any sustainable investments at this time.

#### #2 Other

The remaining 1.7% of investments were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period to calculate the allocations above.

For the previous reference period ending 31 December 2023, the asset allocation was as below:

- #1 Aligned with E/S characteristics: 99.2%
- #2 Other: 0.8%

#### ● ***In which economic sectors were the investments made?***

Sector	Sub-Sector	% Assets
Communication Services	Media & Entertainment	6.41
Communication Services	Telecommunication Services	4.55
Consumer Discretionary	Automobiles & Components	6.54
Consumer Discretionary	Consumer Discretionary Distribution & Retail	1.52
Consumer Discretionary	Consumer Durables & Apparel	5.33
Consumer Staples	Consumer Staples Distribution & Retail	0.63
Consumer Staples	Food, Beverage & Tobacco	1.81
Energy	Energy	1.39
Financials	Banks	10.15
Financials	Financial Services	1.15
Financials	Insurance	2.70
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	2.24
Industrials	Capital Goods	19.65

Industrials	Commercial & Professional Services	0.32
Industrials	Transportation	3.45
Information Technology	Semiconductors & Semiconductor Equipment	7.51
Information Technology	Software & Services	5.87
Information Technology	Technology Hardware & Equipment	4.41
Materials	Materials	5.87
Real Estate	Real Estate Management & Development	6.80

\*The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

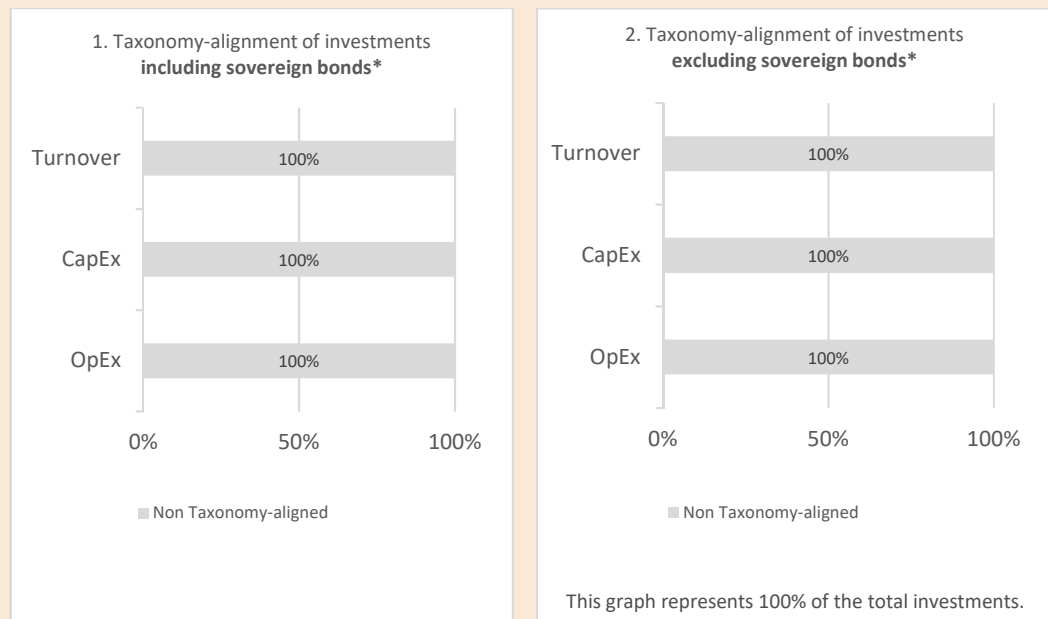

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
- In fossil gas     In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0% respectively.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

	Taxonomy-aligned						Non Taxonomy-aligned					
	31 Dec 2022 period	Dec ref	31 Dec 2023 period	Dec ref	31 Dec 2024 period	Dec ref	31 Dec 2022 period	Dec ref	31 Dec 2023 period	Dec ref	31 Dec 2024 period	
Turnover	0%		0%		0%		100%		100%		100%	
CapEx	0%		0%		0%		100%		100%		100%	
OpEx	0%		0%		0%		100%		100%		100%	

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable.

**What was the share of socially sustainable investments?**

Not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The “#2 Other” investments made by the Sub-Fund were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

One of the Sub-Fund's holdings is a consumer discretionary company which is a leading company in gender diversity among its peers but has not yet signed up to the UNGC. Through its direct engagement with the company, the Investment Manager has learned that the company believed it was operating in compliance with the UNGC while it is not a signatory. The Investment Manager previously presented its view on the importance of becoming a signatory with the formal disclosure obligations and monitoring processes in place. While the Investment Manager has not confirmed that the company has become a signatory to the UNGC, the company has earned wide recognition that it operates in alignment with UNGC principles through the company's outreach efforts to its stakeholders.

The Investment Manager has closely monitored a financial institution which has been on “Watch list” rating since the reference period ending 31 December 2022 due to its relatively low commitment from the company's management on social and governance issues. The Investment Manager has continued to engage with the company on these issues particularly relating to the number of female directors. Through the ongoing engagement, the company has added one female director as of June 2024. Additionally, improvements

in the company's initiatives and communications aimed at enhancing corporate value [throughout the reference period] have led to an improvement in the Investment Manager's proprietary ESG score in January 2025 which resulted in its removal from "Watchlist" designation.

The Sub-Fund invested in a home builder that provides affordable housing in Japan. The Investment Manager engaged with the company focused on women's management issues, particularly discussing the current status, challenges, and future initiatives aimed at improving the representation of women in leadership positions. While the Investment Manager confirmed the implementation of measures such as support for taking leave during life events, the Investment Manager decided to divest the holding due to a lack of confidence in the company's ability to achieve meaningful improvements from a medium-to-long-term perspective.

# Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** \_\_\_%

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_\_%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met

The Sub-Fund promoted contribution to reduction of greenhouse gas (GHG) emissions and sustainable, fair and inclusive business practices as its environmental and social characteristics.

The environmental characteristic was pursued through focusing on companies working towards GHG emissions reduction. Within its investment process, the Investment Manager has taken into account companies' GHG emission reduction targets and monitored current and future emissions of the Sub-Fund in comparison to the carbon budgets for the International Energy Agency (IEA) Sustainable Development Scenario (SDS).

The social characteristic was pursued mainly through the exclusions applied for the Sub-Fund which limited the Sub-Fund's exposure in certain businesses and sectors such as alcohol, adult entertainment, gambling, nuclear weapons, thermal coal, tobacco and controversial weapons as well as compliance with the UN Global Compact principles.

The extent of the Sub-Fund's impact and/or contribution is further described in the section "How did the sustainability indicators perform?" and "How did this financial product consider

principal adverse impacts on sustainability factors?” below. The proportion of the Sub-Fund that was aligned with the environmental and social characteristics is disclosed under the section “What was the proportion of sustainability-related investments?” below.

● **How did the sustainability indicators perform?**

Contribution to reduction of greenhouse gas emissions:

- GHG emissions per unit revenue: The weighted average Scope 1 and 2 GHG intensity (Scope 1 & 2 emissions per USD1 million of revenue) was 40.9 tonnes, whereas that of the TOPIX index (the “Index”) was 80.6 tonnes.

Sustainable, fair and inclusive business practices:

- Management remuneration: 60.0% of the investee companies have disclosed their remuneration policies with emphasis on the relationship between remuneration and the effectiveness of management as opposed to 76.9% of the companies in the Index.
- Percent women on the corporate board: The percentage of female directors was 18.23% as opposed to 19.28% of the companies in the Index.
- Compliance with UN Global Compact: No holdings fell outside compliance with UN Global Compact through the year.
- Exposure to controversial weapons: No holdings had exposure to controversial weapons through the year.

Please note that the sustainability indicator data becomes available on an annual basis in the following months post the end of the fiscal year (the end of March for most of Japanese companies). Therefore, the sustainability indicators provided above have been calculated based on the data available at the time of this periodic report, using the quarter-end average weights of holdings held in the Sub-Fund in 2024 and the latest available impact data. Sustainability indicators above do not take into account companies without relevant data and/or companies whose activities are not relevant to the particular sustainability indicator(s).

For the sustainability indicators above, the Investment Manager has used the data provided by third-party data providers, ISS-ESG and MSCI, as well as research conducted by in-house analysts.

● **...and compared to previous periods?**

Sustainability indicators	31 December 2022 reference period (reported in 2023 periodic report)	31 December 2023 reference period (reported in 2024 periodic report)	31 December 2024 reference period (reported in 2025 periodic report)
GHG emissions per unit revenue (weighted average Scope 1 and 2 GHG intensity)	45.3 tonnes	42.9 tonnes	40.9 tonnes
Management remuneration	58.5%	47.5%	60.0%
Percent women on the corporate board	16.21%	17.20%	18.23%
Compliance with UN Global Compact	All holdings	All holdings	All holdings
Exposure to controversial weapons	No holdings	No holdings	No holdings

GHG emissions per unit of revenue (weighted average Scope 1 & 2 GHG intensity) of the Sub-Fund has decreased slightly compared to the previous year. The Sub-

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

Fund has avoided investing in companies with high level of Scope 1 and 2 GHG emissions without any credible plans to reduce them.

The proportion of companies in the Sub-Fund that disclosed remuneration policies, including executive compensation, has increased materially compared to the previous reference period. The reasons for this are that many companies have improved their disclosures, potentially as a result of engagement by institutional investors, and that the Sub-Fund has sold some small and medium-sized companies with poor disclosures. The Investment Manager has engaged with those companies with no or low quality of disclosures for improvement and will continue to engage with them.

The percentage of women on the corporate board has increased compared to the previous period. The reason for this is that many companies have started to welcome female directors, which may be as a result of engagement by various institutional investors. However, it is a little low compared to the index, and the Investment Manager will continue to engage in increasing the ratio of female directors.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not applicable.

— ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Not applicable.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impact (PAI) indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund's Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Violation of UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines) (threshold 0%)

The Sub-Fund also considered following PAI indicators:

- GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water
- Hazardous waste and radioactive waste ratio
- Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- Unadjusted gender pay gap
- Board gender diversity

	Impact	Portfolio	Data coverage (%)	Index	Data coverage (%)
1.1.1	Scope 1 GHG emissions	461.08	100.00	5,658.27	98.38
1.1.2	Scope 2 GHG emissions	849.66	100.00	2,022.17	98.38
1.1.3	Scope 3 GHG emissions	35,337.22	100.00	68,654.35	98.39
1.1.4	Total GHG emissions	36,647.95	100.00	76,340.19	98.38

1.14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	100.00	0.00	97.85

\*Where there was no impact data and/or no data coverage for an indicator, the value is shown as "N/A" above. The PAI data above represents the average of four quarter-end impacts obtained from MSCI (the "Data Provider") at the time of this periodic report. The data coverage for #1.6.1 to #1.6.9 has been calculated by the Investment Manager based on the Data Provider's data.

- **#1.7 (Activities negatively affecting biodiversity-sensitive areas):** Based on the Data Provider's data, the negative impact of the Sub-Fund was slightly higher than that of the Index due to its investment in chemical companies. The value means share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas. The indicator does not necessarily reflect the negative impact of underlying companies because at individual holding level, a company can be flagged for negative impact simply for not conducting an impact assessment on biodiversity if the company is located in or near biodiversity sensitive area. To avoid getting flagged for negative impacts, the Investment Manager will engage with investee companies to encourage disclosure around their impact assessment on biodiversity based around the TNFD framework. The chemical company concerned has the largest expenditure on biodiversity conservation in Japan, and is conducting business while being conscious of biodiversity.
- **#1.8 (Emissions to water):** The data coverage for both the Sub-Fund and the Index is currently extremely limited for this indicator with data available only for chemical manufacturer holdings (engaged in pesticides and electronic materials) held by the Sub-Fund. The Investment Manager will monitor the development of data availability for this indicator.
- **#1.9 (Hazardous waste and radioactive waste ratio):** Based on the Data Provider's data, the data coverage is limited but, amongst those reported the data, the Sub-Fund has indicated a higher negative impact than that of the Index due to overweight of chemical companies. The Investment Manager will monitor the development of data availability for this indicator.
- **#1.12 (Unadjusted gender pay gap):** The data coverage for both the Sub-Fund and the Index is still limited for this indicator. Based on the Data Provider's data, the Sub-Fund has indicated a higher negative impact than that of the Index due to overweight of a chemical company, an apparel company, etc. The Investment Manager will monitor the development of data availability for this indicator.
- **#1.13 (Board gender diversity):** Based on the Data Provider's data, the Sub-Fund has reported a lower board gender diversity than the Index due to overweight of certain

holdings including chemical companies and an apparel company. The Investment Manager has engaged with investee companies to increase the number of female directors but acknowledged that the process takes some time so will closely monitor the development.

Please note that data from the Data Provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund or the Index.

The Sub-Fund uses the Index in the way that the PAI of the Sub-Fund are compared against the PAI of the Index, with the aim being, in principle, to limit such portfolio average adverse impacts (weighted average adverse impact of the companies held by the Sub-Fund) to be lower than that of the Index. However, the Index is not used to define the portfolio composition of the Sub-Fund and is not used for the purpose of determining the attainment of the environmental and social characteristics promoted by the Sub-Fund. The Index is a broad market index and not consistent with the environmental and social characteristics promoted by the Sub-Fund.

## What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
FAST RETAILING CO LTD	Consumer Discretionary	5.28	Japan
SHIN-ETSU CHEMICAL CO LTD	Materials	5.03	Japan
RECRUIT HOLDINGS CO LTD	Industrials	5.02	Japan
KEYENCE CORP	Information Technology	4.52	Japan
HITACHI LTD	Industrials	4.41	Japan
ITOCHU CORP	Industrials	4.28	Japan
UNICHARM CORP	Consumer Staples	3.87	Japan
CHUGAI PHARMACEUTICAL CO	Health Care	3.64	Japan
SYSMEX CORP	Health Care	3.60	Japan
GMO PAYMENT GATEWAY INC	Financials	3.37	Japan
TOKYO ELECTRON LTD	Information Technology	3.32	Japan
HOYA CORP	Health Care	3.25	Japan
DAIKIN INDUSTRIES LTD	Industrials	3.18	Japan
TOKIO MARINE HOLDINGS INC	Financials	3.16	Japan
OBIC CO LTD	Information Technology	3.15	Japan

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1<sup>st</sup> January 2024 to 31<sup>st</sup> December 2024.**

\*Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

## What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which promoted environmental and social characteristics during the reference period is provided below.

### ● **What was the asset allocation?**

#### #1 Aligned with E/S characteristics

The Sub-Fund invested 97.3% of the Sub-Fund's assets in investments which are aligned with the environmental and social characteristics promoted by the Sub-Fund. The proportion was calculated as the proportion of the portfolio which was subject to

**Asset allocation** describes the share of investments in specific assets.

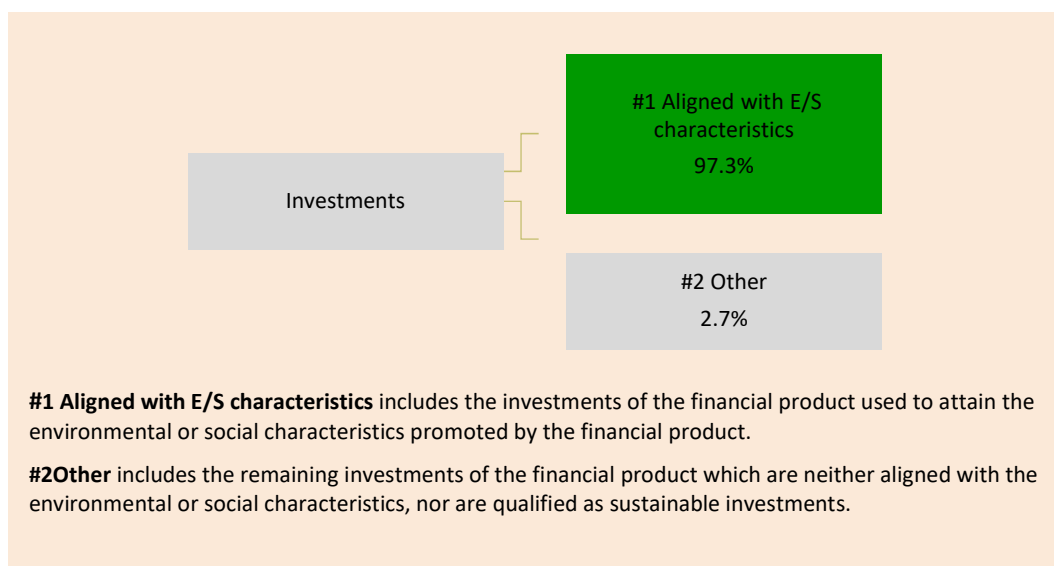

the binding criteria which were used to attain the Sub-Fund's environmental and social characteristics as set out in Annex 1 attached to the Sub-Fund's Supplement.

The Sub-Fund did not make any sustainable investments at this time.

## #2 Other

The remaining 2.7 of investments were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period to calculate the allocations above.

For the previous reference period ending 31 December 2023, the asset allocation was as below:

- #1 Aligned with E/S characteristics: 96.5%
- #2 Other: 3.5%

## ● *In which economic sectors were the investments made?*

Sector	Sub-Sector	% Assets
Consumer Discretionary	Automobiles & Components	4.74
Consumer Discretionary	Consumer Discretionary Distribution & Retail	5.28
Consumer Discretionary	Consumer Durables & Apparel	1.19
Consumer Staples	Consumer Staples Distribution	0.15
Consumer Staples	Household & Personal Products	4.94
Financials	Financial Services	4.69
Financials	Insurance	3.16
Health Care	Health Care Equipment & Services	10.45
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	5.37
Industrials	Capital Goods	21.94
Industrials	Commercial & Professional Services	7.69
Information Technology	Semiconductors & Semiconductor Equipment	5.23
Information Technology	Software & Services	4.84
Information Technology	Technology Hardware & Equipment	8.76
Materials	Materials	8.84

\*The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

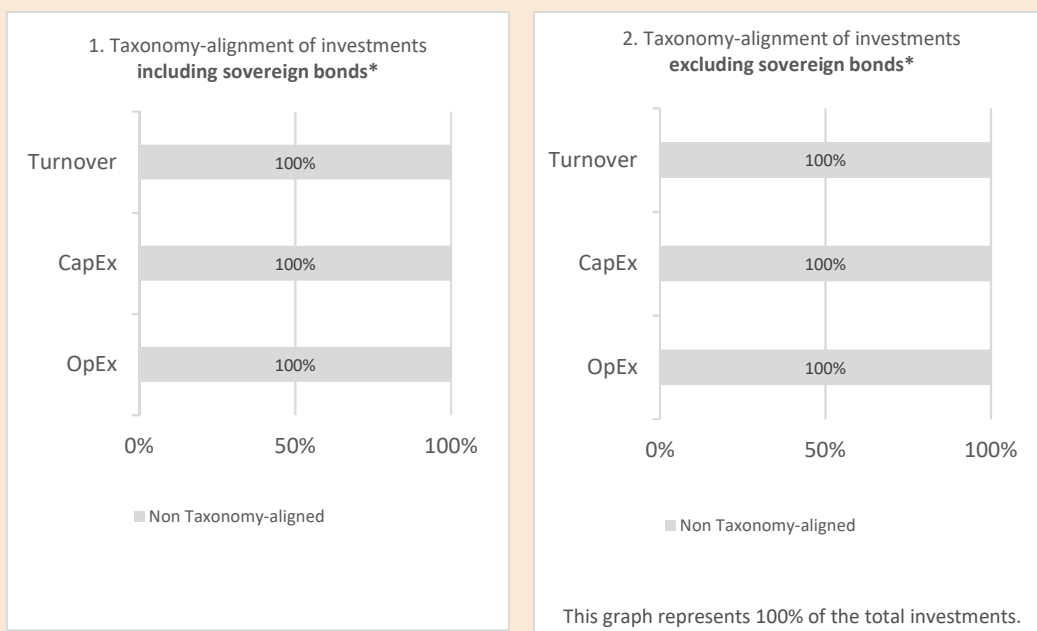

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

### ● What was the share of investments made in transitional and enabling activities?

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The share of investments in transitional and enabling activities was 0% respectively.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

	Taxonomy-aligned						Non Taxonomy-aligned					
	31 Dec 2022 period	Dec ref	31 Dec 2023 period	Dec ref	31 Dec 2024 period	Dec ref	31 Dec 2022 period	Dec ref	31 Dec 2023 period	Dec ref	31 Dec 2024 period	
<b>Turnover</b>	0%		0%		0%		100%		100%		100%	
<b>CapEx</b>	0%		0%		0%		100%		100%		100%	
<b>OpEx</b>	0%		0%		0%		100%		100%		100%	

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable.

- **What was the share of socially sustainable investments?**

Not applicable.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The “#2 Other” investments made by the Sub-Fund were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In order to promote the environmental characteristic of the Sub-Fund, the Investment Manager believes that it is essential to further accelerate the reduction of GHG emissions by those companies that are already deemed to be contributing to environmental characteristics. Based on this belief, the Investment Manager has engaged with companies to understand their carbon neutrality targets and to promote Science Based Targets (SBT) accreditation.

One of the Sub-Fund's holdings is a company that produces sensors and measuring instruments for factory automation. The Investment Manager discussed climate change mitigation at recent meeting in April 2024. The company has recently improved its climate disclosure by adding Scope 3 GHG emission data. However, the company has shown reservation towards SBTi certification. The Investment Manager has and will continue to stress the importance of SBT and encourage management of the company to work towards it.

For the social characteristics of the Sub-Fund, the Investment Manager believes in the importance of creating a diverse and inclusive working environment over the medium to long term.

One of the Sub-Fund's holdings is a company that provides ERP (Enterprise Resource Planning) software. The Investment Manager encouraged the company to enhance board diversity in order to improve the effectiveness of the board. The Investment Manager believes that continuous engagement with the company on themes such as diversity, external directors ratio and top management succession plan has improved the human capital of the company. In 2022, the ratio of external directors was 33% and there were no female directors. The first female director was appointed in 2023. The Investment Manager has also seen improvement in quality of disclosures. The company issued its first integrated report in 2022, then included a mid-term target of the ratio of female managers and rate of paid leave taken in the 2023 integrated report. The most recent integrated report published in August 2024 showed a noticeable enhancement in its content. The Investment Manager recognizes that the company is receptive to ongoing engagement to improve the working environment.

During the reference period, the Sub-Fund divested from a M&A brokerage for SMEs. The excessive burden on sales staff led to a scandal at the company, which drove high employee turnover and had a negative impact on business results. The Investment Manager divested the holding because the company failed to meet the Investment Manager's standard on maintaining a decent work environment for its employees, effective governance that could have prevented the scandal and demonstrated nimble responses to rectify the situation.

### **Disclaimer**

# Sustainable investment objective

### Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective: 77.0%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: 19.9%**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent was the sustainable investment objective of this financial product met?

The Sub-Fund has sustainable investment as its investment objective. In order to achieve its sustainable investment objective, the Sub-Fund invested in securities of issuers that the Investment Manager viewed as contributing to environmental and/or social objectives. The environmental and social objectives of the Sub-Fund are to contribute to:

Environmental objectives:

- Climate Mitigation - Own Operations
- Climate Mitigation - Enabling Activities
- Climate Adaptation
- Efficient use of raw materials
- Sustainable use of water and land
- Minimizing waste production
- Mitigating impact on biodiversity
- Support the circular economy

Social objectives:

- Tackling inequality

- Fosters social cohesion
- Encourages social integration
- Investment in human capital
- Investment in economically or socially disadvantaged communities

The Investment Manager has sought to achieve the sustainable investment objective through investment in sustainable investments that are aligned with the above environmental or social objectives. Each sustainable investment was assessed against the proprietary ESG scores, exclusions and contribution assessment, and categorised into the appropriate contribution category of “direct contribution”, “indirect contribution” or “transition”. The details of the contribution categories and the binding strategies are further described under “What investment strategy does this financial product follow?” in Annex 1 attached to the Sub-Fund’s Supplement.

The summary of the sustainable investments made by the Sub-Fund aligned with the above environmental and/or social objectives is below:

#### Environmental objectives:

- Climate Mitigation - Own Operations
  - Sustainable investments in this objective have made commitments to reduce GHG emissions, which in most cases are either SBTi approved or in line with the commitments of the Paris Agreement. Companies invested have made medium and long term commitments to GHG reductions, track their GHG emissions on a yearly basis and have concrete plans towards their planned targets.
- Climate Mitigation - Enabling Activities
  - Sustainable investments in this objective have offered, as their economic activity, products or services that helped their customers reduce their GHG emission profile. The largest exposure in this objective was in renewable power companies that generate a majority of their electricity through wind or solar generating capacity.
- Efficient use of raw materials
  - Sustainable investments in this objective have industry leading processes to reduce raw materials used in their production process.
- Sustainable use of water and land
  - Sustainable investments in this objective manufacture products that help consumers reduce water usage, such as the installation of water saving fixtures in the home.
- Minimizing waste production
  - Sustainable investments in this objective contribute to reducing waste production in their own operations. For example, a building materials company implementing measures to maximize lumber utilization.
- Support the circular economy
  - Sustainable investments in this objective are committing to increasing the amount of recycled or recyclable materials in their products. Companies in this category are also involved in the repair and maintenance of equipment that extend equipment useful life and/or the leasing of equipment that increase overall fleet utilization, both of which reduce the amount of OEM (original equipment manufacturer) equipment that needs to be manufactured and reduces waste.

#### Social objectives:

- Tackling inequality
  - Sustainable investments in this objective have had strong commitments and measurable targets to equality, diversity and inclusion within their employee base.

- Fosters social cohesion
  - Sustainable investments in this objective have provided services such as basic internet access in underserved areas.
- Encourages social integration
  - Sustainable investments in this objective provided services to inform and engage minority populations where their native language services were not otherwise available.
- Investment in human capital
  - Sustainable investments in this objective contributed to the development, training and education of society.
- Investment in economically or socially disadvantaged communities
  - Sustainable investments in this objective provided services such as financing, healthcare, internet service to economic or socially disadvantaged communities.

The extent of the Sub-Fund’s sustainability outcome and/or contribution is further described in the section “How did the sustainability indicators perform?” and “How did this financial product consider principal adverse impacts on sustainability factors?” below. The proportion of the Sub-Fund that was invested in sustainable investments is disclosed under the section “What was the proportion of sustainability-related investments?” below.

● **How did the sustainability indicators perform?**

The Sub-Fund’s sustainability indicators performed as below:

- Greenhouse gas (GHG) emissions: The weighted average scope 1 and 2 GHG emissions was 2,573,183 tonnes.
- GHG intensity: The weighted average scope 1 & 2 GHG intensity (scope 1 and 2 GHG emissions per USD1 million of revenue) was 218.4 tonnes.
- Subsidised healthcare provided to economically or socially disadvantaged communities: The subsidised healthcare per USD1 million revenue was USD181,119. Subsidised healthcare are health care services provided that are either subsidised by government programs or uncompensated. The calculation uses the aggregate of subsidised and uncompensated healthcare for 2024. The amount of subsidised health care is based on revenues from services provided by investee companies that are paid by Medicaid, and the amount of uncompensated health care is an estimate for the cost of care provided by investee companies. The total sum of subsidised and uncompensated health care is then divided by the aggregate revenues reported by each issuer for 2024. The Investment Manager calculated the weighted average of the subsidised healthcare for the four issuers that align with this objective as of the end of December 2024.

Please note that the sustainability indicator data generally becomes available on an annual basis in the following months post the end of the year. Therefore, the sustainability indicators provided above have been calculated based on the data available at the time of this periodic report. Unless otherwise stated, the data has been calculated using the quarter-end average weights of holdings held in the Sub-Fund in 2024, and the latest available impact data. Sustainability indicators above do not take into account companies without relevant data and/or companies whose activities are not relevant to the particular sustainability indicator(s).

For the sustainability indicators above, the Investment Manager has used data provided by companies in annual sustainability reports as well as data provided by a third-party data provider, Sustainalytics.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

● *...and compared to previous periods?*

Sustainability indicators	31 December 2022 reference period (reported in 2023 periodic report)	31 December 2023 reference period (reported in 2024 periodic report)	31 December 2024 reference period (reported in 2025 periodic report)
GHG emissions (scope 1 & 2)	2,346,761 tonnes	2,832,590 tonnes	2,573,183 tonnes
GHG intensity (scope 1 & 2)	359.6 tonnes	229.8 tonnes	218.4 tonnes
Subsidised healthcare provided to economically or socially disadvantaged communities (per USD1 million revenue)	USD143,190	USD139,713	USD 181,119

The Sub-Fund’s reduction in GHG emissions and intensity was due to a reduction in the portfolio’s exposure to certain higher carbon intensity industries, such as leisure, transportation and energy.

● *How did the sustainable investments not cause significant harm to any sustainable investment objective?*

In order to ensure that the sustainable investments of the Sub-Fund do not cause significant harm to any environmental or social sustainable investment objective, the Sub-Fund has taken into account certain indicators for adverse impacts on sustainability factors. Details on how the indicators have been considered is described below.

Within this assessment, the Investment Manager used in-house research and analysis taking into account reported data and data provided by third party data providers, Sustainalytics and Bloomberg, where available.

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Manager considered the following principal adverse impacts (“PAI”) indicators, either directly or indirectly, throughout the investment process through certain product-, activity- or conduct-based exclusions, proprietary ESG scores and contribution assessment.

The exclusions include controversial weapons (#14 below), thermal coal (climate-related PAI indicators), and companies deemed to be in violation of the UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines) (#10 below) as further described under “What investment strategy does this financial product follow?”.

- 1) GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- 2) Carbon footprint
- 3) GHG intensity of investee companies
- 4) Exposure to companies active in the fossil fuel sector
- 5) Share of non-renewable energy consumption and production

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- 6) Energy consumption intensity per high impact climate sector
- 7) Activities negatively affecting biodiversity-sensitive areas
- 8) Emissions to water
- 9) Hazardous waste and radioactive waste ratio
- 10) Violations of UNGC and OECD Guidelines
- 11) Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- 12) Unadjusted gender pay gap
- 13) Board gender diversity
- 14) Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

The Investment Manager has also taken into account other relevant PAI indicators depending on the business activities, behaviours of a company and the availability of data. Where there was no sufficient data to make credible assessment, the Investment Manager supplemented with its qualitative research and engagement. Engagement with companies takes place on an ongoing basis.

Please note that data from the third party data provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable investments have aligned with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights by excluding companies that the Investment Manager deemed in violation of UNGC and OECD Guidelines.

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Sub-Fund considered the following PAI indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund's Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Exposure to companies deemed to be in violation of UNGC and OECD Guidelines as assessed by the Investment Manager using inputs from third-party data providers (threshold 0%)

For the following PAI indicators, the Investment Manager's analysts consider the PAI for each investment of the Sub-Fund to understand and mitigate the impacts. Where quantitative data was available, the Investment Manager sought to invest in companies with lower negative impacts when other characteristics (such as contribution to environmental or social objectives) were similar. However, data continues to be limited for PAI, particularly for US based investee companies. In these situations, the Investment Manager analysed the company's goals, policies and activities to judge the company's impact on PAI qualitatively. Where there are concerns, the Investment Manager's analysts

document how the company plans on mitigating or the company's initiatives to confirm if the investments still qualify as sustainable investments. The Investment Manager used sources such as company sustainability reports and filing, as well as third party providers, Sustainalytics and Bloomberg, to perform this analysis.

**Asset allocation** describes the share of investments in specific assets.

- GHG emissions (Scope 1 GHG emissions, and Scope 2 GHG emissions, Scope 1&2 GHG emissions)
- Scope 1&2 Carbon footprint
- Scope 1&2 GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Board gender diversity
- Share of securities not issued under Union legislation on environmentally sustainable bonds
- Number of days lost to injuries, accidents, fatalities or illness

Please note that data from the third party providers may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund.

### What were the top investments of this financial product?

**Largest investments** **Sector** **% Assets** **Country**

Largest investments	Sector	% Assets	Country

\*Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The list of top investments is reflective of the general portfolio composition including assets classified as "#Not sustainable" (i.e. all investments of the Sub-Fund).

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:  
1<sup>st</sup> January 2024 to 31<sup>st</sup> December 2024.

### What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which was invested in sustainable investments during the reference period is provided below.

#### ● **What was the asset allocation?**

#1 Sustainable

The Investment Manager has invested 96.9% of the Sub-Fund's assets in sustainable investments.

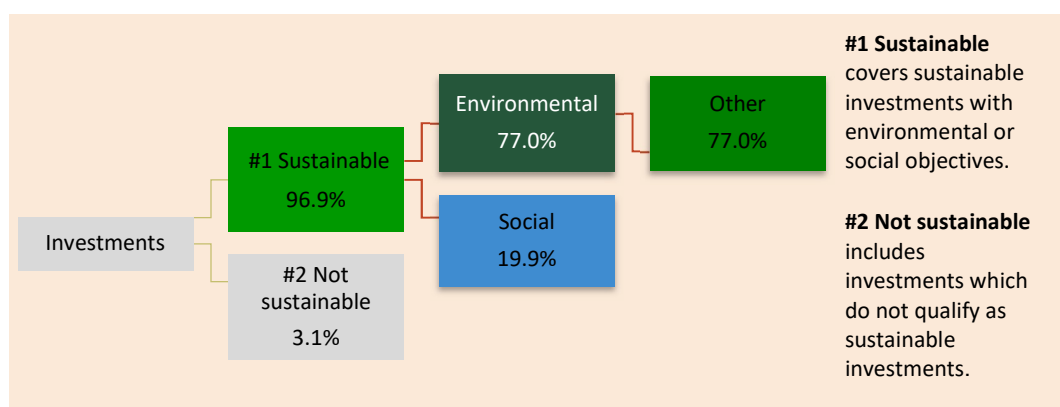

Further details on how the Investment Manager identifies sustainable investments are described under "What investment strategy does this financial product follow?" in Annex 1 attached to the Sub-Fund's Supplement.

#### #2 Not sustainable

The remaining 3.1% of investments were primarily cash held as ancillary liquidity.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period to calculate the allocations above.

Within this 3.1%, a small proportion constitutes certain legacy debt instruments held by the Sub-Fund from the time prior to the recategorisation of the Sub-Fund as an Article 9 fund within the meaning of SFDR in November, 2021. The Investment Manager continues to seek to divest such legacy debt instruments and has not written off such holdings taking into account the best interest of shareholders and potential future increase in liquidity. The proportion of legacy debt instruments account for 0.03% of the Sub-Fund using the quarter-end average weights of Sub-Fund holdings. These holdings did not affect the delivery of the sustainable investment objective in the reference period due to the limited proportion.

For the previous reference period ending 31 December 2023, the asset allocation was as below:

- #1 Sustainable: 97.4 (split as to Environmental: 81.2% and Social: 16.2%)
- #2 Not Sustainable: 2.6%

#### ● In which economic sectors were the investments made?

Sector	Sub-Sector	% Assets
Automotive	Auto Loans	1.04%
Automotive	Auto Parts & Equipment	4.61%

\*The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

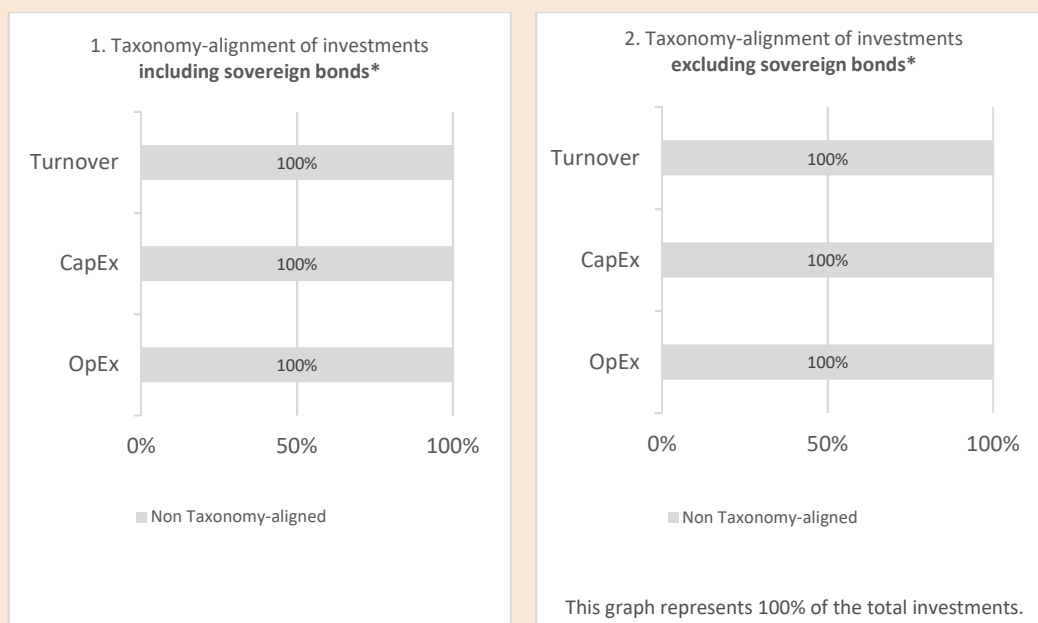

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

### ● What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities was 0% respectively.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

	Taxonomy-aligned			Non Taxonomy-aligned		
	31 Dec 2022 ref. period	31 Dec 2023 ref period	31 Dec 2024 ref period	31 Dec 2022 ref period	31 Dec 2023 ref period	31 Dec 2024 ref period
<b>Turnover</b>	0%	0%	0%	100%	100%	100%
<b>CapEx</b>	0%	0%	0%	100%	100%	100%
<b>OpEx</b>	0%	0%	0%	100%	100%	100%

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 77.0%.

The Sub-Fund did not use the EU Taxonomy classification system in determining whether economic activities of investee companies have contributed to an environmental objective or not.

**What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 19.9%.

**What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

The “#2 Not sustainable” investments made by the Sub-Fund were primarily cash held as ancillary liquidity, along with a small proportion of certain legacy debt instruments as further detailed under the section “What was the proportion of sustainability-related investments?”. They did not follow any minimum environmental or social safeguards. The proportion and use of such “#2 Not sustainable” investments did not affect the delivery of the sustainable investment objective in the reference period due to the limited use and/or the nature of those instruments.

**What actions have been taken to attain the sustainable investment objective during the reference period?**

The Investment Manager conducts deep dive engagements to address particular sustainability-related issues. For example, initiatives and timelines for climate change mitigation plans were discussed to ascertain how committed companies were to their GHG emission reduction goals and their ability to achieve those goals. The Investment Manager engaged with 21 high-yield bond issuers, which include potential investee companies that are not held within the Sub-Fund, in 2024.

For example, the Investment Manager conducted an engagement with a medical equipment manufacturer and distributor of chemicals and laboratory supplies. The discussion focused on the issuer’s successful achievement of its 15% GHG emissions reduction target from a

2019 baseline, which the company completed before its 2025 goal. The issuer has now initiated new targets, aiming to reduce Scope 1 and 2 emissions by 50% by 2030, from their 2020 baseline, and to reduce Scope 3 emissions by 25% in that same timeframe. The company has accomplished much of its progress to date by changing its heating, ventilation and air conditioning (HVAC) and steam systems to more efficient equipment, and is now aiming to use metering and solar projects to reach its new targets. For Scope 3 targets the company is requesting and incorporating data from suppliers.

The Investment Manager also engaged with a manufacturer and distributor of specialty metals to gain an understanding of the issuer's slow progress toward its emissions targets, and determine if the firm had a credible roadmap to get back on track. The firm's carbon intensity target was established in 2021, but used 2019 as a base-line as that was the last year of normal operations before the pandemic. In 2022, carbon intensity was above 2019 levels but below 2021 levels. The main reason for this was high turnover of the workforce during the pandemic. The products the firm manufactures are very technically demanding and it can take new employees several years to become proficient. Therefore, it will likely take several years to get back to the prior level of energy and resource efficiency. 2021 was also a lower volume year, and volume increased in 2022 and again in 2023. The Investment Manager will continue to monitor the issuer's progress.

The Sub-Fund increased exposure to a homebuilder with a firm commitment to net-zero energy readiness. The issuer was the first national homebuilder to publicly commit to ensuring that by the end of 2025, every home they build will meet the requirements of the US Department of Energy's Zero Energy Ready Home program. The company has a long track record of annually targeting a lower HERS (Home Energy Rating System) Index Score for the homes they deliver, which leads to a reduction in GHG emissions over the prior year. The firm integrates HERS Index Scores into their incentive compensation programs for their teams, and every home they build is third-party rated and certified with a HERS Index Score.

## ANNEX

Product name: Nomura Funds Ireland – Global High Conviction Fund  
 Legal entity identifier: 549300RRS0HBO8UNLZ19

# Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective: \_\_\_%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: \_\_\_%**

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted contribution to reduction of greenhouse gas (GHG) emissions and sustainable, fair and inclusive business practices as its environmental and social characteristics.

The environmental characteristic was pursued as explained below:

The Sub-Fund has:

- Consistently shown forecast compliance with the International Energy Agency (IEA) Sustainable Development Scenario (SDS) for climate change (according to ISS-ESG), that is global warming kept well below 2 degrees centigrade. While the Sub-Fund's emissions are low, the investments have also included companies whose activities actively reduce the emissions of others through product efficiency improvement or the stimulation of investment in low carbon power generation.
- Invested in companies that offer products to improve the efficiency of buildings (heating and cooling).

- Invested in a leading operator of renewable power generation in the USA and several very low carbon emissions companies including one that has committed to ultimately mitigating all the carbon emissions it has produced in its history.

The Investment Manager has:

- Engaged with several companies to encourage them to set Science Based Targets (SBTs) for GHG emission reduction.
- Engaged with a company that consumes palm oil to ensure that the impact of palm oil production on deforestation is appropriately monitored and mitigated.

The social characteristic was pursued as explained below:

The Sub-Fund has:

- Invested in a leading vaccine company and a company that supplies equipment and consumables to the pharmaceutical industry.
- Also invested in a health insurance company that helps support the public health primarily in the USA.
- Invested in a company that produces insulin and other diabetes related treatments as well as a drug to help people lose weight because diabetes is often a consequence of obesity.
- Invested in a company that supports payments infrastructure worldwide.

The extent of the Sub-Fund's impact and/or contribution is further described in the section "How did the sustainability indicators perform?" and "How did this financial product consider principal adverse impacts on sustainability factors?" below. The proportion of the Sub-Fund that was aligned with the environmental and social characteristics is disclosed under the section "What was the proportion of sustainability-related investments?" below.

### ● ***How did the sustainability indicators perform?***

Contribution to reduction of greenhouse gas emissions:

- GHG emissions per unit revenue: The portfolio weighted average Scope 1 and 2 GHG intensity (Scope 1 and 2 GHG emissions per USD1 million of revenue) was 37.92 tonnes. The average GHG intensity for the MSCI All Country World Index (the "Index") was 108.14 tonnes. The Sub-Fund's highest emitting company had the GHG intensity of 737.37 tonnes but the company is also a waste solutions provider offering services including landfill gas and power production.

Sustainable, fair and inclusive business practices:

- Management remuneration: The weighted average annual total compensation for the Sub-Fund's holdings' CEOs (or equivalent) was USD23.8 million including stock awards of USD16 million. This compares to USD22.6 million in total compensation including stock awards of USD15.3 million for the Index companies. Many companies in the Index do not provide this remuneration data, with transparency typically limited in emerging markets. Therefore, the Index averages reflect largely developed market companies.
- Percent women on the corporate board: The weighted average percent of female directors is 38% for the Sub-fund compared to 32% for the Index, for the companies where we have information on this metric.
- Compliance with UN Global Compact principles: No holdings fell outside compliance with UN Global Compact through the year.
- Exposure to controversial weapons: No holdings had exposure to controversial weapons through the year.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

Please note that the sustainability indicator data becomes available on an annual basis in the following months post the end of the year. Therefore, the sustainability indicators provided above have been calculated based on the data available at the time of this periodic report, using the quarter-end average weights of holdings held in the Sub-Fund in 2024, and the latest available impact data. Sustainability indicators above do not take into account companies without relevant data and/or companies whose activities are not relevant to the particular sustainability indicator(s).

For the sustainability indicators above, the Investment Manager has used data provided by companies in annual sustainability reports and third-party data providers, ISS-ESG and MSCI.

● **...and compared to previous periods?**

<b>Sustainability indicators</b>	<b>31 December 2022 reference period (reported in 2023 periodic report)</b>	<b>31 December 2023 reference period (reported in 2024 periodic report)</b>	<b>31 December 2024 reference period (reported in 2025 periodic report)</b>
GHG emissions per unit revenue (weighted average Scope 1 and 2 GHG intensity)	44.25 tonnes	68.22 tonnes	37.92 tonnes
Management remuneration (weighted average annual total compensation for the Sub-Fund's holdings' CEOs)	USD 28.9 million (including USD 20 mil. stock awards)	USD 34.4 million (including USD 25.8 mil. stock awards)	USD 23.8 million (including USD 16.0 mil. stock awards)
Percent women on the corporate board (weighted average percent of female directors)	25%	34%	38%
Compliance with UN Global Compact principles	All holdings	All holdings	All holdings
Exposure to controversial weapons	No holdings	No holdings	No holdings

The lower Scope 1 and 2 GHG intensity in 2024 is due to lower average weight of the Sub-Fund (the Sub-Fund exited the position during the year) invested in an energy company heavily involved in renewable energy compared to the previous reference period ending 31 December 2023. The reason of the exit was to invest in an alternative the Investment Manager deems of higher quality and upside potential financially.

The Sub-Fund has shown improvement on the female director ratio on the corporate board compared to the previous period due to a combination of some companies having materially increased the number of female directors and the Sub-Fund having initiated investment in companies with higher percentage of female directors.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Sub-Fund considered the following principal adverse impact (PAI) indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund’s Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Violation of UN Global Compact principles (UNGCP) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines) (threshold 0%)

The Sub-Fund also considered following PAI indicators:

- GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water
- Hazardous waste and radioactive waste ratio
- Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- Unadjusted gender pay gap
- Board gender diversity

	Impact	Portfolio	Data coverage (%)	Index	Data coverage (%)
1.1.1	Scope 1 GHG emissions	818.35	100.00	5,017.74	99.83
1.1.2	Scope 2 GHG emissions	332.97	100.00	1,116.40	99.83

1.6.9	NACE Code L (Real Estate Activities)	N/A	0.00	0.37	1.79
1.7	Activities negatively affecting biodiversity-sensitive areas	5.70	100.00	10.61	99.84
1.8	Emissions to water	0.00	2.06	0.08	1.33
1.9	Hazardous waste and radioactive waste ratio	0.21	46.23	4.10	38.67
1.10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	100.00	0.17	99.92

1.11	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	0.00	100.00	0.27	99.79
1.12	Unadjusted gender pay gap	6.23	50.23	8.98	29.88
1.13	Board gender diversity	36.83	100.00	34.60	99.94
1.14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	100.00	0.35	99.94

\*Where there was no impact data and/or no data coverage for an indicator, the value is shown as "N/A" above. The PAI data above represents the average of four quarter-end impacts obtained from MSCI (the "Data Provider") at the time of this periodic report. The data coverage for #1.6.1 to #1.6.9 has been calculated by the Investment Manager based on the Data Provider's data.

- #1.4 (Exposure to companies active in the fossil fuel sector): The Sub-Fund reported 0.83% for this indicator which was much lower than that of the Index. The exposure calculates the proportion of the Sub-Fund invested in companies that derive any revenue from relevant fossil fuel-related activities. The Sub-Fund's holdings flagged for this PAI are companies involved in the renewable energy transition. One of them is heavily involved in renewable energy and the other company is a supplier of equipment to the renewables industry.

Please note that data from the Data Provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund or the Index.

The Sub-Fund uses the Index in the way that the PAI of the Sub-Fund are compared against the PAI of the Index, with the aim being, in principle, to limit such portfolio average adverse impacts (weighted average adverse impact of the companies held by the Sub-Fund) to be lower than that of the Index. However, the Index is not used to define the portfolio composition of the Sub-Fund and is not used for the purpose of determining the attainment of the environmental and social characteristics promoted by the Sub-Fund. The Index is a broad market index and not consistent with the environmental and social characteristics promoted by the Sub-Fund.

## What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
MICROSOFT CORP	Information Technology	8.57	USA
AMAZON.COM INC	Consumer Discretionary	6.93	USA
ALPHABET INC-CL A	Communication Services	6.73	USA
APPLE INC	Information Technology	6.01	USA
MASTERCARD INC - A	Financials	5.34	USA
TAIWAN SEMICONDUCTOR MANUFACTURING	Information Technology	4.93	Taiwan
COMPASS GROUP PLC	Consumer Discretionary	4.62	UK
ASML HOLDING NV	Information Technology	4.22	Netherlands
NOVO NORDISK A/S-B	Health Care	4.08	Denmark
LVMH MOET HENNESSY LOUIS	Consumer Discretionary	3.95	France
ASTRAZENECA PLC	Health Care	3.93	UK
UNITEDHEALTH GROUP INC	Health Care	3.93	USA
IMI PLC	Industrials	3.50	UK
NESTLE SA-REG	Consumer Staples	3.29	USA

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **1<sup>st</sup> January 2024 to 31<sup>st</sup> December 2024.**

\*Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

## What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which promoted environmental and social characteristics during the reference period is provided below.

### ● **What was the asset allocation?**

#### #1 Aligned with E/S characteristics

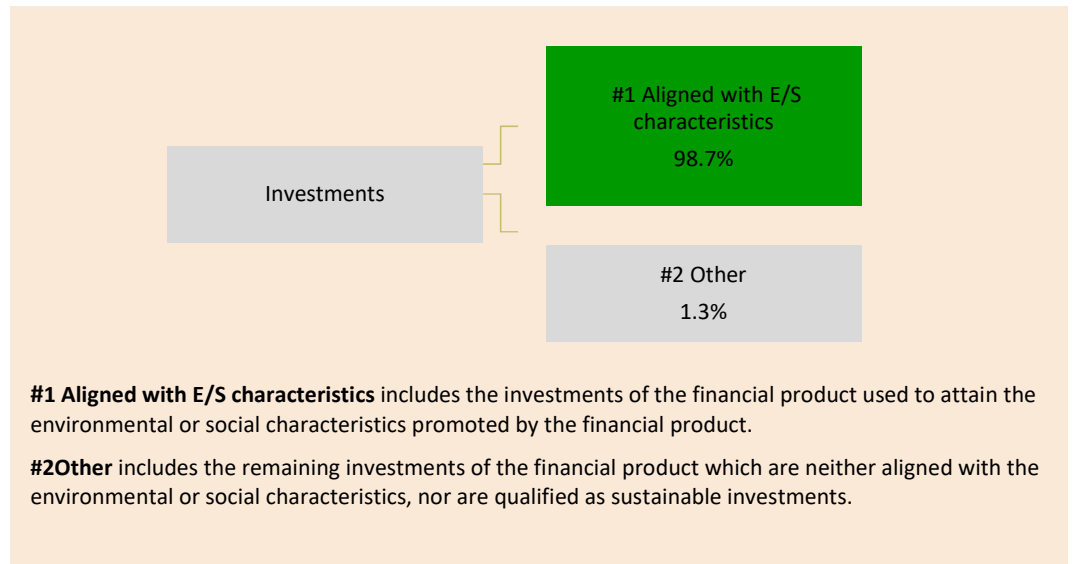

The Sub-Fund invested 98.7% of the Sub-Fund’s assets in investments which are aligned with the environmental and social characteristics promoted by the Sub-Fund. The proportion was calculated as the proportion of the portfolio which was subject to the binding criteria which were used to attain the Sub-Fund’s environmental and social characteristics as set out in Annex 1 attached to the Sub-Fund’s Supplement.

The Sub-Fund did not make any sustainable investments at this time on the basis that no sustainable investment framework has been adopted for this Sub-Fund and investments have not been screened against the sustainable investment criteria set down in SFDR.

#### #2 Other

The remaining 1.3% of investments were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period to calculate the allocations above.

For the previous reference period ending 31 December 2023, the asset allocation was as below:

- #1 Aligned with E/S characteristics: 96.1%
- #2 Other: 3.9%

### ● **In which economic sectors were the investments made?**

Sector	Sub-Sector	% Assets
--------	------------	----------

Communication Services	Media & Entertainment	6.73
Consumer Discretionary	Consumer Discretionary Distribution & Retail	8.97
Consumer Discretionary	Consumer Durables & Apparel	5.75
Consumer Discretionary	Consumer Services	4.62
Consumer Staples	Food, Beverage & Tobacco	4.22
Financials	Financial Services	8.44
Financials	Insurance	5.65
Health Care	Health Care Equipment & Services	5.31
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	11.04
Industrials	Capital Goods	8.42
Industrials	Commercial & Professional Services	1.40
Information Technology	Semiconductors & Semiconductor Equipment	9.48
Information Technology	Software & Services	11.83
Information Technology	Technology Hardware & Equipment	6.01
Utilities	Utilities	0.82

\*The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the Sub-Fund did not use the EU Taxonomy classification system in determining whether economic activities of investee companies have contributed to an environmental objective or not. Therefore, the EU Taxonomy alignment figures reported below and in the graphs set out in the following section are an incidental result of the investment strategy of the Sub-Fund and the environmental and social characteristics promoted by the Sub-Fund.

The extent to which sustainable investments with an environment objective were aligned with the EU Taxonomy were:

- 0% as measured in turnover
- 0.12% as measured in capital expenditure (CapEx)
- 0% as measured in operational expenditure (OpEx)

Following is the breakdown of the proportion of the investments per each of the environmental objectives under the EU Taxonomy reported by investee companies:

- a) climate change mitigation:
  - 0% as measured in turnover
  - 0.12% as measured in CapEx
  - 0% as measured in OpEx
- b) climate change adaptation:
  - 0% as measured in turnover
  - 0.04% as measured in CapEx
  - 0% as measured in OpEx
- c) the sustainable use and protection of water and marine resources: alignment ratio was 0% for all turnover, CapEx and OpEx.
- d) the transition to a circular economy: alignment ratio was 0% for all turnover, CapEx and OpEx.
- e) pollution prevention and control: alignment ratio was 0% for all turnover, CapEx and OpEx.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

f) the protection and restoration of biodiversity and ecosystems: alignment ratio was 0% for all turnover, CapEx and OpEx.

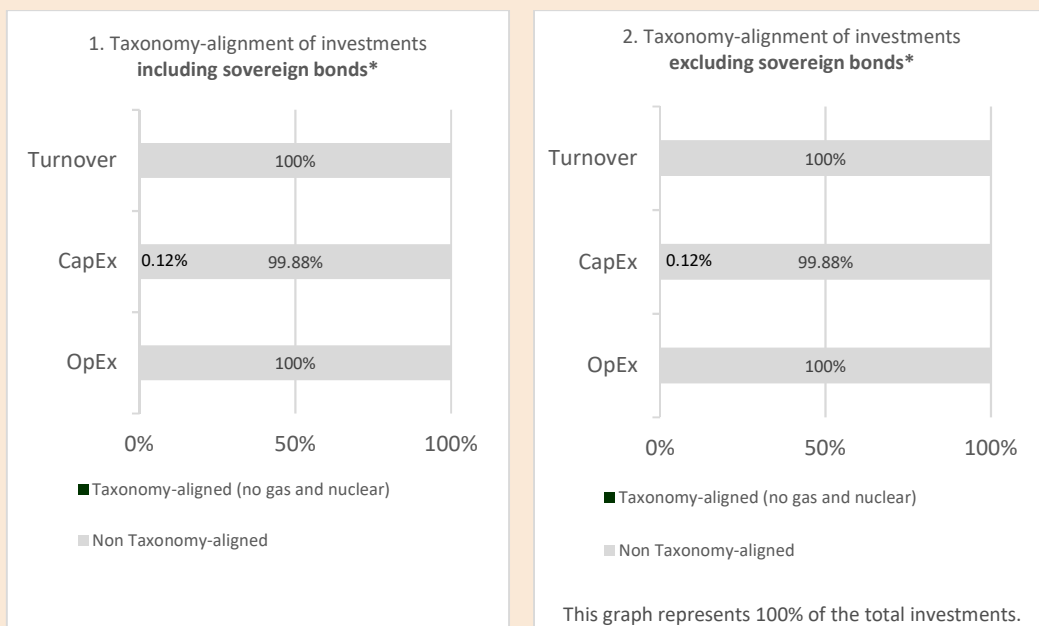

The EU Taxonomy alignment data in this report was calculated based on the alignment ratios reported by investee companies which were obtained from a third-party data provider and does not include estimates provided by companies or third-party data providers. The compliance of the investments of the Sub-Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

As the Sub-Fund did not hold any sovereign bonds for the reference period, the alignment ratios with the EU Taxonomy were identical between calculations including sovereign bonds and excluding sovereign bonds.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0% respectively.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

	Taxonomy-aligned			Non Taxonomy-aligned		
	31 Dec 2022 ref period	31 Dec 2023 ref period	31 Dec 2024 ref period	31 Dec 2022 ref period	31 Dec 2023 ref period	31 Dec 2024 ref period
<b>Turnover</b>	0%	0%	0%	100%	100%	100%
<b>CapEx</b>	0%	0.18%	0.12%	100%	99.82%	99.88%
<b>OpEx</b>	0%	0%	0%	100%	100%	100%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable. For the reference period, the Sub-Fund did not use the EU Taxonomy classification system in determining whether economic activities of investee companies have contributed to an environmental objective or not. Therefore, the EU Taxonomy alignment figures reported above are an incidental result of the investment strategy of the Sub-Fund and the environmental and social characteristics promoted by the Sub-Fund.

**What was the share of socially sustainable investments?**

Not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The “#2 Other” investments made by the Sub-Fund were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Investment Manager undertook a total of 50 engagements with portfolio companies during the reference period. There were 15 in Europe, 28 in North America, 4 in Asia ex Japan and 3 in Japan. This broadly reflects the location of the headquarters of the investee companies held by the Sub-Fund during the period. 26 of the engagements included issues relating to the environment and 23 included issues relating to social considerations. The non-exhaustive list below illustrates some of the themes the Investment Management engaged on:

- 12 engagements were related to GHC emission reduction targets and SBTi commitments;
- 8 engagements were related to climate change, including reporting, sharing of information, emissions trajectory and PFAS (forever chemicals) remediation and treatment for drinking water;

- 6 engagements were related to mitigating obesity: impact of Ultra-processed foods (UPF), initiatives within their workforce including their access to diabetes and weight loss medication (GLP-1);
- 5 engagements were related to further disclosures from the company;
- 3 engagements were related to Human Rights;
- 2 engagements were related to management remuneration and their disclosure and link to ESG;
- 2 engagements were related to deforestation cases on their supply chain.

# Sustainable investment objective

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>Yes</b>	<input type="radio"/> <input type="radio"/> <input type="checkbox"/> <b>No</b>
<input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 50.8%</b> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy *</li> <li><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul>
<input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 48.2%</b>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

\* The EU Taxonomy alignment figures reported herein are an incidental result of the sustainable investment objective pursued by the Sub-Fund. Please see further below under “To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?”

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of the Sub-Fund is to invest in companies with a high overall positive impact on society (meaning the environment, society, customers, suppliers, employees and investors). Based on the sustainable investment objective above, the Investment Manager sought to invest in companies with the greatest total positive impact on all stakeholders by mainly focusing on the following six UN Sustainable Development Goals (“SDGs”) aligned “Impact Goals”:

1. Mitigate Climate Change
2. Mitigate Natural Capital Depletion
3. Eliminate Communicable Disease
4. Mitigate the Obesity Epidemic
5. Global Access to Basic Financial Services
6. Global Access to Clean Drinking Water

The Investment Manager has sought to achieve the sustainable investment objective through investment in sustainable investments that are aligned with the Impact Goals or other environmental or social objectives. Each sustainable investment was assessed

against the proprietary ESG ratings, exclusions, SDGs assessment, contribution assessment and proprietary total stakeholder impact assessment, and categorised into the appropriate contribution category of “direct contribution” and “indirect contribution”. The details of the contribution categories and the binding strategies are further described under “What investment strategy does this financial product follow?” in Annex 1 attached to the Sub-Fund’s Supplement.

As further described under the section “How did the sustainability indicators perform?”, the Investment Manager has measured the impact of the Sub-Fund’s investments through the metric of impact of the underlying holdings per USD 1 million invested in the Sub-Fund. The Investment Manager has observed positive contribution across all six Impact Goals particularly in the social Impact Goals of 3) Eliminate Communicable Disease and 4) Mitigate the Obesity Epidemic.

The extent of the Sub-Fund’s impact and/or contribution is further described in the section “How did the sustainability indicators perform?” and “How did this financial product consider principal adverse impacts on sustainability factors?” below. The proportion of the Sub-Fund that was invested in sustainable investments is disclosed under the section “What was the proportion of sustainability-related investments?” below.

● **How did the sustainability indicators perform?**

The Sub-Fund’s sustainability indicators performed as below (impact of the underlying holdings per USD 1 million invested in the Sub-Fund):

- Tonnes of carbon avoided as a result of an investee company’s products and services: (Scope 4) 216.39 tonnes
- Number of low income patients reached with drugs and treatments through company’s access strategies: 26 patients
- Number of people reached with financial services that were previously unbanked: 105
- Litres of clean drinking water provided as a result of a company’s technology: 1782 litres

The following indicators were not included as the sustainability indicators indicated within Annex 1 attached to the Sub-Fund’s Supplement but have been added in this report to provide shareholders and potential investors with better understanding of the impact of the Sub-Fund’s investments during the reference period. Some or all of the following indicators may not be relevant for future reference periods because of the idiosyncratic nature of the indicators that reflect certain particular investments held by the Sub-Fund during the current reference period.

- Tonnes of carbon avoided relative to the MSCI All Country World Index (the “Index”): 381 tonnes
- Number of diabetes patients treated: 4 patients
- Amount of industrial and precious metal recycled: 420 tonnes
- Financial amount of mortgages provided to low income and economically deprived population: USD 315.
- Total financial amount of loans to micro, small and medium enterprises in Indonesia: USD 30,604.

Please note that the sustainability indicator data becomes available on an annual basis in the following months post the end of the year. Therefore, the sustainability indicators provided above have been calculated based on the data available at the time of this periodic report, using the quarter-end average weights of holdings held in the Sub-Fund in 2024, market capitalisation data as of 2024 December-end and the fiscal year-end impact data for 2023. Sustainability indicators above do not take

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

into account companies without relevant data and/or companies whose activities are not relevant to the particular sustainability indicator(s).

For the sustainability indicators above, the Investment Manager has used data provided by companies in annual sustainability reports and a third-party data provider, ISS-ESG.

● **...and compared to previous periods?**

<b>Sustainability indicators</b>	<b>31 December 2022 reference period (reported in 2023 periodic report)</b>	<b>31 December 2023 reference period (reported in 2024 periodic report)</b>	<b>31 December 2024 reference period (reported in 2025 periodic report)</b>
Tonnes of carbon avoided as a result of an investee company's products and services (Scope 1+2+3)	78.35 tonnes	68.23 tonnes	216.39 tonnes
Number of low income patients reached with drugs and treatments through company's access strategies	24 patients	24 patients	26 patients
Number of people reached with financial services that were previously unbanked	114	111	105
Litres of clean drinking water provided as a result of a company's technology	1532 litres	1578 litres	1782 litres
Tonnes of carbon avoided relative to the Index (Scope 1+2+3)	157 tonnes	378 tonnes	381 tonnes
Number of diabetes patients treated	5 patients	3 patients	4 patients
Amount of industrial and precious metal recycled	722 tonnes	828 tonnes	420 tonnes
Financial amount of mortgages provided to low income and economically deprived population	USD 976	USD 272	USD 315
Total financial amount of loans to micro, small and medium enterprises in Indonesia	USD 22,546	USD 19,283	USD 30,604

The Sub-Fund has a low turnover in the range of 20-25% and therefore the Investment Manager expects that these metrics should not change materially on a year-on-year basis. The changes to the metrics are broadly in line within an expected range for market movements and the Investment Manager maintaining discipline around trimming security positions when valuations are extended and adding security positions when valuations are more attractive, and therefore, not indicative of any material shift in approach towards impact. One material decline was for the amount of industrial and precious metal recycled which was driven by the Investment Manager having divested from one holding that has highly impactful recycling operations but suffered a material decline in company quality over the reference period. The material increase in tonnes of carbon avoided in the 2024 reference period was due to the inclusion of a new holding in an environmental consulting and engineering services business. This company reports emissions avoided as a result

of the projects it has consulted on, which sits in a broader categorisation than how the Investment Manager calculated carbon avoided in the previous reference periods. The Investment Manager deemed it appropriate to broaden the category to reflect the high impact this business is having in supporting the Impact Goal of Mitigate Climate Change.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

In order to ensure that the sustainable investments of the Sub-Fund do not cause significant harm to any environmental or social sustainable investment objective, the Sub-Fund has taken into account certain indicators for adverse impacts on sustainability factors. Details on how the indicators have been considered is described below.

Within this assessment, the Investment Manager used the data available from a third-party data provider, MSCI which was based on the latest available impact data as well as in-house research and analysis provided by the Investment Manager.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The Investment Manager considered the following principal adverse impacts (“PAI”) indicators, either directly or indirectly, throughout the investment process through certain product-, activity- or conduct-based exclusions, proprietary ESG ratings, SDGs assessment, contribution assessment and proprietary total stakeholder impact assessment.

The exclusions include controversial weapons (#14 below), thermal coal (climate-related PAI indicators), and companies deemed to be in violation of the UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines) (#10 below) as further described under “What investment strategy does this financial product follow?”.

- 1) GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- 2) Carbon footprint
- 3) GHG intensity of investee companies
- 4) Exposure to companies active in the fossil fuel sector
- 5) Share of non-renewable energy consumption and production
- 6) Energy consumption intensity per high impact climate sector
- 7) Activities negatively affecting biodiversity-sensitive areas
- 8) Emissions to water
- 9) Hazardous waste and radioactive waste ratio
- 10) Violations of UNGC and OECD Guidelines
- 11) Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- 12) Unadjusted gender pay gap
- 13) Board gender diversity

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- 14) Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

The Investment Manager has also taken into account other relevant PAI indicators depending on the business activities, behaviours of a company and the availability of data. Where there was no sufficient data to make credible assessment, the Investment Manager supplemented with its qualitative research and engagement. Engagement with companies takes place on an ongoing basis.

Please note that data from the data provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable investments have aligned with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights by excluding companies that the Investment Manager deemed in violation of UNGC and OECD Guidelines.

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Sub-Fund considered the following PAI indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund's Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Violation of UNGC and OECD Guidelines (threshold 0%)

The Sub-Fund also considered following PAI indicators:

- GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water
- Hazardous waste and radioactive waste ratio
- Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- Unadjusted gender pay gap

- Board gender diversity

	Impact	Portfolio	Data coverage (%)	Index	Data coverage (%)
1.1.1	Scope 1 GHG emissions	484.85	100.00	1,716.18	99.83
1.1.2	Scope 2 GHG emissions	135.50	100.00	381.62	99.83

1.14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	100.00	0.35	99.94

\*Where there was no impact data and/or no data coverage for an indicator, the value is shown as "N/A" above. The PAI data above represents the average of four quarter-end impacts obtained from MSCI (the "Data Provider") at the time of this periodic report. The data coverage for #1.6.1 to #1.6.9 has been calculated by the Investment Manager based on the Data Provider's data.

- #1.1.1 to 1.3 (GHG emissions, Carbon footprint and GHG intensity): All of these PAI indicators were significantly lower than those of the Index due to the Sub-Fund's focus on the companies that have both lower operational GHG emissions and contribute to reducing emissions through their products and services. Overall total GHG emissions were 31% of the Index. Scope 3 GHG emissions may become higher once the estimates are replaced by investee companies' reported data.
- #1.4 (Exposure to companies active in the fossil fuel sector): While the impact was lower than that of the Index, the Sub-Fund reported 6.62% exposure to companies active in the fossil fuel sector. The exposure calculates the proportion of the Sub-Fund invested in companies that derive any revenue from fossil fuel-related activities. The Sub-Fund's holdings flagged for this PAI are companies heavily involved in the renewable energy transition.

- The Sub-Fund outperformed the Index on the environmental PAI indicators other than #1.5 (the share of non renewable energy consumption) and #1.8 (Emissions to water). For the former, the Sub-Fund was 0.05% worse but when included the Data Provider's estimates the Sub-Fund outperformed the Index. The Investment Manager will monitor the development of the reported data for this indicator. For emissions to water, as the coverage for both the Sub-Fund and the Index is very limited, the data is not currently meaningful.

Please note that data from the Data Provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund or the Index.

The Sub-Fund uses the Index in the way that the PAI of the Sub-Fund are compared against the PAI of the Index, with the aim being, in principle, to limit such portfolio average adverse impacts (weighted average adverse impacts of the companies held by the Sub-Fund) to be lower than that of the Index. However, the Index is not used to define the portfolio composition of the Sub-Fund and is not used for the purpose of determining the attainment of the sustainable investment objective of the Sub-Fund. The Index is a broad market index and not consistent with the sustainable investment objective of the Sub-Fund.

## What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
MICROSOFT CORP	Information Technology	5.21	USA
JOHNSON CONTROLS INTERNATION	Industrials	4.38	USA
MASTERCARD INC - A	Financials	4.19	USA
TAIWAN SEMICONDUCTOR MANUFACTURING	Information Technology	4.19	Taiwan

VISA INC-CLASS A SHARES	Financials	3.15	USA
AXA SA	Financials	3.09	France

\*Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:  
1<sup>st</sup> January 2024 to 31<sup>st</sup> December 2024.

## What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which was invested in sustainable investments during the reference period is provided below.

### ● *What was the asset allocation?*

#1 Sustainable

The Investment Manager has invested 99.0% of the Sub-Fund's assets in sustainable investments.

**Asset allocation** describes the share of investments in specific assets.

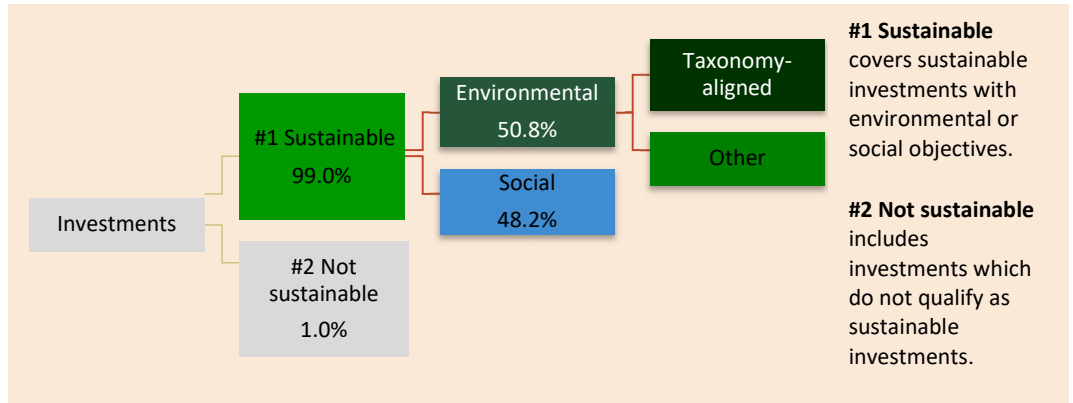

Further details on how the Investment Manager identifies sustainable investments are described under “What investment strategy does this financial product follow?” in Annex 1 attached to the Sub-Fund’s Supplement.

**#2 Not sustainable**

The remaining 1.0% of investments were cash held as ancillary liquidity.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period to calculate the allocations above.

\* The EU Taxonomy alignment figures reported herein are an incidental result of the sustainable investment objective pursued by the Sub-Fund. Please see further below under “To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?”

For the previous reference period ending 31 December 2023, the asset allocation was as below:

- #1 Sustainable: 99.2% (split as to Environmental: 52.2% and Social: 47.0%)
- #2 Not Sustainable: 0.8%

**In which economic sectors were the investments made?**

Sector	Sub-Sector	% Assets
Communication Services	Media & Entertainment	3.53
Financials	Banks	4.09
Financials	Financial Services	9.18
Financials	Insurance	7.87
Health Care	Health Care Equipment & Services	11.24
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	16.04
Industrials	Capital Goods	12.21
Industrials	Commercial & Professional Services	7.36
Information Technology	Semiconductors & Semiconductor Equipment	8.28
Information Technology	Software & Services	11.99
Information Technology	Technology Hardware & Equipment	0.27
Materials	Materials	0.38
Utilities	Utilities	6.55

\*The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

For the reference period, the Sub-Fund did not use the EU Taxonomy classification system in determining whether economic activities of investee companies have

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

contributed to an environmental objective or not. Therefore, the EU Taxonomy alignment figures reported below and in the graphs set out in the following section are an incidental result of the sustainable investment objective pursued by the Sub-Fund.

The extent to which sustainable investments with an environment objective were aligned with the EU Taxonomy were:

- 3.02% as measured in turnover
- 4.46% as measured in capital expenditure (CapEx)
- 4.12% as measured in operational expenditure (OpEx)

Following is the breakdown of the proportion of the investments per each of the environmental objectives under the EU Taxonomy reported by investee companies.

- a) climate change mitigation:
  - 2.93% as measured in turnover
  - 4.21% as measured in CapEx
  - 3.98% as measured in OpEx
- b) climate change adaptation:
  - 0.00% as measured in turnover
  - 0.22% as measured in CapEx
  - 0.14% as measured in OpEx
- c) the sustainable use and protection of water and marine resources:
  - 0% as measured in turnover
  - 0% as measured in CapEx
  - 0% as measured in OpEx
- d) the transition to a circular economy:
  - 0.12% as measured in turnover
  - 0.03% as measured in CapEx
  - 0% as measured in OpEx
- e) pollution prevention and control:
  - 0% as measured in turnover
  - 0% as measured in CapEx
  - 0% as measured in OpEx
- f) the protection and restoration of biodiversity and ecosystems:
  - 0% as measured in turnover
  - 0% as measured in CapEx
  - 0% as measured in OpEx

The EU Taxonomy alignment data in this report was calculated based on the alignment ratios reported by investee companies which were obtained from a third-party data provider and does not include estimates provided by companies or third-party data providers. The compliance of the investments of the Sub-Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

As the Sub-Fund did not hold any sovereign bonds for the reference period, the alignment ratios with the EU Taxonomy were identical between calculations including sovereign bonds and excluding sovereign bonds.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

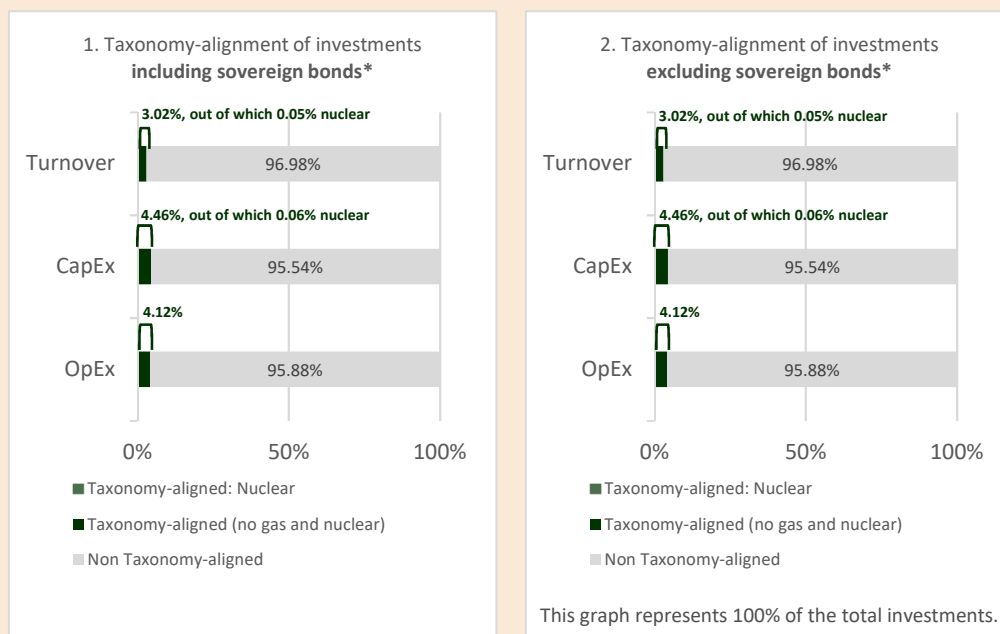

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities are economic activities** for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

- Yes:
   
 In fossil gas
   
 In nuclear energy
   
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was as below.

Transitional activities:

- 0.00% as measured in turnover
- 0.00% as measured in CapEx
- 0% as measured in OpEx

Enabling activities:

- 2.70% as measured in turnover
- 3.57% as measured in CapEx
- 3.58% as measured in OpEx

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

	Taxonomy-aligned			Non Taxonomy-aligned		
	31 Dec 2022 ref. period	31 Dec 2023 ref. period	31 Dec 2024 ref. period	31 Dec 2022 ref. period	31 Dec 2023 ref. period	31 Dec 2024 ref. period
<b>Turnover</b>	0%	1.85%	3.02%	100%	98.15%	96.98%
<b>CapEx</b>	0%	2.73%	4.46%	100%	97.27%	95.54%
<b>OpEx</b>	0%	3.23%	4.12%	100%	96.77%	95.88%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was below:

- 47.81% as measured in turnover
- 46.37% as measured in CapEx
- 46.71% as measured in OpEx

The Sub-Fund did not use the EU Taxonomy classification system in determining whether economic activities of investee companies have contributed to an environmental objective or not. Therefore, the EU Taxonomy alignment figures reported above in response to the question “To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?” are an incidental result of the sustainable investment objective pursued by the Sub-Fund.

### What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 48.2%.

### What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The “#2 Not sustainable” investments made by the Sub-Fund were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards. The proportion and use of such “#2 Not sustainable” investments did not affect the delivery of the sustainable investment objective in the reference period due to the limited use and the nature of those instruments.

### What actions have been taken to attain the sustainable investment objective during the reference period?

The Investment Manager has conducted the following engagement activities in each quarter during the reference period. The Investment Manager utilised milestone progress tracking in its engagement which is broken down into the following 6 stages:

- Stage I: Communicate issues to portfolio companies
- Stage II: Company shares a recognition of the issues
- Stage III: Company formulates countermeasures
- Stage IV: Company implements countermeasures
- Stage V: Completion
- Stage X: Closed without success

1. The Investment Manager undertook 9 engagements for impact with portfolio companies in Q1. Of these 2 were focused on the Sub-Fund’s Mitigate Natural Capital Depletion Impact Goal, 2 on Mitigate the Obesity Epidemic, 1 on Global Access to Basic Financial Services, 1 on Mitigate Climate Change and 3 on other sustainability matters. Of the 9 engagements undertaken, 6 were ongoing engagements whilst 3 were one-off engagements. Of these ongoing engagements the breakdown by milestone was: 0 were at milestone Stage I, 3 were at milestone Stage II, 1 was at

milestone Stage III, 1 was at milestone Stage IV, and 1 was at milestone Stage V (completed).

2. The Investment Manager undertook 28 engagements for impact with portfolio companies over 2Q. Of these 12 were focused on the Sub-Fund's Mitigate Climate Change impact goal, 5 on Mitigate the Obesity Epidemic, 3 on Eliminate Communicable Disease and 8 on other sustainability matters. Of the 28 engagements undertaken, 22 were ongoing engagements whilst 6 were one-off engagements. Of these ongoing engagements, the breakdown by milestone was: 4 were at milestone Stage I, 11 at milestone Stage II, 4 at milestone Stage III, 0 at milestone Stage IV and 3 at milestone Stage V (completed). Two engagements had to be closed without success to prioritise other engagements given the limited prospect for success through further engagement. For those closed without success, while the engagements were not successful, the Investment Manager believed that the companies still had sufficient positive total impact and are qualified as sustainable investments.
3. The Investment Manager undertook 12 engagements for impact with portfolio companies over 3Q. Of these 6 were focused on the Sub-Fund's Mitigate Climate Change impact goal, 4 on Mitigate the Obesity Epidemic, 1 on Eliminate Communicable Disease and 1 on other sustainability matters. Of the 12 engagements undertaken, 10 were ongoing engagements whilst 2 were one-off engagements. Of these ongoing engagements the breakdown by milestone was: none at milestone Stage I, 3 were at milestone Stage II, 2 were at milestone Stage III, 2 at milestone Stage IV and 3 at milestone Stage V (completed).
4. The Investment Manager undertook 13 engagements for impact with portfolio companies over Q4. Of these 8 were focused on the Sub-Fund's Mitigate Climate Change impact goal, 1 on Mitigate Natural Capital Depletion, 1 on Eliminate Communicable Disease and 3 on other sustainability matters. Of the 13 engagements undertaken, 9 were ongoing engagements whilst 4 were one-off engagements. Of these ongoing engagements the breakdown by milestone was: 3 were at milestone Stage I, 4 at Stage II, 0 at milestone Stage III, 1 at milestone Stage IV, and 1 at milestone Stage V (completed).

## ANNEX

Product name: American Century Global Small Cap Equity Fund  
 Legal entity identifier: 213800ZBE2LLV7F4VR97

# Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective: \_\_\_%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: \_\_\_%**

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager has promoted sustainable practices in the areas of the environment and society as its environmental and social characteristics through:

- **Exclusions** – The Investment Manager has excluded companies that did not meet fundamental responsibilities in the areas of human rights, labour, environment, and anti-corruption, companies with any tie to controversial weapons, companies deriving certain revenues from tobacco production and thermal coal extraction.
- **Sustainability Assessment** – The Investment Manager utilised a proprietary sustainability assessment which is comprised of a quantitative sustainability score and trend adjustment (“Sustainability Assessment”). At least 85% of net assets, excluding cash, short-term debt instruments, and collective investment schemes (“Excluded Investments”), were invested in companies that received a quantitative sustainability score that fell in the top 75% of the investee company’s universe (“the 85% Threshold”) at time of purchase. Compliance with the 85% Threshold was monitored on an ongoing basis.

- **Engagement** – A fundamental view of the Investment Manager is its approach of inclusion over exclusion to maximise the influence on investee companies via engagement. As part of its Sustainability Assessment, the Investment Manager engaged with investee companies on sustainability issues to gain insight or discuss best industry practices. The Investment Manager, based on its evaluation, did not identify any investee companies assessed to have newly identified severe controversies that the Investment Manager believed required engagement. Details of the engagement activities are described in the section under “What actions have been taken to meet the environmental and/or social characteristics during the reference period?”

The extent of the Sub-Fund’s compliance with the binding requirements set out in Annex 1 attached to the Sub-Fund’s Supplement is further described in the section “How did the sustainability indicators perform?” and “How did this financial product consider principal adverse impacts on sustainability factors?” below. The proportion of the Sub-Fund that was aligned with the environmental and social characteristics is disclosed under the section “What was the proportion of sustainability-related investments?” below.

● **How did the sustainability indicators perform?**

- **Exclusions** – No exposure to companies that did not meet fundamental responsibilities in the areas of human rights, labour, environment, and anti-corruption nor to companies with any tie to controversial weapons, companies deriving certain revenues from tobacco production or thermal coal extraction.
- **Sustainability Assessment** – The proportion of the net assets, excluding Excluded Investments, invested within the 85% Threshold was 93%. The proportion was calculated based on the 12-month average weights of holdings held in the Sub-Fund during the reference period ending 31 December 2024.
- **Engagement** – As at the end of December 2024, the aggregate number of investee companies engaged with during the reference period was 40. None of those engagements were a result of the evaluation by the Investment Manager, with inputs from third-party data providers, as having a newly identified controversy that the Investment Manager believed required engagement.

For the sustainability indicators above, the Investment Manager has used the Investment Manager’s proprietary data, as well as data provided by third party providers such as FactSet and MSCI. Regarding data from third-party data providers, the Investment Manager is not able to verify the accuracy of the data, nor the sources from which the data is collected.

● **...and compared to previous periods?**

Sustainability indicators	31 December 2022 reference period (reported in 2023 periodic report)	31 December 2023 reference period (reported in 2024 periodic report)	31 December 2024 reference period (reported in 2025 periodic report)
Exclusions	No exposure	No exposure	No exposure
Sustainability Assessment (within top 75% quantitative sustainability scores)	92%	97%	93%

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

Engagement	35	46	40
------------	----	----	----

Details of the engagement activities are described in the section under “What actions have been taken to meet the environmental and/or social characteristics during the reference period?”

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable.

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable.

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Sub-Fund considered the following principal adverse impact (PAI) indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund’s Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons), based on a third-party classification (threshold 0%)
- Exposure to those companies deemed in violation of UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines), based on a third-party classification (threshold 0%)

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1<sup>st</sup> January 2024 to 31<sup>st</sup> December 2024.**

Largest investments	Sector	% Assets	Country
ASICS CORP	Consumer Discretionary	1.54	Japan
EVERCORE INC - A	Financials	1.37	USA
INTERMEDIATE CAPITAL GROUP	Financials	1.33	UK

CYBERARK SOFTWARE LTD	Information Technology	1.16	Israel
TOLL BROTHERS INC	Consumer Discretionary	1.14	USA
GUIDEWIRE SOFTWARE INC	Information Technology	1.06	USA
BOARDWALK REAL ESTATE IN	Real Estate	1.05	Canada
ONTO INNOVATION INC	Information Technology	1.05	USA
CAR GROUP LTD	Communication Services	1.01	Australia

\*Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

## What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which promoted environmental and social characteristics during the reference period is provided below.

### ● **What was the asset allocation?**

#### #1 Aligned with E/S characteristics

The Sub-Fund invested 95.1% of the Sub-Fund's assets in investments which are aligned with the environmental and social characteristics promoted by the Sub-Fund. The proportion was calculated as the proportion of the portfolio which was subject to the binding criteria which were used to attain the Sub-Fund's environmental and social characteristics as set out in Annex 1 attached to the Sub-Fund's Supplement.

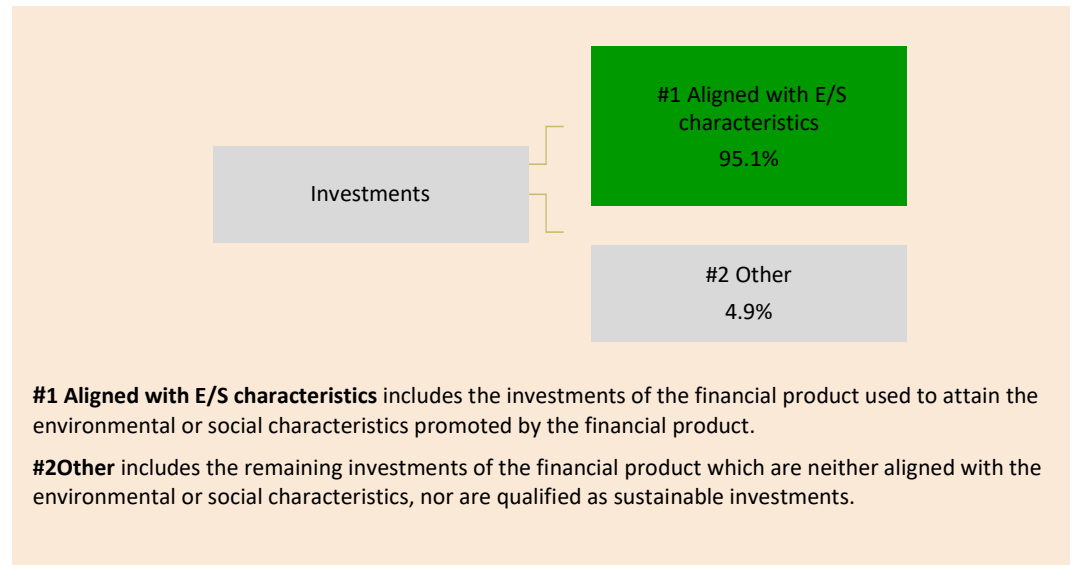

The Sub-Fund did not make any sustainable investments at this time.

#### #2 Other

The remaining 4.9% of investments were invested in companies that received a quantitative sustainability score that fell in the bottom 25% of the investee company's universe, in unscreened investments (collective investment schemes) for efficient portfolio management purposes, and in cash held as ancillary liquidity; they did not follow any minimum environmental or social safeguards.

**Asset allocation** describes the share of investments in specific assets.

The Investment Manager used the 12-month average weights of holdings held in the Sub-Fund during the reference period ending 31 December 2024 to calculate the allocations above.

For the previous reference period ending 31 December 2023, the asset allocation was as below:

- #1 Aligned with E/S characteristics: 96.7%
- #2 Other: 3.3%

● ***In which economic sectors were the investments made?***

Sector	Sub-Sector	% Assets
Communication Services	Media & Entertainment	2.56
Consumer Discretionary	Automobiles & Components	1.42
Consumer Discretionary	Consumer Discretionary Distribution & Retail	4.52
Consumer Discretionary	Consumer Durables & Apparel	7.19
Consumer Discretionary	Consumer Services	2.37
Consumer Staples	Consumer Staples Distribution	1.30
Consumer Staples	Food, Beverage & Tobacco	1.30
Consumer Staples	Household & Personal Products	1.87

Financials	Insurance	2.21
Health Care	Health Care Equipment & Services	5.05
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	3.66
Industrials	Capital Goods	11.06
Industrials	Commercial & Professional Services	6.37
Industrials	Transportation	1.23
Information Technology	Semiconductors & Semiconductor Equipment	4.72
Information Technology	Software & Services	7.07
Information Technology	Technology Hardware & Equipment	2.98
Materials	Materials	6.76
Real Estate	Equity Real Estate Investment	4.25

Real Estate	Real Estate Management & Development	2.82
Utilities	Utilities	1.18

\*The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity and collective investment schemes used for efficient portfolio management.

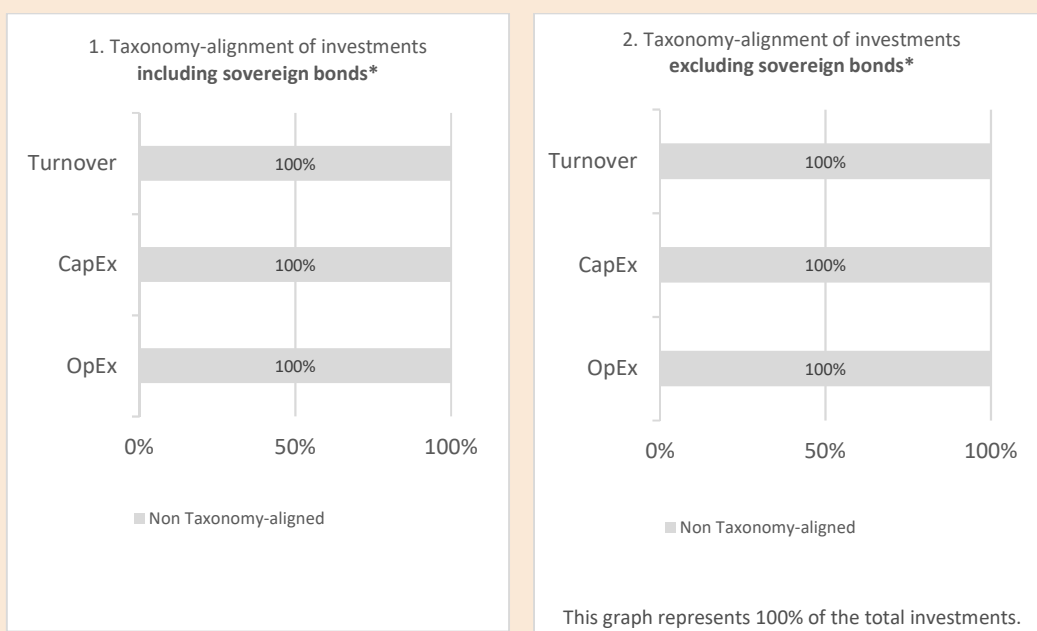

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas     In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0% respectively.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

	Taxonomy-aligned			Non Taxonomy-aligned		
	31 Dec 2022 ref period	31 Dec 2023 ref period	31 Dec 2024 ref period	31 Dec 2022 ref period	31 Dec 2023 ref period	31 Dec 2024 ref period
<b>Turnover</b>	0%	0%	0%	100%	100%	100%
<b>CapEx</b>	0%	0%	0%	100%	100%	100%
<b>OpEx</b>	0%	0%	0%	100%	100%	100%

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable.

**What was the share of socially sustainable investments?**

Not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The “#2 Other” investments made by the Sub-Fund included investment in companies that received a quantitative sustainability score that fell in the bottom 25% of the investee company’s universe, in unscreened investments (collective investment schemes) for efficient portfolio management purposes, and in cash held as ancillary liquidity; they did not follow any minimum environmental or social safeguards.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2024, the Sub-Fund excluded from its investment universe companies that violated the mandated product and norms-based criteria to ensure investee companies are promoting certain environmental and social characteristics. For example, the Sub-Fund did not invest in companies involved in the manufacture of controversial weapons or companies not in compliance with UNGC principles.

The Investment Manager's analysis of sustainability risks and opportunities led to investments in companies whose earnings growth that support several sustainability themes such as digitalization, energy transition and decarbonization. For example, the Sub-Fund invested in companies that provided innovative and important solutions supporting

vehicle electrification, wind and geothermal power, circular economies and carbon capture. The Investment Manager also identified companies that contributed to healthcare innovation and pharmaceuticals, such as companies engaged in the discovery, development and manufacture of treatments for rare conditions.

The Investment Manager engaged with 40 companies during the reference period, pursuant to its engagement policy and procedures. In general, engagement is conducted by the Investment Manager's Sustainable Research team, in partnership with investment teams, and is focused on material sustainability-related issues that the Investment Manager believes could potentially impact the value of the company. The Sustainable Research team may also engage companies on key themes that the Investment Manager believes will promote a more sustainable economy. Engagement activities may include in-person meetings, written communication, and industry forums, summarized and shared in the Investment Manager's investment research platform. Engagement summaries catalog objectives, record a company's progress, and document outcomes.

In 2024, the Investment Manager engaged with the management of investee companies on 32 different topics. The five topics most frequently addressed in engagements during the period were human capital, greenhouse gas emissions, governance, energy and environmental management. In most situations, engagement resulted in a better understanding of the sustainability risks facing the company and, more importantly how company management is addressing those risks.

#### **Disclaimer**

This disclosure was developed using information from MSCI ESG Research LLC or its affiliates or information providers. # Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** \_\_\_%

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_\_%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager has promoted sustainable practices in the areas of the environment and society as its environmental and social characteristics through:

- **Exclusions** – The Investment Manager has excluded companies that did not meet fundamental responsibilities in the areas of human rights, labour, environment, and anti-corruption, companies with any tie to controversial weapons, and companies deriving certain revenues from tobacco production or thermal coal extraction.
- **Sustainability Assessment** – The Investment Manager utilised a proprietary sustainability assessment which is comprised of a quantitative sustainability score and trend adjustment (“Sustainability Assessment”). At least 85% of net assets, excluding cash, short-term debt instruments, and collective investment schemes (“Excluded Investments”), were invested in companies that received a quantitative sustainability score that fell in the top 75% of the investee company’s universe (“the 85% Threshold”) at time of purchase. Compliance with the 85% Threshold was monitored on an ongoing basis.

- **Engagement** – A fundamental view of the Investment Manager is its approach of inclusion over exclusion to maximise the influence on investee companies via engagement. As part of its Sustainability Assessment, the Investment Manager engaged with an investee company on sustainability issues to gain insight or discuss best industry practices. The Investment Manager has also engaged with an investee company that had a newly identified severe controversy that the Investment Manager believed required engagement. Details of the engagement activities are described in the section under “What actions have been taken to meet the environmental and/or social characteristics during the reference period?”

The extent of the Sub-Fund’s compliance with the binding requirements set out in Annex 1 attached to the Sub-Fund’s Supplement is further described in the section “How did the sustainability indicators perform?” and “How did this financial product consider principal adverse impacts on sustainability factors?” below. The proportion of the Sub-Fund that was aligned with the environmental and social characteristics is disclosed under the section “What was the proportion of sustainability-related investments?” below.

● **How did the sustainability indicators perform?**

- **Exclusions** – No exposure to companies that did not meet fundamental responsibilities in the areas of human rights, labour, environment, and anti-corruption nor to companies with any tie to controversial weapons and companies deriving certain revenues from tobacco production or thermal coal extraction.
- **Sustainability Assessment** – The proportion of the net assets, excluding Excluded Investments, invested within the 85% Threshold was 99%. The proportion was calculated based on the 12-month average weights of holdings held in the Sub-Fund during the reference period ending 31 December 2024.
- **Engagement** – As at the end of December 2024, the aggregate number of investee companies engaged with during the reference period was 36. One engagement was a result of the evaluation by the Investment Manager, with inputs from third-party data providers, as having a newly identified controversy that the Investment Manager believed required engagement.

For the sustainability indicators above, the Investment Manager has used the Investment Manager’s proprietary data, as well as data provided by third party providers such as FactSet and MSCI. Regarding data from third-party data providers, the Investment Manager is not able to verify the accuracy of the data, nor the sources from which the data is collected.

● **...and compared to previous periods?**

Sustainability indicators	31 December 2022 reference period (reported in 2023 periodic report)	31 December 2023 reference period (reported in 2024 periodic report)	31 December 2024 reference period (reported in 2025 periodic report)
Exclusions	No exposure	No exposure	No exposure
Sustainability Assessment (within top 75% quantitative sustainability scores)	98%	99%	99%

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

Engagement	35	43	36
------------	----	----	----

Details of the engagement activities are described in the section under “What actions have been taken to meet the environmental and/or social characteristics during the reference period?”

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Sub-Fund considered the following principal adverse impact (PAI) indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund’s Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons), based on a third-party classification (threshold 0%)

- Exposure to those companies deemed in violation of UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines), based on a third-party classification (threshold 0%)

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1<sup>st</sup> January 2024 to 31<sup>st</sup> December 2024.**

Largest investments	Sector	% Assets	Country

\*Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The list of top investments is reflective of the general portfolio composition including assets which are not aligned with the environmental and/or social characteristics promoted by the Sub-Fund (i.e. all investments of the Sub-Fund).

## What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which promoted environmental and social characteristics during the reference period is provided below.

### ● **What was the asset allocation?**

#### #1 Aligned with E/S characteristics

The Sub-Fund invested 97.5% of the Sub-Fund's assets in investments which are aligned with the environmental and social characteristics promoted by the Sub-Fund. The proportion was calculated as the proportion of the portfolio which was subject to the binding criteria which were used to attain the Sub-Fund's environmental and social characteristics as set out in Annex 1 attached to the Sub-Fund's Supplement.

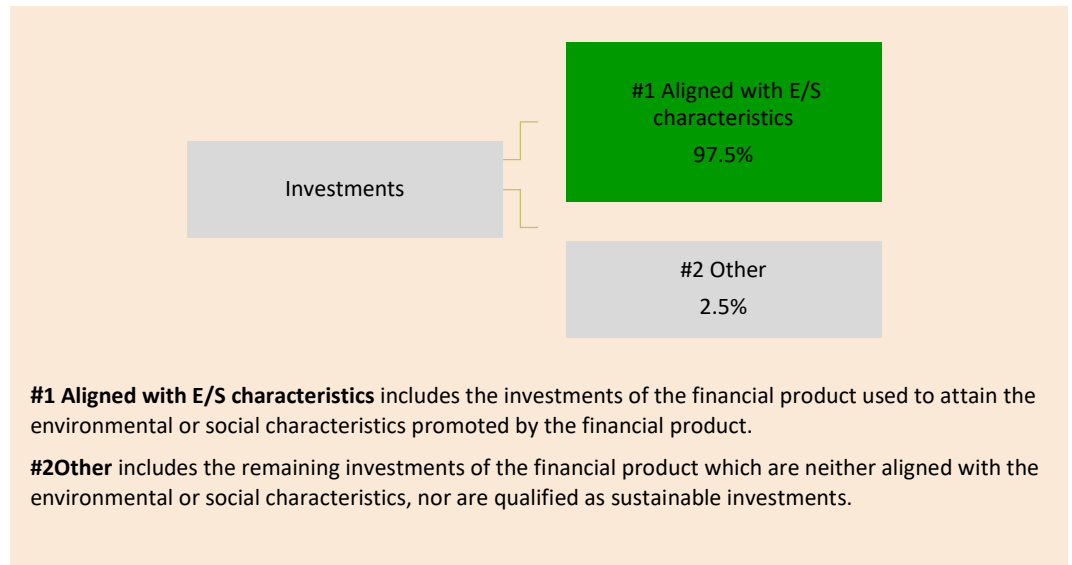

The Sub-Fund did not make any sustainable investments at this time.

#### #2 Other

The remaining 2.5% of investments were invested in companies that received a quantitative sustainability score that fell in the bottom 25% of the investee company's universe and in cash held as ancillary liquidity; they did not follow any minimum environmental or social safeguards.

**Asset allocation** describes the share of investments in specific assets.

The Investment Manager used the 12-month average weights of holdings held in the Sub-Fund during the reference period ending 31 December 2024 to calculate the allocations above.

For the previous reference period ending 31 December 2023, the asset allocation was as below:

- #1 Aligned with E/S characteristics: 98.4%
- #2 Other: 1.6%

● ***In which economic sectors were the investments made?***

Sector	Sub-Sector	% Assets
Communication Services	Media & Entertainment	5.80
Communication Services	Telecommunication Services	1.13

Real Estate	Real Estate Management & Development	0.64
Utilities	Utilities	2.27

\*The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

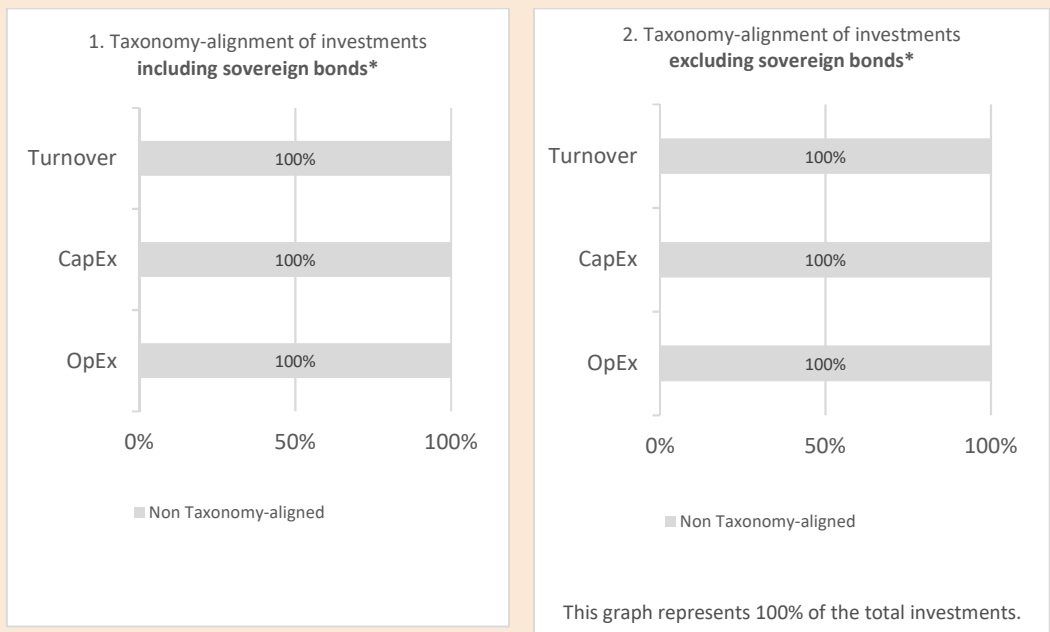

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0% respectively.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

	Taxonomy-aligned			Non Taxonomy-aligned		
	31 Dec 2022 ref period	31 Dec 2023 ref period	31 Dec 2024 ref period	31 Dec 2022 ref period	31 Dec 2023 ref period	31 Dec 2024 ref period
<b>Turnover</b>	0%	0%	0%	100%	100%	100%
<b>CapEx</b>	0%	0%	0%	100%	100%	100%
<b>OpEx</b>	0%	0%	0%	100%	100%	100%

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable.

**What was the share of socially sustainable investments?**

Not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The “#2 Other” investments made by the Sub-Fund included investment in companies that received a quantitative sustainability score that fell in the bottom 25% of the investee company’s universe and in cash held as ancillary liquidity; they did not follow any minimum environmental or social safeguards.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2024, the Sub-Fund excluded companies that violated the mandated product and norms-based criteria from its investment universe to ensure investee companies are promoting certain environmental and social characteristics. For example, the Sub-Fund did not invest in companies involved in the manufacture of controversial weapons or companies not in compliance with UNGC.

The Investment Manager’s analysis of sustainability risks and opportunities led to investment opportunities that support several sustainability themes such as digitalization, alternative energy, clean water technologies and companies providing innovative health care services and solutions.

The Investment Manager engaged with 36 investee companies during the reference period, pursuant to its engagement policy and procedures. In general, engagement is conducted by the Investment Manager’s Sustainable Research team, in partnership with investment teams, and is focused on material sustainability-related issues that the Investment Manager believes could potentially impact the value of the company. The Sustainable Research team may also engage with companies on key themes that the team believes will promote a more sustainable economy. Engagement activities, which may include in-person meetings, written communication and industry forums, are summarized and shared in the

Investment Manager's investment research platform. Engagement summaries catalogue objectives, record a company's progress, and document outcomes.

In 2024, the Investment Manager engaged with the management of investee companies on 31 different topics. The five topics most frequently addressed in engagements during the period were human capital management, compensation, general governance, data privacy and cybersecurity, and greenhouse gas emissions.

The Investment Manager also engaged one investee company assessed as having a newly identified severe controversy, as determined by a third-party data provider. According to the data provider, the investee company was involved in a severe controversy related to a data breach and ransomware attack of health care data. During the in-person engagement, the investee company provided detailed background on their immediate escalation, response and work to prevent future breaches. The issue did not result in widespread harm. The company rebuilt its affected IT systems while ensuring ongoing network functionality, and instituted additional employee training. Overall, the Investment Manager deemed the company's response effective and the issue resolved. In most situations, including the controversy-related engagement, engagement resulted in a better understanding of the sustainability risks facing the investee company, and more importantly, how company management is addressing those risks.

# Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** \_\_\_%

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_\_%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager has promoted sustainable practices in the areas of the environment and society as its environmental and social characteristics through:

- **Exclusions** – The Investment Manager has excluded companies that did not meet fundamental responsibilities in the areas of human rights, labour, environment, and anti-corruption, companies with any tie to controversial weapons, and companies deriving certain revenues from tobacco production or thermal coal extraction.
- **Sustainability Assessment** – The Investment Manager utilised a proprietary sustainability assessment which is comprised of a quantitative sustainability score and trend adjustment (“Sustainability Assessment”). At least 85% of net assets, excluding cash, short-term debt instruments, and collective investment schemes (“Excluded Investments”), were invested in companies that received a quantitative sustainability score that fell in the top 75% of the investee company’s universe (“the 85% Threshold”) at time of purchase. Compliance with the 85% Threshold was monitored on an ongoing basis.

- **Engagement** – A fundamental view of the Investment Manager is its approach of inclusion over exclusion to maximise the influence on investee companies via engagement. As part of its Sustainability Assessment, the Investment Manager engaged with investee companies on sustainability issues to gain insight or discuss best industry practices. The Investment Manager, based on its evaluation, did not identify any investee companies assessed to have a newly identified severe controversy that the Investment Manager believed required engagement. Details of the engagement activities are described in the section under “What actions have been taken to meet the environmental and/or social characteristics during the reference period?”

The extent of the Sub-Fund’s compliance with the binding requirements set out in Annex 1 attached to the Sub-Fund’s Supplement is further described in the section “How did the sustainability indicators perform?” and “How did this financial product consider principal adverse impacts on sustainability factors?” below. The proportion of the Sub-Fund that was aligned with the environmental and social characteristics is disclosed under the section “What was the proportion of sustainability-related investments?” below.

● **How did the sustainability indicators perform?**

- **Exclusions** – No exposure to companies that did not meet fundamental responsibilities in the areas of human rights, labour, environment, and anti-corruption nor to companies with any tie to controversial weapons, and companies deriving certain revenues from tobacco production or thermal coal extraction.
- **Sustainability Assessment** – The proportion of the net assets, excluding Excluded Investments, invested within the 85% Threshold was 99.8%. The proportion was calculated based on the 12-month average weights of holdings held in the Sub-Fund during the reference period ending 31 December 2024.
- **Engagement** – As at the end of December 2024, the aggregate number of investee companies engaged with during the reference period was 15. None of those engagements was a result of the evaluation by the Investment Manager, with inputs from third-party data providers, as having a newly identified controversy that the Investment Manager believed required engagement.

For the sustainability indicators above, the Investment Manager has used the Investment Manager’s proprietary data, as well as data provided by third party providers such as FactSet and MSCI. Regarding data from third-party data providers, the Investment Manager is not able to verify the accuracy of the data, nor the sources from which the data is collected.

The “#2 Other” investments made by the Sub-Fund included investment in companies that received a quantitative sustainability score that fell in the bottom 25% of the investee company’s universe and in cash held as ancillary liquidity; they did not follow any minimum environmental or social safeguards.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2024, the Sub-Fund excluded companies that violated the mandated product and norms-based criteria from its investment universe to ensure investee companies are promoting certain environmental and social characteristics. For example, the Sub-Fund did not invest in companies involved in the manufacture of controversial weapons or companies not in compliance with UNGC.

The Investment Manager’s analysis of sustainability risks and opportunities led to investment opportunities that support several sustainability themes such as digitalization, alternative energy, clean water technologies and companies providing innovative health care services and solutions.

The Investment Manager engaged with 15 investee companies during the reference period, pursuant to its engagement policy and procedures. In general, engagement is conducted by the Investment Manager’s Sustainable Research team, in partnership with investment teams, and is focused on material sustainability-related issues that the Investment Manager believes could potentially impact the value of the company. The Sustainable Research team may also engage with companies on key themes that the team believes will promote a more sustainable economy. Engagement activities, which may include in-person meetings, written communication and industry forums, are summarized and shared in the

Investment Manager's investment research platform. Engagement summaries catalogue objectives, record a company's progress, and document outcomes.

In 2024, the Investment Manager engaged with the management of investee companies on 19 different topics. The five topics most frequently addressed in engagements during the period were compensation, human capital management, general governance, data privacy and cybersecurity, and labor practices and supply chain management. In most situations, engagement resulted in a better understanding of the sustainability risks facing the investee company, and more importantly, how company management is addressing those risks.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager has promoted sustainable practices in the areas of the environment and society as its environmental and social characteristics through:

- **Exclusions** – The Investment Manager has excluded companies that did not meet fundamental responsibilities in the areas of human rights, labour, environment, and anti-corruption, companies with any tie to controversial weapons and companies deriving certain revenues from tobacco production or thermal coal extraction.
- **Sustainability Assessment** – The Investment Manager utilised a proprietary sustainability assessment which is comprised of a quantitative sustainability score and trend adjustment (“Sustainability Assessment”). At least 85% of net assets, excluding cash, short-term debt instruments, and collective investment schemes (“Excluded Investments”), were invested in companies that received a quantitative sustainability score that fell in the top 75% of the investee company’s universe (“the 85% Threshold”) at time of purchase. Compliance with the 85% Threshold was monitored on an ongoing basis.

- **Engagement** – A fundamental view of the Investment Manager is its approach of inclusion over exclusion to maximise the influence on investee companies via engagement. As part of its Sustainability Assessment, the Investment Manager engaged with investee companies on sustainability issues to gain insight or discuss best industry practices. The Investment Manager, based on its evaluation, did not identify any investee companies assessed to have a newly identified severe controversy that the Investment Manager believed required engagement. Details of the engagement activities are described in the section under “What actions have been taken to meet the environmental and/or social characteristics during the reference period?”

The extent of the Sub-Fund’s compliance with the binding requirements set out in Annex 1 attached to the Sub-Fund’s Supplement is further described in the section “How did the sustainability indicators perform?” and “How did this financial product consider principal adverse impacts on sustainability factors?” below. The proportion of the Sub-Fund that was aligned with the environmental and social characteristics is disclosed under the section “What was the proportion of sustainability-related investments?” below.

● **How did the sustainability indicators perform?**

- **Exclusions** – No exposure to companies that did not meet fundamental responsibilities in the areas of human rights, labour, environment, and anti-corruption nor to companies with any tie to controversial weapons and companies deriving certain revenues from tobacco production or thermal coal extraction.
- **Sustainability Assessment** – The proportion of the net assets, excluding Excluded Investments, invested within the 85% Threshold was 95.7%. The proportion was calculated based on the 12-month average weights of holdings held in the Sub-Fund during the reference period ending 31 December 2024.
- **Engagement** – As at the end of December 2024, the aggregate number of investee companies engaged with during the reference period was 13. None of those engagements were as a result of the evaluation by the Investment Manager, with inputs from third-party data providers, as having a newly identified controversy that the Investment Manager believed required engagement.

For the sustainability indicators above, the Investment Manager has used the Investment Manager’s proprietary data, as well as data provided by third-party providers such as FactSet and MSCI. Regarding data from third-party data providers, the Investment Manager is not able to verify the accuracy of the data, nor the sources from which the data is collected.

● **...and compared to previous periods?**

Sustainability indicators	31 December 2022 reference period (reported in 2023 periodic report)	31 December 2023 reference period (reported in 2024 periodic report)	31 December 2024 reference period (reported in 2025 periodic report)
Exclusions	No exposure	No exposure	No exposure

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability Assessment (within top 75% quantitative sustainability scores)	100%	99.8%	95.7%
Engagement	19	12	13

Details of the engagement activities are described in the section under “What actions have been taken to meet the environmental and/or social characteristics during the reference period?”

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impact (PAI) indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex

1 to the Sub-Fund's Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons), based on a third-party classification (threshold 0%)
- Exposure to those companies deemed in violation of UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines), based on a third-party classification (threshold 0%)

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1<sup>st</sup> January 2024 to 31<sup>st</sup> December 2024.**

Largest investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR-SP ADR	Information Technology	9.50	Taiwan
TENCENT HOLDINGS LTD	Communication Services	5.99	China
SAMSUNG ELECTRONICS CO LTD	Information Technology	4.69	South Korea
ICICI BANK LTD-SPON ADR	Financials	2.84	India
RELIANCE INDUSTRIES LTD	Energy	2.35	India
TRIP.COM GROUP LTD	Consumer Discretionary	2.09	China
CHINA CONSTRUCTION BANK	Financials	2.05	China
SK HYNIX INC	Information Technology	1.92	South Korea

CASH	N/A	1.84	N/A
EMAAR PROPERTIES PJSC	Real Estate	1.76	UAE
ZOMATO LTD	Consumer Discretionary	1.74	India
NETEASE INC	Communication Services	1.73	China
BIM BIRLESIK MAGAZALAR AS	Consumer Staples	1.71	Turkey
NASPERS LTD-N SHS	Consumer Discretionary	1.63	South Africa

\*Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The list of top investments is reflective of the general portfolio composition including assets which are not aligned with the environmental and/or social characteristics promoted by the Sub-Fund (i.e. all investments of the Sub-Fund).

## What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which promoted environmental and social characteristics during the reference period is provided below.

### ● *What was the asset allocation?*

#### #1 Aligned with E/S characteristics

The Sub-Fund invested 96.5% of the Sub-Fund's assets in investments which are aligned with the environmental and social characteristics promoted by the Sub-Fund. The proportion was calculated as the proportion of the portfolio which was subject to the binding criteria which were used to attain the Sub-Fund's environmental and social characteristics as set out in Annex 1 attached to the Sub-Fund's Supplement.

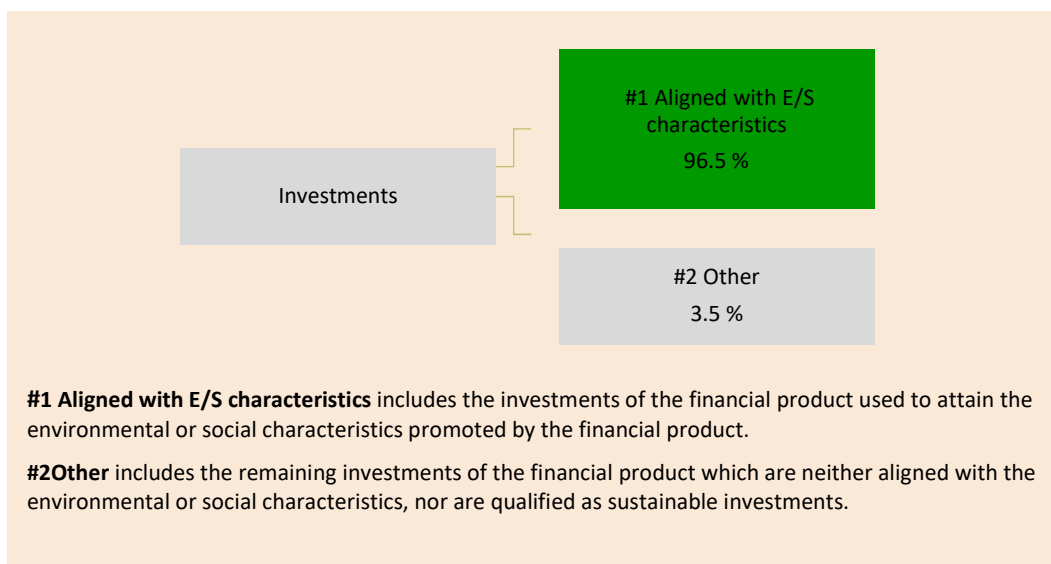

The Sub-Fund did not make any sustainable investments at this time.

**Asset allocation** describes the share of investments in specific assets.

## #2 Other

The remaining 3.5% of investments were invested in companies that received a quantitative sustainability score that fell in the bottom 25% of the investee company's universe and in cash held as ancillary liquidity; they did not follow any minimum environmental or social safeguards.

The Investment Manager used the 12-month average weights of holdings held in the Sub-Fund during the reference period ending 31 December 2024 to calculate the allocations above.

For the previous reference period ending 31 December 2023, the asset allocation was as below:

- #1 Aligned with E/S characteristics: 98.7%
- #2 Other: 1.3%

### ● In which economic sectors were the investments made?

Sector	Sub-Sector	% Assets
Communication Services	Media & Entertainment	8.76
Consumer Discretionary	Automobiles & Components	3.45
Consumer Discretionary	Consumer Discretionary Distribution & Retail	3.55
Consumer Discretionary	Consumer Durables & Apparel	0.47
Consumer Discretionary	Consumer Services	9.37
Consumer Staples	Consumer Staples Distribution	3.89
Consumer Staples	Food, Beverage & Tobacco	3.25
Consumer Staples	Household & Personal Products	0.94
Energy	Energy	5.00
Financials	Banks	17.12
Financials	Financial Services	1.16
Financials	Insurance	1.26
Health Care	Health Care Equipment & Services	2.04
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	2.74
Industrials	Capital Goods	4.97
Industrials	Transportation	1.01
Information Technology	Semiconductors & Semiconductor Equipment	13.35
Information Technology	Software & Services	2.08

Information Technology	Technology Hardware & Equipment	9.13
Materials	Materials	0.83
Real Estate	Real Estate Management & Development	3.32
Utilities	Utilities	0.50

\*The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

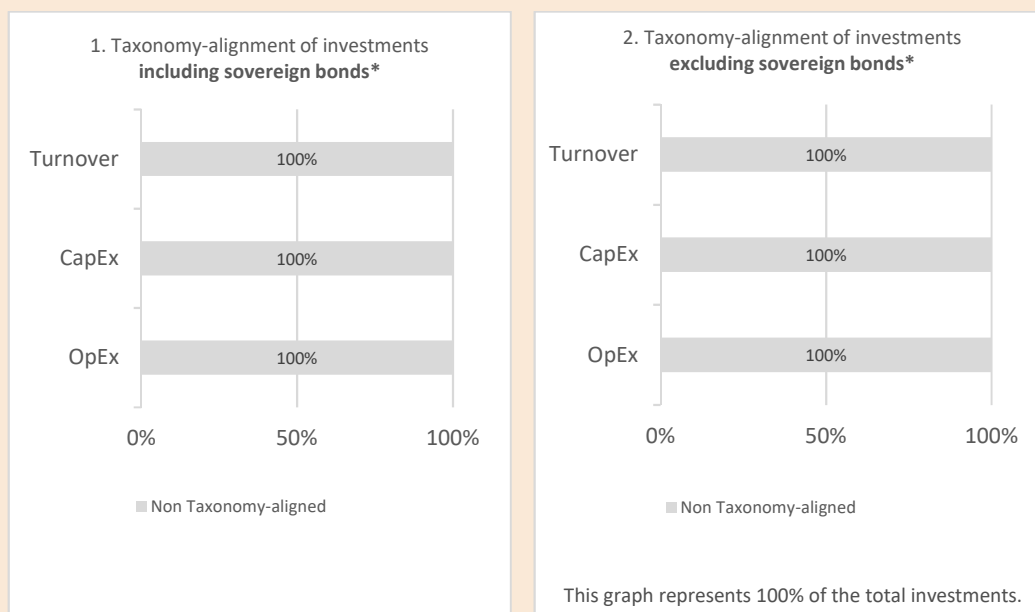

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas     In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0% respectively.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

	Taxonomy-aligned			Non Taxonomy-aligned		
	31 Dec 2022 ref period	31 Dec 2023 ref period	31 Dec 2024 ref period	31 Dec 2022 ref period	31 Dec 2023 ref period	31 Dec 2024 ref period
<b>Turnover</b>	0%	0%	0%	100%	100%	100%
<b>CapEx</b>	0%	0%	0%	100%	100%	100%
<b>OpEx</b>	0%	0%	0%	100%	100%	100%

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable.

**What was the share of socially sustainable investments?**

Not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The “#2 Other” investments made by the Sub-Fund included investment in companies that received a quantitative sustainability score that fell in the bottom 25% of the investee company’s universe and in cash held as ancillary liquidity; they did not follow any minimum environmental or social safeguards.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2024, the Sub-Fund excluded companies that violated the mandated product and norms-based criteria from its investment universe to ensure investee companies are promoting certain environmental and social characteristics. For example, the Sub-Fund did not invest in companies involved in the manufacture of controversial weapons or companies not in compliance with UNGC.

The Investment Manager’s analysis of sustainability risks and opportunities led to investment opportunities that support several sustainability themes such as digitalization, energy transition and decarbonization. For example, the Sub-Fund invested in companies that provide innovative and important solutions supporting vehicle electrification, solar and wind power, and fuel efficiency. The Investment Manager has also identified companies held by the portfolio that contribute to health care innovation and pharmaceuticals, such as the Sub-Fund’s investment in companies engaged in the discovery, development and

manufacture of biologics services. The Sub-Fund has also invested in companies tied to financial inclusion, such as innovative companies that help provide access to financial services to the underbanked and underprivileged sections of the rural population.

The Investment Manager engaged with 13 investee companies during the reference period, pursuant to its engagement policy and procedures. In general, engagement is conducted by the Investment Manager's Sustainable Research team, in partnership with investment teams, and is focused on material sustainability-related issues that the Investment Manager believes could potentially impact the value of the company. The Sustainable Research team may also engage with companies on key themes that the team believes will promote a more sustainable economy. Engagement activities, which may include in-person meetings, written communication and industry forums, are summarized and shared in the Investment Manager's investment research platform. Engagement summaries catalogue objectives, record a company's progress, and document outcomes.

In 2024, the Investment Manager engaged with the management of investee companies on 18 different topics. The five topics most frequently addressed in engagements during the period were human capital, data privacy and cybersecurity, energy, environmental management, and general governance. In most situations, engagement resulted in a better understanding of the sustainability risks facing the company, and more importantly, how company management is addressing those risks.

# Sustainable investment objective

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective: 14.1%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: 83.9%**

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of the Sub-Fund is to create a positive societal and/or environmental impact through investment in an actively managed portfolio of emerging markets equity securities. Based on the sustainable investment objective above, the Investment Manager sought to invest in companies that create a positive, measurable social and/or environmental impact (a “sustainable impact”), as demonstrated by their contribution to at least one or more of five sustainable investment themes: 1) Health Care, 2) Empowerment, 3) Sustainable Living, 4) Climate, and 5) Technological Advancement. Each of these sustainability themes were guided by sub-themes which are aligned with the UN Sustainable Development Goals (“SDGs”).

The Investment Manager has sought to achieve the sustainable investment objective through investment in sustainable investments that are aligned with the SDGs above. Each sustainable investment was assessed against the exclusions, contribution assessment and SDGs alignment assessment, and categorised into the appropriate contribution category of “direct contribution”. The details of the contribution categories and the binding strategies are further described under “What investment strategy does this financial product follow?” in Annex 1 attached to the Sub-Fund’s Supplement.

The extent of the Sub-Fund's impact and/or contribution is further described in the section "How did the sustainability indicators perform?" and "How did this financial product consider principal adverse impacts on sustainability factors?" below. The proportion of the Sub-Fund that was invested in sustainable investments is disclosed under the section "What was the proportion of sustainability-related investments?" below.

### ● **How did the sustainability indicators perform?**

The Sub-Fund's sustainability indicators performed as described below:

- 7%\* of the portfolio's revenue is derived from investee companies offering products and/or services that improve access to health care or sustainable living to lower-income populations;

\* Note that investee companies may derive revenue from multiple business lines not associated with improving access to health care and/or sustainable living for lower-income populations. Those investee companies assessed as having at least 20% of their revenue (latest available) aligned with these primary themes are considered to be contributing to improving access to health care or sustainable living for lower-income populations.

- Innovation and technological advancement as measured by capital expenditures resulted in EUR14,440 per EUR1 million invested in the Sub-Fund in calendar year 2023, which is the most recent data available at the time of this report.
- The carbon footprint of the portfolio based on the weighted average measurement of greenhouse gas (GHG) emissions was 190 tonnes of CO<sub>2</sub>e per EUR 1 million invested.
- Over the reference period, 32% of the Sub-Fund's assets were in companies with gender diverse boards as assessed by the Investment Manager.
- Over the reference period, 55% of the Sub-Fund's assets were in companies with independent board of directors.

Please note that the sustainability indicator data becomes available on an annual basis in the following months post the end of the year. Therefore, the sustainability indicators provided above have been calculated based on the data available at the time of this periodic report. Unless otherwise stated, the data has been calculated using the quarter-end average weights of holdings held in the Sub-Fund in 2024, enterprise values data as of 2024 December-end and the latest available impact data. Sustainability indicators above do not take into account companies without relevant data and/or companies whose activities are not relevant to the particular sustainability indicator(s).

For the sustainability indicators above, the Investment Manager has used data provided by companies in annual sustainability reports, information obtained through the Investment Manager's engagement directly with investee companies, Factset, and MSCI. Regarding data from third-party data providers, the Investment Manager is not able to verify the accuracy of the data, nor the sources from which the data is collected.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

● **...and compared to previous periods?**

Sustainability indicators	31 December 2022 reference period (reported in 2023 periodic report)	31 December 2023 reference period (reported in 2024 periodic report)	31 December 2024 reference period (reported in 2025 periodic report)
Revenue or percent of revenue from portfolio holdings that offers products and/or services that improve access to health care or sustainable living to lower-income populations	7% of revenue	8% of revenue	7% revenue
Innovation and technological advancement as measured by capital expenditures (per EUR 1 million invested in the Sub-Fund)	EUR11,801	EUR16,815	EUR14,440
Carbon footprint metrics of the portfolio based on the measurement of greenhouse gas (GHG) emissions (per EUR 1 million invested in the Sub-Fund)	177 tonnes of CO2e	177 tonnes of CO2e	190 tonnes of CO2e
Board gender diversity (as identified by the Investment Manager)	25% of Sub-Fund's holdings	26% of Sub-Fund's holdings	32% of Sub-Fund's holdings
Independent board of directors	51% of Sub-Fund's holdings	53% of Sub-Fund's holdings	55% of Sub-Fund's holdings

For this reference period, the Sub-Fund experienced improvements in board of directors independence and gender diversity. The percent of revenue from portfolio holdings that offer products and/or services that improve access to health care or sustainable living remained within its historical range. Capital expenditures (per EUR 1 million invested in Sub Fund) decreased as the Investment Manager significantly reduced the Sub-Fund's weight in a key technology position in the second half of the year. The Sub-Fund's carbon footprint increased year over year, driven in part by greater exposure to the industrials sector.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

In order to ensure that the sustainable investments of the Sub-Fund do not cause significant harm to any environmental or social sustainable investment objective, the Sub-Fund has considered certain indicators for adverse impacts on sustainability factors, as described below.

Within this assessment, the Investment Manager used in-house research and analysis taking into account data provided by a third party data provider, MSCI, where available.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager considered the following principal adverse impacts ("PAI") indicators, either directly or indirectly, throughout the investment process

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

through certain product-, activity- or conduct-based exclusions, contribution assessment and SDGs alignment assessment.

The exclusions include controversial weapons (#14 below), thermal coal (climate-related PAI indicators), and companies deemed to be in violation of the UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines) (#10 below), as further described under “What investment strategy does this financial product follow?” in Annex 1 attached to the Sub-Fund’s Supplement.

- 1) GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- 2) Carbon footprint
- 3) GHG intensity of investee companies
- 4) Exposure to companies active in the fossil fuel sector
- 5) Share of non-renewable energy consumption and production
- 6) Energy consumption intensity per high impact climate sector
- 7) Activities negatively affecting biodiversity-sensitive areas
- 8) Emissions to water
- 9) Hazardous waste and radioactive waste ratio
- 10) Violation of UNGC and OECD Guidelines
- 11) Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- 12) Unadjusted gender pay gap
- 13) Board gender diversity
- 14) Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

The Investment Manager has also considered other relevant PAI indicators depending on the business activities and behaviours of the respective company. The Investment Manager has monitored the availability of data regarding investee companies and engaged with those companies that the Investment Manager has determined have insufficient data to make a credible assessment of the company’s impact on sustainability factors. These engagements, which include requesting disclosure and information about procedures implemented to mitigate PAI, take place on an ongoing basis.

Please note that data from the the third party data provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable investments were aligned with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights because companies that the Investment Manager deemed to be in violation of UNGC and OECD Guidelines were excluded from the portfolio.

## How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following PAI indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund's Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons), based on a third-party classification (threshold 0%)
- Exposure to companies deemed to be in violation of UNGC and OECD Guidelines, based on a third-party classification (threshold 0%)

## What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING CO LTD	Information Technology	9.72	Taiwan
TENCENT HOLDINGS LTD	Communication Services	6.08	China
SAMSUNG ELECTRONICS CO LTD	Information Technology	4.89	South Korea

\*Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1<sup>st</sup> January 2024 to 31<sup>st</sup> December 2024.**

## What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which was invested in sustainable investments during the reference period is provided below.

### ● **What was the asset allocation?**

#### #1 Sustainable

The Investment Manager has invested 98.1% of the Sub-Fund's assets in sustainable investments.

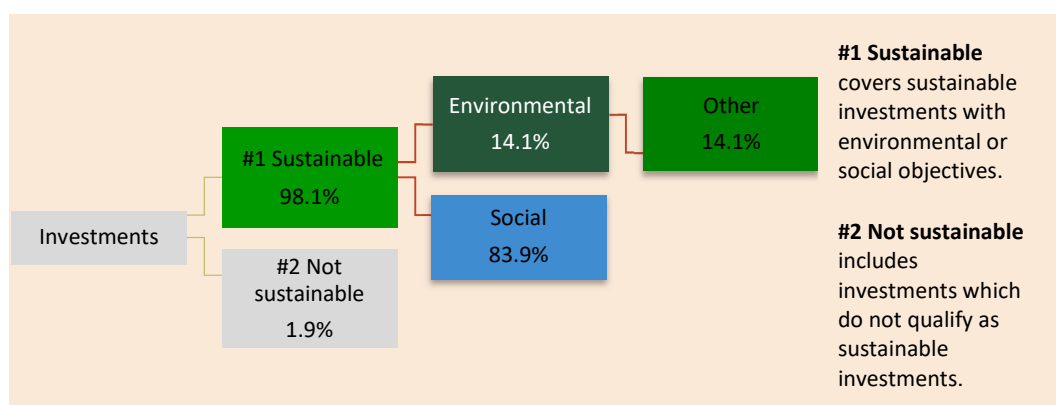

Further details on how the Investment Manager identifies sustainable investments are described under "What investment strategy does this financial product follow?" in Annex 1 attached to the Sub-Fund's Supplement.

**Asset allocation** describes the share of investments in specific assets.

## #2 Not sustainable

The remaining 1.9% of investments were cash held as ancillary liquidity.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period to calculate the allocations above.

For the previous reference period ending 31 December 2023, the asset allocation was as below:

- #1 Sustainable: 97.1% (split as to Environmental: 15.0% and Social: 82.1%)
- #2 Not Sustainable: 2.9%

## ● In which economic sectors were the investments made?

Sector	Sub-Sector	% Assets

Materials	Materials	0.85
Utilities	Utilities	2.91

\*The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

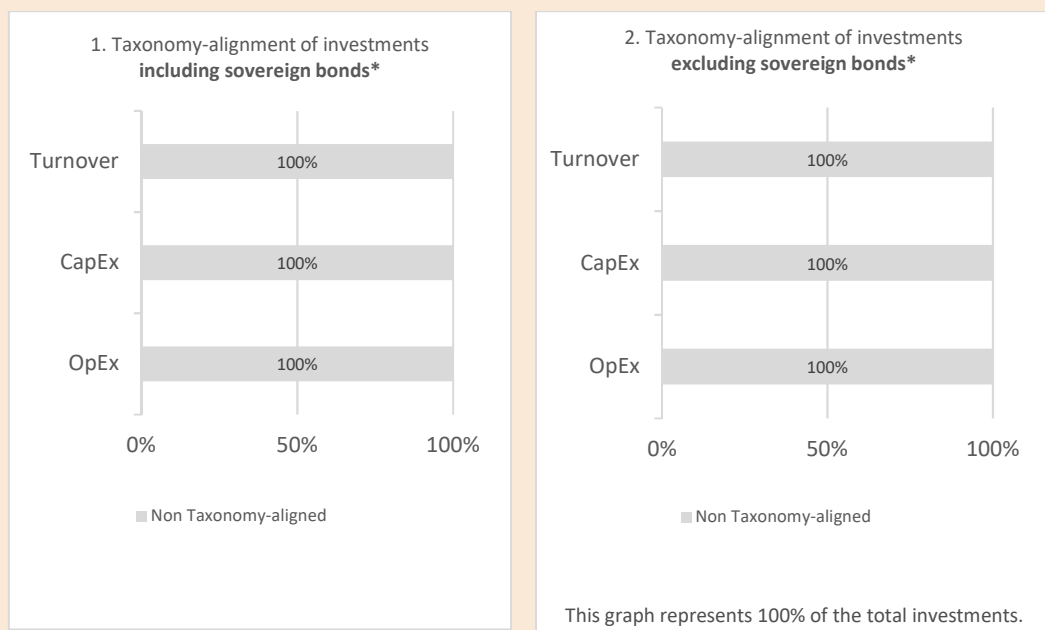

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### ● What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities was 0% respectively.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

	Taxonomy-aligned			Non Taxonomy-aligned		
	31 Dec 2022 ref period	31 Dec 2023 ref period	31 Dec 2024 ref period	31 Dec 2022 ref period	31 Dec 2023 ref period	31 Dec 2024 ref period
<b>Turnover</b>	0%	0%	0%	100%	100%	100%
<b>CapEx</b>	0%	0%	0%	100%	100%	100%
<b>OpEx</b>	0%	0%	0%	100%	100%	100%

### **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 14.1%.

The Sub-Fund did not use the EU Taxonomy classification system in determining whether economic activities of investee companies have contributed to an environmental objective or not.

### **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 83.9%.

### **What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

The “#2 Not sustainable” investments made by the Sub-Fund were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards. The proportion and use of such “#2 Not sustainable” investments did not affect the delivery of the sustainable investment objective in the reference period due to the limited use and the nature of those instruments.

### **What actions have been taken to attain the sustainable investment objective during the reference period?**

In 2024, the Sub-Fund sought to enable the growth of companies with opportunities for current or projected net-positive growth by specifically investing in companies the Investment Manager believed to be aligned with at least one or more of five sustainable investment themes: 1) Health Care, 2) Empowerment, 3) Sustainable Living, 4) Climate, and 5) Technological Advancement. Each of these sustainability themes were guided by sub-themes which are aligned with the SDGs.

The Sub-Fund also excluded companies that violated the mandated product and norms-based criteria from its investment universe to ensure investee companies do not cause significant harm to any environmental or social sustainable investment objective. For

example, the Sub-Fund did not invest in companies involved in the manufacture of controversial weapons or companies not in compliance with UNGC principles.

The Investment Manager's analysis of sustainability risks and opportunities led to investment opportunities that support several sustainability themes such as digitalization, energy transition and decarbonization. For example, the Sub-Fund invested in companies that provide innovative and important solutions supporting vehicle electrification, solar and wind power, and fuel efficiency. The Investment Manager has also identified and invested in companies that contribute to health care innovation and pharmaceuticals, such as companies engaged in the discovery, development, and manufacture of biologics services. The Sub-Fund also invested in companies tied to financial inclusion, such as innovative companies that help provide access to financial services to the underbanked and underprivileged sections of the rural population.

The Investment Manager engaged with 13 investee companies during the reference period, pursuant to its engagement policy and procedures. In general, engagement is conducted by the Investment Manager's Sustainable Research team, in partnership with investment teams, and is focused on material sustainability-related issues that the Investment Manager believes could potentially impact the value of the company. The Sustainable Research team may also engage with companies on key themes that the Investment Manager believes will promote a more sustainable economy. Engagement activities, which may include in-person meetings, written communication, and industry forums, summarized and shared in the Investment Manager's investment research platform. Engagement summaries catalogue objectives, record a company's progress, and document outcomes.

In 2024, the Investment Manager engaged with the management of investee companies on 19 different topics. The five topics that were the most frequently engaged during the period were human capital, data privacy and cybersecurity, general governance, controversial sourcing, and environmental management. In most situations, engagement resulted in a better understanding of the sustainability risks the company is facing and, more importantly how company management is addressing those risks.

## ANNEX

Product name: Nomura Funds Ireland – Japan Sustainable Equity Core Fund

Legal entity identifier: 213800OZBIQ3K5QR5E90

# Sustainable investment objective

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** 69.9 %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** 29.2 %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of the Sub-Fund is to invest in companies with a high overall positive environmental and/or societal impact. Based on the sustainable investment objective above, the Sub-Fund has mainly focused on the following three UN Sustainable Development Goals (“SDGs”) aligned “Impact Goals”:

1. Mitigate Climate Change
2. Mitigate Natural Capital Depletion
3. Promote Good Health and Well-Being

The Investment Manager has sought to achieve the sustainable investment objective through investment in sustainable investments that are aligned with the Impact Goals or other environmental or social objectives. Each sustainable investment was assessed against the proprietary ESG scores, exclusions and contribution assessment, and categorised into the appropriate contribution category of “direct contribution”. The details of the contribution categories and the binding strategies are further described under “What investment strategy does this financial product follow?” in Annex 1 attached to the Sub-Fund’s Supplement.

As further described under the section “How did the sustainability indicators perform?”, the Investment Manager has measured the impact of the Sub-Fund’s investments through the metric of impact of the underlying holdings per JPY100 million invested in the Sub-Fund.

The Investment Manager has particularly focused on the following sustainable investments in relation to the above environmental and social objectives:

1. Mitigate Climate Change: Sustainable investments in this objective have offered products and/or services that enables others to reduce their energy emissions, or produced energy through renewable sources such as wind and solar power.
2. Mitigate Natural Capital Depletion: Sustainable investments in this objective have reduced their wastes through recycling, or offered products and/or services that are more resource-efficient to reduce environmental impact.
3. Promote Good Health and Well-Being: Sustainable investments in this objective have provided medical care and products, high quality education or basic infrastructures for healthy life in developed and/or emerging countries.

The extent of the Sub-Fund’s impact and/or contribution is further described in the section “How did the sustainability indicators perform?” and “How did this financial product consider principal adverse impacts on sustainability factors?” below. The proportion of the Sub-Fund that was invested in sustainable investments is disclosed under the section “What was the proportion of sustainability-related investments?” below.

#### ● **How did the sustainability indicators perform?**

The Sub-Fund’s sustainability indicators performed as below (impact of the underlying holdings per JPY100 million invested in the Sub-Fund):

- Tonnes of carbon avoided as a result of an investee company’s products and services: (Scope 1+2+3) 150 tonnes. The amount of carbon avoided was calculated using the quarter-end average weights of holdings held in the Sub-Fund in 2024, market capitalisation data as of the end of December 2024 and fiscal year-end impact data for 2023.
- Amount of natural resources avoided in manufacturing and servicing of an investee company’s products: Water consumption avoided was 11.3 m<sup>3</sup>. Energy consumption avoided was 3.9 MWh. The water and energy consumption avoided were the amount of consumption reduced on a year on year basis within the manufacturing and servicing process of investee companies’ products between the fiscal year 2022 and 2023. These indicators were calculated based on the quarter-end average weights of holdings held in the Sub-Fund in 2024 and market capitalisation data as of the end of December 2024.
- Amount of R&D investment spent on promoting the development of new drugs and medical equipment: JPY 0.28 million. This is the aggregate financial amount of R&D investment spent during the reference period.

Please note that the sustainability indicator data becomes available on an annual basis in the following months post the end of the fiscal year (the end of March for most of Japanese companies). Therefore, the sustainability indicators provided above have been calculated based on the data available at the time of this periodic report as indicated above. Sustainability indicators above do not take into account companies without relevant data and/or companies whose activities are not relevant to the particular sustainability indicator.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

For the sustainability indicators above, the Investment Manager has used data provided by companies in annual sustainability reports as well as data obtained by a third-party data provider, MSCI.

● **...and compared to previous periods?**

Sustainability indicators	31 December 2022 reference period (reported in 2023 periodic report)	31 December 2023 reference period (reported in 2024 periodic report)	31 December 2024 reference period (reported in 2025 periodic report)
Tonnes of carbon avoided as a result of an investee company's products and services (Scope 1+2+3)	374 tonnes	65 tonnes	150 tonnes
Amount of natural resources avoided in manufacturing and servicing of an investee company's products	Water: 17.2 m3 Energy: 44.0 MWh (between 2019/2020)*	Water: 13.2 m3 Energy: 10.6 MWh (between 2021/2022)*	Water: 11.3 m3 Energy: 3.9 MWh (between 2022/2023)
Amount of R&D investment spent on promoting the development of new drugs and medical equipment	JPY 0.44 million	JPY 0.59 million	JPY 0.28 million

\* Due to the data availability at the time of the reporting for the reference period ending 31 December 2022, the Sub-Fund reported the amount of natural resources avoided in manufacturing and servicing of an investee company's products by using the data from 2019 and 2020. As companies' disclosures improved, the Sub-Fund has reported the same indicator based on the data from 2021 and 2022 for the reference period ending 31 December 2023.

The Sub-Fund reported significantly higher tonnes of carbon avoided as a result of an investee company's products and services (Scope 1+2+3) during the reference period due to changes in holdings. This was due to the investment in an industrial company, which accounted for about 100 tonnes of carbon avoided through provision of innovative solutions such as lighter aircraft materials and desalination.

The lower amount of natural resources avoided in manufacturing and servicing of an investee company's products was due to the impact of the expansion of economic activities. Total sales of investee companies increased by about 8%. When measured in water and energy intensity of the investee companies, both have shown improvements.

The lower amount of R&D investment spent on promoting the development of new drugs and medical equipment was due to the reduction in the weight of holdings with higher R&D investments. Total R&D investment of investee companies has increased compared to the previous year.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

In order to ensure that the sustainable investments of the Sub-Fund do not cause significant harm to any environmental or social sustainable investment objective, the Sub-Fund has taken into account certain indicators for adverse impacts on sustainability factors. Details on how the indicators have been considered is described below.

Within this assessment, the Investment Manager used the data available from a third-party data provider, MSCI which was based on the latest available impact data as well as in-house research and analysis provided by the Investment Manager.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Manager considered the following principal adverse impacts (“PAI”) indicators, either directly or indirectly, throughout the investment process through certain product-, activity- or conduct-based exclusions, proprietary ESG scores and contribution assessment.

The exclusions include controversial weapons (#14 below), thermal coal (climate-related PAI indicators), and companies deemed to be in violation of the UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines) (#10 below) as further described under “What investment strategy does this financial product follow?”.

- 1) GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- 2) Carbon footprint
- 3) GHG intensity of investee companies
- 4) Exposure to companies active in the fossil fuel sector
- 5) Share of non-renewable energy consumption and production
- 6) Energy consumption intensity per high impact climate sector
- 7) Activities negatively affecting biodiversity-sensitive areas
- 8) Emissions to water
- 9) Hazardous waste and radioactive waste ratio
- 10) Violations of UNGC and OECD Guidelines
- 11) Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- 12) Unadjusted gender pay gap
- 13) Board gender diversity
- 14) Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

The Investment Manager has also taken into account other relevant PAI indicators depending on the business activities, behaviours of a company and the availability of data. Where there was no sufficient data to make credible assessment, the Investment Manager supplemented with its qualitative research and engagement. Engagement with companies takes place on an ongoing basis.

Please note that data from the data provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable investments have aligned with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights by excluding companies that the Investment Manager deemed in violation of UNGC and OECD Guidelines.

## How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following PAI indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund's Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Violation of UNGC and OECD Guidelines (threshold 0%)

The Sub-Fund also considered following PAI indicators:

- GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water
- Hazardous waste and radioactive waste ratio
- Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- Unadjusted gender pay gap
- Board gender diversity

	Impact	Portfolio	Data coverage (%)	Index	Data coverage (%)

1.13	Board gender diversity	21.86	100.00	20.96	97.56
1.14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	100.00	0.00	97.85

\*Where there was no impact data and/or no data coverage for an indicator, the value is shown as "N/A" above. The PAI data above represents the average of four quarter-end impacts obtained from MSCI (the "Data Provider") at the time of this periodic report. The data coverage for #1.6.1 to #1.6.9 has been calculated by the Investment Manager based on the Data Provider's data.

- #1.5 (Share of non-renewable energy consumption and production): The Sub-Fund had slightly higher negative impact on this indicator compared to the Index. One of the holdings, for example, is an electronic manufacturer that reported relatively high share of non-renewable energy consumption. The Investment Manager deems the company contributes to the Impact Goal of Promote Good Health and Well-Being through provision of education.
- #1.6.9 NACE Code L (Real estate activities): the data coverage of this particular indicator for both the Sub-Fund and the Index is currently limited. The major contributor to the higher intensity of the Sub-Fund was a real estate company, which the Investment Manager deems to contribute to the Sub-Fund's Impact Goal of Mitigate Climate Change through its solution services. The Investment Manager believes that the negative impact of the company on this PAI has not been significant.
- #1.9 (Hazardous waste and radioactive waste): Based on the Data Provider's data, the Sub-Fund has indicated a higher negative impact than that of the Index. The data coverage of this indicator for both the Sub-Fund and the Index is currently limited and only 6 companies within the Sub-Fund reported the data. If taken into account the estimates provided by the Data Provider, the Sub-Fund had lower negative impact on this indicator.
- #1.12 (Unadjusted gender pay gap): This indicator slightly exceeded the Index. In the case of several financial companies, gender pay gap could be explained by variation of roles and the gaps within the same roles were not significant. Additionally, there was a case where regional gender pay gap figures were used as proxies for global gender pay gap. Taking these factors into consideration, the Investment Manager does not view this indicator to be significantly lagging behind that of the Index.

Please note that data from the Data Provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund or the Index.

The Sub-Fund uses the Index in the way that the PAI of the Sub-Fund are compared against the PAI of the Index, with the aim being, in principle, to limit such portfolio average adverse impacts (weighted average adverse impacts of the companies held by the Sub-

Fund) to be lower than that of the Index. However, the Index is not used to define the portfolio composition of the Sub-Fund and is not used for the purpose of determining the attainment of the sustainable investment objective of the Sub-Fund. The Index is a broad market index and not consistent with the sustainable investment objective of the Sub-Fund.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

1<sup>st</sup> January 2024 to 31<sup>st</sup> December 2024.

Largest investments	Sector	% Assets	Country
SONY GROUP CORP	Consumer Discretionary	4.73	Japan
RECRUIT HOLDINGS CO LTD	Industrials	4.62	Japan
ORIX CORP	Financials	3.52	Japan
DAIICHI SANKYO CO LTD	Health Care	3.43	Japan
SOMPO HOLDINGS INC	Financials	3.12	Japan
FUJITSU LIMITED	Information Technology	3.05	Japan
OBAYASHI CORP	Industrials	3.04	Japan
SUMITOMO ELECTRIC INDUSTRIES	Consumer Discretionary	3.04	Japan
RENESAS ELECTRONICS CORP	Information Technology	2.99	Japan
SUMITOMO MITSUI FINANCIAL GROUP	Financials	2.89	Japan
NEC CORP	Information Technology	2.82	Japan
DENSO CORP	Consumer Discretionary	2.78	Japan
BIPROGY INC	Information Technology	2.69	Japan
MITSUI FUDOSAN CO LTD	Real Estate	2.69	Japan
CKD CORP	Industrials	2.61	Japan

\*Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

## What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which was invested in sustainable investments during the reference period is provided below.

### ● *What was the asset allocation?*

#### #1 Sustainable

The Investment Manager has invested 99.1% of the Sub-Fund's assets in sustainable investments.

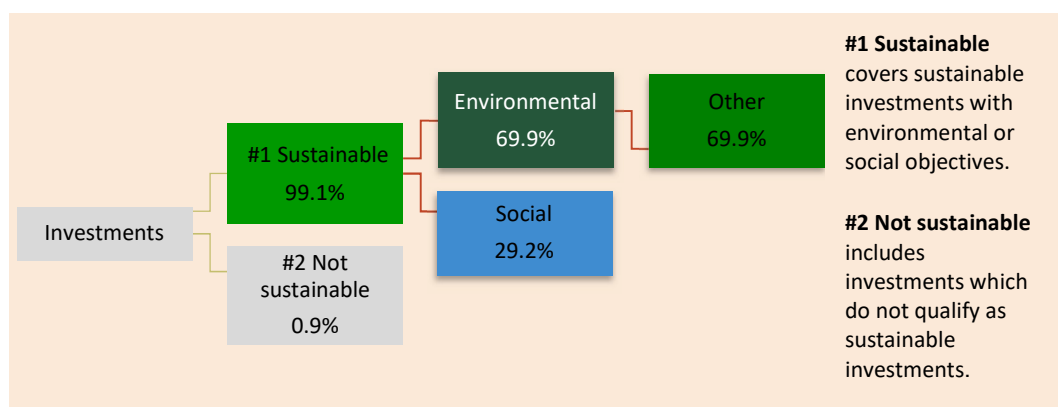

Further details on how the Investment Manager identifies sustainable investments are described under "What investment strategy does this financial product follow?" in Annex 1 attached to the Sub-Fund's Supplement.

#### #2 Not sustainable

The remaining 0.9% of investments were cash held as ancillary liquidity.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period to calculate the allocations above.

**Asset allocation** describes the share of investments in specific assets.

For the previous reference period ending 31 December 2023, the asset allocation was as below:

- #1 Sustainable: 99.0% (split as to Environmental: 66.6% and Social: 32.4%)
- #2 Not Sustainable: 1.0%

● **In which economic sectors were the investments made?**

Sector	Sub-Sector	% Assets
Communication Services	Telecommunication Services	1.98
Consumer Discretionary	Automobiles & Components	7.20
Consumer Discretionary	Consumer Durables & Apparel	8.76
Consumer Discretionary	Consumer Services	2.11
Financials	Banks	5.05
Financials	Financial Services	5.69
Financials	Insurance	5.50
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	5.76
Industrials	Capital Goods	17.31
Industrials	Commercial & Professional Services	9.08
Industrials	Transportation	0.46
Information Technology	Semiconductors & Semiconductor Equipment	2.99
Information Technology	Software & Services	9.65
Information Technology	Technology Hardware & Equipment	11.91
Materials	Materials	1.44
Real Estate	Real Estate Management & Development	4.29

\*The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

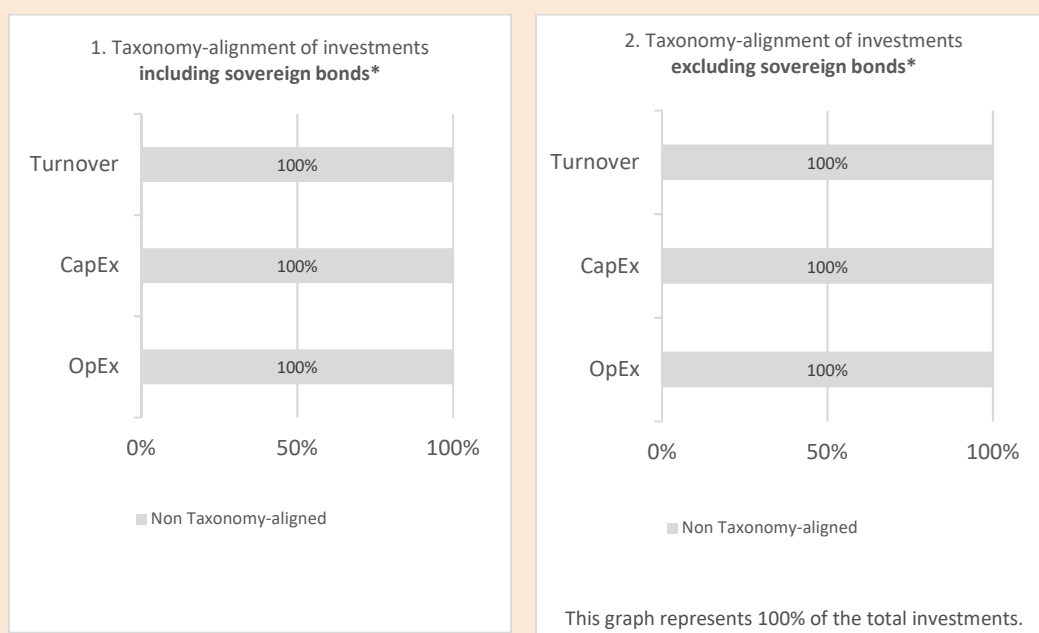

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0% respectively.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

	Taxonomy-aligned						Non Taxonomy-aligned					
	31 Dec 2022 period	31 Dec ref period	31 Dec 2023 period	31 Dec ref period	31 Dec 2024 period	31 Dec ref period	31 Dec 2022 period	31 Dec ref period	31 Dec 2023 period	31 Dec ref period	31 Dec 2024 period	
<b>Turnover</b>	0%		0%		0%		100%		100%		100%	
<b>CapEx</b>	0%		0%		0%		100%		100%		100%	
<b>OpEx</b>	0%		0%		0%		100%		100%		100%	

\* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 69.9%.

The Sub-Fund did not use the EU Taxonomy classification system in determining whether economic activities of investee companies have contributed to an environmental objective or not.

### **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 29.3%.

### **What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

The “#2 Not sustainable” investments made by the Sub-Fund were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards. The proportion and use of such “#2 Not sustainable” investments did not affect the delivery of the sustainable investment objective in the reference period due to the limited use and the nature of those instruments.

### **What actions have been taken to attain the sustainable investment objective during the reference period?**

The Investment Manager has invested in an electronic components company. As part of its engagement on climate change mitigation, the Investment Manager has encouraged its investee companies to obtain SBTi certification. During discussions with the company, the company initially indicated that it faced challenges in gathering GHG emission data. However, as the Investment Manager continued the engagement, the company strengthened its GHG reduction targets for 2030. Following this, in August 2024, the company announced that it has submitted a commitment letter towards obtaining SBTi approval.

The Investment Manager also engaged with a chemical company. The company has set ambitious goals which include 4.5 times higher sales in 2030 than in 2013 for its sustainability and innovation business that aims to reduce environmental negative impact. On the other hand, the Investment Manager assessed that the company's targets for carbon neutrality were insufficient and initiated engagement with the company. The company has set GHG reduction targets based on absolute emission amounts in Japan, while GHG reduction targets for the rest of the world is based on GHG emissions intensity. The Investment Manager encouraged the company to apply the same absolute emission based targets to the rest of world within the company. Additionally, while the company has launched sustainability and innovation businesses and is to increase avoided emissions, the Investment Manager pointed out that there is a lack of disclosure regarding these environmental initiatives. The company responded that it initially disclosed the absolute emission based targets only in Japan but is committed to making positive efforts in moving these matters forward.

**Disclaimer**

This disclosure was developed using information from MSCI ESG Research LLC or its affiliates or information providers. Although Nomura Asset Management U.K. Limited information providers, including without limitation, MSCI ESG Research LLC and its affiliates (the “ESG Parties”), obtain information (the “Information”) from sources they consider reliable, none of the ESG Parties warrants or guarantees the originality, accuracy and/or completeness, of any data herein and expressly disclaim all express or implied warranties, including those of merchantability and fitness for a particular purpose. **Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of the Sub-Fund is to invest in companies with a high overall positive environmental and/or societal impact. Based on the sustainable investment objective above, the Sub-Fund has mainly focused on the following six UN Sustainable Development Goals (“SDGs”) aligned “Impact Goals”:

1. Mitigate Climate Change
2. Mitigate Natural Capital Depletion
3. Global Access to Basic Financial Services
4. Global Access to Clean Drinking Water
5. Eliminate Communicable Disease
6. Mitigate the Obesity Epidemic

The Investment Manager has sought to achieve the sustainable investment objective through investment in sustainable investments that are aligned with the Impact Goals or other environmental or social objectives. Each sustainable investment was assessed against the proprietary ESG scores, exclusions, contribution assessment and proprietary total stakeholder impact assessment, and categorised into the appropriate contribution category of “direct contribution” and “indirect contribution”. The details of the contribution categories and the binding strategies are further described under “What investment

strategy does this financial product follow?" in Annex 1 attached to the Sub-Fund's Supplement.

For Mitigate Climate Change and Mitigate Natural Capital Depletion, the Investment Manager has mainly invested in companies that make "direct contribution" to these Impact Goals through their products (for example, electric vehicle (EV) manufacturers, EV battery manufacturers, renewable utilities) and services (for example, providing financing for emerging technologies). For Global Access to Basic Financial Services, the Sub-Fund has mainly invested in financial institutions that provide their financial services to population in low-income blanket or focus on providing finance to small and medium-sized enterprises. For Global Access to Clean Drinking water, the Investment Manager invested in a company that makes "indirect contribution" through their project focusing on providing safe and clean water to wide community in Malaysia, as well as companies focused on 3Rs (reduce, reuse and recycle) for optimal water consumption. The Investment Manager also invested in companies that make "direct contribution" to Eliminate Communicable Disease and Mitigate the Obesity Epidemic through innovative research for development of new drugs and medical devices.

As further described under the section "How did the sustainability indicators perform?", the Investment Manager has measured the impact of the Sub-Fund's investments through the metric of impact of the underlying holdings per USD 1 million invested in the Sub-Fund.

The extent of the Sub-Fund's impact and/or contribution is further described in the section "How did the sustainability indicators perform?" and "How did this financial product consider principal adverse impacts on sustainability factors?" below. The proportion of the Sub-Fund that was invested in sustainable investments is disclosed under the section "What was the proportion of sustainability-related investments?" below.

### ● **How did the sustainability indicators perform?**

The Sub-Fund's sustainability indicators performed as below (impact per USDm invested in the Sub-Fund):

- Tonnes of carbon avoided as a result of an investee company's products and services: 207.38 tonnes
- Amount of investment that financed sustainable projects and deprived or underprivileged communities: the amount of green finance (loans to renewable projects) was USD 37,577.51 and the amount of loans provided to low income population was USD 16,455.57
- Amount of R&D investment spent on promoting the development of new drugs and medical equipment: USD 2,119.59
- Total amount of water saved by water recycling: 16.37 tonnes

Please note that the sustainability indicator data becomes available on an annual basis in the following months post the end of the year. Therefore, the sustainability indicators provided above have been calculated based on the data available at the time of this periodic report, using the quarter-end average weights of holdings held in the Sub-Fund in 2024, market capitalisation data as of 2024 December-end and the latest available impact data. Sustainability indicators above do not take into account companies without relevant data and/or companies whose activities are not relevant to the particular sustainability indicator(s).

For the sustainability indicators above, the Investment Manager has used data provided by companies in annual sustainability reports.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

● **...and compared to previous periods?**

<b>Sustainability indicators</b>	<b>31 December 2022 reference period (reported in 2023 periodic report)</b>	<b>31 December 2023 reference period (reported in 2024 periodic report)</b>	<b>31 December 2024 reference period (reported in 2025 periodic report)</b>
Tonnes of carbon avoided as a result of an investee company's products and services	142.17 tonnes	188.94 tonnes	207.38 tonnes
Amount of investment that financed sustainable projects and deprived or underprivileged communities	Green finance (loans to renewable projects) : USD 42,162.24  loans provided to low income population: USD 2,394.60	Green finance (loans to renewable projects) : USD 22,046.80  loans provided to low income population: USD 21,458.17	Green finance (loans to renewable projects) : USD 37,577.51  loans provided to low income population: USD 16,455.57
Amount of R&D investment spent on promoting the development of new drugs and medical equipment	USD 5,206.34	USD 2,755.38	USD 2,119.59
Total amount of water saved by water recycling	13.95 tonnes	14.44 tonnes	16.37 tonnes

The Sub-Fund reported higher tonnes of carbon avoided as a result of an investee company's products and services. The latest figures for loans provided to low income population is lower relatively to previous reporting period partly because one of the financial holdings has not disclosed the figure. Smaller amount of R&D investment for new drugs and medical equipment and larger amount of water saved by water recycling were due to the changes in the portfolio holdings.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

In order to ensure that the sustainable investments of the Sub-Fund do not cause significant harm to any environmental or social sustainable investment objective, the Sub-Fund has taken into account certain indicators for adverse impacts on sustainability factors. Details on how the indicators have been considered is described below.

Within this assessment, the Investment Manager used the data available from a third-party data provider, MSCI which was based on the latest available impact data as well as in-house research and analysis provided by the Investment Manager.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager considered the following principal adverse impacts ("PAI") indicators, either directly or indirectly, throughout the investment process through certain product-, activity- or conduct-based exclusions, proprietary ESG scores, contribution assessment and proprietary total stakeholder impact assessment.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The exclusions include controversial weapons (#14 below), thermal coal (climate-related PAI indicators), and companies deemed to be in violation of the UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines) (#10 below) as further described under “What investment strategy does this financial product follow?”.

- 1) GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- 2) Carbon footprint
- 3) GHG intensity of investee companies
- 4) Exposure to companies active in the fossil fuel sector
- 5) Share of non-renewable energy consumption and production
- 6) Energy consumption intensity per high impact climate sector
- 7) Activities negatively affecting biodiversity-sensitive areas
- 8) Emissions to water
- 9) Hazardous waste and radioactive waste ratio
- 10) Violations of UNGC and OECD Guidelines
- 11) Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- 12) Unadjusted gender pay gap
- 13) Board gender diversity
- 14) Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

The Investment Manager has also taken into account other relevant PAI indicators depending on the business activities, behaviours of a company and the availability of data. Where there was no sufficient data to make credible assessment, the Investment Manager supplemented with its qualitative research and engagement. Engagement with companies takes place on an ongoing basis.

Please note that data from the data provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable investments have aligned with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights by excluding companies that the Investment Manager deemed in violation of UNGC and OECD Guidelines.

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Sub-Fund considered the following PAI indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund’s

Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Violation of UNGC and OECD Guidelines (threshold 0%)

The Sub-Fund also considered following PAI indicators:

- GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water
- Hazardous waste and radioactive waste ratio
- Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- Unadjusted gender pay gap
- Board gender diversity

	Impact	Portfolio	Data coverage (%)	Index	Data coverage (%)
1.1.1	Scope 1 GHG emissions	48.56	100.00	398.90	99.97
1.1.2	Scope 2 GHG emissions	60.59	100.00	91.11	99.97
1.1.3	Scope 3 GHG emissions	1,205.72	100.00	2,021.80	99.98

1.6.8	NACE Code H (Transportation and Storage)	N/A	0.00	1.62	2.14
1.6.9	NACE Code L (Real Estate Activities)	0.32	1.61	0.16	1.66
1.7	Activities negatively affecting biodiversity-sensitive areas	0.00	100.00	5.67	99.89
1.8	Emissions to water	0.00	11.40	0.00	5.52

1.9	Hazardous waste and radioactive waste ratio	0.83	57.61	4.90	50.16
1.10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	100.00	0.51	99.96
1.11	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	0.00	100.00	0.64	99.92
1.12	Unadjusted gender pay gap	12.51	24.11	15.16	28.50
1.13	Board gender diversity	25.16	100.00	24.67	99.97
1.14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	100.00	0.58	100.00

\*Where there was no impact data and/or no data coverage for an indicator, the value is shown as "N/A" above. The PAI data above represents the average of four quarter-end impacts obtained from MSCI (the "Data Provider") at the time of this periodic report. The data coverage for #1.6.1 to #1.6.9 has been calculated by the Investment Manager based on the Data Provider's data.

- #1.6.9 (NACE Code L): Regarding NACE Code L (Real Estate Activities), while the impact for the Sub-Fund underperformed at 0.32 GWh/million EUR, the data coverage of this particular indicator for both the Sub-Fund and the Index is currently extremely limited. The Sub-Fund holds a property company in Australia. The Investment Manager believes that the company contributes to the Sub-Fund's Impact Goal of Mitigate Climate Change through provision of energy-efficient buildings.

Please note that data from the Data Provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund or the Index.

The Sub-Fund uses the Index in the way that the PAI of the Sub-Fund are compared against the PAI of the Index, with the aim being, in principle, to limit such portfolio average adverse impacts (weighted average adverse impacts of the companies held by the Sub-Fund) to be lower than that of the Index. However, the Index is not used to define the portfolio composition of the Sub-Fund and is not used for the purpose of determining the attainment of the sustainable investment objective of the Sub-Fund. The Index is a broad market index and not consistent with the sustainable investment objective of the Sub-Fund.

## What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING	Information Technology	9.23	Taiwan
TENCENT HOLDINGS LTD	Communication Services	6.26	China
SK HYNIX INC	Information Technology	5.93	South Korea
KB FINANCIAL GROUP INC	Financials	5.30	South Korea
LENOVO GROUP LTD	Information Technology	4.61	China
SHINHAN FINANCIAL GROUP	Financials	4.54	South Korea
DELTA ELECTRONICS INC	Information Technology	4.03	Taiwan
Cash	N/A	3.35	N/A
DBS GROUP HOLDINGS LTD	Financials	3.34	Singapore
CHROMA ATE INC	Information Technology	3.08	Taiwan
BYD CO LTD-H	Consumer Discretionary	2.96	China
AGRICULTURAL BANK OF CHINA	Financials	2.87	China

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

1<sup>st</sup> January 2024 to 31<sup>st</sup> December 2024.

MACROTECH DEVELOPERS LTD  
 SAMSUNG ELECTRONICS CO LTD  
 ENN ENERGY HOLDINGS LTD

Real Estate	2.83	India
Information Technology	2.81	South Korea
Utilities	2.80	China

\*Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The list of top investments is reflective of the general portfolio composition including assets classified as “#2 Not sustainable” (i.e. all investments of the Sub-Fund).

## What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which was invested in sustainable investments during the reference period is provided below.

### ● What was the asset allocation?

#### #1 Sustainable

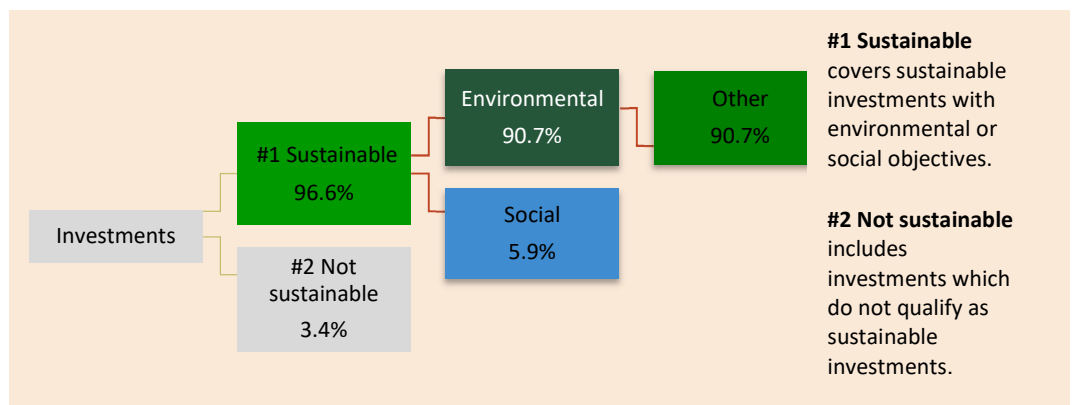

The Investment Manager has invested 96.6% of the Sub-Fund's assets in sustainable investments.

Further details on how the Investment Manager identifies sustainable investments are described under “What investment strategy does this financial product follow?” in Annex 1 attached to the Sub-Fund’s Supplement.

#### #2 Not sustainable

The remaining 3.4% of investments were cash held as ancillary liquidity.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period to calculate the allocations above.

For the previous reference period ending 31 December 2023, the asset allocation was as below:

- #1 Sustainable: 96.6% (split as to Environmental: 91.5% and Social: 5.1%)
- #2 Not Sustainable: 3.4%

● **In which economic sectors were the investments made?**

Sector	Sub-Sector	% Assets
Communication Services	Media & Entertainment	6.26
Communication Services	Telecommunication Services	0.69
Consumer Discretionary	Automobiles & Components	3.96
Consumer Discretionary	Consumer Services	0.39
Energy	Energy	0.58
Financials	Banks	24.21
Financials	Financial Services	3.87
Financials	Insurance	3.98
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	5.30
Industrials	Capital Goods	3.10
Information Technology	Semiconductors & Semiconductor Equipment	17.27
Information Technology	Software & Services	1.96
Information Technology	Technology Hardware & Equipment	16.56
Real Estate	Equity Real Estate Investment	1.56
Real Estate	Real Estate Management & Development	2.83
Utilities	Utilities	4.15

\*The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

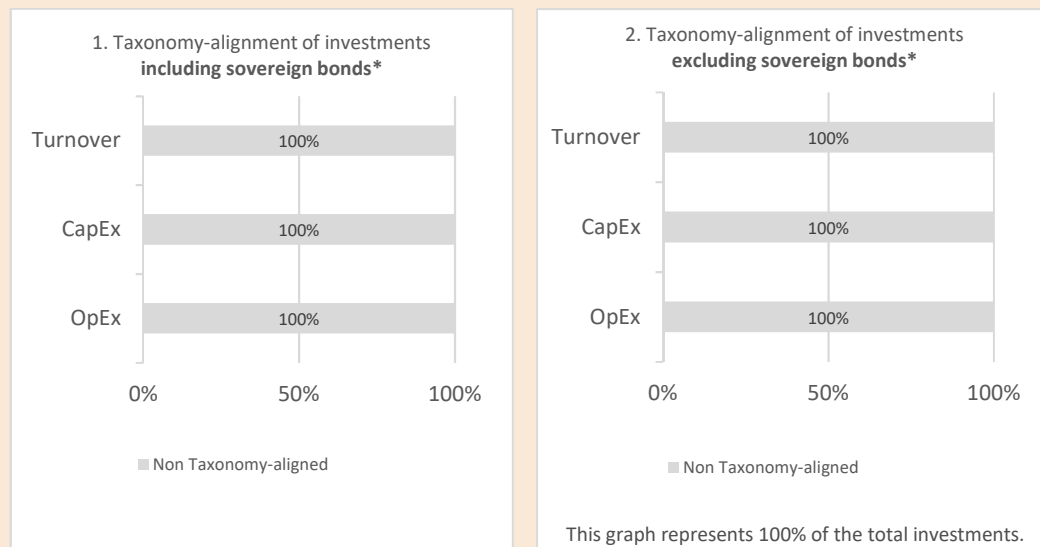

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
- In fossil gas     In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0% respectively.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

	Taxonomy-aligned			Non Taxonomy-aligned		
	31 Dec 2022 ref period	31 Dec 2023 ref period	31 Dec 2024 ref period	31 Dec 2022 ref period	31 Dec 2023 ref period	31 Dec 2024 ref period
<b>Turnover</b>	0%	0%	0%	100%	100%	100%
<b>CapEx</b>	0%	0%	0%	100%	100%	100%
<b>OpEx</b>	0%	0%	0%	100%	100%	100%

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 90.7%.

The Sub-Fund did not use the EU Taxonomy classification system in determining whether economic activities of investee companies have contributed to an environmental objective or not.

**What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 5.9%.

### **What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

The “#2 Not sustainable” investments made by the Sub-Fund were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards. The proportion and use of such “#2 Not sustainable” investments did not affect the delivery of the sustainable investment objective in the reference period due to the limited use and the nature of those instruments.

### **What actions have been taken to attain the sustainable investment objective during the reference period?**

During the reference period, the Investment Manager conducted 8 engagements with investee companies on various issues such as carbon reduction strategies, management’s KPIs related to ESG, clean energy generation/usage strategies, water recycling technologies, and gender diversity of corporate board of directors/employees.

Within the above engagements, the Investment Manager engaged with a battery products manufacturing company to better understand its strategies and encourage the company to get validation from SBTi on their net-zero targets and further promote its efforts on circular economy. In 2023, the company unveiled its "Zero-Carbon Strategy", officially announcing the goals of carbon neutrality in core operations by 2025 and carbon neutrality of the entire supply chain, from mineral resources to battery shipment, by 2035. The company aims to achieve those goals by innovation, R&D for low-carbon products and technologies, and systematically advancing process optimization, energy conservation, and emission reduction. The company will vigorously embark on renewable energy projects, thoroughly establish a framework for the recycling and utilization of retired batteries, and comprehensively strive towards the attainment of carbon neutrality throughout its operations and supply chain. To achieve the goal of carbon neutrality, the company has strengthened its emission reduction efforts in various aspects. Based on the latest data available as of 2023, the company implemented 538 energy conservation measures and saved a total of 585,650,560 kWh of power consumption per year, 28,099,246 m<sup>3</sup> of natural gas consumption per year, and 165,863 tons of steam per year. Its energy conservation was equivalent to removing about 440,913.14 tCO<sub>2</sub>e emissions. The proportion of zero-carbon power reached 65.43%, an increase of about 38.83% compared to 2022.

## ANNEX

Product name: Nomura Funds Ireland – Corporate Hybrid Bond Fund  
 Legal entity identifier: 213800MJTEQ25TDKRG04

# Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective: \_\_\_%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: \_\_\_%**

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund sought to contribute to reduction of greenhouse gas (GHG) emissions as its environmental characteristics by investing primarily in issuers that are committed to decarbonisation as well as exhibiting declining GHG emissions.

The extent of the Sub-Fund's contribution is further described in the section "How did the sustainability indicators perform?" and "How did this financial product consider principal adverse impacts on sustainability factors?" below. The proportion of the Sub-Fund that was aligned with the environmental characteristics is disclosed under the section "What was the proportion of sustainability-related investments?" below.

#### ● *How did the sustainability indicators perform?*

- GHG emissions:
  - Scope 1: 18,788.24 tonnes
  - Scope 2: 2,137.83 tonnes
  - Scope 3: 96,813.22 tonnes
  - Total (Scope 1+ 2+3): 117,739.3 tonnes

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- Carbon footprint: The total GHG emissions (Scope 1+2+3) per EUR 1 million invested in the Sub-Fund was 737.32 tonnes.
- GHG intensity: The weighted average GHG intensity (Scope 1+2+3 GHG emissions per EUR 1 million revenue) was 1,438.53 tonnes.
- Proportion of the Sub-Fund that reduced GHG emissions on a year on year basis:
  - 66.96% has reduced total Scope 1+2+3 GHG emissions
  - 55.72% has reduced carbon footprint
  - 41.95% has reduced GHG intensity

Please note that the sustainability indicator data becomes available on an annual basis in the following months post the end of the year. Therefore, GHG emissions, carbon footprint and GHG intensity data provided above have been calculated based on the impact data and estimates available at the time of this periodic report, using the quarter-end average weights of holdings held in the Sub-Fund in 2024. Sustainability indicators above do not take into account companies without relevant data or estimates.

For the sustainability indicators above, the Investment Manager has used data provided by companies in annual sustainability reports and data and estimates provided by a third-party data provider, ISS.

● **...and compared to previous periods?**

Sustainability indicators	31 December 2023 reference period (reported in 2024 periodic report)	31 December 2024 reference period (reported in 2025 periodic report)
GHG emissions:	Scope 1: 5,480.4 tCO <sub>2</sub> e Scope 2: 847.36 tCO <sub>2</sub> e Scope 3: 28,544.67 tCO <sub>2</sub> e Total (Scope 1+ 2+3): 34,872.44 tCO <sub>2</sub> e	Scope 1: 18,788.24 tCO <sub>2</sub> e Scope 2: 2,137.83 tCO <sub>2</sub> e Scope 3: 96,813.22 tCO <sub>2</sub> e Total (Scope 1+ 2+3): 117,739.3 tCO <sub>2</sub> e
Carbon footprint: The total GHG emissions (Scope 1+2+3) per EUR 1 million invested	1,078.78 tCO <sub>2</sub> e/EUR 1m invested	737.32 tCO <sub>2</sub> e/EUR 1m invested
Weighted average GHG intensity (Scope 1+2+3 GHG emissions per EUR 1 million revenue)	1,375.89 tCO <sub>2</sub> e/EUR 1m revenue	1,438.53 tCO <sub>2</sub> e/EUR 1m revenue
Proportion of the Sub-Fund that reduced GHG emissions on a year on year basis	Reduced total Scope 1+2+3 GHG emissions: 32.1% Reduced carbon footprint: 32.0% Reduced GHG intensity: 58.9%	Reduced total Scope 1+2+3 GHG emissions: 66.96% Reduced carbon footprint: 55.72% Reduced GHG intensity: 41.95%

From the reference period ending 31 December 2024, the Investment Manager changed the data source from MSCI to ISS due to broader availability of company-reported data and its methodology. The Investment Manager viewed that company-reported data would be more useful for the basis for engagement with issuers.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Sub-Fund considered the following principal adverse impact (PAI) indicators as part of its broader exclusions as further described in Annex 1 to the Sub-Fund’s Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Violation of UN Global Compact principles (UNGCP) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines) (threshold 0%)

For the following PAI indicators, the Sub-Fund monitored the indicators on an individual issuer-level and engaged with the issuers whose GHG emissions (as measured in GHG emissions, carbon footprint and GHG intensity) are not declining on a year on year basis and/or who the Investment Manager deems are failing to meet their decarbonisation plans based on the mid to long term trajectory. During the reference period, the number of engagements with portfolio companies undertaken by the Investment Manager was 15, as further described under “What actions have been taken to meet the environmental and/or social characteristics during the reference period?”.

- GHG emissions of investee companies
- Carbon footprint
- GHG intensity of investee companies

Please note that data from the Data Provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1<sup>st</sup> January 2024 to 31<sup>st</sup> December 2024.**

Largest investments	Sector	% Assets	Country
AUSNET SERVICES V/R 03/11/81	Utilities	7.24	Australia

VOLKSWAGEN INT V/R /PERP/	Consumer Discretionary	2.11	Germany
ENBW ENERGIE V/R 08/31/81	Utilities	2.05	Germany

\*Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The list of top investments is reflective of the general portfolio composition including assets which are not aligned with the environmental characteristics promoted by the Sub-Fund (i.e. all investments of the Sub-Fund).

## What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which promoted environmental characteristics during the reference period is provided below.

**Asset allocation** describes the share of investments in specific assets.

### ● **What was the asset allocation?**

#### #1 Aligned with E/S characteristics

The Sub-Fund invested 94.5% of the Sub-Fund's assets in investments which are aligned with the environmental characteristics promoted by the Sub-Fund. The proportion was calculated as the proportion of the portfolio which was subject to the binding criteria which were used to attain the Sub-Fund's environmental characteristics as set out in Annex 1 attached to the Sub-Fund's Supplement.

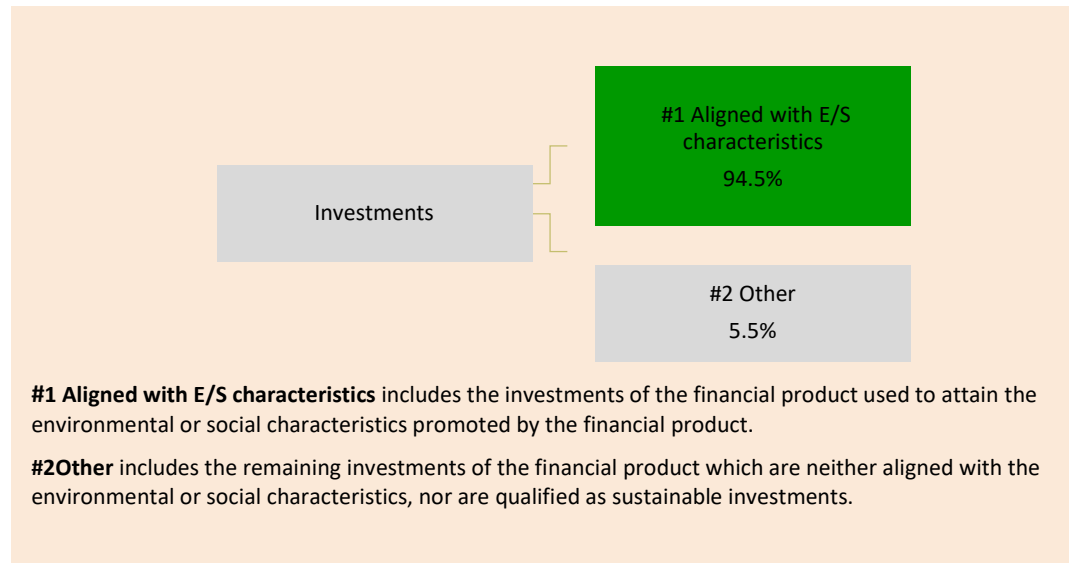

Within the context of the binding criterion of iii) GHG emission profile and engagement, the proportion was calculated as the aggregate proportion of 1) issuers that reduced total Scope1+2+3 GHG emissions, carbon footprint and/or GHG intensity between 2022 and 2023, and 2) issuers whose increase in total Scope 1+2+3 GHG emissions, carbon footprint and/or GHG intensity between 2022 and 2023 was assessed as temporary and not affecting their mid to long term trajectory.

The Sub-Fund did not make any sustainable investments at this time on the basis that no sustainable investment framework has been adopted for this Sub-Fund and investments have not been screened against the sustainable investment criteria set down in SFDR.

## #2 Other

The remaining 5.5% of investments were cash held as ancillary liquidity and forward currency contracts for hedging purposes. Engagement progress and results will be periodically assessed and unsuccessful engagement may lead to divestment.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period to calculate the allocations above.

For the previous reference period ending 31 December 2023, the asset allocation was as below:

- #1 Aligned with E/S characteristics: 61.7%
- #2 Other: 38.3%

## ● ***In which economic sectors were the investments made?***

Sector	Sub-Sector	% Assets
Communications Services	Media & Entertainment	1.90
Communications Services	Telecommunication Services	17.01
Consumer Discretionary	Automobiles & Components	4.73
Energy	Energy	18.26
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	5.20
Industrials	Commercial & Professional Services	0.14
Industrials	Transportation	1.99
Real Estate	Equity Real Estate Investment Trusts (REITs)	0.97
Real Estate	Real Estate Management & Development	3.38
Utilities	Utilities	40.92

\*The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity and derivatives used for hedging purposes.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the Sub-Fund did not use the EU Taxonomy classification system in determining whether economic activities of investee companies have contributed to an environmental objective or not. Therefore, the EU Taxonomy alignment figures reported below and in the graphs set out in the following section are an incidental result of the investment strategy of the Sub-Fund and the environmental characteristics promoted by the Sub-Fund.

The extent to which sustainable investments with an environment objective were aligned with the EU Taxonomy were:

- 7.86% as measured in turnover
- 17.26% as measured in capital expenditure (CapEx)
- 11.82% as measured in operational expenditure (OpEx)

Following is the breakdown of the proportion of the investments per each of the environmental objectives under the EU Taxonomy reported by investee companies.

- a) climate change mitigation:
  - 6.56% as measured in turnover
  - 13.30% as measured in CapEx
  - 8.96% as measured in OpEx
- b) climate change adaptation:
  - 0.01% as measured in turnover
  - 0.01% as measured in CapEx
  - 0.02% as measured in OpEx
- c) the sustainable use and protection of water and marine resources:
  - 0.02% as measured in turnover
  - 0.00% as measured in CapEx
  - 0.00% as measured in OpEx
- d) the transition to a circular economy:
  - 0.03% as measured in turnover
  - 0% as measured in CapEx
  - 0.01% as measured in OpEx
- e) pollution prevention and control:
  - 0.04% as measured in turnover
  - 0.01% as measured in CapEx
  - 0.01% as measured in OpEx
- f) the protection and restoration of biodiversity and ecosystems:
  - 0% as measured in turnover
  - 0% as measured in CapEx
  - 0% as measured in OpEx

The EU Taxonomy alignment data in this report was calculated based on the alignment ratios reported by investee companies which were obtained from a third-party data provider and does not include estimates provided by companies or third-party data providers. The compliance of the investments of the Sub-Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

As the Sub-Fund did not hold any sovereign bonds for the reference period, the alignment ratios with the EU Taxonomy were identical between calculations including sovereign bonds and excluding sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

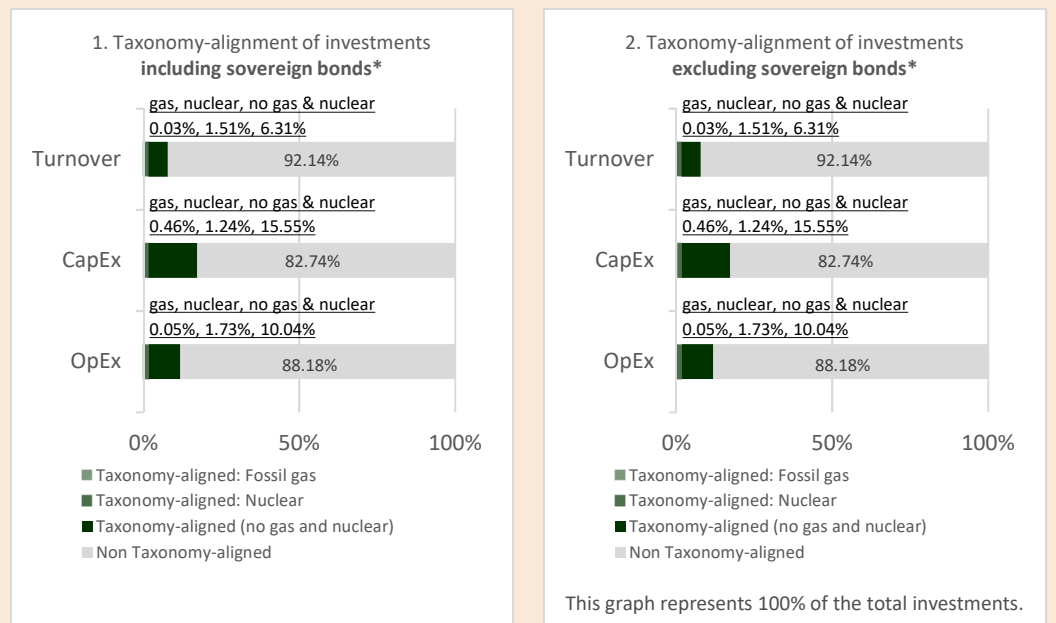

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- ✘ Yes:
  - ✘ In fossil gas
  - ✘ In nuclear energy
- ☐ No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was as below.

Enabling activities:

- 2.69% as measured in turnover
- 5.29% as measured in CapEx
- 4.31% as measured in OpEx

Transitional activities:

- 0.97% as measured in turnover
- 1.38% as measured in CapEx
- 1.26% as measured in OpEx

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

	Taxonomy-aligned		Non Taxonomy-aligned	
	31 December 2023 reference period	31 December 2024 reference period	31 December 2023 reference period	31 December 2024 reference period
<b>Turnover</b>	4.21%	7.86%	95.79%	92.14%
<b>CapEx</b>	12.12%	17.26%	87.88%	82.74%
<b>OpEx</b>	7.75%	11.82%	92.25%	88.18%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable. For the reference period, the Sub-Fund did not use the EU Taxonomy classification system in determining whether economic activities of investee companies have contributed to an environmental objective or not. Therefore, the EU Taxonomy alignment figures reported above are an incidental result of the investment strategy of the Sub-Fund and the environmental characteristics promoted by the Sub-Fund.

**What was the share of socially sustainable investments?**

Not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The “#2 Other” investments made by the Sub-Fund were cash held as ancillary liquidity and forward currency contracts for hedging purposes, and they did not follow any minimum environmental or social safeguards.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

During the reference period, the Investment Manager engaged with 15 issuers; 9 on missed KPI (failing to decarbonise on a YoY basis) and 6 due to their large GHG intensity. In total, the Investment Manager engaged with 7 of the largest carbon emitters in the portfolio. Out of the 15 issuers engaged, 1 issuer was placed under review on the back of potential delayed interim decarbonisation targets, requiring follow-up engagement. Engagements with portfolio companies have focused on environmental topics including carbon footprint, GHG intensity and sustainability strategies.

As at the time of this report, 62% of the Sub-Fund’s asset is invested in issuers with SBTi approved mid term targets based on a third-party data provider’s data. The Investment Manager intends to keep engaging with portfolio companies on setting credible plans including SBTi targets where appropriate.

## ANNEX

Product name: Nomura Funds Ireland – US High Yield Bond Continuum Fund  
 Legal entity identifier: 213800F61MPBBYFMK267

# Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** \_\_\_%

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_\_%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted contribution to reduction of greenhouse gas (GHG) emissions at portfolio level as its environmental characteristics by limiting portfolio-level GHG intensity (Scope 1 & 2) to be lower than that of the ICE BofA US High Yield Constrained Index (the "Index").

The extent of the Sub-Fund's contribution is further described in the section "How did the sustainability indicators perform?" and "How did this financial product consider principal adverse impacts on sustainability factors?" below. The proportion of the Sub-Fund that was aligned with the environmental and social characteristics is disclosed under the section "What was the proportion of sustainability-related investments?" below.

#### ● **How did the sustainability indicators perform?**

The Sub-Fund's sustainability indicators performed as below:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- GHG intensity (Scope 1 and 2): 273.8 tonnes for the Sub-Fund and 290.2 tonnes for the Index. 63.6% of the Sub-Fund’s assets had reported or estimated GHG intensity data to enable this calculation.
- Total GHG emissions for corporate issuers (scope 1 and 2): 2,965,044 tonnes

Please note that the sustainability indicator data generally becomes available on an annual basis in the following months post the end of the year. Therefore, the sustainability indicators provided above have been calculated based on the latest reported or estimated impact data available at the time of this periodic report, which is typically lagged by at least one full year. For the calculation of the above sustainability indicators, the Investment Manager has used the quarter-end average weights of holdings held in the Sub-Fund in 2024.

Sustainability indicators above do not take into account companies without relevant reported or estimated data.

For the sustainability indicators above, the Investment Manager has used reported and estimated data provided by a third-party data provider, Sustainalytics.

● **...and compared to previous periods?**

Sustainability indicators	31 December 2023 reference period (reported in 2024 periodic report)	31 December 2024 reference period (reported in 2025 periodic report)
GHG intensity (scope 1 and 2)	Sub-Fund: 243.6 tonnes Index: 280.7 tonnes	Sub-Fund: 273.8 tonnes Index: 290.2 tonnes
Total GHG emissions for corporate issuers (scope 1 and 2)	2,453,502 tonnes	2,965,044 tonnes

Portfolio GHG intensity and GHG emissions increased year-over-year due to an increased allocation to issuers in the basic industry and utilities sectors. Portfolio weighted average GHG intensity remained lower than that of the Index.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Sub-Fund considered the following principal adverse impact (PAI) indicator as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund’s Supplement (“Annex 1”). The Sub-Fund complied with the exclusion based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (revenue threshold 5%)

For the following PAI indicators, absolute GHG emissions (Scope 1 and 2) can be impacted by various factors including the business size and activity volume of the issuers held in the portfolio. Therefore, the Sub-Fund focused on Scope 1 and 2 GHG intensity (Scope 1 and 2 GHG emissions divided by revenue) and limited its portfolio weighted average Scope 1 and 2 GHG intensity to be lower than that of the Index. The Investment Manager used reported and estimated data from a third party provider, Sustainalytics, to perform this analysis.

- GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, and Scope 1&2 GHG emissions)

Please note that data from the third party provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1<sup>st</sup> January 2024 to 31<sup>st</sup> December 2024.**

Largest investments	Sector	% Assets	Country
Cash	N/A	3.78	N/A

Venture Global Lng Inc VENLNG 9.875% 02/01/32	Energy	0.42	USA

\*Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The list of top investments is reflective of the general portfolio composition including assets which are not aligned with the environmental characteristics promoted by the Sub-Fund (i.e. all investments of the Sub-Fund).

## What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which promoted environmental characteristics during the reference period is provided below.

**Asset allocation** describes the share of investments in specific assets.

### ● **What was the asset allocation?**

#### #1 Aligned with E/S characteristics

The Sub-Fund invested 96.2% of the Sub-Fund's assets in investments which are aligned with the environmental characteristics promoted by the Sub-Fund. The proportion was calculated as the proportion of the portfolio which was subject to the binding criteria of i) proprietary ESG scoring and ii) exclusions, as set out under "What investment strategy does this financial product follow" in Annex 1. These criteria were used to attain the Sub-Fund's environmental characteristics as set out in Annex 1.

The binding criterion of iii) ESG constraint (where the Sub-Fund will constrain the weighted average GHG intensity of the corporate issuers held in the Sub-Fund to be below that of the Index), described under "What investment strategy does this financial product follow" in Annex 1, was also applied to the Sub-Fund's assets in respect of which reported or estimated GHG intensity data was available (which assets comprised 63.6% of the Sub-Fund's investments).

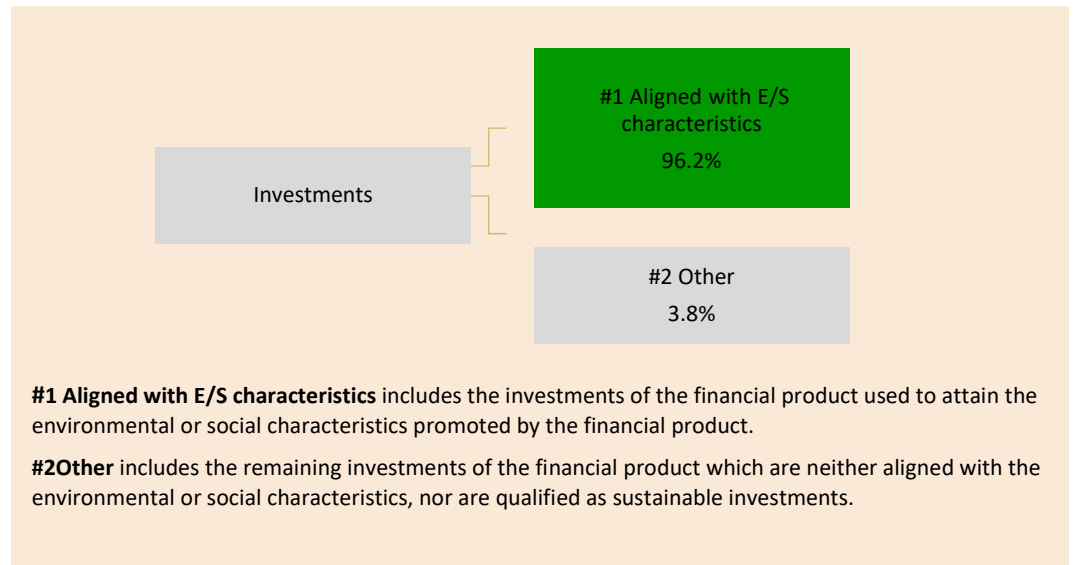

The Sub-Fund did not make any sustainable investments at this time.

#### #2 Other

The remaining 3.8% of investments were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period to calculate the allocations above.

For the previous reference period ending 31 December 2023, the asset allocation was as below:

- #1 Aligned with E/S characteristics: 97.2%
- #2 Other: 2.8%

● ***In which economic sectors were the investments made?***

\*The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

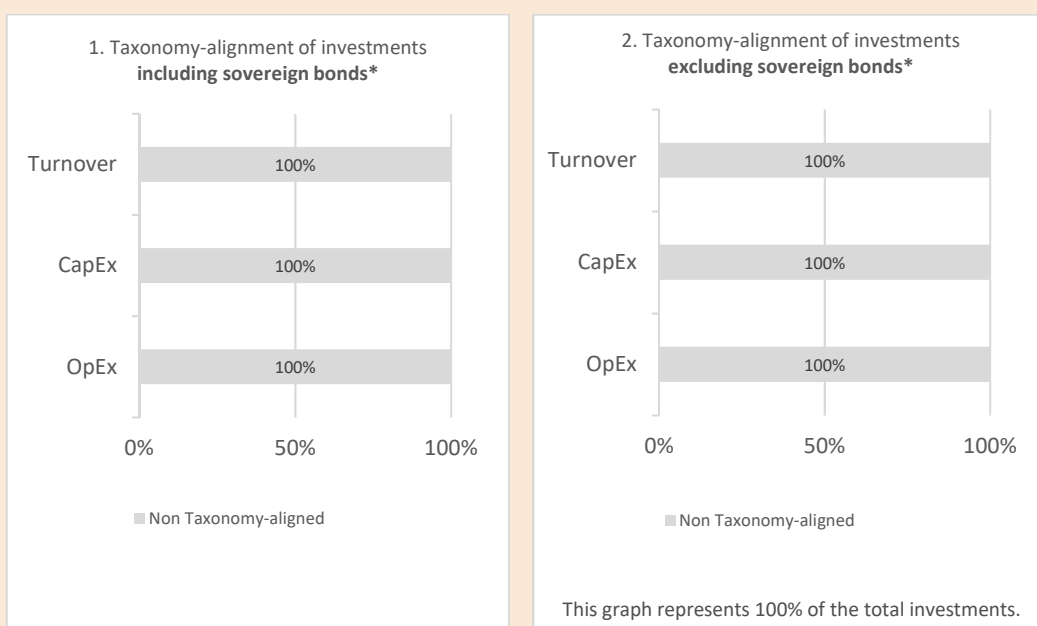

### **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0% respectively.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

	Taxonomy-aligned		Non Taxonomy-aligned

<b>OpEx</b>	0%	0%	100%	100%

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable.

### **What was the share of socially sustainable investments?**

Not applicable.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The “#2 Other” investments made by the Sub-Fund were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Investment Manager conducts deep dive engagements to address particular sustainability-related issues. For example, initiatives and timelines for climate change mitigation plans were discussed to ascertain how committed companies were to their GHG emission reduction goals and their ability to achieve those goals. The Investment Manager engaged with 21 high-yield bond issuers, which include potential investee companies that are not held within the Sub-Fund, in 2024.

For example, the Investment Manager conducted an engagement with a medical equipment manufacturer and distributor of chemicals and laboratory supplies. The discussion focused on the issuer’s successful achievement of its 15% GHG emissions reduction target from a 2019 baseline, which the company completed before its 2025 goal. The issuer has now initiated new targets, aiming to reduce Scope 1 and 2 emissions by 50% by 2030, from their 2020 baseline, and to reduce Scope 3 emissions by 25% in that same timeframe. The company has accomplished much of its progress to date by changing its heating, ventilation and air conditioning (HVAC) and steam systems to more efficient equipment, and is now aiming to use metering and solar projects to reach its new targets. For Scope 3 targets, the company is requesting and incorporating data from suppliers.

The Investment Manager also engaged with a manufacturer and distributor of specialty metals to gain an understanding of the issuer’s slow progress toward its emissions targets, and determine if the firm had a credible roadmap to get back on track. The firm’s carbon intensity target was established in 2021, but used 2019 as a base-line as that was the last year of normal operations before the pandemic. In 2022, carbon intensity was above 2019 levels but below 2021 levels. The main reason for this was high turnover of the workforce during the pandemic. The products the firm manufactures are very technically demanding and it can take new employees several years to become proficient. Therefore, it will likely take several years to get back to the prior level of energy and resource efficiency. 2021 was also a lower volume year, and volume increased in 2022 and again in 2023. The Investment Manager will continue to monitor the issuer’s progress.

The Sub-Fund increased exposure to a homebuilder with a firm commitment to net-zero energy readiness. The issuer was the first national homebuilder to publicly commit to ensuring that by the end of 2025, every home they build will meet the requirements of the US Department of Energy’s Zero Energy Ready Home program. The company has a long track record of annually targeting a lower HERS (Home Energy Rating System) Index Score for the homes they deliver, which leads to a reduction in GHG emissions over the prior year. The firm integrates HERS Index Scores into their incentive compensation programs for their teams, and every home they build is third-party rated and certified with a HERS Index Score.

## ANNEX

Product name: Nomura Funds Ireland – Emerging Market Corporate Bond Fund  
 Legal entity identifier: 213800S8S3LY5PVCL933

# Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective: \_\_\_%**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: \_\_\_%**

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted contribution to reduction of greenhouse gas (GHG) emissions at portfolio level as its environmental characteristics by limiting portfolio-level GHG intensity (Scope 1 & 2) to be lower than that of the J.P. Morgan CEMBI Broad Diversified Index (the "Index").

The extent of the Sub-Fund's contribution is further described in the section "How did the sustainability indicators perform?" and "How did this financial product consider principal adverse impacts on sustainability factors?" below. The proportion of the Sub-Fund that was aligned with the environmental and social characteristics is disclosed under the section "What was the proportion of sustainability-related investments?" below.

#### ● *How did the sustainability indicators perform?*

The Sub-Fund's sustainability indicators performed as below:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- GHG intensity (scope 1 and 2): 470 tonnes for the Sub-Fund and 555 tonnes for the Index. 82.1% of the Sub-Fund’s assets had reported or estimated GHG intensity data to enable this calculation.
- Total GHG emissions (scope 1 and 2) for corporate issuers: 9,420,879 tonnes

Please note that the sustainability indicator data generally becomes available on an annual basis in the following months post the end of the year. Therefore, the sustainability indicators provided above have been calculated based on the latest reported or estimated impact data available at the time of this periodic report, which is typically lagged by at least one full year. For the calculation of the above sustainability indicators, the Investment Manager has used the quarter-end average weights of holdings held in the Sub-Fund in 2024.

In-scope securities for the above sustainability indicators are securities with direct exposure to issuers and do not include financial derivative instruments, on the basis that financial derivative instruments were used for hedging or efficient portfolio management purposes and were not used to attain the environmental characteristics promoted by the Sub-Fund. Sustainability indicators above do not take into account companies without relevant reported or estimated data.

For the sustainability indicators above, the Investment Manager has used reported and estimated data provided by a third-party data provider, Sustainalytics.

● **...and compared to previous periods?**

Sustainability indicators	31 December 2023 reference period (reported in 2024 periodic report)	31 December 2024 reference period (reported in 2025 periodic report)
GHG intensity (scope 1 and 2)	Sub-Fund: 537 tonnes Index: 581 tonnes	Sub-Fund: 470 tonnes Index: 555 tonnes
Total GHG emissions (scope 1 and 2) for corporate issuers	9,494,161 tonnes	9,420,879 tonnes

Portfolio GHG intensity declined while total GHG emissions stayed largely the same as previous period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Sub-Fund considered the following principal adverse impact (PAI) indicator as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund’s Supplement (“Annex 1”). The Sub-Fund complied with the exclusion based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (revenue threshold 5%)

For the following PAI indicator, absolute GHG emissions (Scope 1 and 2) can be impacted by various factors including the business size and activity volume of the issuers held in the portfolio. Therefore, the Sub-Fund focused on Scope 1 and 2 GHG intensity (Scope 1 and 2 GHG emissions divided by revenue) and limited its portfolio weighted average Scope 1 and 2 GHG intensity to be lower than that of the Index. The Investment Manager used reported and estimated data from a third party provider, Sustainalytics, to perform this analysis.

- GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, and Scope 1&2 GHG emissions)

Please note that data from the third party provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1<sup>st</sup> January 2024 to 31<sup>st</sup> December 2024.**

Largest investments	Sector	% Assets	Country
Cash	N/A	2.75	N/A
Qnb Finance Ltd QNBK 2.625% 05/12/25	Banking	1.51	Qatar

\*Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The list of top investments is reflective of the general portfolio composition including assets which are not aligned with the environmental characteristics promoted by the Sub-Fund (i.e. all investments of the Sub-Fund).

## What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which promoted environmental characteristics during the reference period is provided below.

**Asset allocation** describes the share of investments in specific assets.

### ● **What was the asset allocation?**

#### #1 Aligned with E/S characteristics

The Sub-Fund invested 97.2% of the Sub-Fund's assets in investments which are aligned with the environmental characteristics promoted by the Sub-Fund. The proportion was calculated as the proportion of the portfolio which was subject to the binding criteria of i) proprietary ESG scoring and ii) exclusions, as set out under "What investment strategy does this financial product follow" in Annex 1. These criteria were used to attain the Sub-Fund's environmental characteristics as set out in Annex 1.

The binding criterion of iii) ESG constraint (where the Sub-Fund will constrain the weighted average GHG intensity of the Sub-Fund to be below that of the Index), described under "What investment strategy does this financial product follow" in Annex 1, was also applied to the Sub-Fund's assets in respect of which reported or estimated GHG intensity data was available (which assets comprised 82.1% of the Sub-Fund's investments).

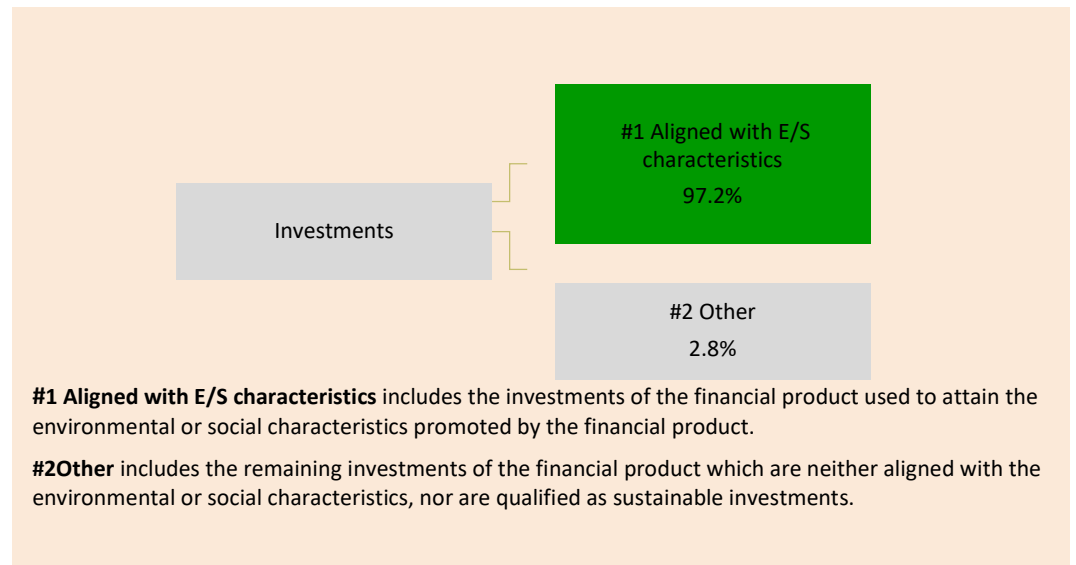

The Sub-Fund did not make any sustainable investments at this time.

#### #2 Other

The remaining 2.8% of investments were cash held as ancillary liquidity and financial derivative instruments used for efficient portfolio management and hedging purposes, and they did not follow any minimum environmental or social safeguards.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period to calculate the allocations above.

For the previous reference period ending 31 December 2023, the asset allocation was as below:

- #1 Aligned with E/S characteristics: 93.9%
- #2 Other: 6.1%

● ***In which economic sectors were the investments made?***

Sector	Sub-Sector	% Assets
Automotive	Auto Loans	0.54

Utility	Non-Electric Utilities	0.13

\*The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity and derivatives used for efficient portfolio management and hedging purposes.

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

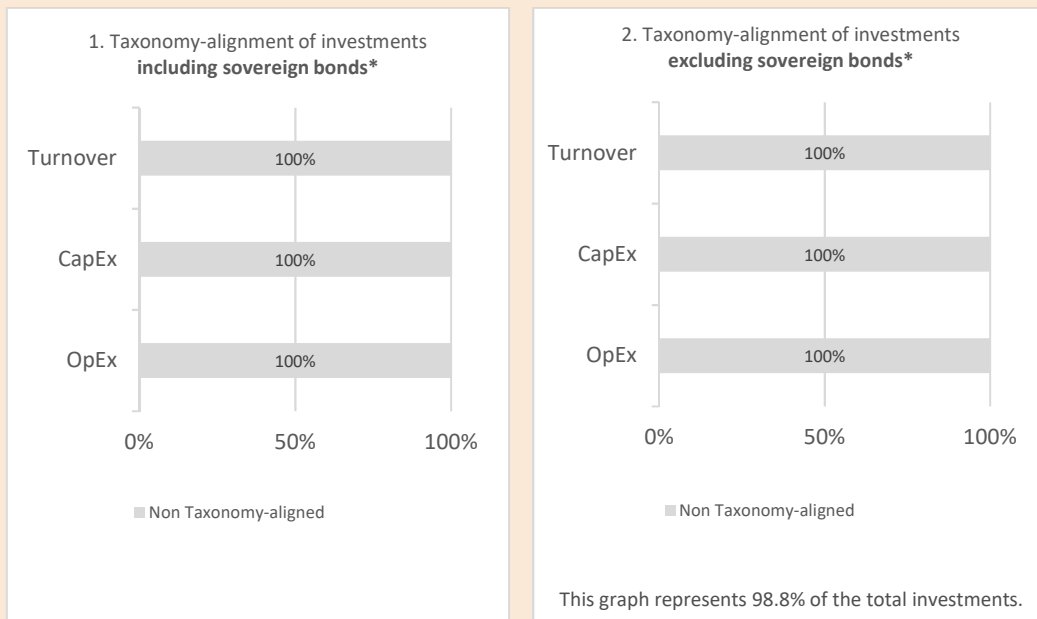

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0% respectively.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

	Taxonomy-aligned		Non Taxonomy-aligned	
	31 December 2023 reference period	31 December 2024 reference period	31 December 2023 reference period	31 December 2024 reference period
<b>Turnover</b>	0%	0%	100%	100%
<b>CapEx</b>	0%	0%	100%	100%
<b>OpEx</b>	0%	0%	100%	100%

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable.

**What was the share of socially sustainable investments?**

Not applicable.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The “#2 Other” investments made by the Sub-Fund were cash held as ancillary liquidity, and financial derivative instruments used for efficient portfolio management and hedging purposes, and they did not follow any minimum environmental or social safeguards.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Investment Manager conducts deep dive engagements to address particular sustainability-related issues. For example, initiatives and timelines for climate change mitigation plans were discussed to ascertain how committed companies were to their GHG emission reduction goals and their ability to achieve those goals. The Investment Manager engaged with 4 emerging market domiciled bond issuers, which include potential investee companies that are not held within the Sub-Fund, in 2024.

For example, the Investment Manager engaged with an Eastern European power producer and distributor to discuss the issuer’s ESG reporting, as well as review its governance and human capital commitments. The company aims to achieve its net zero emissions target by increasing the share of production from renewable sources, mainly wind and geothermal generation, and by investing in battery storage capacity to ensure capacity flexibility. On governance, the company implemented a code of ethics and an integrated management system to track and enhance the use of energy resources, as well as an anti-corruption management system. Overall, the company provides comprehensive disclosures and timely updates to its ESG policies, but, during the engagement call, management did not demonstrate or emphasize specific targets or investment amounts required to achieve its ESG goals, and did not provide clarity on initiatives in the area of human capital. The Investment Manager will continue to monitor the issuer’s progress.

The Sub-Fund invested in a quasi-sovereign energy company making progress toward its climate-related goals. The company enhanced its sustainability plan for 2023-2050, incorporated climate change risks into its risk committee portfolio, and remains committed to climate risk disclosure. While the issuer’s short- and long-term emissions reduction targets remain aggressive, short-term performance indicators are showing some success, particularly in Scope 1 GHG emissions, gas flaring, and water recycling.
